SUMMARY OF INFORMATION

NOTE: This was a search training exercise conducted using SOLO CRV. I took down the coordinates and progressed through stage 3. In stage three I obtained some concepts about the site, I objectified these using a stage 4.5, but I did not formally enter stage 4 or try to obtain additional stage for information. I then conducted a "hot finger" dowse on the world map in the small CRV room--covering only Europe.

The target event takes place in the UK in an area between London and Birmingham (closer to London). (Note: an additional hot spot was noted in Amsterdam, The Netherlands). The event takes place in an area that has a city feel. It involves a narrow area that opens into a larger one (stage 7: gateway). Motion is a strong component. Additional sensory information pertaining to the structure and the event are (S-2's): gray, hard, gritty, cool, moist, narrow, tall, big, and a sloping down motion.
