SESSION RESULTS

1. ( ) The target was the HAMPTON ROADS TUNNEL AND CHESAPEAKE BAY BRIDGE, consisting of a combination of trestles and tunnels stretching across a distance of 17.6 miles gapping the mouth of the Chesapeake Bay.

2. ( ) Source's descriptive included circular objects with points, a flying object (probably an airplane), triangles which move and expand and are controlled or related to the movement of water, open spacious area, flat ground further described as hard and dry, semi-circles (domes?) which emit flames and heat, other manmade devices which can cause bodily harm and are signified by explosive sounds and a symbolic eagle or other large bird. Other fleeting visuals included cloth hats worn by men and a possible reference to a large flag or other similar waving cloth.

3. ( ) After a review of the descriptives reported by Source it must be concluded that the data provided does not correlate with the known major gestalts of the target. There was no reference to large bodies of water, superstructures, tunnels or roads. The information provided was more in keeping with expected data found in more arid regions, perhaps even a desert region. The one item that may have been directly related to the actual target was the reference to the symbolic eagle or other large bird. The target logo is a large flying tern or gull on a blue background and is found on road signs and guideposts leading to the target area.

I first saw a circle with many points on it.

Then I noticed a triangle which was moving around in all different directions.

Then I felt that I was in the sky flying with a large man-made object.

I felt that the area I was in was very isolated. It was dry, flat land and the ground was brown.

I kept getting the image of a ball and then half circles with flames on top.

I noticed that on the ground there were two objects. One big and one small. The smaller object was not working. The bigger object was what you put the balls in.

It could hurt someone if we was in the way.

I then saw a large eagle but this bird was a representation of something.

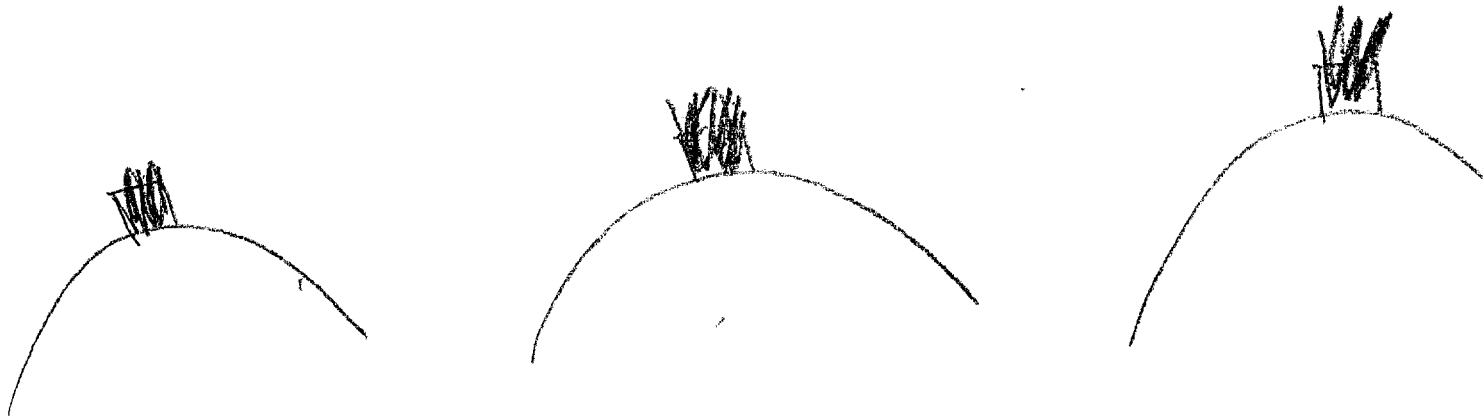

I felt that although this area was isolated, there was something going on and it dealt with the large object on the ground. I also felt that this it belonged to something bigger.

I also saw ~~something~~ white cloth which ~~was~~ then head

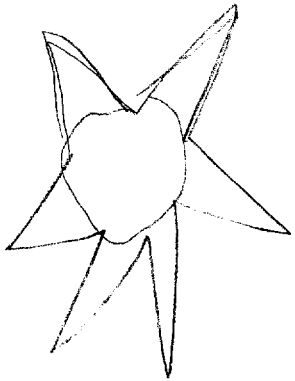

I also sensed that when I saw these triangles moving, water had something to do with moving the triangles.

I also noticed at this site, in the distance, a large cloth which could flap.
