DATE: 2 Jan 87

SESSION: 01

SOURCE: 079

START: 1032

SANCTUARY: 1035

TARGET: 1038

FINISH: \_\_\_\_\_

COORDINATE: 024740/260469

FRONTLOAD: "No descriptive or pre session info provided."

\* Just prior to session Source recounted two OOBES. In one document written in Spanish was viewed. In the other a precognitive experience pertaining to the demise of a close family member was viewed. Her concern was very real but not enough to noticeably affect her enthusiasm for this session. Interviewer discussed concepts of parallel universes in relation to "changing" of futures in the hopes she would perceive that the future is not always set but can change even from the clarity of a precognitive event!!

## NOTES:

- ① 1st snow of season
- ② Some physical discomfort due to headache and minor ~~flu~~ flu symptoms.

2. (S/NF/SK) The target was a microwave station in the area of ELKO, Nevada. No other data pertaining to the site was provided except the actual coordinates of the site. Based upon subsequent conversations with the unit Operations Officer, it was learned that the site configuration is congruent with expected microwave facilities.

3. (S/NF/SK) Source initially began the session by describing what may have been a reference to a religious site i.e., "sacred water, monumental, displaying, peaceful", etc. A "retarget" drove Source to a new set of descriptives which matched the expected descriptives of the target, i.e., "tall, slender, hard, "A" & "V" shaped, triangles, open structure, located in an open area". Continued efforts to focus Source on the microwave facility provided even more specific details such as a, "buzzing (noise), open construction, used to "see out", warning, giving directional power, (a mirror effect) of reflecting and echoing with a circular component related to the site." Other unrelated data provided by Source could not be effectively correlated to expected gestalts at the target but were only incidentally provided among the other more relevant data.

4. (S/NF/SK) Based upon a detailed evaluation of Source's data provided during the session and a comparison of that data to the known and expected components of the site, the following can be concluded"

- a. (C/NF/SK) Source successfully acquired the correct site.
- b. (C/NF/SK) Source provided correct and comprehensive descriptives of all the major gestalts at the site.
