~~Site involves <sup>desert</sup> area with long  
mountain/rock formations, including a~~

In this desert area is a man-made structure which ~~is not~~ I have not as yet successfully resolved. Something that has to do with it involves something to look involving people, culture, etc., & may be rounded a dome like. Area may be set aside by man, as a "national park," a something.

There are many people concentrated here, associating with one another for specific purposes or purposes. White & warm colors (red + orange) predominate. The subject of this place involves the cultural + social milieu of the people. Reading, carving, interacting + significant diversity are important to the people at the site. Area manifests a sense of ~~low~~ low development non westernized, somewhat <sup>suggestive of</sup> pastoral or agricultural, + religious on a ~~basic~~ <sup>religious</sup> ~~level~~.

This site gives a strong impression of places (like Capetown, S.A. (in terms of terrain + cultural standard); a Navajo Indian Reservation, for same basic reasons; or Merca, because of cultural aspects as well.
