25 AUG 86

SESSION SUMMARIES

MORNING

SITE I (Mountain Glacier)

..... feeling of cold, rugged mountains

SITE II (ANKARA, TURKEY)

..... the most outstanding thing about this site was the jerky movement associated with it

SITE III (Persopolis, Iran)

..... had a feeling of mountains surrounded by water.... a very steep rugged cliff.... site was definitely warm. In actuality the site is situated on a flat valley between mountains and is the ruins of an ancient city.

SITE IV (Desert/sand)

..... definite feeling of flat, hard, warm, smooth.... similar to water, but not quite.... feeling of land

AFTERNOON

SITE I (MT. Stanley) (...a mountain, rain-forest atmosphere)

..... feeling land/water interface.... mountainous, vertical waterfall..... lake

SITE II (Sand Dunes)

..... very high vertical feeling, smooth, land, dirt (not rock)..... unusually empty, no color or impression of anything going on.

..... still need a lot of work on the feeling of the site.... it's coming along, but ever so slowly.
