

*4 Oct 88*

~~SECRET/NOFORN~~

PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

-----

PROJECT NUMBER: 8817	SESSION NUMBER: 02
DATE OF SESSION: 30 Sep 88	DATE OF REPORT: 4 Oct 88
START: 1415	END: 1526
METHODOLOGY: CRV	VIEWER IDENTIFIER: 095

-----

1. (S/NF/SK) MISSION: Continue reporting on probable drug-smuggling operation.
2. (S/NF/SK) VIEWER TASKING: Continue Stage IV reporting from previous session.
3. (S/NF/SK) COMMENTS: No PIs, good signal line contact. New information provided relevant to EEI, though no answers to specific EEI questions as yet obtained.
4. (S/NF/SK) EVALUATION:

HANDLE VIA SKEET CHANNELS ONLY

~~SECRET/NOFORN~~

CLASSIFIED BY: DIA (DT)  
DECLASSIFY: OADR

*Excellent results -  
Need some quality  
reporting to "where" (first  
and foremost) and "when."*

This document is made available through the declassification efforts  
and research of John Greenewald, Jr., creator of:

# The Black Vault

The Black Vault is the largest online Freedom of Information Act (FOIA)  
document clearinghouse in the world. The research efforts here are  
responsible for the declassification of hundreds of thousands of pages  
released by the U.S. Government & Military.

Session Summary  
Viewer 095  
30 SEP 88  
1415-1526  
CRV

The target is a narrow, top-heavy metallic ship. The ship has an unusual width to length proportionality in that it is unusually narrow for its length.

Located on a level higher than the main deck is smooth, domed container which appears to protect and conceal what is inside. Inside is something white, metallic and smooth that rotates and has several moving parts (see sketch page 2). This thing is permanently attached to the ship. Part of it is inside the container, the rest is below deck.

The ship is moving quickly to a rendezvous or observation point. Associated with its motion is the concept of "passageway" like fjords. The speed of the vessel is very important; movement must be timely. The ship is moving at night with stealth and everything is battened down. The ships motion is first northerly and then northeasterly (see sketch of motion, page 4).

The rendezvous involves a rapid transference or hand-off. Associated with the transference is the idea of "move it, move it !" One group is not happy about having to do this in this manner as it is risky or stupid or both.

The transfer takes place at night at sea (on purpose), though there is a distinguishable coastline. The distance to the coastline was not determined. The general location of the rendezvous is defined, but some type of last minute signalling or communication will be used to refine the location. The link up appears to be with another ship. This ship is smaller: shorter, more squat (width to length) and lower than the original ship. The transfer is from the larger craft down to the smaller. The link-up between the two crafts is a "mess, not a smooth join-up process." There is a lot of jostling, scampering, bouncing and bobbing. Ropes are thrown. Everybody is trying to be professional but failing miserably because of speed, anxiety and the just plain natural uncoordination of the situation due to nature (choppy seas, etc). Shown in a sketch on page 7 is a sketch of something boxy on the smaller vessel.
