

PROJECT: OTHER A  
 DATE: 23 OCT 86  
 SESSION: 010  
 SOURCE: 101

START: 0911  
 SANCTUARY: 0924  
 TARGET: 0926  
 FINISH: \_\_\_\_\_

COORDINATE: NONE REQUIRED (THE ROAD)

## FRONTLOAD:

" WE will be moving back to the road again. The last session ended at daybreak on 19 mar 1984. For this session I would like you to move back a few hours to a point somewhere between midnight and daybreak on that day. The general activity as we left was confusion, anger and fear from a mortar and artillery barrage directed at the protectorate area. There were large helicopters in the air, smoke, fire and general mayhem. New uniforms, (blue uniforms) were spotted for the first time within this area."

13 minutes to sanctuary  
 normal 7-8 minutes.

noise from other room gone  
 at 0920. IT WAS VERY LOUD.

## NOTES:

- ① voices from the other room
- ② some back pain
- ③ interviewer on emotional low from entry of son into Army at 0700 this morning.

OTHER # 101  
23 OCT 86

PAGE 2

→ IT IS NOW 23 OCT 86, move back in time to the dark morning hours of 19 Mar 84 to the road. Describe your perceptions.

★ Surface rising up sharply on the sides. scrub brush, hearty plants, rocky terrain. Sharp rises in elevation. Cool. Not real cold.

→ ITS NOW 3:00 IN THE MORNING

★ maybe a light mist in the air, road narrows, rocky, rough hard. Plenty of men in light colored robes. Gray robed men. Impression crew served automatic weapon set up towards site I. Metallic, dark colored, light crew served. Men are listening intently, smell of adrenalin. Scraping noises. moving up the road. other groups (25/30) on up the road. I'm at the wide spot now. Quiet. Campfires are pretty much out. Berms area is pretty primitive. Not very high, poor job of fortification. Vehicles -- like a motor park, jammed in. Makeshift shelters. Security includes claymores outside and on berm. Site II quiet. nothing important.

→ continue

★ Looking for carrying party we saw before. They are up several hundred feet in the rocks. Rough terrain 0400 - - - mist continues. SITE II, guards, nothing unusual happening. Wide ~~spot~~ spot. Sulfur smell, smoky, crew served weapons. Robed men on both sides of road. Not as many as ~~before~~ I thought before. Exchange of small arms fire. Most crew served from inside. Whump, whump, fire from inside misdirected. Flares in front but attack from rear, Explosions from hills (fired from soldiers non-effective). Small arms lessening. Fires from high angle not direct. Gray party still waiting

3

tense. Inside compound, black smoke. Confusion. STANIC, push to talk, flares shifting. Does not appear to be a ground assault. Breaking contact now from the sides. moving back into the hills. Hill people careful to avoid their own indirect fire which is not very accurate. Other men (Carrying party) men tense. at site I, tensesness, how, movement, gates thrown open. Road block. Explosion on lead vehicle. Small arms. Second vehicle with soldiers, BRAY robes pouring fire. Contact broke in stages. moving back into hills. Contact now broken all along road. convoys beginning down road.

~~→~~ → OK, we move to the clean-up

★ Not a lot of casualties, not the purpose. Choppers around the area, on the ground at the site. Some gunships. vehicles parked. Convoy coming from site. one is tactical soldiers. One is van.

→ Stay with the second convoy.

★ Not much combat power. Trucks, long jeeps. There is somebody on ground from site I, very angry. The people in dark blue uniform are there. They are disdainful and smug. They're seeing more damage to equipment than to personnel. Authority figure very angry. Moving ahead a little bit. Second convoy has arrived.

→ This is the non-tactical convoy

★ Yes, just a few escort vehicles. I first thought it was a medevac but it's not. Some of the things being unloaded (Raw Data). Semi Bowl shape, metallic, heavy, low, long, like a sled, like runners, no

#

☆☆☆ Wheels. one van has feeling of electronics. They are erecting something. looks like an antenna but its not. Metallic, word taller than its wide. But not tall enough to be antenna. looks like a framework but its not a framework. not a very complicated job. Clearing away debris. There are a ~~lot~~ lot of people here now. perimeter enlarged 360°. I don't know where they came from. moving to site II to see if anything is happening there. Nothing new. Some new military presence. moving to site I - - - Now the helicopters are in the air in the hells near the road.

→ continue

☆ Its around 0900 - - - - So I'm moving up ~~at~~ and down the road. going back to look at the submarine

→ Did it sustain any damage

☆ ... (pause) ... its being tested.

→ TESTED

☆ Like hydraulic system, raising front end, bottom stays. apparently no damage. Raised and lowered again.

→ Look now at the new construction. The framework.

☆ There is a lot of me for one replacement. except if battery broken, don't change battery, change cars. looking at -- I guess I'll call it a tower, its inside the enclosed area, ~~the base~~

→ The perimeter?

★ There is a human perimeter further out. This is in a perimeter further back, its -- construction stages, making sure I'm not AOL this -- ~~there~~ <sup>there</sup> round objects on the side, comes to mind is microwave with dishes on the side but not near tall enough. Angles ~~not~~ pointing towards hills. Not tall enough to be a tower

→ OK we will come back to it when its being used.

★ about 0900 --- continuing to scan. I'm trying to be very sure. <sup>no</sup> AOL here. Hill people. Group in rocks, backside, (12/20) with a prisoner - POW data. Uniform, dirty, no hat, afraid, hemmed in, watched, cold. Doesn't understand. Site I, 1000 --- Very military, very ordered feeling, like a garrison post. Vehicles are cleaned and some people are in dress uniforms. Very regimented. Guards are more like guard duty instead of combat. They look sharp. Very STRAC, continuing to move up the road. a couple things now - submarine has been moved to dead center of enclosed area, appears to be heavy armored vehicles outside perimeter - maybe tanks. maybe 3/4 of them. The hair at base of my neck standing up but I don't know why.

→ lets examine that I see the tower

★ its taller now but I don't know why.

→ is there a relationship between the tower and anything else.

★ Tower being built by people from site I. its not being built because of attack but as a result it is being built sooner now.

→ A Is the tower causing your anxiety.

★ no I don't think so

→ lets move to the center of the compound. the submarine

★ Twisting knobs on the side now, <sup>no</sup> Urgency here. like they are still doing test.

→ OK we can move on.

★ moving towards site II = saw 1000 - - - - - very crowded, civilians. military presence bigger than previously. civilians appear to be angry. not much else going on.  
1100 - - - - - (Pause 000) tower getting taller.

→ Anxiety

★ none now, site I, 1100 - - - - - 1200 - - - - - up the road. clear day, blue sky. traffic fairly heavy today. nothing very exciting happening.

→ Hill people

★ There is still a lot of them for the day time. They are spread all over the hills in small groups of 5/6. No messings. Back to the road. Very large vehicle carrying -- other vehicles on its back. More armored vehicles. trying count treadwells.

→ Don't bother

★ Just a test

→ ~~Also~~ wide spot

★ Break time, like they're on break now, helicopters still.

7

occasionally around. can't be sure but they may be getting ready to move submarine.

→ Why do you say that

★ They are doing a lot of things with it, tightening knobs on the side. 1300 - - - - SITE II. Very crowded trucks on road, civilian/military. at wide spot. Nothing - on road between wide point and site I, there has been an explosion.

→ Who caused it.

★ Not the hill people. Something just exploded.

→ Damage

★ it was full, whatever it was. large vehicle.

→ The vehicle was damaged.

★ Yes. I can't see if it was a truck, a helicopter crash, a truck. I'm going to move a bit to see if I can't pick it up. it was a ground vehicle. Had a ~~missile~~ or something.

→ We can leave that now -

★ 1400 - - - - 1500 - - - - Helicopters bringing things to center point. Not important 1600 - - - - still improving center point - submarine still there, perimeter is being drawn in 1700 - - - - Desolate looking. In the hills people still moving 1800 - - - - OPS out, 1900 - - - - DARK, ~~wide~~ wide point lit up and they are still working, welding sounds, clanking, hitting metal with hammers. SITE I 2000 - - - - center point

8

SPS/LPS 360°, temporary perimeter has been drawn in  
except in the north towards road. ~~THE~~ tanks still there.

2100 - - - - - Quite a few lights cut off at compound  
area. Visual, row of horses falling down, collapsing  
in dust. I don't know where that came from 2200 - - - - -  
Very few lights on. Whirring sound now. Site II  
darkened. Check points 2300 - - - - - 2400 - - - - -

→ STOP There, go to the wide spot - submarine tower

★ both there

→ Was the submarine used today

★ checked and moved

→ The tower

★ no
