PROJECT SUN STREAK (U)

Session Procedures Report

Monitor 099

FORMAT

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Control Number: 'OTHER' ^{SECRET} 5	Nickname:
Date of Session: 3 SEP 86	Target Country:
References:	Session Number: 01
Date of Report: 3 SEP 86	Mission Status:
Technique Utilized: CRV	Source Identifier: RV-021

1. (S/NF/SK) TASKING: Determine if viewer can identify/describe target at SG1A [redacted] Monitor had conducted other sessions on this target. SG1A [redacted]

2. (S/NF/SK) SESSION: Source discovered an "antenna" at site. Stage 6 was employed to trace the 'connection' of this to other things at site. This association lead to the target.

(S/NF/SK) Summary: Site - "open flat land with sandy terrain in the background. There is a structure at the site with a dish-like structure on top. The upper structure connects to other structures which are tall, thin, metallic w/a feeling of flowing energy passing through. These separate structures are located away from the main structure. The main structure is a shielded facility to which radio waves/signals pass. The facility is impenetrable in that the shielding prevents "intrusion." ~~Base~~ While this activity is "clandestine" ~~approved~~ ^{known} activity.

(S/NF/SK) FEEDBACK: Source was informed that session went very well and that site may be worked again.

Area is open flat land with what appears to be some dune type terrain in the ~~background~~ background. There is a structure at the site with a dish-like structure on top. The upper structure connects to other structures, which are tall, thin, metallic and have a feeling of flowing energy passing through. These separate structures are located away from the main structure. The main structure is a shielded facility ~~through~~ ^{to} which radio waves / signals pass. The facility is impenetrable in that the shielding prevents "intrusion". While it is a "clandestine" activity, it is a known facility.
