PROJECT SUN STREAK (U)

Session Procedures Report

FORMAT

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Control Number: 'OTHER D'	Nickname:
Date of Session: 9 JUL 86	Target Country:
References:	Session Number: 3
Date of Report: 17 JUL 86	Mission Status:
Technique Utilized: CRV	Source Identifier: RV-003

1. (S/NF/SK) TASKING: Same as session #1

miss 099

2. (S/NF/SK) SESSION: Source ~~described~~ described what was probably the same 'petroleum storage' 'underground petroleum storage area' as described in session #2, but may have actually been ~~at~~ at ~~the~~ target site.

3. (S/NF/SK) Summary: (Large, vertical, round, smooth, grey structure located 2km to the NW). Target is a very wide, long, broad structure in a large, open, semi-restricted area. This structure may be coated with a protective, black, tacky substance 'like tar'. The structure is constructed with a thin, hard, metal casing, under which is a spongy, composite material 'like high-tech insulation', then an area of empty space, then a supporting structural framework, then a huge, mostly empty volume of space which smells very strong and pungent. This volume is only partly filled with a fluid that is not necessarily beneficial to biological systems, but is used for something. It is extracted from one end of the structure through a long, thin, round thing (pipe?).

This document is made available through the declassification efforts
and research of John Greenewald, Jr., creator of:

The Black Vault

The Black Vault is the largest online Freedom of Information Act (FOIA)
document clearinghouse in the world. The research efforts here are
responsible for the declassification of hundreds of thousands of pages
released by the U.S. Government & Military.

Discover the Truth at: <http://www.theblackvault.com>

then is loaded into something that transports it to where it is distributed, portioned, and packaged.

4. (S/NK/SK) FEEDBACK: Ops officer opined that source-provided info was not satisfying the 'intelligence question'. Amplifying tasking instructions were provided so that source could be run ~~over~~ ~~type~~ ~~again~~ against target yet again.
