FOR YOUR RECORDS:

An attempt was made to target Source 021 on tasking I-2 on 15 December 1986. The session began without incident, however the initial descriptives did not fit well into the known components of the target. An Attempt was made to "re-target" the Source, however, for reasons unknown and unstated, the Source was unable to acquire the site and requested that the session be terminated. Following the session the Source stated that she had been under some physical discomfort from cramps and a slight bout of bronchial asthma. No specific date was set for another session except as indicated on current training schedules.
