

PROJECT: Approved For Release 2000/08/08 : CIA-RDP96-00789R002000360002-9 1320
 DATE: 12 MAY 87 START: 1327
 SESSION: 02 TARGET: 1329
 SOURCE: 101 FINISH: _____

COORDINATE: 642170/171131

FRONTLOAD:

THIS will be the 2nd TRIP TO THE AREA WE WORKED LAST SESSION. YOU TOLD ME OF THREE DISTINCT STRUCTURES: A CHRISTMAS TREE SHAPED STRUCTURE, A BLOCK HOUSE/BUNKER, AND A GRAIN SLD. I WILL WANT YOU TO VIEW THESE SEPARATELY TO DETERMINE THEIR RELATIONSHIP TO ONE ANOTHER AND THEIR SPATIAL LOCATIONS. YOU ALSO REPORTED ON THE CONCEPTS OF MONITORING AND TEST. WE WILL NEED TO SEE WHERE THESE CONCEPTS CAME FROM "

NOTES:

- ① Clear, warm day
- ② No known or stated indemics

DRAFT: _____

TYPING: _____

PROOF: _____

Approved For Release 2000/08/08 : CIA-RDP96-00789R002000360002-9

CORRECT: _____

CPS: _____

This document is made available through the declassification efforts
and research of John Greenewald, Jr., creator of:

The Black Vault

The Black Vault is the largest online Freedom of Information Act (FOIA)
document clearinghouse in the world. The research efforts here are
responsible for the declassification of hundreds of thousands of pages
released by the U.S. Government & Military.

2

→ G42170/171131

★ LOW, FLAT STRUCTURE, BERMED, THERE'S LIKE A BERM AROUND IT, HARDENED, FUNCTIONAL, GREY OR LIGHT BEIGE

→ FOCUS AROUND THE GENERAL AREA

★ BERM, AROUND THE PERIMETER, WINDOWS, INSIDE ITS DARK, HEAVY DOUBLE DOORS, YOU ENTER AND IMMEDIATELY GO DOWN STAIRS

→ REMAIN OUTSIDE - THE GENERAL AREA

★ NOT REAL GREEN, NOT REAL BROWN, NOT LUSH BUT NOT REALLY SANDY, ANOTHER SINGLE STRUCTURE, POSSIBLY SOME CABLES LEADING TO A METALLIC, TOWER STRUCTURE

→ PAUSE - IT IS NOW 12 MAY 87 - YOU ARE IN THE TIGHT AREA, PERCEIVE A TIME PERIOD OF 27 APR - 15 MAY 87 PERCEIVE THOSE STRUCTURES AT THE TIME I'M INTERESTED

★ A SERIES OF TEMPORARY, METALLIC, LOW, BOX LIKE, STRUCTURES FACING INWARD - THERE'S TALL, MODERATELY TALL, STRANGE SHAPE SLOPING ROOF WINDOWLESS STRUCTURE, FAR SIDE OF THE AREA, PACKED EARTH, MORE SANDY THAN CLAY,

→ WE WILL LOOK AT THEM SEPARATELY

★ A VERY LARGE, METALLIC, PARTIALLY SHINY COFFEE MAKER 8,000,000 GALLONS, ROUND, CYLINDRICAL, SILVERISH, BLACK BANDS, IT SETS CLOSER TO #1'S ON A LINE BETWEEN THE ARMS OF THE CRESCENT - A LITTLE TO THE RIGHT AS VIEWED FROM THE BUNKER - MOUNTAINS ON THE DISTANCE

3

→ STAY WITH THE coffee maker

★ LARGE, TOP slants to ALMOST A POINT, A FEELING OF A LARGE/POTENTIAL power, NOTICEABLE STEADY HUMMING noise, WIRES/cables on the bottom TO THE side, APPEARS there may be another very small bunker like building 2/4 feet above the ground, no more than 10 mtr diameter off to the right - 100 from the coffee maker - in ~~the~~ A way, whole area reminds me of BARSTOW/Lancaster - ~~Silver is~~

→ coffee maker

★ silver bad word, like opaque, texture like quality, like grey mixed in -

→ The word is Burnished -

★ good word, men moving around, overall type one piece suits, very competent, good "J's" They are looking up, this thing is very big - a feeling of expectation, a feeling of final parachute check, excitement, radio/commo - Bad word loudspeaker and radio - I'm moving out always, maybe even another bunker type area & this is all being timed, programmed, monitored, plotted - tri-sected - collated, correlated, controlled, relayed, ~~the~~ instructed, charged, observed, watched, monitored, measured and metered, there's a... I think this is important - A concept - Bracketing - one long one short round, that kind of bracket - it fits in the bracket

→ coffee machine potential power

4

- ★ Kinetic energy, like a muscle at rest, like an object pushing up against another object causing tremendous potential energy, coiled, energy is greater than the sum of the parts, energy is increased geometrically, vice arithmetically, energy is built up and stored in a way, re-circulated but the potential is always there & energy is associated with bottom part of coffee maker
- Describe the bottom part
- ★ The interior - hair pin like tubes, cables, resemble pipes, energy is kept circulating, different than storage in a battery, the energy is always there - a thick cool fluid, there's like a ~~thin~~ rug, like a walking mat with a rough finish, ~~porous~~ porous, there's something here that takes the place of brushes, when things pass by brushes there is energy but this thing does it differently - when the energy flows by there is more efficiency since brushes have been replaced, bottom part of system is cyclical in a way, it feeds back into itself - builds into itself -
- This is one structure that will participate in the occurrence, focus on that occurrence -
- ★ Being extremely careful here - I'm going very slow - The men have ~~of~~ left and gone partially underground - a build up of energy - it's all being monitored and tested ~~but~~ but that is only a close word - There's a surge, like the coffee pot spouts something in the sky - I've seen expecting the pot to rise but instead it shoots something from the top - a build up a kinetic type energy, a hum, an instantaneous release, a shooting up in the sky - something shooting from the coffee

5

(continued)

- ★ pot, maybe at the top of the coffee pot, sleeker, cylindrical, two components
- its course
- ★ straight up, arcing, some sort of orbit, going to - I'm going to follow that again - something happens at this point, like a split, like its programmed to happen
- ★ split raw data
- ★ gets smaller, separates, soart, the components separate, the top component is not entirely metal - it continues to shoot up - I'm going to follow the sequence again - goes up, stops, like its hit by something -
- hit by something
- ★ like a light bolt, a bolt of light - like something hits this - maybe the coffee pot hits this, its confusing - something starting to go into orbit, starting to go into the arc when its hit - goes into two pieces - very confusing - something is climbing, curving, it meets something like a bolt
- focus on the source of the bolt follow it back
- ★ Bolt is coming down - from the sky - something in the air - it originates from something in the air - drifting, the bolt comes down from above, higher up yet - something goes up but something higher up hits it with the bolt & AOL satellite but it is higher
- Describe the bolt

6

- ★ white, almost opaque, extremely rapid, directed, channelled, catharized (Bad word), almost see through it.
- source of the bolt
- ★ Higher up - bolt comes down - like from something drifting, hovering - something flat on the side -
- The object that goes up -
- ★ End component, top part not all metal, plastic like parts, its not a high as coffee pot, more cylindrical, more gracefully,
- Back to the coffee pot
- ★ I'm checking the sequence again - maybe the pot is the source of the bolt - I'm still confused -
- Corn silo
- ★ its back further away, no windows, wierd shape, slanted roof - function is to set up - not too clear - interlocking - functions as an intermediary, whatever that means, its a link in a relay, AOL, kinds like a shuttle,
- Pause now - at the time of the occurrence - Describe the events and the relationship of the structures -
- ★ Coffee pot building up of energy, over to ugly bunker, monitoring, reporting, relaying info, watching (primary focus of Roman activity), at the silo there is waiting, bouncing back and off, coffee pot - a release of energy, climbing, climbing, the bunker monitoring, intersecting, almost armory, digitalizing, computing, recording, checking over, silo monitoring, Vietnam, history, bunker.

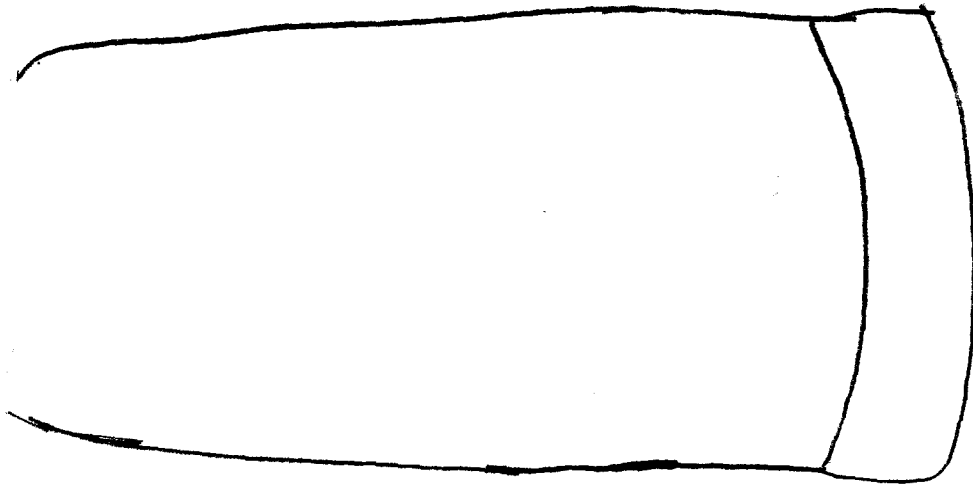

~~II~~

- ★ I'm looking for the collapsing power & saw before but I don't see it now - men running around but like in a drill, no panic, whatever the hell is going on it was successful in a way that points the way to future adjustments, This is a step not a conclusion,
- Pause now - the person has the answers - focus on that person -
- ★ Inside the bunker, bright lit, excited, controlled, looking for him now - Has to do with triangulating, shortening the distance and the angle -
- Ask this person - Potential for success -
- ★ Two path answer - long range/short range, long range = given, certain constants and licenses chances for success broadening/crossing over into other areas all very good - immediate less important except as stepping stone for long range - immediate success likely - success modified up or down by manipulation of data, in anyway therefore success is relative - you need a correlation, a small success & a long one against,
- Strengths of this thing
- ★ newness, its novelty, speed, difficult to detect, difficult to counter, opens the way for many other areas,
- Its weakness
- ★ Bulky, ~~it~~ takes time to prepare/to build up, at this point reliability only assured with extraordinary preparation - under routine conditions reliability decreases, costly - requires a large number of these coffee pots & politically difficult to justify in anyway - if a concept - majority of benefit in long way down the road -

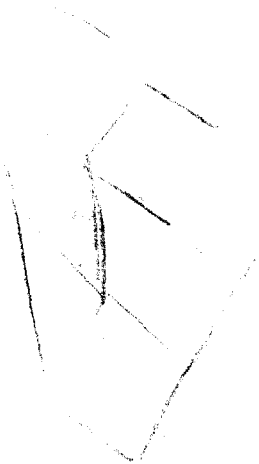

8

- * a trifle fermented
- Pause - now - I'm going to ask a direct question I understand
it may confuse you - custom - coffee releases -
Something goes down - a bott - focus again on the sequence -
believe if the coffee pot is the source of the ~~pot~~ bott -
- * umm, I'm trying to confirm something -
Yes - Yes - I think the coffee pot has something to do
with something above also -
- Pause - Return to your commentary -

(End SESSION 2:32 PM)

TINY
BUNKER

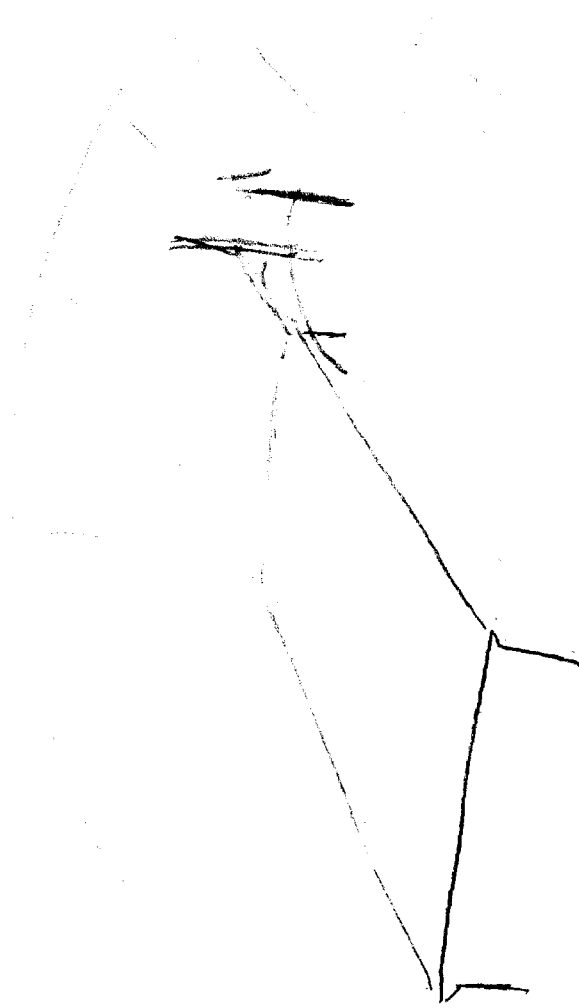

CUPP
PO

CROSSER
IN
ORCENT
SHARE

3ELM

AREA REMINDS ME OF
LANCASTER/BARSTON AREA,
UGLY BUNKER LIKE STRUCTURE
INSIDE A BERM. THIS STRUCTURE'S
PRIMARY COMPONENT IS UNDERGROUND.
CRESCENT SHAPE OF METALLIC
CROWNS INTERCONNECTED FACING
IN. AT END OF CRESCENT
IS A HUGE METALLIC
COFFEE POT (CO) HAPED STRUCTURE.
THIS STRUCTURE HAS TO DO
WITH A TREMENDOUS AMOUNT
OF KINETIC ENERGY THAT IS
KEPT CIRCULATING. TEST,
MONITORING GOING ON, FINAL
CHECK, MEN MOVE OUT OF
WAY. THERE IS SOMETHING
"SPIT" INTO SKY. GOES
UP TO ABOVE CURVE TOWARD
ORBIT AND IS BROKEN INTO

TWO COMPONENTS BY A BOB
WHICH I BELIEVE CAME
FROM THE HUGE COFFEE POT.

THIS IS A SUCCESS. ONCE
CONTACT IS MADE THE SIZE
OF THE SUCCESS CAN BE
CONTROLLED BY MANIPULATING
FIGURES / STATISTICS. PRIMARY
PROSPECTS FOR COFFEE POT
ARE LONG RANGE, HOWEVER
PRESSURE MAY BE BEING PUT
ON TO EMPHASIZE SHORT
RANGE GOALS AT EXPENSE OF
THE LONG RANGE PICTURE.
THERE IS A MAN IN THE
BUNKER WHO KNOWS WHAT
IS GOING ON (CHIEF SCIENTIST,
PROJECT MANAGER?) AND TOLD
ME THE INFORMATION IN

THIS PARAGRAPH I PICK

UP JUST THE LEAST
HINT OF SUBTERFUGE
FROM THIS MAN.

COFFEE POT HAS
SOMETHING TO DO WITH
BRACKETTING (NFI) AND IT MAY
MAY ALSO BE CONNECTED
IN SOME WAY WITH A
PLATFORM IN THE SKY.
