

SECTION II

This section deals exclusively with the accuracy of the information provided, not its usefulness. Responses are scaled from 0-3 utilizing the following explanatory criteria. If a source has not addressed a particular item then select UNKNOWN. If a source describes an item which cannot be verified then select CANNOT BE DETERMINED.

0 - Little or no correspondence with known or suspected components of the target site.

1 - Evidence that the proper target site is being described, however the information contains a mixture of correct and incorrect elements.

2 - Good site correspondence with several items recognizable or confirmatory in nature but some incorrect or irrelevant information is reported.

3 - Good correspondence with the target with unambiguous and unique information and relatively little known incorrect information.

	0-3	UNKNOWN	CANNOT BE DETERMINED
