- E. SESSION SUMMARY:

There is an overwhelming impression of human manipulation of natural energy associated with the target. There is high velocity that is directed. The concept of energetics is pronounced; either high energy output or high energy consumption. There is a sense of height involved with the target. The target is surrounded by an area of green "lumpiness". The target feels hollow and a roundness is also associated with the target. Somehow, water is a major part of the target.

The target has sectioned squares and/or curves; it is constructed of smooth, hard sections. There has been a peaceful application of developed technology as far as the target is concerned. There is a circular object/feature with lines criss-crossing across it and away from it.

Descriptors are: white, green, tall, round, circular, loftiness, angular, coursed, layered, height, tall, empty, a sense of falling, lines and criss crossing.
