Demonstration
Oct. 7, 1992
V: 079

Site was open and spacious. Site had a triangular object that was man made. This object stood straight up. Site also had other objects that were round or circular in nature. A motion or movement is associated with the site that is fast and fleeting. Round slopes or mounds are associated with the site. There is a feeling of something going or moving upward with a lot of energy. Something is high. I had a hard time getting my feet on the ground.
