- E. SESSION SUMMARY:

Site had several square structures. One structure was red and one was white. There were men at the site. It looked as though the men were jumping out of a object into the air. The men looked serious. The men were dressed the same. It seemed they had to wear special clothing for what they were doing.

The site also had two similiar objects or two people that were dressed alike and the objects or the people were being "shot" up into the air. It looked as though these two people were dressed in blue and they were jumping into the air. This part of the site was entertaining.

Candy-striped lighthouse, built in 1964, guards treacherous Prince Shoal off the entrance to the Saguenay River. Wicked currents, powerful winds, and ripsaw shoals make this stretch a sailor's nightmare. In thick fog, swirling waters nearly carried *White Mist* into the light tower's base.
