WORKING PAPER

SUMMARY OF INFORMATION

At this time, there is no further relevant data that can be furnished and meaningfully affect the outcome of the planned hijacking of a US aircraft with 28 DOD-affiliated persons aboard in Athens, Greece. Sufficient data has been furnished to allow authorities on the scene with the assistance of the FAA, to successfully neutralize this specific threat.

There is a high potential for terrorist activities projected for the September/October 1988 time window. There is a likelihood of terrorist activities directed against US interest in the PACOM. The first target is a multi-service but predominantly naval base located in the vicinity of Iwaki (Taira), Japan. The second target is a facility located in the vicinity of Tinaca Point, the Philippines.

In the USAREUR area, an international meeting taking place at a convention center in Munich, Germany, again resurfaced as a likely target of independent (non-Iran sponsored) terrorist activity. Terrorists plan to use blue and white vans with tinted windows in this attempt in Munich. Access is to be gained via tunnels (not further described). Stuttgart (EUCOM HQS) also appears to be a high risk area in the September 1988 time frame. US military officers tentatively described as COL, COL (P), BG, John Abrams and/or John Knox were described as US high priority targets for kidnapping.

[The above constitutes the results of a topical search - a dump of data that needs to be refined through the conduct of additional sessions nearer the projected dates of the events]. G
