SUMMARY OF INFORMATION

The developmental activity within the "enemy (target) building" is to rebuild, reconstruct, (refurbish) from plans and blueprints.

*under reconstruction*

One such object appears to be a missile. The perception of the missile is directly related to a catapult (launch-type) device emanating from a big, circular, round, area that belongs to an object described as a submarine.

"Ice and cold" (weather conditions) are associated with this target.
