PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: B907 SESSION NUMBER: 01
DATE OF SESSION: 27 FEB 89 DATE OF REPORT: 27 FEB 89
START: 1010 END: 1040
METHODOLOGY: WRV VIEWER IDENTIFIER: 079

1. (S/NF/SK) MISSION: Determine and describe the content and the developmental activity, if any, of a structure reflected in a copy of overhead photography.

2. (S/NF/SK) VIEWER TASKING: Access and describe the target structure; provide a descriptive overview of the target area; and access and describe the nature of a developmental activity, if any, at the target structure.

3. (S/NF/SK) COMMENTS: No inclemencies noted. Overhead perception of target and target area inferred that 079 was pm target. A Summary of Information is attached to this report.

4. (S/NF/SK): EVALUATION:

SUMMARY OF INFORMATION

The target structure is a "big, tall, long, elongated" building with windows...some sort of plant. It is located near water and harbors a secret, developmental activity.

The activity appears shrouded in secrecy and deals with "Soviet-designed" submarines described as "smaller and faster than the "tornado" (typhoon?) and projected to be used mainly in "low intensity conflicts." This (submarine) model is faster, more complex, more robotic (automated). Advanced computer technology in the form of advanced micro-chips, facilitate these developments.

Conceptually there is a perception of weaponry that can be "snapped on or snapped off" (interchangeability); a second perception indicates the presence of sophisticated equipment that will allow for the collection and transmission of information (to a land base or sea base area.) These constitute the hallmarks of these improvements.

The names "Pitar/Rotary/Ritter" phonetically surfaced as being associated with this advanced weaponry.

The name Stuart/Stewart surfaced as possible being knowledgeable of this activity.
