PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

---

PROJECT NUMBER:	B90B	SESSION NUMBER:	03
DATE OF SESSION:	08 MAR 89	DATE OF REPORT:	08 MAR 89
START:	0938	END:	1046
METHODOLOGY:	CRV	VIEWER ID:	095

---

1. (S/NF/SK) MISSION: To access and describe an event which is suspected to have taken place at about 1830 hours (local), on 4 April, 1987.

2. (S/NF/SK) VIEWER TASKING: "Return to the previous site, access and describe any current, related activity(ies) which are not present at the site. Determine the type and purpose of the activity(ies)."

3. (S/NF/SK) COMMENTS:

a. Inclemencies: Pain from accident.

b. 095 had little difficulty returning to the target site, and appeared to have good site contact. Targeted with "activities", perceptions of material objects appeared. 095 had the recurring AOL/S of "test range".

c. Summary of Information enclosed.

4. EVALUATION:

SUMMARY OF INFORMATION

The cue "activities of interest in a present time in locations other than the original site" elicited the image of a large area of flat open land which is rural and isolated. On this land is a compound of several long, rectangular buildings and one square building. This compound is in the middle of nowhere on this open flat land. What trees there are in clumps as if the land had been cleared. There is a narrow 2 lane road leading to the compound. Another narrow road seems to go around a large portion of the open land "like" a perimeter road.

This compound is purposefully isolated and on open land because of its function.

The cue "activity:type and purpose" elicited concepts of questioning and testing and a visual image of something mechanical which pivots back and forth in a controlled mechanical motion. (Ideas of pivoting, rotating, moving and mechanical). This motion is in a horizontal plane, back and forth in an arc of approximately 100-120 degrees. The motion has a period of 4 seconds per round trip. This object is electronic, technical, mechanical and automatic (the motion is not a result of a manual operation). The base portion is circular and the pivoting

~~CONFIDENTIAL~~

portion is linear and narrow (no more than 1-2 degrees wide). This is a component - not a complete system. It is integrated with something. (ADL: network) I could not tell whether this electro-mechanical device was just a part of the compound (ADL: protection) or whether it itself is a product of the compound/facility.

There is a strong feeling of security, government and specialization associated with this place, its function and this device. The compound gave me a repeating ADL of "test range."

TASKER

1. PROJECT : 8908
2. Encrypted coordinates: 743522/463256.
3. Tasking: "Return to the previous site, access and describe any current, related activity(ies) which are not present at the site. Determine the type and purpose of the activity(ies)."
4. Required EEI:
  - a. Describe any related, current activity(ies) not present at the site.
  - b. Determine and describe the type and purpose of the activity(ies).
