|Date of Session  : 28Apr87
|
|Date of Report   : 28Apr87
|
|Source Identifier: 018

```

Monitor 099

1. (S/NF/SK) Tasking: Monitor granted access to ops officer "eyes only" packet on 24 April 87. Immediately prior to session, monitor reviewed packet and selected Sketch A, Area #3, 6th floor as the target. Area #2 was kept in mind as a secondary target.

2. (S/NF/SK) Session: No source PI. Monitor experienced the usual tribulation in attempting to get source to target but, as always, source did a fine job after he acquired a good "lock on". After monitor was reasonably confident that this had occurred, the source was cued with "FCD-1", then later, "Sketch A, Area #3, 5th floor" and then the 6th floor, which was the intended target. Whereas the source did not immediately produce what could be labeled as "substantive" data, monitor's confidence was not lessened; this is #018's style for the first hour of most sessions. In an attempt to nail down the target, monitor provided the source a copy of the site layout, (attached) pointing out the target location. Source seemed to appreciate this diagram and commenced describing the 6th floor in more concrete terms. Monitor "whipsawed" the source about rapidly from cue to cue (based upon reported data), so as not to allow AOL a chance to gain a foothold. (Source conceded that this tact was a good one). All-in-all, a good product. Monitor is confident that this source can be successfully walked area-to-area through the entire site with good results. Source could also follow up on any perceptions which might have more than a passing "utility assessment" significance. [Note: At the end of the session, monitor challenged source with a "dowsing" problem, to wit: "Show me on the diagram where the directors office is". Source response is outlined below.]

3. (S/NF/SK) Summary: "FCD-1" was perceived as an enclosed/encased (as though in "lead") area in the corner of Area #3, but not touching

the outside walls. There are people at desks which are located between FCD-1 and the outer corner walls of the building. One of the people here places what seems to be a film container into an envelope. The envelope is destined for what may be a library/archive. The object on the film has a diagram of a "corner-reflector-shaped" object the function of which is connected with ideas of: "increasing productivity, energetic, scooping/scraping/capturing--(AOL-wind foil, corner reflector, laser reflector). The actual object is located in a warm, dry climate in a place which has workmen and airplane sounds. (The "origin" of the film is connected to an AI of "Washington, DC). The photo of the object was taken by a very well-dressed, but disheveled man. A "director" is located in Area #2 but another (possibly higher) may have an office in Area #4.

4. (S/NF/SK) Feedback: Source was informed that his dowsing was probably correct from the available information regarding site. No other feedback provided.
