Site is near a large city. But is in a more isolated area away from the city (commuting distance). Large complex. There is a "militaristic" feeling to the complex - based more on attitudes and demeanor of people. People there are not in military uniform. Bldg. is administrative in nature - reception area, offices, conference room/auditorium, and a 5th floor that is qualified as a storage area with large heavy vault-like doors. Feeling that is very free-proof. It has a musty smell. Large numbers of records are maintained - deal with people and contain personal information. Some of the records are very old. (See Break - IRK area). Personal history files. See Break - Chernobyl victims.

People are from select segments of society - political

leftists. ← AM

AM ~~State~~ Czechoslovakia

Political tris - people who have "disappeared":

Possibly political prisoners and families.

Keeping track.
