"THIS will be another attempt to have you "read" a document. The difference in this case is that I do not know what the document is and you will not be given feedback until the summary is complete. I will not provide you a coordinate since that would be superfluous - I will use the cue "The Document." The document is in a sealed envelope on the table. The room is lit.

I had the feeling that this was a book. It had a colorful cover. It was written this year by a man and the copyrights dated back to the 1970s.

It was about an expansion, a mind expansion, a technique or techniques. It was people oriented on a scientific matter. I had the sense of information processes. I could see diagrams and and blocks.

The beginning of the book explained how something could occurred naturally or could occur naturally. The end of the book took on a more universal appeal.

It was evolutionary and dealt with external realities.

It had to do with training people and was used for education purposes.

It had to do with rituals.

The issues were teaching, using, events, and outcomes.

The information is public and the information has been used before in earlier years.
