

~~SECRET~~/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

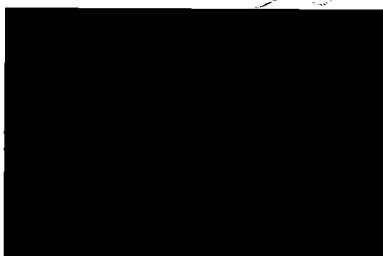

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8728	SESSION NUMBER: 2
DATE OF SESSION: 27 JAN 88	DATE OF REPORT: 27 JAN 88
START: 1050	END: 1130
METHODOLOGY: ANALYTICS	VIEWER IDENTIFIER: 099

1. (S/NF/SK) MISSION: Locate a classified document.
2. (S/NF/SK) VIEWER TASKING: This session began as a joint session, using the pendulum, with viewer #003. However, in the hands of 099 the pendulum responded negatively, or not at all (except to the question of whether or not the document was located in the D.C. area-- the result was yes. After 003 departed the viewing room 099 turned to analytics to work the problem. Four dashed lines were placed quickly, in the manner of an ideogram, beside each quadrant or map sheet in question. The spaces between the third and fourth dash are usually the determinant for a positive reading. The process is repeated a number of times to be certain of the reading, or if the dashes were not discrete. No attempt to remote view was made during this session.
3. (S/NF/SK) COMMENTS: The results of this endeavor indicate that the present location of the document lies in the SE quadrant of D.C., top part of map sheet #23 (see attached).

SGFOIA3

Analytics
South east
quadrant of D.C.
