S-1's out in a rural or counter setting away from
major population centers. The place is not for people
to live but to carry out activities that
people would get in the way of. People are here,
but it's their job, & they wouldn't be here if they
didn't need to be.

got 2 impression that inside are moving parts. Sense that emanations
 involved are like "waste" secondary, though with proper
 engineering application could be made of them.

54 1/2 doesn't seem to be a weapon, but involves major part
of work + process for developing components of
something.
