E. SESSION SUMMARY:

The target is a public place with a large plaza associated with it. People gather here for leisure, for sitting, watching and for walking. It is a place for milling around, relaxation and informal entertainment. A large squarish structure over looks this "plaza" area (see diagram page ii). There is a location where water is concentrated; it cascades over flat and smooth declining surfaces and along angled smooth surfaces. The water flow is the same velocity across its entire with.

There is shaped stone with curved or rounded surfaces. Some features within the vicinity are also curved. The target "feels" surrounded by "1000's" of houses. It is "near the edge" of something.

There is the concept of "groups of 3". There is a chair-like feature which pivots as it appears suspended (see diagram page iii).
