PROJECT SUN STREAK (U)

TOPIC: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

PROJECT NUMBER: 8713	SESSION NUMBER: 4
DATE OF SESSION: 21 OCT 87	TARGET COUNTRY:
REFERENCE:	MISSION STATUS:
TECHNIQUE UTILIZED: CRV	SOURCE IDENTIFIER: 011

1. (S/NF/SK) Monitor Tasking: Determine the nature and extent of current activities associated with the given coordinates.
2. (S/NF/SK) Source Tasking: The monitor's intent was to "restart" this project, and the Viewer was so informed. Thus, the session began in Stage 1 using the original coordinates. This procedure led to the same site as that previously encountered, i.e., a "large, natural, manmade structure". Since the monitor suspected that numerous activities/areas might be overlapping, a Stage 6 tool was employed in an attempt to sort things out: The Viewer was directed to place a symbol for the large structure in the center of a worksheet, then to draw lines to circles labeled "Activity A, B, etc." This procedure seems to have worked well and will be employed in future session with this source. Only a cursory look at two separate activities was undertaken during this session.
3. (S/NF/SK) Summary: The Viewer's summary is attached. Note that the data pertaining to "submarine" appears outside the Stage 4 AOL column.
4. (S/NF/SK) Comments: Good structure/control was maintained throughout the session. But because of the disconnectedness in places, this monitor feels that some AOL has crept in. The next session will begin with an exploration of the upper (surface) part of the "cavern" and will seek to address "current activities", per tasking instructions.

SESSION SUMMARY

SESSION: 21 Oktober 1987, 1305-1504 hrs

The first impressions were of a structure and a mountain.

At this point, I felt as if I was being blocked from obtaining further target information by a person/s unknown.

Focusing on "Activity A", I perceive a person. Although I am not sure whether this person is male or female, there is a ^{feminine quality} ~~feeling of femininity~~ about this individual. There is the sound of soft music in the background.

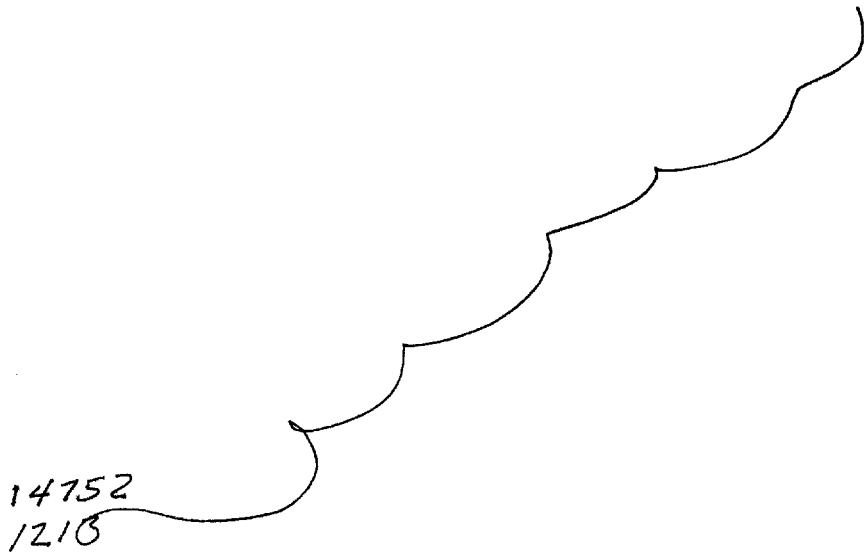

Associated with activity A, is a structure that is pointed at the apex and has flat sides; AOL - like a pyramid. This structure appears to have an aura around it and seems to feel somewhat religious; AOL - like a church or mosque. Any further attempts to access this person or structure seem to be blocked.

Focusing on "Activity B", I perceive the colors of yellow and yellowish green. Everything seems curvy and in motion. There is a structure. It is hard, gray, angular, vertical, high, solid; feels like a solid block of stone. The top of this structure is flat and open, like some kind of platform. There is a touristy feeling about this place.

Probing for a "hidden element" at this location; the idea of a "mountain fortress" comes to mind. Beneath this area is a long, empty, round corridor/tunnel that appears to be carved out of solid rock. This corridor/tunnel leads to a large, cavern-like room. Inside is a man-made structure that appears to be on some kind of platform that is supported by something that looks like coiled springs (see sketch, page 6). Associated with this site is a vertical shaft. There is something that travels up and down this shaft, AOL-like an elevator. At the bottom of this shaft is a large square/rectangular corridor which appears to be carved out of solid rock. There seems to be doorways or openings on each side of this (see sketch, page 8) corridor. I perceive people moving down this corridor. An impression of construction workers or maintenance-type personnel is associated with this group of people. Associated with this complex, are ships or submarines. AOL-like an underground submarine pen.

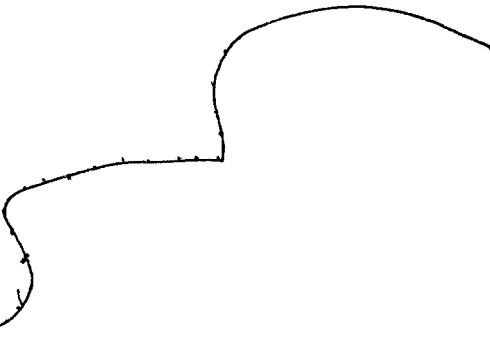

- small group of occupants
 - ships / submarines
 - pursue
 - long for contact

PEOPLE?

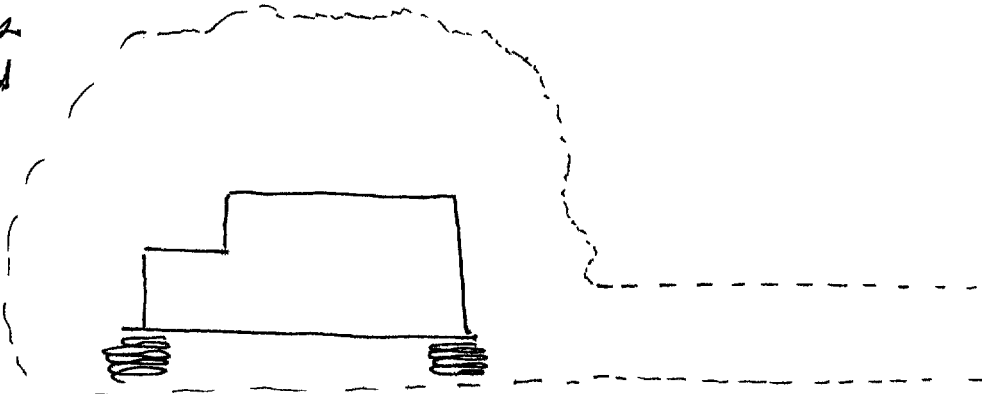

1/2 - getting a touristy feeling - people running around saying
ooh-aaahh, look at this, look at that. Not really paying attention
to what is really going on, just going through the motions of what
they think they should be doing and saying.

HIDDEN ELEMENT?

mountain fortress
