PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

PROJECT NUMBER: 8713	SESSION NUMBER: 5
DATE OF SESSION: 27 OCT 87	TARGET COUNTRY:
REFERENCE:	MISSION STATUS:
TECHNIQUE UTILIZED: CRV	SOURCE IDENTIFIER: 011

1. (S/NF/SK) Monitor Tasking: Describe the nature and extent of present activity associated with the given coordinates.
2. (S/NF/SK) Source Tasking: 011 was instructed to begin the session in Stage 4 with an exploration of the area [above and outside the structure].
3. (S/NF/SK) Summary: The viewer's summary/sketches and post session sketch are attached.
4. (S/NF/SK) Comments: The unusual motion described in the session (page 3) may be of tactical interest to the customer.

SESSION SUMMARY

SESSION: 27 OCT 87, 1312- HRS

First impressions are of a light grey, dome-shaped rock (see sketch, page 1). The surface of this rock feels cool, hard, chalky, or powdery. On top of this rock is a square structure. This structure may not always be visible or apparent. Nearby is a coastline with very high vertical cliffs (see sketch, page 1). There appears to be something that is moving at an incline to the top of the dome-shaped rock and stops at the top. There is a change in direction and the motion is downward vertically and ends at a large, cavernous room (see sketch, page 2). Somewhere under this site is an extremely large, arched tunnel or cavern. Inside of this tunnel or cavern are large warehouse-type structures. There is a large flat platform or paved area next to a body of water (AOL-like a docking and loading facility). This entire complex appears to be underground.

There is some kind of object associated with this target. It is large, round and has what appear to be fins (AOL-like rocket fins). There is a definite motion associated with this object. At the beginning of this motion there is a round, circular feature (AOL-like a crater or revetment). The motion moves upward at an incline, peaks, and moves downward at an incline to a point and then continues downward at a very accelerated speed (see sketch, page 3).

From high overhead there appears to be a body of water bordered on three sides by land. There is ^{a feeling of} coldness about this site and there is not much color here, only shades of grey.

Page 5 is merely a post-session, analytic sketch representing the target area gestalt. It should not be construed as being an accurate rendering of the actual site.
