PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

-----

PROJECT NUMBER: 16A	SESSION NUMBER: 1
DATE OF SESSION: 881219	DATE OF REPORT: 881219
START: 0855	END: 1020
METHODOLOGY: CRV	VIEWER IDENTIFIER: 032

-----

1. (S/NF/SK) MISSION: Access and describe in training target #16A, a Space Shuttle launch at Cape Kennedy on 850412.
2. (S/NF/SK) VIEWER TASKING: Encrypted coordinates 850412/100016.
3. (S/NF/SK) COMMENTS: Excellent session. 032 experienced some AOL near the very end due to an AI which he called an EI. (He attributed his feelings of terror/fear of the rocket flames to the people at the site--this set him off into AOL.) The stage seven exercise was about the same as usual. The search exercise was interesting in that 032 stated that he was distracted by a space object which was near the vantage point he was using to try to determine where on earth the site was. This distracting object may in fact have been the site (shuttle) after take off.
4. EVALUATION: 4.

SESSION SUMMARY  
(SUMM 12)

VIEWER #:032  
DATE:17 DEC 88  
START TIME:0855L  
END TIME: 1020L

Site is a structure or object that has a supporting structure with a metallic skin covering (see sketches pages 2 and 3). The structure is arched, curved, circular and hollow. Inside the structure there is a presence of poles, tubes and bars some of which are in triangular in shape.

The site has many interconnected cylinders, (see page 6) that are joined in sequence. The significance of these cylinders is not known.

The site spins or has parts that spin. Many of the parts spin in opposite directions and drive one another through the use of opposing forces. There is a presence of gears or cams at the site. While present at the site there was a vibrating feeling (low frequency vibration).

There are louvers connected with the site (AOL like vent louvers). Many connected cables are running throughout the structure (see sketch page 8 and 9).

There are flames associated with the site (AOL like a drive force) the flames are either in movement or they are critical to the movement of the structure (see AI page 9).

There is a dish associated with the site -- it's function was not explored (see sketch page 10).

In the conclusion of the session -- while trying to determine the location of the site the clear perception of ~~the objective came into focus~~ but then my attention was drawn to the object sketched on page 12. This object was directly to my right as I was determining the targets location.
