SESSION SUMMARY
(Summ 16)

VIEWER #:032
DATE: 03 JAN 89
START TIME: 0930L
END TIME: 1030L

Site is located in the northern hemisphere, in rough or mountainous terrain which appears to be sparsely vegetated. Site has a large amount of machinery present in all sizes and shapes. There are box shaped objects as well as gears, and rotating metal blades.

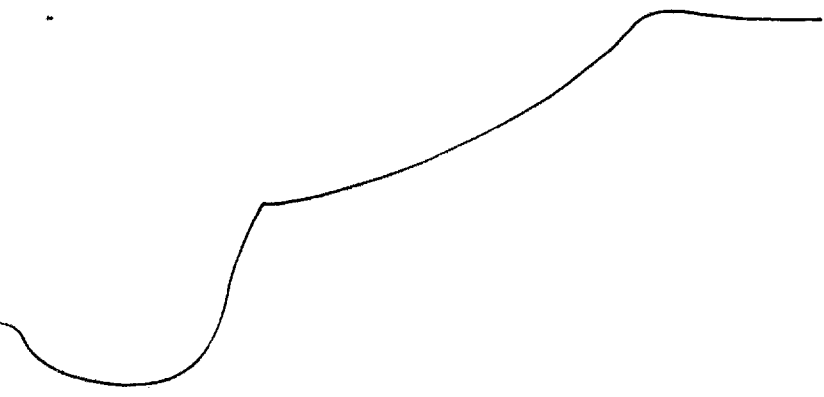

There is a structure which has pillars (see page 7) of stone and marble or perhaps cement. There are doors and openings, panels with buttons and lights. There is another object which is tall, thin and has a cylindrical top to it (see page 8). Below the latter is a flat surfaced object which spins in clockwise direction.

There are objects present which are of metallic tubing with acrylic or mesh spacers between them. The configuration of these objects is unknown.

There are glass or mirrored objects suspended from the ceiling which are convex in shape -- behind these objects are security cameras.
