PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: ~~S-71-100~~ 15      SESSION NUMBER: 001  
DATE OF SESSION: 15 March 89      DATE OF REPORT: 10 Apr 89  
START: 1400      END: 1435  
METHODOLOGY: CRV      VIEWER IDENTIFIER: 032

1. (S/NF/SK) MISSION: Report and describe successfully through Stage VI methodology on selected site.
2. (S/NF/SK) VIEWER TASKING: Encrypted coordinates 3222109/400817 (Fenwick Island Lighthouse).
3. (S/NF/SK) COMMENTS: Viewer successfully located, described dimensionally, and constructed a model of the site in question.
4. (S/NF/SK) EVALUATION: *H*

SUMMARY OF INFORMATION

Site is a structure. The predominant aspect of the structure is it's height. The structure is tall, with steep vertical sides (see sketches pages 4,5, and 5a). The structure has curved aspects as well as square corners and flat floors. The top of the structure seems to be pointed with some rounded, hollow structure below it (see sketch on page 8c). This top is hollow and it appears to be constructed of plastics, glass or ceramic materials. There are also exposed metal support structures inherent to the site -- ADL: looking like exposed building construction. There is something which sticks out of this top and swings around (ADL: making it look like an observatory).

A's experienced were that of being well above ground -- pinned to the side of the structure, and looking down to the ground below.

The terrain surrounding the site slopes sharply away from the structure flowing into low ground and then climbing back into high ground some distance away from the structure. But the important aspect seems to be that the ground helps to elevate the structure (see sketch on page 8a).

There are annexes or attachments to the structure making the base wider than the rest of the structure. There is also an aire of upper structure and lower structure.
