- E. SESSION SUMMARY:

The target is associated with a large, dark colored bird. It is sitting with its wings folded and is looking out over the surrounding area. There is a wooden feature reminiscent of a split rail fence. There are also angles and corners which feel like worn or weathered wood.

There is a sense of individuality or singleness associated with the target. A lumpy green appears to "spill" out onto the scene from either side. There are small clump-like features which have an organic feel; however, they are sharp and "harsh" in nature.

It feels very still here. It is like the scene has been taken out of time somewhere and thrust into the present. There is a shuffling sound from somewhere outside of the scene itself. This place is not "alien" but it does have a surrealistic "flavor" to it.

ROBIN HOOD, CHATTANOOGA NEWS-FREE PRESS

Freak spring flood turns Lee Highway in Chattanooga into a kayaker's waterway. Abnormally heavy rains last March caused South Chickamauga Creek, an uncontrolled tributary of the Tennessee, to inundate the Brainerd section of the city for three days. Even the big river itself rose seven feet above flood stage. Damage appraisals ran as high as 65 million dollars, but authorities estimated that losses would have been nearly ten times greater without TVA's dams and reservoirs.
