- E. SESSION SUMMARY:

The target contains a characteristic loftiness and sense of great vertical height. There is a very thick and "solid" green associated with both of these concepts. There are tall, flat edges, some of which either drop out of sight below or are obscured by mist/clouds/smoke.

There is a shining lattice-like feature on one side of the target. It contains criss-crossing lines and a long curved portion. This latter section feels incomplete.

There is a third prominent feature which occurs in the background of the target. It is long and wispy as well as containing a "delicate" feel to it. The view is spectacular and is one not seen by many individuals. There is a feeling that special arrangements and/or transport to the target are required.

MR [REDACTED] IS BEACON PERSON

"I felt a little tremor," David Livingstone admitted in 1855, as his canoe surged toward the thunder of the mile-wide falls he named for Britain's Queen Victoria. A plane **(above)** now carries tourists above the torrent of the Zambezi River, where the explorer saw "a dense white cloud with two rainbows." Pale moonlight recaptures one such rainbow in a haunting time exposure **(right)** that also records a star track.
