- E. SESSION SUMMARY

The theme of the document series target is "save the species". I could see whales moving through the water and space. This site has to do with interplanetary and environmental issues. A type of animal may be featured as a focus of concern. The letter S and the word super may be referred to in the document. The target revolves around a certain positive activity or track in response to our world. A circular or secular trek is the area where there is attention and movement of energy. It may involve an animal's journey.

CPYRGHT

BINARY STARS: ODD COUPLES

A MINORITY OF ONE, our sun has no companion star. But the majority of stars appear in company. Our nearest stellar neighbor, Alpha Centauri, is a three-star system, while Castor, in the constellation Gemini, must be counted as a trio of double, or binary, stars orbiting a common center.

When binary stars are close enough to interact with each other, they produce some of the most explosive, peculiar, and baffling events yet observed.
