- E. SESSION SUMMARY:

Due to my illness, perceptions are difficult at the present.
Hard to concentrate.

The ship's ultimate course is in a northerly direction. It is currently stopped near a point of land that is extremely rocky and jagged. This promontory extends out into the water and forms small, isolated precipices reminiscent of an island chain, only on a minuter scale.

This vessel is very hard to access. There is a feeling of "inconsistency" associated with this target, whether it is the tasking, the information provided or the vessel itself. It is a very hard target to lock onto.

Viewer's Note
