In early November 1973 we received a letter from

[Redacted]

in which he requested price and delivery information on a compact, 60mm telescope that he manufactured for amateurs. The following paragraphs are taken from his letter:

As you Americans do not want to tell us that the so proudly called 'flying saucers' are, and above all, that they work (and this may be very important in the future), I need your excellent telescope for myself and my observation group which I am just starting.

"The UFO [Unidentified Flying Objects] are coming more and more over this country, and seeing perhaps to the very core of this land and the beautiful skies, we have been more often in the sky than the busy Americans.

"When telling my tax return, please remember that the parking must be almost empty-plated, because otherwise the local vandals may destroy the telescope even before it reaches me."

- End -
