UNEXPLAINED TRAVELLING BRIGHT LIGHT SEEN IN THE SKY

DATE: 27 October 1977

SOURCE

I. About 10 PM on the night of 10 Jul 76, while en route from Leitang to
Honshu by train, we saw a bright light in the air which was travels by
a long trail of black smoke. It was much too bright for a plane. It
may have been five to 1/2 miles distant and was under two thousand feet
above ground.

II. We inspected our guide's text but got only a bare sense that
it was probably a flying saucer. The guide was "Traveller" who had been
with a party of which I was a member on a previous trip. Whether he
know what it was could not be determined.
