RE: FOIA #007-20(2)

Dear

This correspondence is in response to your request submitted to the DoD Polygraph Institute (DoDPI) for documentation regarding audiovisual materials pertaining to the Polygraph. Your request was referred to DSS for action/response and received on October 18, 1999 for processing. Your request is currently being processed in accordance with the Freedom of Information Act (FOIA) 5 United States Code 552.

Enclosed as a partial response to your request is a "Bibliography Listing" of audiovisual materials located that at DoDPI.

Further, in paragraph #2 of your request, you asked for "...A copy of any polygraph training curriculum created by DoDPI...". Due to the extensive and in-depth nature that "any" portrays, we ask that you please narrow the scope of your request by including *specific dates* as to which you wish for us to search. Please understand that by requesting "any" polygraph training curriculum materials created that this could cover literally thousands of documents which may be maintained at the DoD Polygraph Institute and due to limited resources could take many months, possibly years to gather and review for release to you.

Additionally, we must inform you also that due to a significant number of pending requests, a final response determination within the statutory time period (20 days), may not be possible. Your request will be processed in a multitrack processing system based on a first-in, first-out concept. If you would like the information possibly within the next 20-30 working days and can demonstrate to this office a compelling need for this information, we may consider expediting your request. Attachment (1) contains information on multitrack processing and what constitutes a compelling need. This attachment also contains information on how to request expedited processing.

Should you have any questions pertaining to this correspondence, please feel free to contact my Ms. Layne of my office at 703-325-9448.

Sincerely,

LESLIE R. BLAKE
Chief, Office of FOIA
and Privacy
