ISOO Notice 2019-01: Agencies Eligible to Receive Referrals from Automatic Declassification at 25, 50, and 75 Years

September 27, 2019

The following agencies have received approval from the Interagency Security Classification Appeals Panel (ISCAP) to exempt specific information from automatic declassification and may receive referrals¹ resulting from automatic declassification reviews. Each agency is only authorized to use the exemptions listed in the respective tables below. In accordance with section 3.3(d)(3) of Executive Order 13526, “Classified National Security Information” (the “Order”), these agencies should not be sent referrals for information that they are not authorized to exempt.

The agencies listed in the table above are the only agencies eligible to receive referrals for classified national security information that is older than 25 years old.

When reviewing records containing information created by another agency, the reviewing agency should only refer information to the originating agency if the originating agency is authorized to exempt that category of information. All referrals must meet the standards in section 3.3(d)(3) of the Order. Agencies should consult existing waivers and the receiving agency's declassification guide prior to referring.

25X Exemptions: Agencies designated above as having ISCAP-approved 25X exemptions may receive declassification referrals for specific information contained in records subject to automatic declassification at 25 years.

50X Exemptions: Only agencies designated above as having ISCAP-approved 50X exemptions may receive referrals for specific information contained in records between 45 and 70 years of age.

50X1-HUM and 50X2-WMD Exemptions: Information properly identified as information revealing the identity of a confidential human source or human intelligence source (50X1-HUM) or revealing key design concepts of weapons of mass destruction (50X2-WMD) is exempt from automatic declassification at 50 years. To exempt this information under these categories, it must fall within the specific limitations in section 3.3(h) of the Order. Agencies that have not notified ISCAP of their intent to use these exemptions should refer this information to the agency with the appropriate expertise to make this determination. Depending on the origins of the information, the CIA, DIA, and FBI are most often the primary agencies to consult regarding 50X1-HUM. Similarly, the DOE is the primary agency to consult regarding nuclear 50X2-WMD and the Army is the primary agency to consult regarding chemical or biological 50X2-WMD.

75X Exemptions: Only agencies designated above as having ISCAP-approved 75X exemptions may receive referrals for specific information contained in records 70 years of age or older.

Background: Sections 3.3(b) and (h) of the Order allow agency heads to exempt specific information from automatic declassification at 25, 50, and 75 years. Section 3.3(j) of the Order requires the agency head or senior agency official to seek ISCAP approval for such exemptions at least one year prior to the onset of automatic declassification and specifies the requirements to obtain this approval. 32 CFR 2001.32 instructs agencies on the preparation and content of declassification guides and on the process for submitting guides to the ISCAP for approval.

During the declassification guide review process of the ISCAP, agencies are required to justify each information element proposed for exemption from automatic declassification at each milestone by describing the damage to national security that would occur if the information were to be prematurely declassified. The criteria for the exemption of information become more restrictive for 50X and 75X exemptions, which must be differentiated from 25X exemptions.

As stated earlier, agencies are reminded that section 3.3(d)(3) of the Order requires that only records containing classified information that can reasonably be expected to fall into an

exemption detailed in the receiving agency's ISCAP approved declassification guide may be referred to that agency.

Additionally, section 3.7(b)(3) of the Order requires that agencies exchange detailed declassification guidance with each other under the coordination of the National Declassification Center to enable the proper identification and referral of information.

Identifying that a Declassification is the ISCAP Approved Version: It is a reviewer's responsibility to confirm the declassification guide they are using is the ISCAP approved version. To facilitate this, below is a list of the dates of each agency's ISCAP approved declassification guide:
