B6

Thx for the update, and all you're doing. And no apology necessary at all.

Because you're working w Southern Command on clearing planes, I wanted to alert you that Paul Farmer is trying to get back to Haiti w a team of doctors and supplies tomorrow. He is leaving from NY around 8 on a private plane, tail # 410 MIKE. I'm copying Huma who is also working to get clearance for the plane.

I apologize for the delay in responding. We were planning for tomorrow's commodity lift.

Current status is that planes are landing at the airport but the Govt of Haiti is prioritizing and managing throughput and that makes its capacity very low and congestion very high.
