Just fyi - here I am on the USNS Comfort (which sadly it appears, or so the WSJ tells me, did not get its mission expanded or extended - I had hoped at least the former so while it is there with its 1300 people including hundred+ doctors it could be helping more people on even earthquake-related injuries that needed to be re-set or begun rehabilitating etc). Also, the woman second from the right is the person from the Clinton Foundation who was working with the pharmacy at HUEH (general hospital) and related pharmaceutical supply chain issues; everyone spoke very highly of her competence and contributions. Please share with my Dad (wasn't sure who would be the best person to forward this to). Thanks.
