

[Redacted]

From: Strobe Talbott [Redacted]

RELEASE IN PART
B6

To: Hillary Clinton hr15@att.blackberry.net

Subject: [Redacted]

Hillary, on a somewhat (but not completely) different track from the one that's brought us together of late: [Redacted]—a dear friend who's been vastly helpful to [Redacted] in her current "science experiment," and who, as you know, [Redacted] and whom you've supported via the Elizabeth Glaser Pediatric AIDS Foundation/mother-to-child int'l work—would be interested, when the time is appropriate, in working for you on issues like PEPFAR (pediatric AIDS in particular), obesity, tobacco, women's reproductive health, pandemics, and global public health in general. These are, as you also know, not subjects on which State has traditionally asserted or distinguished itself. But [Redacted] guesses—as do I—that that's about to change. If and when you or someone on your behalf wants to reach out to him, best is by e-mail: [Redacted]. Cheers, Strobe
