

## JSC Master Plan

**Summary:** The Mission Support Council (MSC) met on October 19, 2017 and evaluated JSC's Master Plan (MP). Each center is required to provide a master facilities plan in order to ensure alignment with Agency goals, commitments and is compliant with NASA Directives to include NPR 8810.1A Center Master Planning and the NASA Office of Strategic Investment (OSI) policies, procedures, and plans. This plan is an update from an MSC JSC Master Plan presented on July 14, 2016 where the council decided to not approval the plan. In making this decision the MSC evaluated the Agency priorities, ability of this plan to meet the requirements of the Center's goal established by Agency mandates, internal stakeholder inputs and external stakeholder requirements.

The Mission Support Council made the decision after reviewing the data and analyses provided and consultation by the recommender with the following stakeholders and several others

- C. Williams, Assistant Administrator, Office of Strategic Infrastructure
- S. Robinson, Director of Facilities Real Estate Division
- R. Clay, Human Exploration and Operations
- M. Wolfe, Executive Director State Historic Preservation Office, Texas Historical Commission
- A. Machuca, General Manager City of Houston Airport System
- J. Kearns, Science Mission Directorate
- WSTF - White Sands Missile Range, Aerospace Data Facility and GSFC TDRSS 1 & 2
- JSC Senior Leadership Council and Organizations

**Decision:** Based on this review, the MSC finds that this plan is compliant with the Agency Facility Strategy adopted in 2009 and other required Center planning directives, policies and procedures. The MSC directed JSC leadership and facilities management, working with the OSI, to execute the JSC Master Plan (MSC-2017-10-005) as proposed with the following observations:

- The plan positions NASA for success at JSC, enabling great progress against all defined metrics
- The plan reflects a strong linkage with the recent Center Strategic Planning Initiative (JSC 2017)
- The plan reflects proactive consideration of opportunities to honor mission commitments as well as prudent institutional stewardship
- The plan identifies and positions the Agency to benefit from the use of an innovative GSA authority

This MSC decision approval does not constitute budgetary approval. Related budget decisions will be worked through normal CoF processes.
