James Clapper, et. al:

More:

[\(b\)\(6\)](https://twitter.com/(b)(6))

New:

*** VLF record-- decodable now, un-erasable (patchwork at least), robust, global: public available with high-hacker skill sets.

19kHz-20kHz is a divide by 7 from the Ham radio LF experimental range (outbound, verified by my jammer that revealed the remote auto-gain for me:

135.7kHz-137.8kHz): loud, and global-- check out Australia-- many English speaking actors, and little else on the VLF (remote? Maybe loud due to distance to hit targets in Australia and remote auto-gain)

*** MKUltra-- their MO left and right-- look at Ray Hyman at Harvard, UO, and work with the Stanford Institute. Even simulated insanity for unwilling subjects-- of course the CIA would hand off any military developments to a post-MKUltra branch of research. The UO cognitive scientists are "hard-science" and biology oriented in emphasis-- Ray hooks up with them via timing experiments, and Don Levi via informal logic interests (psych paper evaluation)-- both were at Harvard (with Timothy Leary) and both came to the UO in 1966.

*** I'm now seeing more "legal" looking investigators-- some voices: "The FBI confirmed investigations" but I hear them weeks later: no help for them yet; plenty of "winking"-- but no direct contact with me yet-- I think a corrupt leadership fires agents and investigators, and denies requisitions and clearances.

*** Rough sense: those who hear me: orange on Wednesdays and Saturdays: add perfecto + thumbs up gestures (3 points of convergence): NB-- orange on your map & paranoia "noise": used by the MKUltra people-- simulated paranoia (semiotic time diversions, etc.: I suspect Sue Clapper here-- maybe helping (context cue communication: CIA agent "pseudonyms"), or time-buying)

4-page pdf summary-- print out, walk this to your local FBI (or legal/intel)-- ask for help: do this at least for legal protection (no duress when you don't brain-storm and offer all your money first before violating me or spraying an additional "my inner voice" frequency on the VLF (your inbound if implanted)-- I wouldn't doubt the criminal leadership would use anything here with me to put others in solitary too if they could:

<https://www.docdroid.net/vdrFtXE/mind-radio-implant-hostage-summary-4-pages.pdf.html>

Remember-- not just celebrity sex slaves and compromised "senator Johns": the ability to sabotage peer opponents to support allies and friends who hire/fire down a "pyramid scheme." (bottle neck here: number of people vetting sabotage).

People may be phone trapped with white-listed and black-listed numbers and pre-fixes.

More in-depth:

The VLF (19kHz-20kHz) looks to be decodable (inner and outer word-audio frequencies, web-crawl collectable cross-referenced (out of sync by material anomaly = every image: ~one more x,y scan line) spectrograms (+ NASA and other natural radio events getting more "hobby" records)-the signal is constant, strong, global (beacons?) and probably much less in number of signal lanes than those implanted (antenna measurements needing to be entered into radio-telescope equipment)-robust both in signal prevalence and in the info repetition (like letters for audio features, or motor-prep for mouth: features between 30Hz and 130Hz, repeated for loudness (est.))-convertible to two streams of searchable text (expect a "patchwork" of more or less data--each spectrogram: way to short, every additional w/ same signal: 1 more "scan line" on the x (time, feature frequency necessities) and y (signal differentiation):

Look at the time stamps (updates), and at 19kHz-20kHz (also: 16.2kHz -- maybe rectenna corkscrew from prior implants (audio, not brain)) + a diode, wire wrap + two antennas for "differential radar bouncing of inner skull and summed with neuron action potential firings (electrical 'sparks'):

(sign up for free-- see full texts):

<http://journal.frontiersin.org/article/10.3389/fnins.2015.00217/full>
(brain audio to text)

<http://journal.frontiersin.org/article/10.3389/fneng.2014.00014/full>
(inner voice decoded)

NSA will HAVE to do this, to see what is out there for hackers, etc. + WHAT WAS COMPROMISED? (again, text produced is text-searchable, and statistically analyzable (concordance too: full vocab).

Immediate action: flood noise on the inbound range (wideband, barrage) first at sensitive areas (pentagon, etc.)-- Target Don S Levi (jam freqs, location, immobilize calling ability (break hands?), and all UO affiliates: they abuse and rape the rest. Block my signal, and potential relief for some too.

Noise on the inbound may deflect and protect some of the outbound from a permanent VLF record (advice: decoded content is as illegal as snuff films and child porn: expect that some of that is)-- the inbound can be turned on with communications and "posting"-- people heard in their heads, and do not know it, and "feedback"-- an implant in a dead person, posted on a mark, with the "zipper open"-- w/ the marks voice re-broadcasted loud on the widely recorded VLF (NASA, natural radio, solar flares, meteorology, lightning, etc.)

Long phone lines may pick up some of this VLF signal (picks up "lightning radio") as noise that can be decoded (voice features in the "kick-drum" range w/ direct to audio conversions: 30Hz-130Hz), or supplement other data sources (like very long antennas, resonating?)

To Prove: combine radio expertise (Harris may have started an investigation, I think Carl Harris is in solitary) with the decoding expertise (above). The decoders probably need a mono WAV of the AM-type outbound (should be 2-- send both): they could spectrograph separate the frequencies and trigger the 92 features (30 audio (electrode discovered), 62 modulating (like mouth muscle movement-associated activations, etc picked up by an EEG))(92 features correlated with, I think, their audio output features (from connectionist training: brain measuring instrument numbers correlated with time-stamped microphones (or video: see J Gallant's work (back to 2008: images with Miyawaki in Japan)) you may need to "light up" the implant with a resonating inbound frequency (flat line): but I suspect an additional rectenna in the screw-mount, attuned to a constant VLF, LF, etc. source (think bunker mole)).

Not only: verified testimony (we get raped) -- but proves the outbound has the inner voice-- should see that "ear-plug-stoppers" or the like only stop any calling ability, not being heard. If the possible (if over-implanted: "only ~100 lines simultaneous" with freq switch in & outs-- who thought this was real? Maybe the Execs and friends only-- like 40 lines for them, and the rest for isolated victims).

Also: I suspect heavy FBI/DOJ corruption-- due process for me should have quite a bit of by-product discovery and lead to some executions high up (there is no "treason in the 2nd degree"): act now, report for legal protection: walk to an FBI if necessary, drop off my 4-page summary.

Expect: all the presidential candidates are implanted and know they are accessible. Hillary Clinton looks to have been attacked more before the campaign-- may be "protected from the truth" -- a phrase used by Bush '43.

The use of brain-washing looks extensive-- and focused on specifics: like a drug-addiction, conditioned behavior, potentially using "barfs + bliss" -- hopefully not hooked up to phrase-recognition triggers (maybe subtle, constant associations).

The demographic in intel solitary (BOP SAMs): same as the public figures reporting being raped ("Hollywood" and the Bilderberg group "power crowd")-- reports of them talking to friends, thinking of reporting-- but what leads them to SAMs? Crimes of passion (murders) that were obviously manipulated unbeknownst to them at the time. Trials in secret (they "signed up" with Ray Hyman or Don Levi-- official DARPA/CIA advisor Ray Hyman)-- and faked deaths to cover them being in solitary w/o the ability to visit anyone but immediate family or a lawyer, and no rights to write or call.

<https://www.docdroid.net/vdrFtXE/mind-radio-implant-hostage-summary-4-pages.pdf.html>

[\(b\)\(6\)](https://twitter.com/(b)(6))

Added, recent research insights:

Background-- looks like an MKUltra element (Ray Hyman, SRI-- University of Oregon psych dept. using philosophy dept. at diversion): unwilling subjects, simulated insanity, brain-washing (conditioning), radio-stimulus, noise-torture-- all used, and MKUltra traits-- was assigned the recon implants developed by the Air Force and Navy-- early 70s-- found out how to "hide their voices" and "dial into other people" -- if there are limited lines (100) -- and 1000+ implanted-- the switching equipment would have antenna measurement numbers (precise echoes of resonance frequencies) needed to "plug-in" to the radio-telescopes -- these could be switched in and out, creating the illusion: more lines at once (Ray Hyman: also a DARPA deception advisor-- into the history of magic, paranormal debunking (in the tradition of Houdini) and part of the "Reason" crowd-- I think he is an anarcho-capitalist that framed democrats as political manipulators and "sex-slave" johns for Hollywood stars (Ray-- affiliated with "Stargate" too) Don S Levi (son Adam H Levi-- at Harvard with Obama in the 80s (est)) -- Don S Levi: UO philosophy prof, logician, and at Harvard with Ray Hyman and Timothy Leary (psych dept) pre 1966 (1966-- both now at UO)-- Ray is from Maryland (ft. George Meade-- an NSA HQ-- and I suspect: the 6940th electronic wing houses the switching equipment). Speculative: the SLA (a cult using rapes ~'74 (Patty Hearst w/ a machine-gun photos: may be implanted ~"you don't go back from brain-washing, you change," and has a 'Don' and a 'Will' (cp MKUltra founders + UO philosophy profs Don Levi & Will Davie (long time abuser)-- just up the road from the Stanford Research Institute at Menlo Park)-- maybe some "back" and the Don & Wills are fronts (back = Ray Hyman + ? Mike Posner? Tom Givon? Not sure on other than Ray-- his son Phil maybe involved with Don Levi).

100% solution to remote Malech reader and mind camouflage in high-risk locations:

The wi-fi headset, method-- triangulation proof mind camouflage-- don't use patterns on inbound-- just random firing patterns-- just use so many transmitters that the weave elements are undetectable at distance-- neuron firings are already very weak and should be barely detectable but in sums.

CLARIFIED ASSESSMENT

The current situation understanding:

DNI head James Clapper set up two front groups going back 20+ years:

-- One was a contractor group going back from Norad contractor E D O to ITT to Vectrus -- with the administrators not knowing implants made people accessible 24 7 and not tipping off clients with a bad vibe, as with double blind experiments, for early adopters, people perceived as responsible and able to afford the technology, mostly cream of the crop public figures.

-- The other front is composed of University of Oregon DARPA psychology professors, who got implanted and were given equipment to experiment with and found "head numbers" to call and have access to the power crowd early adopters implanted by the contractors, and they use philosophy professors as a front

-- Meanwhile, the government mind radio implant program was frozen, with no use allowed to stop water-boarding and prevent terrorism, only the top official security implant program is maintained, and the program is hidden from scrutiny

-- In a related back story, graduate student Barack Obama was selected at Harvard (as seen through student Adam H Levi's eyes) : profiled as a CEO psychopath with small group organizational skills (a group does his homework for him as he becomes a figurehead for himself with a goal to become president)

-- Obama may have been unsuspectingly implanted AND given implants to put up his nose for his use (with him thinking, "I'm doing crimes solo on the way to president, not as an unsuspecting collaborator with James Clapper" and Barack sets up a Mafia silencing tactic with a torture group with Don Levi to maintain the perceived control of the criminal implant use regarding those who know via the University of Oregon professors)

-- Don S Levi, with his exploited abusive personality disorder (narcissim gone psychopath) appears to be addicted to meth (for long abuse sessions) and some opiate like oxycodone, for the next day come down crash. Hence he is now addiction controlled for torture use by Obama and others.

-- Adam H Levi, the son of Don S Levi, is now a DC assistant attorney General for investments and securities, which is at least useful for insider trading info research.

-- This looks like tight knit groups of families having power fun, killing and raping, and making money for future dynasties, and maybe some charity foundations to convince themselves and others this is OK in the big scheme of things

-- Now it is clear that by holding back science and my multiple suffering reduction and biodiversity foundations, they are holding back aid to any real values other than them getting away with murders

-- It now looks like my contact was contained: all leadership who were notified were replaced slowly over two+ years-- and my internet, phone and mail strictly under control

Again narrative clarification:

Clapper sets up two fronts:

- contractors going back to EDO, not knowing implants made people accessible 24/7 : early adopters-- responsible people
- Government implant program frozen-- not use to stop waterboarding-- just security for top officials
- DARPA profs get "head numbers" and have access to the power crowd early adopters
- Obama selected at Harvard (seen through student Adam H Levi's eyes) : CEO psychopath with small group organizational skills (they do his homework)
- Obama-- maybe implanted (no need for additional "president" implant-- same frequencies, presidents lied to (safer)) AND given implants to put up his nose (I'm doing this solo, not as an unsuspecting collaborator: no excuse-- just "opportunities for a douche bag" (how is he helping NOW))
- Adam H Levi -- now a DC asst. AG for investments and securities-- at least insider info research (for who: him, and/or ?)

Again-- tight knit groups-- families and very close friends:

Clapper's, Levi's, Obama's-- but looks like only Clapper's family is 90% (2nd thoughts for Clapper himself: not into hobby evil to the exclusion of all else) into it, Levi's : 80% (Adam, Joanna, Katherine: half-hearted, inevitable doom-- at this point: drug addictions), Obama's 40% (Michelle? clued in now?-- I'd look at drug control: serious or some threat (in head or closet rapes-- again: serious)), Hyman's: 20% (grandson in Houston? clued in now?)

What does the audience here hear?

Recognizable government officials-- two are "creepy"-- Clapper "chess guy creepy"-- Obama "emotionally invested in disrespect creepy"

Others: their family and friends-- eg: "not Dawn Meyerriecks, but Jennifer Clapper (Clapper's daughter)"

And-- the DARPA profs and sadist logician Don S Levi front

Looks like Don is addicted to both meth and some opiate: meth for abuse, opiates for the crash. His choice? Slow to develop?

There may be some long-term politics for Clapper (et. al: family, friends):

-- Big losses, bigger gains (think their ideas: planning 911, etc.)-- break the law, kill many, foreseen trajectory of gain (non democratic)

-- Public figures get a major "privacy is important" impact on their souls-- libertarian propaganda attempt (manipulation, not open debate)

This sort of "Utilitarianism" -- like thinking a heroin addict got it right: just brute pleasure-- pressing a button to get high.

Jesus: "you naïve simple minded hypocrites-- everyone a slave until everyone is OK = everyone is always a slave-- and I work hard as a teacher, and this ointment helps out here."

And me: "you rape me to re-arrange the deck chairs on the Titanic, and lock my foundation beneficiaries (the poorest children on the planet) in the deck below to die: ~7000+ a day). BTW-- cure for the blind.

* those implanted by the contractor do not know-- the DARPA profs do : not sure how they "got lucky" finding numbers.

Also-- a good line for the president: "Luck is where preparation meets opportunity"-- BS on any "I was manipulated"-- right now is bad enough.

I'll but this out there again:

KGB-- would have been "materialists" (think Marx and Dialectical Materialism)-- this would have lead to a focus on tech:

Clapper (at Tech Application, etc... like Dawn Meyerrieks (think Dimitri Medvedev, etc.)) may have been a target (tech positions)-- and may have been a USSR double agent-- then the USSR fell in 1991-- what happened next? EDO bought the assets-- Adm. Denis Blair (and head of EDO, a communications control contractor for NORAD, etc.) -- probably a first "Double Blind Front": implant power folks-- and don't give off a "bad vibe" -- the equivalent of an experiment implementer not knowing if a placebo is given to a subject-- does not tip off subject at any cue level. Seems the same Gen. Hunzeker.

Meanwhile-- DARPA cognitive scientists at the University of Oregon (Mike I Posner, Ray Hyman) work through their "front" -- some philosophy professors (Don S Levi-- probably a friend of Ray Hyman (overlapping interests: fallacies)-- and access those implanted by the contractor, and do not know that only inter-personal calls are cut, not their outbound.

Obama hooks up with Don's son at Harvard-- profiled by Clapper (predisposition to be evil (CEO psychopath) and small group directional ability (his crew "of him" -- the figurehead homework crew)-- seen through Adam's eyes at Harvard: gets an implant (I think: in his nose-- but may have been implanted too (Clapper control))-- may have been approached by someone other than Adam (Aaron Levi?-- someone in the UO / Levi group)).

NB: there are some ELF folks in Eugene "radicals" -- may have some special forces folks to "implant people in their sleep in Eugene"-- may have been lied to as to why (think: Cheyney Ryan-- Hollywood (his dad was actor Robert Ryan)-- and thinking that would help keep this from being buried indefinitely).

Hearing some idiot "science flack"

Obama, Clapper, et. al:-- really:

Despite their millions of victims (impact assessment: my foundations, and here: the scientific correction coming in the future (just knowing what is possible with the mind radio would have helped the relevant scientists)...

Looking like people behind the window on the Today Show, waving "look at me" while the parade of science goes by

Huge implications with computer-brain interfacing

And Obama-- a selfish spoiled graduate law student who met Don S Levi's undergraduate son at Harvard, got an implant to put in his nose-- and directed others to do his work, and became a figurehead for himself: "I want to be president."

Turns out: profiled for predilections and abilities by Clapper. This point-- probably more of a deal for Obama-- does not matter that he is fundamentally stupid (myopic: can play chess and debate)-- but so "un-wise" in being EVIL.

Engineers:

When implementing the the "60GHz" hardware timed, timing region differentiating head-set, and neural net data interface:

the feature/cue set will need "time slices"-- this is between the radio differentiated "mind radio" implants which are fast, but only one region summed, and fMRI work which is slow, but many regions-- see the Miyawaki, et. al. image and Gallant, et. al. video work from 2008 and 2012:

<https://www.youtube.com/watch?v=daY7uO0eftA>

<https://www.youtube.com/watch?v=nsjDnYxJ0bo>

I'd look at summing the values between t1 and t2 in the feature set first (need to experiment on which time frame would be relevant-- I'd think, but this may be wrong that you'd have t1, t2, t3 be shorter intervals as you approach the "present").

Looks to me that Obama and Clapper's strategy was this:

- 1) Get a "prosumer" spy hold on my internet, phone & mail with a small crew of young people (my phone intercepts: young guys)
- 2) Replace all the relevant leadership (those who were told) with new leadership
- 3) Don't tell the new leadership about my contact

Why stupid? I've seen 100s of investigators-- and they've shown up where I've been out in public-- have "passed signs" and have seen each other.

Like anyone is going to see this is real, and then give up.

NB: Appears that Clapper is implanted -- might need to get him in a Faraday Cage environment ASAP (War Room, etc.)

He probably has more info of various compartmentalized programs due to implant crimes-- but -- much would be the people implanted and probably already recorded abroad.

FBI should approach-- I think he' d like a demand for cooperation.

Engineers:

Re-- the "60GHz" hardware timed helmet, and neural net data interface-- I outlined the "inbound before"-- this could be two way-- just have receivers that triangulate the transmitter differences (transmitters can be set to a level baseline (zero, flat) and measure the difference at the receiver-- the "fMRI replacement with transmitter stimulators"-- and "secondary baseline" signals might be used for real-time calibration (cord length, material differences-- etc: this would be needed for very high resolution measurements: could be more than 60GHz)-- this could be used, potentially for "mobile fMRI" and less expensive real-time brain scanning when the resolution is lowered.

Two data streams:

--video camera or microphone or muscle movement sensor + balance (level (compass? Left right swing feeling?)-- might help with "sick to stomach" issues)

-- The computer-brain interfacing headset above-- separate signals for each region

Data correlations for each area to each source (left right ears / eyes = two mics / two cameras) might clarify a one region mapping-- and read/stimulate separately = 1 region with 8 training sets (4 sense organs, both ways (in and out)

EG = 4 AV sources & 20 regions = 80 pairings.

Also combine all 4 AV sources to each of 20 region data streams-- the feature set of all 4 AV on the left (or right) and 1 region on the right (or left) = 20 data correlations-- one for region -- both ways = 40 training sets.

(picture data sets as vertical --- and t1, t2 as well multiplies the feature sets).

The brain measurements-- much less than the electronic data (except the speed-- the t1, t2 may be very many-- as I'd predict patterns in the kHz range-- while Video might be 24Hz movie to 120Hz+ fast video (games))

I'd use video codec data-- and use the kind for "low bandwidth connections" -- I'd try them all-- as the brain correlations might work better for one approach than another)-- I've found good rendering with Windows Media 9 codec, and Onto (used by Adobe for flash: thing-- web deployment = low bandwidth).

The above: needed for the "VR game googles" or direct-brain VR head-sets with game console interfaces-- to get the brain activity audio video corelations.

Also-- cross correlations

(maybe smell + taste = "samples")

And in/out just like PDP/Connectionist/Neural-Net training

Subject: RE: [Implant-hostage-situation] FBI

Found-- emails not getting through: resend-- look at much below

A "solution" (president, etc. in the way):

KNOW that if you need a solution to brain-computer interfacing issues, you have them-- no need to spend and implement if you see no use (other un-thought of variables: like "diplomatic insanity.")

Then : "triple press release" (internal, international inter-governmental, public)

Everyone wears them. Why? To "camouflage those who need cover"-- only people who have "secrets" and you sense the headband (no usable signal)-- then they would be identified-- everyone wears, them-- it say nothing other than :

government employee-- might have to have contractors wear them too-- if some element looks "diplomatically insane" or "is willing to risk passion off local citizens with sweeps in public"-- this should MITTIGATE problems if they arise.

When, in history, has there ever been specific tech that could not be addressed and mitigated with counter tech.

Again-- this falls in the Codename Tempest spectrum: you have data from the 80s-- look at the full spectrum impact-- all uses of brain-computer interfacing should be less than that (humans are fallible-- have less accurate memory in both quantity and exactness-- and much "noise" (BS thoughts that are irrelevant)-- probably never "integrating info"-- other than their specialty itself integrating various elements : "why do these specialties have an intersection" : monitors and communications lines: they imply, indirectly, info integration too-- and I doubt you've achieved zero tolerance on laptops, etc.-- this fits the "information inflation" idea too).

Remember-- crux anecdotes do not destroy a theory-- counter-examples are usually the exceptions that prove the rule-- and point to needed refinements.

More:

Radio waves are always perfect sin waves. Action potentials are neurons firing.

Added with picture email:

-- You will need "NEURON FIRING overlaps" : maybe 2-3+ transmitters (headband maybe 4 would do at corners—need to experiment, and certain personal, situations might require more/less—or all the same = cheaper mass production-- might be able to create "overlap appearance" with synthesis too.

-- also—in certain situations – you send "proxies" with the "heads in a secure location"

Brain neuron camouflage headband-hats:

-- Everyone wears them (abroad, etc.)

-- Could be CHEAP:

-- not a sampler, a "synthesizer"

-- AM type-- no "full spectrum"-- lots of "zero amplitude"

-- combine several frequencies to create "random" action potential shapes at the right power level (as quiet as the brain: not phone interference, etc.):

http://www.physiologyweb.com/lecture_notes/neuronal_action_potential/figs/neuronal_action_potential_w.jpg

(next email will not be plain text-- will include jpg embed)

-- AM type can sum and subtract (polarity)-- you need to "stretch with summing and subtraction" several (possibly "phase modulated"-- timing) signals to create enough noise to bury the signals-- could be that some neurons have different types of action potentials (cardiac)-- you'd need to focus on sensory/motor types. Might not block inbound-- but no "mind control"-- which requires 2-way interaction (random thoughts?-- might be able to still communicate with a "remote sender.")

-- You will need "overlaps" : maybe 2-3+ transmitters (headband maybe 4 would do at corners—need to experiment, and certain personal, situations might require more/less—or all the same = cheaper mass production.

-- also—in certain situations – you send "proxies" with the "heads in t a secure location"

To clarify:

The red tape-- the DNI and president are essential "integrators"-- and they can use legal moves to create delays in stopping the treason and sedition ("prove it)-- sounds like Clapper was implanted-- and changed his tune a bit-- not sure if this a "hang tight strategy": effectively causing treason and sedition through their command positions.

-- and with my research: looks clear why: Clapper set up the two fronts: created opportunities, and probably did "profiling"-- eg. Don Levi's foster children might not be involved now, but think: juvenile delinquent-- and Don-- a sadistic molester and OCD narcissist ("YOU fail my impossible standards, I'm 'Gad'" sic)-- a clear mental case (DSM: pathological narcissism into anti-social personality disorder)-- and Obama-- probably not just HARVARD and LAWYER (think the other two traits: YALE and MANAGER)-- and BLACK-- and Harvard Law Review editor-- but I'd hazard-- a sadist-- and my diagnosis: CEO psychopath-- turns off emotions "when success requires ruthlessness." I think he had an implant (may still have one) that he can stick up his nose-- may have access to more than one-- may use on the road, or in the WH (stored in a box or bag lined with layers of aluminum foil (think "booster bag"). Clapper-- his psychology is not as developed as a criminal-- this was not his life-- this was his secret art hobby-- and he got caught-- the "voyeur" setting things up chess-like-- not invested as a "do-er"-- I'd hazard B. Obama-- also having a hard time with his "secret evil genius" being set up-- probably respects his criminal self more than his public accomplishments-- and may have expected some to be more impressed with that (sounds that way-- Barack: "what if it was me, not Don"-- me: "a turd by any other name smells the same"-- sounds like hostage Hilary Clinton was humiliated, and manipulated in to "admitting admiring this 'accomplishment'" (BS)).

Think:

In an abduction situation where a captive has a gun to their head-- you can make a sniper call.

Looks (and I hear this)-- the president and Clapper (working towards helping, it sounds-- this is habit re-direction)-- are creating legal red tape to continue sedition (by force of command: the constitution has been abridged at scale 0-- and treason (massive classified info disclosure-- more than Benedict Arnold or the Rosenberg's)-- the law (like UCMJ art. 94)-- puts the military in a hard space-- this would be a "take out call"

BUT-- the president can be implanted-- probably already has a security implant-- when could that "you don't kill them-- you interrogate passively" call be more clear-- I'd go to the FISA judges asap-- I think you'd find consensus-- may not hold up in court-- but enough to stop crimes in progress.

-- sorry about this-- I get distracted just about constantly

Identifying the implant victims:

-- I think I heard Gen. Huneker-- "we have an implanted people list"-- he probably did not know that the ear plugs did not work : makes sense-- double blind.

-- There may be others-- and the US may have some frequencies to triangulate

-- the implant has no "auto-gain"-- a 1-800 leave your info (and we verify) option would need upping and downing signal power-- very slow-- so the recording is heard for a while.

-- Again-- I've verified the 2200 meter as the outbound-- found the auto-gain issue with a weak "smart jammer"-- ~136kHz

-- I do not know the inbound-- but find an implanted person, listen on the wideband 2200 meter, and signal up the frequency range until you hear the echo (timing)-- but note the auto-gain too loud or soft: no echo (signal bounces "through the eye of a needle"-- the range relevant to neuron threshold stimulation.

-- there should be a range-- but may be more than one type (I think the 39.1 that President Carter mentioned-- he may have been lied too, not sure if he got that from an experiment... but the inbound and outbound-- may be a factor of 2 (x2, x2)-- x10 is cheap, but VERY accurate antenna length may have been needed for a "double duty" VLF and LF Antenna--- the accuracy is needed for power (think "tuning tips" on CB antennas.

Again: no public disclosure immediately necessary to end the hostage crisis -- ALL the hostages are raped more or less-- in tandem with me, or when interrogated by the rape cult.

Do this: I think Dempsey helped develop it as a hostage (the various hostages throwing ideas back and forth with me, while being raped if they added info)

Discretion used to contact hostages-- fly them to a military hospital-- take deposition-- de-implant-- establish two-way legal obligations (restitution from US, no disclosure from them).

--
Foreign intel already knows-- verify (they saw your intel looking into me: ditto, how the military found out and "good to go" I've heard around my neighborhood (many placed people here since I got through 20 FEB 2013))-- and you'd be dealing with foreign elements in a similar way (may require "bribes" or more time-delayed restitution payments: you now have "verified testimony" (asking with an implant in the ear, or up the nose-- "did you just tell the truth in that interview")-- and you can verify if they did.

A little in office chat might be good--

I suspect chief of staff McDonough-- simply due to his intel specialty: communications-- may have connections to running the compartmentalized implant program being protected, when it is clearly a treasonous amount of classified info disclosure with any one still implanted and having info-- even "stoppers" would not be legal, given some of the info people have (much more careful with Codename Tempest level A info-- this implant tech falls within the Codename Tempest threats-- and much less then the entire group (monitors being remotely decoded with baseline signals, etc-- like turning a window into microphone diaphragm with a laser-- this is why monitors are shielded -- brains could have headbands that mask the brain signals: burry the patterns without making patterns the brain can recognize-- it works

with radio stimulation (priming and timing, not brainwaves: "popcorn and patterns")--computer-brain interfacing is already here and this group is probably already stalling any needed preparedness):

fMRI visual decoding (2011 Jack Gallant):

<https://www.youtube.com/watch?v=nsjDnYxJ0bo>

(many more-- since about 2008-- every brain sensor and stimulator will be exploited for this approach)

Sorry for the mess Mr. Vice President-- a quick summary:

-- two "front" groups with an in government coordination:

- 1) Contractors implanting the powerful and wealthy : (Dorne & Margolin, EDO, ITT, Excellis, Vectrus (traced asset from Robert Malech patent: 1974)
- 2) University of Oregon cognitive scientists (DARPA researchers) and philosophy professors-- formed a "rape cult" -- and "randomly dialed" those implanted
- 3) This required that inter-personal communication be stopped, while the outbound is still open (ear-plugs, etc: either designed to not work; were sabotaged, or the rectenna power supply went down (eg: the Omega navigation beacons, ending 1997)
- 4) Current: integration failures: DNI, WH-- why : Clapper-- Air Force, and Intel Tech (planning, application) when the implant was being developed for field agents. Obama-- at Harvard with Don S Levi's son (Adam H Levi-- current DC assistant AG for investments & securities: think insider trading research)-- Obama gets an implant in the early 90s to stick in his nose (or is implanted by Adam).
- 5) The idea: "power fun"-- raise money for kids, exit and frame others (Gen. Kutyna, Gen M. Padden, etc.-- implant developers (the top leaders in the few relevant spots at the time)
- 6) Approximately 2000-4000 hostages -- mostly public figures: think the Bilderberg Group + Hollywood (both sides of the camera) (I've heard 100s of voices I can identify, many I can not-- and the implants would cover: ~200-400, 2000-4000, or 20,000-40,000 depending on how many decimal places the "global LF ham radio zone" was divided into (2200 meter - - ~135.7-137.5kHz) (three decimal places for two frequency "integers" plus a 0 / 5 half extra maybe on the end: 136.0005: heard president Carter: 39.1)
- 7) The implant program was not allowed to expand: Bush '43: "we were pushing waterboarding to see why this was not available for use"--- looks like the program was "frozen" to avoid scrutiny.

I realize the slow process of discovery-- and the government folks doing their jobs-- but with key leadership as criminal (Clapper, Obama)-- SOP will not work here like it would had they been OK (eg-- an SOP approach to ending the hostages situation: indiscrete contact /de-implant (even at military hospitals)/ establish two-way legal obligations (restitution / disclosure laws-- foreign intel already knows of implants: verify)).

Here-- I think some need to see: "I do my job and part"-- does not work when key elements are corrupt-- so some are going to have to "work outside the box" a bit-- and stratify "laterally," when any chain-of-command use relies on a point that can be controlled by Obama or Clapper (the "relay" info).

Working on the list...

Again-- you should be be interrogating the president using his security implant-- better than the military having to kill him by law, due to "red tape, including legal redress" leading to delays in stopping treason and/or sedition (they HAVE to stop it).

Updated FBI contact list-- will clean and add more later (top leadership, etc.)-- for some the below may have some new items-- situation looking much clearer now (Contractor security implants, UO/Levi Rape Cult (Obama gets implant to stick up his nose 20+ years ago), Clapper (et. al?) coordination in the background the entire time (implant program not allowed to expand or draw scrutiny)-- motive: money for kids, fun for them-- eventually: exit and frame others.

Means--the outbound was kept open, when cross talk appeared to be shut off (e.g.: the "feeling of an ear plug" would stop interpersonal calls, but never stops the outbound signal-- either earplugs (radio noise generators) never worked, were sabotaged, or were rectenna powered, and the power source went down (like the Omega navigation beacons up to 1997)-- contractors implant wealthy and powerful, US program implants politicians, etc. (for "security" and/or for some: "neat idea: testing it out with responsible people first")-- then the UO Levi rape-murder cult (including Obama, if not lead by him: he is president, not Adam or Don) has access, and so does Clapper.

I'd check to make sure the president does not have implants (plural) that he can stick up his nose or put in his ear (with tooth floss attached, etc.)-- looking more and more like he was not implanted by the Levi group-- simply got an implant - (one or more) from the Levi's (via Adam H Levi)-- and used it to fulfil his wishes

Since I got through he has gone from looking frightened in the news, to angry-- reminds me of Ariel Castro-- that guy in Ohio who had three abductees-- at the first court appearance I saw-- Ariel was trying to hide behind his orange jumpsuit collar -- the second: he was indignant, claiming he should get pity.

Some messages maybe missed below:

Clear:

The "West US, left wing" rape cult is clearly criminal-- and either had access to implants to use on others and/or the signals of implanted people-- back to 1991 from my evidence (unless their "innuendo echo" was them implanted, and not knowing they were echoing my private info).

What did the "East US, right wing" contractor group think they were doing? (Dorne & Margolin? The torture started in 1994: EDO got the assets in 1992, ITT 2007, Excellis 2011, maybe Vectrus 2014)-- real security? Did not seem to be working here? Just "entertainment phones?"-- probably OK legally. Did they know others could get access to the implanted? Then not OK-- unless people knew. IF they knew that implanted people were accessible-- was there coordination with any other element (US CIA, etc-- eg a "private sector" intel providing illegal intel that the US would not do itself-- seems that the US element may not have known it was from an illegal source-- a sort of "legal & ethics double blind" (as when experiment administrators do not know if the treatment is placebo or not-- so they don't tip off the patient, and affect outcomes.)

Replies go to jcb (b)(6) -- not full contact list (US legal/intel/military leadership; intel professionals (INSA hack list); and "locals" -- "you can only learn what you already almost know" (facts & procedures)-- daily weekly digests should be available on request-- should get no more than a dozen emails daily-- two dozen monthly-- depending on "news."-- Thanks-- (b)(6)

Might look into:

Don S Levi looks to have had foster children-- maybe many (large family photo at his UO office -- with one black kid (foster (or affair)) + was picked up by a van with his, I think wife, driving-- Econoline type-- not mini-- often used by families that are large.

Might look into parallels: did the Clapper's have foster children beyond their daughter Jennifer (now in focus given suspected motive: "family dynasty" with money, after "fun rapes," etc.)

Also-- the KGB folks in Russia-- money, Putin with that too + a martial arts expert-- that would be target material enough for the criminals-- and it does look unlikely that the implants would be handed over to the USSR-- puts the Gen. Kutyna voice in question (he may not have known it was not done (he called it a "bad idea" in context-- done):

Also-- did the ear-plugs ever work? If not-- maybe agents were to be fooled, and not ultimately trusted with such a high-tech "top-secret" device-- would have been using state-of-the art NSA recognition in the 80s (real-time and not exact matches--motor control and sensation patterns sent from brain (unburied out of what sounds like static-- or the software was updated

later: less people added (if no programmer available) than updating the implant physical design)). Could again, point to Kutyna (given the "bad idea") + Clapper's "confession" seemed to include Kutyna-- but again-- he may be a frame target too.

Given issues now with the DNI, WH, etc.-- although "stoppers never worked" would give an angle of "only the UO / Levi cult is criminal"-- I am not accusing the government of anything other than what is going on right now (DNI, WH, etc.)-- and ask: how long has it gone back beyond the last 2 and a half years-- and the "this is even close to acceptable to those who know and can act" says there is "trajectory continuity"-- points to broader intel and government knowledge of what was going on-- to me, and others (nb: DNI (and others before it was established: Air Force / Navy intel, etc.) may have been using the situation -- either directly, or indirectly with more or less knowledge of the crimes rooting to the US government employees).

Thinking:

Clapper--

"right hand" of contractors implanting the wealthy with 'security devices'
(maybe even the USSR folks-- just rich Russians, a black belt Putin as 'typical targets')

"left hand" of Levi / UO profs rape cult dialing these wealthy people, ripping off and raping (Obama: part of this group, whether he knew or not)

-- another "pun" : clapping (DNI might have saw that for another reason-- intel integration)

Also-- Looks to me like Clapper (et. al. in government): make money, dispose of dangers (rape cult, Bin Laden implant, etc.) destroy evidence

Probably: long term-- a frame of Gen. Kutyna, etc.-- seems a motif over the last two years-- so that Clapper's family would not come under scrutiny

I'd look into: insider trading takes more than tips-- not sure how the rip-offs would happen-- but this might require logistics research-- I'd check to see if Clapper et. al. had government employees (DNI, etc.)-- doing that work for him under another guise (cost benefit of 9-11-- any Clapper friends and family invest in Halliburton, etc. before 9-11?)

FBI, etc-- here's a list of intel FBI (from the INSA email list hacked, and "refined" by me)-- I'll revise this list as I get "no longer works"-- you in the FBI-- should at least "discuss" at the "water-cooler" level, if not already (you should be high up, some retired)-- others-- you can contact them too-- report.

FBI-- re: me under surveillance-- and my occasional "J-walking"-- if you'd like: please document, and subtract the fines from a "\$5 million reward"-- might break even or such... I think this could be "strictly by the book"-- and still feel right.

Can copy/paste in a group discussion outside this loop:

Add to my list of "seems OK" -- in the CIA:

Mike Morell-- I suspect he was Obama's "foreign policy" "ear-piece" advisor-- probably guided by his last name a bit...

Porter Goss-- I think-- informal "gossip"-- pointed out the ear-piece continuum (tech) and suspected some knew about me 20 years back (true: eg Clapper)

Also-- Government employees: it looks like people "out there" are not being de-implanted due to "legal worries"-- some of you may have that legal option-- you have rights too: sue the government/program as another angle in.

I'm not making any accusations other than for what is happening every day now-- probably on public record--

These crimes should be pretty blatant-- and bust-able for what you see "right in front of you"-- CIA may have "Easter eggs" for the FBI-- I think my name (b)(6) (b)(6) should be a point of integration for many intel branch investigations (military too)).

Some FBI priorities: to stop the crimes:

- 1) block my out bound-- it is rebroadcast to 1000s
- 2) Stop the outbound of Don S Levi, and his family and friends
- 3) Stop the outbound of the suspects in the government (Clapper, McDonough, Obama...)

The FBI, DOJ-- and all the JAGs, Federal Marshals, etc., have full permission to use tapes of my headspace to stop the crimes and pursue the criminals-- all of it-- but I demand to be let out --at least stop the in and out signals (Navy or Coast Guard can block or stop; Air Force Space Command or NORAD could do the radio-telescope listening)-- your engineers could do it cheap (a LF Jammer in my neighborhood)-- I've been researching this for two decades (CT scan, reverse engineering, intel issues-- the history of the implant as seen via the public figures who would be involved due to their positions, etc.)-- with the last two accelerating quite fast.

-- I need my head space blocked in and out from the radio (family & friends would be great too)-- declassifying my sanity to me could come later-- but I've been "excommunicated" from family, friends, and the world for over two decades-- this is an abduction situation (Jaycee Dugard, those galls in Ohio-- similar)-- I've been here for half my life (b)(6)

-- de-implanted eventually-- that same plan for all below-- I've been targeted for the most abuse (could not imagine more) for 21 years-- no 15 minutes to daydream without interruption that entire time-- butthole tactile rapes: 10,000+; 16+ years on maximum dose anti-psychotics; etc.-- I NEED out-- the brain damage from the last two years (less spontaneous word thinking) is worse than from the previous eight (so many more people-- like from two dozen to two thousand-- and a heavy load of the most prestigious public figures).

Some people I think you can trust:

Gen. Dempsey
Gen. Alexander

You need to make sure you are in lockstep with the Joint Chief of Staff, etc. ASAP

In WH-- Biden, maybe Rice (reported: he flipped her off when she said: "we don't do this")-- Kerry-- they all sound OK

Probably: AG Holder-- long process of discovery-- hard time figuring out Obama

My suspects in order:

-- Clapper

-- McDonough

-- Obama (could have relations with Adam Levi-- elevates to #2-- still a Clapper set-up -- with his NSA wife Sue (looks like a family thing-- no selling info-- just using it (background parallel: insider info-- I'd look at his daughter Jennifer, and her husband Mike)-- could have relayed some to CIA-- not sure.

Not sure on Lynch-- a criminally flippant attitude if she has talked to me.

Here's the jump made recently: what is the smallest element that could make now and the past happen?

Why does the rape cult try to sound like they have more people?

Looks like "family and friends"-- a "dynasty" idea-- at least tons of money, and then get out.

Others: Gen. Blair-- contractor-- the "right hand"-- not the UO left hand-- he would probably help-- even if somewhat liable.

When this is proposed:

-- call everyone up -- on phone or in head (they can call an implant broadcasted 800 number and leave their info on ambiguous answering machine (verify implanted)).

-- provide transportation for them to a hospital-- local or military (decentralized and small: direct deposite, plane tickets, etc.-- notify: frisk, etc.)

-- de-implant and keep in touch-- there will be legal consequences for the government and guilty employees, and other criminals.

-- the legal consequences can be non-public too (20+ years sealed records for intel, 20+ years for personal privacy (think kids, rights, and how could a privacy sealed case be more clear?))

And rejected-- (less evidence-- material implant vs: walking into hospital and being frisked on other side of door)-- this could be done right with phones (non-disclosure-- no questions answered-- but clear to the implanted: you will be de-implanted)

Then you know the block: no legal consequences for the criminals involved-- not national security.

Now:

The DNI was created to integrate info-- and relay appropriately-- if Clapper is criminal-- has he done this right?

The WH-- Denis McDonough-- an intel communications specialist (the implant is communications)-- I'm not sure what your sense is of Obama-- but mine is: not so cool-- either a complete nervous breakdown-- and can't do his job-- or in an information deception "moat" or "air-lock" getting the goods only from me (eg: a treasonous intel element-- with the president held hostage in the WH?)-- he needs to jump the moat to others for help: the joint chiefs of staff... etc.-- if innocent (should see: we don't do this-- not even close).

The intel threats-- this is a real issue -- but real issues just as big come up every once in a while (the ENTIRE Codename Tempest, Nukes, etc.) (no war crimes for preparedness, no guilty until cleared, etc.)

-- two groups are fronts

a) contractors (EDO/ITT/Excellis/Vectrus

b) UO cognitive science profs started a "rape cult" and randomly dialed numbers using the implants they got (before ~1990) and got into open heads

c) They now look to be using this for "insider trading" and "rape celebrities"-- Adam H Levi (Don S Levi's son) is an DC assistant AG (investments & securities)-- think insider trading-- his dad-- a Harvard Ph.D (logician at UO)-- Adam is 47-- and would have been a student of Obama's at Harvard (Law Review editor)-- this creates an Obama as victim or villain scenario (implanted? Did he know? Or did he help Adam to right now?)

d) Who coordinates in the us government (these use VLF transmitters (maybe LF)-- and LF radio telescopes (2200 open LF radio frequency range)?

e) It looks like Clapper had means and opportunity in the Air Force when this implant was developed (70s-80s: Kutyna, Padden, et. al)-- could have copied a schematic or taken/borrowed inventory.

f)-- hypothesis: he sabotaged ear plugs-- after he or his wife Sue (NSA too) added a new sample (plug in ear) -- to trigger the "no making calls or receiving" variable-- making it look like a plug blocked the outbound, when it just blocked "calls."

g) This gave the UO Levi group an early entry

h) I think the stoppers are rectenna powered-- and the beacons went down that powered the external ear stoppers (Omega range went down finally in 1997)

i) Then: everyone was "accessible" (in and out)

j) The implant program looks like it was frozen, and never expanded beyond "security for US officials" (despite the original "agent" use intent)-- in order to "hide" the program, and not bring more people (expansion) with scrutiny (see above)-- no tech updates to implants; no use to stop terrorism (waterboarding-- Bush 43: "we pushed that to see why this was not available for use"); I'd hazard that they would try to block relevant radio-re-assignment (eg BACN (Battlefield Air Command Network proposal)-- the "bureaucracy of acquisition" did not want to reassign radio, I think-- despite military tech wanting to).

Looks clear: a corrupt background element coordinating the wiring of wealthy and powerful people "legitimately" (given the contractors did not know the stoppers did not work) for their security, etc.-- while the UO rape cult accessed these people-- sounds like some (actors) were posted on people (can not verify)-- but were posted on me when I got through (2013)-- all of them-- this I can verify, after initial skepticism.

I think Clapper is now implanted -- not sure-- maybe another "hang tight" scenario-- but he might point to others: despite Kutyna sounding like a good man-- he comes up again and again as maybe not-- and should be in at least protective custody (his threatened loved ones as well).

While I wait for : contact, transport, de-implant (calcification build up: FDA approved?), initiate legal obligation relations (restitutions)-- and looking forward to being advised (legal obligations) and kept in contact if this takes a long time (people: "did only I get out-- are these crimes still happening").

IS THIS NOT OBVIOUS? -- YOU FIND PEOPLE IMPLANTED CRIMINALLY -- AND YOU DE-IMPLANT THEM (TRADE "THEY WENT TO A HOSPITAL" for "THEY HAVE MATERIAL EVIDENCE IN THEIR HEADS")-- THE ALTERNATIVES HAVE BEEN BARBARIC: DAILY RAPES, INJURIES, MURDERS-- NSA "AUTO-MIND READERS" would be more humane (phone phrases + head-to-audio (a meantime measure-- not needing to be disclosed: 2200 meters is a public ham radio frequency internationally)).

Probably spinning my wheels here-- and not much more than "I live in a van by the river":

Mitigating the "unknown scare" that is inevitable and already here:

Unknown: yes-- but fits in spectrum of prior threats addressed that are known (Codename Tempest AS A WHOLE, Nukes, etc.)

NB: computer-brain interfacing is already here-- and improving all the time-- vision + audio, sensing + stimulating: already public science since ~2008 (connectionism + any brain sensor-- a fast neuron spike aggregate sum probe (not fMRI -- too slow, I think-- more like a differential oscilloscope probe in nose or ear (4+ orifices too): temporal measurements of amplitude--that's how the implants work: a baseline signal change) should be able to get at the inner voice), sensing and stimulating)-- since I got through (20 Feb 2013)-- I think criminal elements, etc. may now have more

of this: I'd hazard-- maybe the worst time for use is right now, before it is broadly on the map (legal)-- I think many agents in Eugene drew attention to me and this (note the "Moscow" hits as they clued in 20 May 2013 (echoing my b-day 20 Feb, and pointing at Don S Levi (his b-day 20 May))-- I think they already had intercepted my emails to US intel (non-classified).

-- four major issues:

a-- implants (rare-- radio identifiable, etc-- "out in open"-- maybe helpful for agents-- but I'd think high-info value people would be checked (along with periodic perfect lie-detector tests (at least verify: "did you tell the truth with the prior interview?," etc.)-- if the culture does not like this: it will not happen-- but such random "check-ins" might be a good time to look for implants (esp. since they can be used to pass the test in an non radio-secure environment)).

b- abductions (rare-- a very aggressive move (maybe terrorists or organized crime would do this often: but at what scale?-- look at criminal stats-- 1% of the general population are psychopaths-- the typical high-tech criminals who are violent might do this (but why not Codename Tempest items instead-- how often are they used-- this might help identify those #s)-- and I'd think this group are a small number (relatively)), but may grow with terrorism, etc.-- ISIL looks more tech savvy-- but these tools will help against them as well (more than tech parity, I'd hope)-- I think you could calculate the # of "conventional intel abductions" too (adversary budget trade-offs, current abduction rates and value of info obtained, etc.)

c- remote mind reader (diplomatic / legal risk higher than Codename Tempest items-- brains emit less "loudly" than laptops, etc.-- this would require shielding (the headbands (should work in all but the most severe environments (may need a "base-line detector" to eliminate some of these "triangulated areas"))-- I'd look at the Codename Tempest info losses-- impact, cost to address etc.

d- interrogations: some approaches (undercover, embedded): near obsolete)

Looks like c falls below the top of the Codename Tempest spectrum -- the top: accidental secure laptop in non-secure location-- more quantity/accuracy and implies connection like humans (some connections need to be made explicit-- an interrogation would get this (hence "intel generals" protected like "military generals")-- but a remote "mind reader?"-- that would take much time-- wading through fantasies, errors, etc.).

In other words: in the 80s with the full spectrum of codename tempest threats discovered in progress-- the whole spectrum would be worse than the above three threats

Probably already on maps-- but making sure they are.

Nb-- sometimes the logic is messed by a typo:

point: benefits should be huge to go after international organized crime (that missing spot between conventional warfare (too big), and CIA actions (too small))-- in conjunction with legal-- seems more paramilitary now (drug supplies from South America using Mexican commandos, etc.)-- the issues with black-market arms, etc... ongoing issues RIGHT NOW-- more than the slim chance or WWII or any nation state doing anything but supporting "peripheral" conflict (is any major conflict with China on the horizon-- no-- but issues like Taiwan (an example); Russia? No-- but the Crimea issue-- and larger conflict-- seems to me would be with that "international guerrilla warfare approach"

I know-- just an informed citizen's two cents in many ways-- but the obvious is usually what needs the major focus (Freaknomics is the exception: DNA divergence usually fails, although sometimes critical)-- the contemporary shift in priorities (decentralized conflict)-- these new tools should be ripe for those with budget advantage (e.g.: nation states over scale organized crime)

(nb: for clarity I consider terrorism "political organized crime"-- and I've seen (with most others, I'd think) the flip side of "multi-national corporations" and "globalism" grow as scale international organized crime-- a HARD problem, with intersecting legal jurisdictions, the military being a "blunt" "defend/take the territory" weapon-- and the legal/intel/SF needing more emphasis (those are HIGH skill jobs-- and I do wonder about "Blackwater" investigators (cp: bounty hunters)).

Looks to me like the criminals are delaying preparedness-- just a quick heads up on what I see (from the last two years of research, and my other experience) as obvious focal points:

-- Military-- splitting off recon early becomes more sop (I think (VLF?) radar signal signatures is more of the deal now)

-- Legal-- undercover agents-- some criminal groups would be able to "perfect lie detect" soon, if not already

-- CIA-- spies passing on info-- less likely (more risk for them)-- undercover: same as legal (embedded becomes obsolete-- unless agent does not know mission (context predisposition placing-- not sure on this))-- not sure on using a "remote mind reader" for agent identification: any local general public would be leery-- and a "neuron camouflage" headband might indicate use (might multiply use with non-agents, and bury the targets in noise: depending on cost: everyone uses them).

Looks like the benefits are better for international organized crime (contemporary terrorist "international guerrilla warfare") -- when torture looks like an option-- and you get little-- indicates this tech will help there. I see torture only used for humiliation and psych warfare in the future.

A point here-- management has a full plate already-- have you told more intel to prepare than I have? (about 1000-2000 for me).

to not just use AA batteries-- although some might know how to just splice the power from the transformer-- some people would have some left from other electronics devices (usually with specs on the transformer plug):

The parallax quickstart board suggests 9volts but has an 18 volt limit:

Program idea (thanks Anne?)-- turn the rf jammer program into a barrage jammer:

adjust the frequency (up and down, or random range)-- would need the more precise .000 decimal divider too though (only a 1-3 integer range)-- and would have to be inserted where the frequency variable is used to adjust the antenna frequency stimulation timing (with a counter variable-- looks hooked to the 5MHz crystal variable (there is a crystal timer on the Parallax QuickStart board)

(re: the implant antenna "length" below"-- and the fact that the jammer (wide with bleed) I have has reduced my inbound (the outbound seems to be facing a barrier-- the inbound is upped -- due to no real barrier, the inbound signal

clips (too powerful, lost info = more quiet), the auto-adjust goes back down for sweet spot as less info is returned on the echo and it adjusts automatically).

-- implant antenna for LF and VLF might do double duty-- and would have to have a divide by two relation for best power (antenna length is crucial for power)

-- the ~136kHz -- outbound -- verified for me

-- the inbound-- not clear-- but maybe not 13.6kHz -- or 17kHz-- maybe closer to that "39.1"-- like $136 / 2 / 2 = 34\text{kHz}$ (or: 33.925kHz-34.5kHz):

Best numbers yet:

Implant outbound: 135.7–137.8 kHz

Rectenna power: Russian Navaid Alpha: ~12kHz

<http://www.spectrumwiki.com/wiki/DisplayEntry.aspx?DisplayId=26>

But the 16kHz looks the strongest-- and that's not the ALPHA or OMEGA (nb: the 160kHz to 190kHz are US ham radio zones, and are used for radio, etc. in Europe-- 162kHz is used for time in France-- very loud, with wide bleed).

<http://www.vlf.it/alphatrond/alpha.htm>

Outbound-- ~13.6kHz (/10), ~17kHz (/8), ~34kHz (/4), or ~68kHz (/2)-- I need to do more research here.

I've heard that Gen. Kutyna (I suspect he was lead developer for the implants in the early 80s)-- from him: feedback for years.

I've started a "smart jammer"-- and noticed when I'd turn it on and off (both)-- due to the auto-gain being "off-boarded" (I suspect a VLF echo that squeezes through a "dynamic range" sweet spot of the interior transceivers (3rd signal ~AM (~1360) would be the "inside loop" matching the VLF in and LF out) -- the power would down about 5% for a brief period of time-- my voice (when speaking) would lower a bit in volume and intensity: I'm always on feedback too (and hear a tinnitus tone all the time)--but the feedback does go up and down (abuse use, etc.)

Here, for others:

-- Get the program here (free download):

<http://www.instructables.com/id/RF-Jammer/step3/Diagrams-Code/>

-- ~\$20: Get this Parallax "Quick Start" board (not the one at the above site-- this has everything built in):

<http://www.amazon.com/PARALLAX-40000-P8X32A-Propeller-QuickStart/dp/B00E4WM3PU/>

-- ~\$3: You will need a USB MINI cord (not MICRO or "A-B" type (micro is used for cell phones-- and is smaller than the mini connector)):

http://www.amazon.com/s/ref=nb_sb_noss_2?url=search-alias%3Daps&field-keywords=usb+mini+cable

-- ~\$3: You will need a 12 volt power supply-- a clip here that holds 8 AA (1.5 volt) batteries-- with two wires:

<http://www.ebay.com/itm/Black-8-AA-2A-Battery-12V-Clip-Holder-Box-Case-Plastic-with-6-/121492665356>

-- ~\$7: You will need a telescoping antenna (think ~6 feet long-- adjustable length is used for tuning : think 2200 meters divided by two repeatedly, until you get the longest length you can do = more power-- the 2200 meter zone has been pre-approved for general non-licensed use up to 1 watt (about a mile radius)-- you'd need antenna the size of your house to do that-- you would have a hard time knocking out a bedroom sized zone):

http://www.amazon.com/110-5cm-Sections-Telescopic-Antenna-Replacement/dp/B00UBWP3WM/ref=sr_1_7?ie=UTF8&qid=1440018556&sr=8-7&keywords=antenna+telescoping+7%27

--~\$4 : you will need wires to attach the antenna to the quick start board (you might get an antenna mount-- may need "converters" (sma to coax, etc.):

<http://www.ebay.com/itm/40pcs-10cm-Male-To-Male-Dupont-Wire-Jumper-Cable-for-Arduino-Breadboard-/201313412803>

Total: ~\$37

To use:

--- install the driver from the parallax website:

<https://www.parallax.com/downloads/propeller-tool-software>

-- run the "tool" app

-- plug in the USB to the device (no power yet-- the USB will power it up for the program transfer)

-- See if the device is plugged in and working (dropdown from menu)

-- Make sure the RF Jammer and CTR programs are in the same folder

-- Load the RF Jammer program -- look at it: change the frequency to 136 (noted in short program-- this is a start-- the out bound is the goal to block-- this will mess up the inbound calibration, and inbound will be reduced (esp. with on/off (program) switching, see below).,

-- Load the RF Jammer as "top" and upload to EPROM -- the CTR program will go along automatically-- unplug the USB-- the program is there until replaced (e.g. with a new frequency adjustment by you)-- and will remain there even without power.

-- the "p0" wire-plug-in needs to connect to the core of the antenna (on the board: lower left hole in the wide black plug for the chip)

-- the antenna needs to be grounded (the ground from the quick start board (worked): but look into-- third prong in outlets (no electrical-- just don't use the standard two flat ones: I have plug with no device and a wire going from that prong to the antenna "shell" (shiny part)), sink pipes-- go ahead: add the ground from the quick-start too)-- my knowledge slips a bit here-- just the board ground (GND or VSS) that also goes to the black wire on the battery clip.

-- the battery clip: red to VDD, black to VSS (also GND)-- the USB cable will not power the quick start board for the jammer (only ~5.5v too).

-- there is a "program reset button" too

Again-- so far, about a 1% reduction after a noticeable 5% reduction with the inbound power auto-adjustment (~5 seconds or so) from just the above.

The issues: more power, more precision:

-- Goals to improve:

-- use more than one at a time (more reduction power-- more frequencies)

-- time the jammer to turn off and on to mess up the inbound auto-gain calibration -- I estimate about a 5-10 second interval (slow sweet spot adjustment) (simple programming)

-- fine-tune the frequencies: 136 to 136.xx or 136.xxx by making the frequency ~13600 and dividing all the count-down timers by 100 (simple programming)-- I estimate 3 decimal places, with a potential 4th (.0005 or .0000) to double the number of implant signals (three decimals with 0-9, and a "half" added with 0 or 5)

-- frequency range: 135.7–137.8 kHz -- try it all; more than one at a time

-- quick start has 8 potential independent frequencies-- maybe add more "width"-- not sure (programming: p0 is used-- use p1-7 too)-- maybe better "noise"

--

ANOTHER QUICK OPTION: A CARDBOARD BOX WITH 30+ Layers of foil (not tried, but an initial attempt seemed to garner a "Faraday Cage De-bunker" unit -- and the guy seemed frazzled that I did not respond to his questions (my brain damage)-- as if the "seamless" 1-lay bag on my head was working.

Booster Bag Faraday Cardboard Box with 30 layers of aluminum foil (with a big lip over-hang: shoe-box like that fits snug when done)

https://en.wikipedia.org/wiki/Booster_bag

https://en.wikipedia.org/wiki/Faraday_cage

--

Nb: double duty of implant antenna : 136kHz goes to 17kHz (precise length = better reception/transmission (micro millimeter?)) -- maybe the "corkscrew mount" is an antenna (VLF , LF) and the two flat "tabs" are the AM antennas?)

-- Download the driver software here:

After clearing some ground with research (means and opportunity for prior leadership, current leadership at highest level that would be involved with program by default, the history of the tech (Malech, the contractors involved)

-- seeing Clapper (maybe some others too, or another) isolating this program from expansion (from just diplomat security) to avoid scrutiny of criminal use-- and seeing the Levi's (and some other UO / Eugene people) "implanting Hollywood" and academics (a front for Clapper) and EDO/ITT/Excellis/Vectrus used as a front (Hunzker, Widman) to implant the wealthy at Buildenberg events (or the like: insider trading),

-- seeing Don S Levi's son Adam H Levi pursue investments and securities as a specialty

-- seeing that the 1993 "awake to being sedated" would have been when Adam and Barrack were "done with school" and "wanted to make a mark in real world"-- probably a test run by Adam and Barack to implant others.

That is-- given the limited and small number of corrupt (guilty knowledge) government officials in the background-- and where we are at now (still crimes that are blatant for those who hear this implant broadcast (I think about 2000-4000)-- could not just be the intel folks involved (they root to military too-- but the transmitters, e.g. Navy or Coast Guard-- would get numbers, and be clueless as to what they mean (switchboard assignment ("posted" (always hearing one person, and can talk only to them) vs. "call up for conversation" (this part shut off by remote earplug feeling detection)))-- there would have to be significant support from the president-- he would have to be 100% clueless (even in his head-- I'd press charges against him like any other "I hear JD and I know I'm implanted" hostage who was a rapist-- or makes rapes happen by not doing their duty).

Again-- culpability in the past-- important, but not as important as RIGHT NOW-- and who is clinging to murders, rapes, tearing up the constitution-- and trying to attach their only value "get away with it" to other real values that do not need them.

Key points:

1) President-- probably criminal back to 1993 (with implant raping, etc-- just implanting people w/o knowledge-- a bit beyond a "ruffie rape" every day)-- not sure if he knew about Clapper (maybe just thought what Don Levi did was just Don-- and not Clapper too (don't know if Don knew either).

2) DNI head-- the intel info integration point-- exploited to slow progress, and try to "re-take" info control (implant everyone who knows-- as if implanted FBI investigators or going to "give up" in a crime situation like this). Clapper is OCD with info control-- and knows what he is doing (years of vicarious epistemology observation with clues he set).

3) Other government officials-- either in support of program, bribed, coerced, or clueless and with predispositions to do illegal activities.

4) Going into hostages with some avenues of escape: "heroic efforts" seen as beyond abilities-- I expect for some-- this erodes as the smoke clears-- and the severity of the government crimes becomes evident to more people (them too).

Chronology:

1) 70s-80s AF & Navy set up implant reconasainse program

2) 80s-90s Clapper slowly takes over-- replaces some "stoppers" with ones that do not work (sabotaged)-- gets two fronts at least: Levi + Contractors (EDO-Vectrus, etc.)

3) 90s-00s Levi's and Obama's implant many-- could be that the Levi's were used as a front with "Vectrus" -- since it looks like there is coordination between the contractor implants (security) and the Levi goals to "rip off" (Adam -- investments and securities-- Obama -- thinking "Robin Hood" (think his wife's name "Robinson"-- might have appealed to a "progressive rebel")-- even though he should have known about my foundation plans in 1994 (small amount robust enough to last to a larger goal with perpetual investing). But, given that the Levi's "randomly dialed" frequencies (I think Don Levi "got lucky" often, due to a James Clapper he did not know about).

4) 10s-- I get through-- Clapper's "seat in the back with his puppet reach around through Levi, etc" exposed-- and "egos fall hard" as the Obamas (including the president himself: mental breakdown in fragmented slow motion) discover for themselves what Barrack is really about: prestige, and crimes to get away with crimes-- and sacrificing all other values for that, while struggling to connect the evil actions with some good cause.

Heard an Obama voice "I decided to go with this five years ago" (in context: "world takeover attempt"-- get much done "in secret" (as if the tech would get more done with him than with the rest of the world).

This would fit in with a prior statement ~"I was roped up into this about a year before I was elected president (or senator-- can't quite remember-- more likely, on the way to potential presidency, he was "security implanted"-- when he got the "44.1kHz" (not sure, just relating the Carter 39.1)).

Question: was Obama implanted in '93?-- seems too much of a coincidence for DC assistant AG (securities and investments: think insider trading) Adam H Levi (Don S Levi's son) being at Harvard when Obama was the Harvard Law Review editor. Voluntarily, or in his sleep... did he work with a "Wizard of Oz" Clapper and Levi in his head? Or did he "see this power was under utilized, and then work towards world control?"

Thinking a bit (and having heard Obama and family a bit more over the last two weeks)

A VERY distinct possibility that "families and friends" are the ones who seized the government implant program, and would not allow any scrutiny (no expansion of program (e.g. to interrogate terrorists, and prevent waterboarding/rendition), no updating the implant tech (just the switchboard updated, or re-programmed, and plugged into current VLF transmitters / LF radio telescope receivers), adversity to all radio-re-assignment (BACN), have to be implanted to know about the program? (not sure: but controllable)-- in other words: the "families and friends" user the

US resources within the government, but don't really let the government use them (how has that security implant been working: seems no one was on security duty-- again: that might require expanding the program, and drawing more scrutiny).

Who are these families?-- My suspects:

-- The Levi's (Don & Katherine + their son and daughter in-law Joanna) with friend Ray Hyman and maybe Mike Posner?

-- The Clappers (James and Sue + their daughter Jennifer and her husband Mike) with friend? (Gen. Alexander?: I think he et. al. patented my work: thank you.)

-- The Obamas (Barrack and Michelle + their daughters Malia and Sasha (being "primed") with friend Denis McDonough and maybe Susan Rice?

Realizing: Barack -- have heard enough of him to know that he knows enough to fire the criminals, and stop the crimes: I expect all these families and friends (except the Obama children) to be executed for the worse cases of treason in world history (and decades of torture, murders, and rapes).

I think I heard Sue clapper saying "family supremacism" was the issue: "proof is in the pudding" (like the implants made them more "evolved")-- I pointed out: more of a death toll (much worse than sustaining any status quo (e.g. "Bush43Care" or "Iraq-war-care" is actually more accurate than "Obamacare" (the tri-fecta and the Iraq war).

See (from my perspective) that the president has potentially a triple dis-information ring:

- 1) Clapper/DNI partitioning info they integrate so that situation resolution is slowed
- 2) Ring of intel advisors-- untrustworthy for me -- look like placed implant supporters + McDonough being an intel communications (tech application) specialist
- 3) If President is implanted-- some may not be able to tell him much, due to not trusting folks who hear him

If the president has not fully talked this out with the Joint Chiefs of Staff (re: national security)-- he needs to ASAP-- they will back up intelligence and research confidence-- and military appropriateness for preparedness. I think the DOD has done some work ("good to go") but had to find out without Clapper.

Here is an issue I'd put forward: Given that I still hear presidents, and press, etc.-- has anyone been simply called to be de-implanted (on the implant line too)?

They would only be seen going to a military or regular hospital: and then-- they would have no material evidence, and national security would be improved.

If this is not done broadly at this point, here's a reason why: legal action could be taken (of the public map-- graymail issues made sure that intel crimes can be prosecuted without classified information disclosure- and the implant admin could be held accountable at that point.

Again-- looks like an inside-the-government take-over of the implant program where no scrutiny was allowed-- only things like "marks" implanted for their safety (really?-- doesn't look that way-- might look into Vectrus the security implanter for the wealthy, etc., and UO (via Cheyney Ryan-- his father was actor Robert Ryan-- they were a community active family-- Winona Ryder -- and then the "six degrees of separation" "Kevin Bacon game" with rolodexes, etc.)-- plenty of VIPs implanted, but terrorists not interrogated fully -- basically-- only the implant admin could really use this-- and avoided any type of scrutiny-- technical-- or anything calling for the expansion of the administration.

Given that: I'd replace the entire implant admin with new people-- people not even close to vetted by Clapper, and other admin-- and not implanted or working closely with implanted people-- and without "predispositions" to sacrifice the law for extras national security cost benefit (remember: raising budgets for health care or the military or intel would offset those "scare numbers.")

In other words-- intel and the military could offset any perceived loss of life risk with higher budgets-- seems they should be approaching congress for this, rather than imposing more than a stiff tax on my body and brain.

Option for JS:

Call up all suspect officers-- they have a life-time obligation and can be called to duty-- call them off "projects"--

Call up : Gen. Kutyna, and the original Air Force Space Commanders and all retired NORAD commanders (esp. late '70s to early '90s)-- Navy parallel? -- the people who developed and deployed the implant program.

If you can (weird, I know: Lt. Gen. Clapper: Air Force, and my #1 suspect for current subversion of constitution (chief of group (now including families) that seized control of the implant program many years ago internal to the US government (the very beginning : could be mid 70s to early 90s-- and in stages)-- just a few, unknown, with access to the implants or headgear with assigned frequencies, and then the signaling equipment-- keep the program out of all scrutiny (no implant tech update, no use other than national security personnel security (marks; but no terrorist interrogation without waterboarding)-- with "fronts" implanting others-- actors and academics through UO (Cheyney Ryan, Winona Ryder (Don Levi knew her godfather Tim Lear from early-mid 60's Harvard))-- maybe some wealthy power-players and military through Vectrus (Gen. Hunzeker, Phil Widman-- heard a Warren Buffet voice: "he had me implanted." (btw: Don Levi is evil-- a self-conscious malignant narcissist -- "look at me" gone psychopath with sadism with "hobby collection" dimensions; I'm not sure about Vectrus-- look like a "fall-guy" group that thought they were doing the right thing-- may be some "aesthetic juxtaposition" with the Vectrus and the UO/ Levi group fronts, as used by Clapper, et. al.)

A worry: the criminal group implants everyone they know knows-- and already has private sector backup (at least for listening to the amateur legal 136kHz range-- listening could be any frequency-- inbound looks like VLF)

Advice to the Navy:

Shut down all outbound signals to implanted people: they are all violated, this is not only against Geneva conventions-- it's severely unconstitutional (guilt until cleared, etc.-- war crimes for preparedness)...

Advice to Air Force:

The Air Force (Space Command) -- the radio telescopes listening-- not so critical to stop-- but this will be demanded too (illegal-- violating, but not as much).

If the Navy does not shut off the transmitters-- shutting of the radio telescope receivers will effectively shut off the transmitters (off board auto-gain w/ implants-- needs receiver transceiver coordination).

Looks like FAMILIES are involved-- like the Levi family (and friends: like Don's friend Ray Hyman)-- I'd expect the same for the government members of the rape cult (no need to minc words here-- their "reality" diverges from the public like a cult-- and they have sacrificed all other values to "rape and get away with it":-- e.g. my foundation delays cost 1000s of lives a day (utilitarianism)-- rule of law, democracy, 10 commandments-- all thrown out the window-- national security too: treason, etc.):

I'd expect the Clapper family involved (think: how big a part of their lives is this implant program-- they have access to 1000s of public figures-- the most powerful, prestigious, and famous people-- idols, etc.)-- and for some: three decades of use.

McDonough-- does he have a family-- He's a major suspect for leading the group running the implant program (after Clapper-- maybe 2011? Another "Fall guy" in 2014? -- looking at the contractor shifts: 1992, 2007, 2011, 2014 -- seeing: Kutyna, Blair, Clapper, McDonough, Lt. Gen. Stewart (I thought he was replacing Clapper already) or Meyerriecks (now CIA science & tech director after leaving the DNI)-- seeing Stewart/Meyerriecks as set up (change in 2014?-- I got through in 2013).

I don't think every intel and legal relevant necessarily has malicious intent (rape me to buy time, etc.) -- but may have been given "perks" only for coercion potential-- I've stated this many times, re: Don Levi (look up his paper: "what's luck got to do with it"-- just read the first page (bottom))-- he want to tempt people-- people are lured into a crime bigger than they expected, and then that is used for blackmail control:

<http://onlinelibrary.wiley.com/doi/10.1111/j.1467-9205.1989.tb00258.x/abstract>

(First page of Levi's academic paper on moral luck-- he has a "common sense" approach-- and complicates issues beyond rigid logic with particular context expansion, and various individual case)-- the issue in this paper is also about family responsibilities vs. living out individual dreams (Gauguin left his family to paint in Tahiti)-- Don has a painter wife (Katherine) and the painting family dichotomy parallels the early Wittgenstein (picture theory of meaning) and the later Wittgenstein (language games with family resemblances)-- a "symbol" Don may have picked up from the essay he was critiquing.

NOTE: THE PHYSICAL ABUSE IS GETTING MORE SEVERE:

1) Multiple "self" punching in the face (temple-- probably due to prior "stroke" speculation when Don was probably out "doing the rape rounds" of the crowd after I called the FBI again)-- imagine Don or another with a boxing glove and a board between their punches and their head-- and driving me to fury, and then doing that manipulation-- I pointed out my nephew having to hold himself back from drinking liquid Tide after the Patriots won the Super Bowl-- he watches one football game a year.

2) Daily butt-hole rapes (multiple)

3) Felt like I was having a baby a day ago-- and I get nausea and headaches (from a certain high-pitched ringing) often

This in addition to: no 15 minute break from the "brain-grinder"-- this is the worst aspect, which does the brain damage-- and I'm still diagnosed with schizophrenia (had to: could not work-- and there are definitely voices in my head)-- no one has ever confirmed (family, etc.) that I am not insane-- for the full 20 years that I've been diagnosed.

US government: this is documented-- this is real-- you are doing this to me on tape: the worst psychological torture of all time-- 2015-- and you participate as well using Navy equipment to violate me.

Subject: Time buying: control those who know; replace global rectenna power source (Russian ALPHA navaid)

I hear plenty of smoke-screens (bogus debates, as if there are unresolved issues, more question marks, indefinitely)

Why buy time?

- 1) Control everyone who has found out
- 2) Replace the Russian ALPHA navigation beacons that power the implant rectenna (16.2kHz) with defunct US Omega-- not to power stoppers again, or be "listening posts" (unnecessary)

I've heard (about two days ago)-- a Clapper-like voice, re: the Omega Navigation system powering the rectenna-powered (radio signal powered) ear stoppers, and no-one noticing the stoppers not working post 1997 when Omega was completely shut down (my suspicions: the Russian Alpha beacons power the implants, the US Omega powered the ear stoppers for agents)-- he said-- (after saying a few days before, re: the ear-plugs that would mask the implant outbound with radio noise: "I said they were rectenna powered, when they batteries would run out")--he said: ~"the ear stoppers never really stopped the outbound-- they didn't create a mask-- the equipment simulated them working by stopping cross-communications-- so that these agents could be caught if they'd slip" (reconstructive paraphrase of point made).

This would shift focus from Clapper back to the UO folks: BUT-- that would be the past 30 years, not the past 2+

If the president "has something to hide"-- I'd think: "Perks" like everyone else-- but he is being exploited by much more criminal intel employees (Clapper, McDonough-- at this point-- I suspect all intel & leadership received "perks" (brain rape opportunities-- "access" to folks they wanted to hear and/or interact with)-- and that some, esp. those closest to the implant situation-- are using the president's "part" in this-- and exacerbating issues that are relatively irrelevant (as if HE could make this (right now) happen alone)-- in order to manipulate him and others-- more than just framing (an "exaggeration of guilt frame")-- they are controlling the presidency through coercion.

I'm hearing that three intel officials went to NBC (and others) to "blow the whistle"-- and that these "news" organizations refused to go with it.

I'm notifying these news organizations now: I am pressing charges against all employees who have heard me--- your level of guilt or innocence will be determined in criminal and civil court (civil beyond those who heard my inner voice, etc.).

Again-- ANY brain-interfacing tech: implants, abductions, and a remote Malech "Brain-emanations" reader/decoder-- and all of it less than the sum of the full spectrum of Codename Tempest issues that were discovered in progress and dealt with appropriately, globally--

There are questions and uncertainties with the implant, etc. threats-- but these unknowns fall within the spectrum of known threats.

Why did the news organizations do this (if they did)? This means: they are not hostages (they don't NEED to escape being raped)-- they probably have received "perks" (access to brain rape other humans)-- and, like all the other guilty parties, try to associate their complicity with treason (state secrets, classified info, broadcast globally, including into adversary territory, with knowledge: under 300kHz-- more than shortwave-- can hear it everywhere with sensitive listening devices)-- with national security-- as if they are helping keep the nation and globe safe-- and this was the only way to do that.

Again-- Treason-- more than Benedict Arnold or the Rosenbergs.

No duress-- when you violate me, and do not do the due diligence of calling me AND calling the FBI first.

Subject: Stopping Waterboarding & Rendition vs. Implant Administrator "Perks"

Again:

Waterboarding and Rendition-- didn't have to happen-- and more info would have been gained to stop terrorism with no one needing to know how.

Bush 43 (voice like his) claimed: ~"we pushed waterboarding to see why the implant tech (security) was not made available for interrogation use."

Why would the implant program administrators need to "sell" access, when they could rip off money directly with less risk?

So, of course-- the implant program was for their personal "rape use."

This goes back at least to the 1980s (for me, at least 1991-- the Malech Patent: 1974).

<http://www.google.com/patents/US3951134>

And again: computer brain interfacing-- here already, and improving daily:

<https://www.youtube.com/watch?v=nsjDnYxJ0bo>

Again-- 9-11: looks like Bin Laden was implanted and harassed by Don S Levi and Ray Hyman-- and "motivated" to do terrorism like never before: I'd swim across the Atlantic with a knife in my mouth to take out Don & Ray (rectenna powered radio implant out of range under water-- looks like a "mop-up" to get rid of 9-11 orchestration evidence. Motive: "fun, big time," contractor money (might look at "insider trading"-- who (including friends) invested in 9-11 profiteering before it happened), more heat in the mid-east (support Israel-- idiot style), Manhattan = class warfare (Don S Levi is from Brooklyn). Other evidence: Al Queda terrorism activity trajectory (big jump-- less than "prophetically clear" Bin Laden statement right after and US figuring out "why?")-- the "psychopath calling cards"-- maybe known by Bin Laden: 9-11 = an emergency call; the targets: "two New York Jews who think might big of themselves, and our intel says this roots to US leadership and military"; Don S Levi-- rarely leaves the country-- in Bangkok Thailand during 911-- they have a famous child sex-slave red-light district (Don and Ray are molesters)-- the pun "cock my gun" and "bang my cock" re: the 911 attack explosions; also: James Clapper has ~700 hours of Air Force flight experience, and experience in Thailand too (as do a few early Air Force Space Commanders: Kutyna, Padden, etc.)

The implants use LF and VLF-- the Navy controls this range-- they either provide this signal, or can jam it--

FACT: the us government is violating all the implant hostages.

Question: why were all the hostages tuned into me when I got through?

Question: leadership-- at this point-- just hearing you-- you are caught in slow-motion: what is your five year plan for reality?

Either you will be executed-- or in jail-- and facing a civil suit from me (for showing up in my head: not a government gaff)-- my demands: not money-- an oral statement at length on record, preferably in a public venue--or at the civil trial itself.

Subject: RE: All replacing intel leadership (since 20 FEB 2013): the implant program administrators

Also-- with the demographic of the hostages ("Hollywood" both sides of the camera + the "Bilderberg group participants" (so much this group, I suspect an "access point")):

https://en.wikipedia.org/wiki/List_of_Bilderberg_participants

Cheyney Ryan (voice) claimed: 4000 implants-- me, thinking the 100s of public figures I've heard, voices I do not recognize-- and public "echoes" by public figures (hints, etc. that they are implanted when interviewed etc.-- some may have noticed this-- they have been "feeling out" the public space and checking in indirectly what they must now know is a large crowd)-- I thought 2000 given the 2200 meter frequency range, and going 3 decimal places-- but 3 decimal places plus an extra ".0005" would double that (think every other frequency in a different geographic area-- so signal bleed would not be an issue).

I see three aims of violating these people:

- 1) classified info
- 2) insider trading info
- 3) lifestyles of the rich and famous

But... for who? The highest bidder? An exclusive clientele? Why, when you can just use the info yourselves:

Who has violated all these people? Obviously, besides the "fronts" (like the UO profs could not be stopped by legal)-- the people running the implant program.

Did FBI head Comey "buy access" to Steve Carell's head? I heard a voice, in the context, it's Comey: "I didn't rape him-- just wanted to know what his life was like" (like "Dan in real life" was not enough)-- heard another voice later: "but the story was different for two starlets he bought access to.")

Again-- all relevant legal and intel: after two years of hearing their voices arguing that I "need to get with the program" and having me raped-- clear-- they are the rape cult-- I would not doubt, at this point, that they have all been brain-raping for years-- celebrities, etc. So of course, don't expect "solutions" to this hostage crisis from them.

Subject: All replacing intel leadership (since 20 FEB 2013): the implant program administrators

At this point-- re: information integration-- clear that the White House and Joint Chiefs of Staff are "in the know" about the implant hostage situation-- have been for about two and a half years (I got through 20 FEB 2013-- saw I was being documented 24 MAR 21).

They must both be "hermetically sealed" as far as information is concerned-- and all parties in these groups guilty of state-level crimes-- they seem more concerned about catching the "real" criminals than stopping the crimes they are doing now.

Here we see the psychology-- people who do not see themselves as criminal-- doing the worst crimes any government group has out of a wartime environment-- in the entirety of history-- and not wanting to verify their criminal depravity in public. I am not accusing the US leadership of anything other than what they are doing to me right now (and to the crowd in tandem: does my voice always sound like me?)-- and know they've known about this and me (some of current leadership) going back 20+ years (hence the continuity of "we can do this, it's at least somewhat OK").

Any mind reading tech: fits in the Codename Tempest spectrum-- not the worst, not the least of threat-- but the kind of tech challenges faced and met on a regular basis-- any "computer-brain interfacing" catch-up at this point is your fault-- and part of the "scientific correction" that will happen regardless of disclosure (science held back: patent office

employees implanted, etc.)-- there has not been any technology in history with a threat that could not be met/mitigated. Laptops have "louder" emanations than brains, have integrated info too-- and they don't forget that info (esp. with information inflation) when going from one secure location to another to work on it. Heads can be as effectively blocked as laptop computers (former CIA head John Deutch lost his clearance for a while due to accidentally taking a laptop off secure grounds-- this happens-- and his laptop could have been caught with more info than his head being scanned). Also-- computer brain interfacing is, again: inevitable-- you are holding back preparedness now by focusing on your criminal use of this going back 30 years. Also-- the bloated sense of importance intel has: compare your budgets and results to all other global intel-- what are 100% verifiable returns on your investments compared to 100% verifiable returns on other government programs (no 1% doctrine please: real number ranges multiplied through other real number ranges)-- you lost how much info during the Codename Tempest response- what was the impact range.

Is the chief of staff, Denis McDonough part of the group that runs the implant program? That compartmentalized program looks very illegal-- was only for agents (and given the USSR issue ("they implant themselves, we have access")-- probably understood-- the program would be secret for only a year or two)-- and using this for leadership security is insane (broadcasting whatever they know (there is a difference between decodable emanations and broadcasting globally (under 300kHz goes global for radio telescopes)-- where is that security now? Was it ever used for that? A "classified info intercom" (only classified when people didn't know they were emanating).

Clear-- at this point, so much of the top leadership is criminal at a death-penalty degree, that they will not break the "official legal & intel" into their circle, as they will be instantly held accountable-- it's that obvious and evil (not just bad-- if the word "evil" has a use-- it applies here to the current US leadership-- I'm not sure where each individual falls on what I call the "sick to spoiled" ratio behind their depravity-- sick like drug addicts, or detached from their victims' suffering and feeling entitled to do their crimes (spoiled brats).

Given complete failure across the board (this is a situation where leadership would be executed for not stopping the leaders)-- and this, over two years into me getting through-- the lower level legal (civil and military) will have to "jump the fence" and start arresting / interrogating in a huge way-- before a "surprise press release" that catches many legal and military agencies by surprise globally.

My thinking: all intel leadership was replaced after I got through-- I would not be surprised to find that all are the implant program administrators-- even AG Lynch (as in, CIA in secret for 20 years).

Subject: Why Clapper and McDonough are my #1 & #2 in-government suspects

Who assigns the radio frequency "matching"-- why was a "post everyone on JD" an option for the US to use (Navy transmitter operators may not know what they are doing).

Again—despite what looks like multiple “frame the White House and president’ attempts—I’d have a hard time believing the president would order the ~2000 members of the “hostage audience” posted on my frequencies (out and in)—and then show up as an idiot—there may be something there “to hide”—but I’m still certain of some elements:

1) My main suspects in the government now: James Clapper and Denis McDonough

a) Clapper:

i) The head of DNI-- many voices reporting "non-integration of information"-- thinking "the white house" due, I'd think, to the "radio show with the WH as fools."

ii) Adm. Denis Blair-- former head of EDO (a contractor with the Malech patent assets (they bought Dorne & Margolin)-- Blair, Navy (VLF transmitters) to Clapper's Air Force (LF radio telescopes: Space Command)-- the head of the DNI just before Clapper-- Clapper worked with Geo-Eye in conjunction with ITT when ITT bought EDO -- hence-- two obvious "contractor interface" people. Blair-- if I've heard him: not Clapper-- and claims he is worried about his family being implanted, and facing fainting fall deaths (nb: deaths more likely when psychopaths have more time).

ii) I have heard a voice representing Clapper often: not close to professional-- (sometimes with an older "strong voice" woman (presented as a Dominatrix at one point-- at first I thought she was a co-worker (DM or SOS) but think now: his wife Sue from the NSA) and confessed about a year and half ago-- as if it were to humiliate him with a false confession (to DIVERT-- from what?-- him? The ability to get out of radio range (for him?))-- many "buy time" arguments-- ludicrous cost benefit analysis to "elevate this to we must rape for years to figure things out."

iii) Look at Clapper's career path when the implant tech would be developed (remember, the Air Force runs the nukes-- and are part of NORAD-- radio would be them and Navy (long range transmissions before satellite using the below 300kHz range that refracts globally (more than "short wave."))-- the Robert Malech patent (radio signals for brain sensing/stimulating) is from 1974:

<http://www.google.com/patents/US3951134>

<http://www.af.mil/AboutUs/Biographies/Display/tabid/225/Article/107384/lieutenant-general-james-r-clapper-jr.aspx>

12. June 1979 - January 1980, Washington area representative for electronic security command, deputy commander, Fort George G. Meade, Md.

13. February 1980 - April 1981, commander, 6940th Electronic Security Wing, Fort George G. Meade, Md.

14. April 1981 - June 1984, director for intelligence plans and systems, Office of the Assistant Chief of Staff for Intelligence, Headquarters U.S. Air Force, Washington, D.C.

15. June 1984 - May 1985, commander, Air Force Technical Applications Center, Patrick Air Force Base, Fla.

16. June 1985 - June 1987, assistant chief of staff for intelligence, U.S. Forces Korea, and deputy assistant chief of staff for intelligence, Republic of Korea and U.S. Combined Forces Command

17. July 1987 - July 1989, director for intelligence, Headquarters U.S. Pacific Command, Camp H.M. Smith, Hawaii

18. July 1989 - March 1990, deputy chief of staff for intelligence, Headquarters Strategic Air Command, Offutt Air Force Base, Neb.

19. April 1990 - November 1991, assistant chief of staff for intelligence, Headquarters U.S. Air Force, Washington, D.C.

20. November 1991 - present, director, Defense Intelligence Agency and General Defense Intelligence Program, Washington, D.C.

iv) Speculative-- Clapper snags a schemata to use the implant tech himself (a "remote headset" or "an implant up the nose with tooth floss to pull it back out") back to when the implant is first developed-- then has a "back row seat" for 30 years of "neighborhood molester suburban sprawl" as he "plays chess" in secret using a front or two (the UO professors (Levi, Hyman, etc), maybe Gen. Hunzeker, Phil Widman (Vectrus, etc.)) to get people implanted (potentially to sell "headspace": classified info, insider trading info, and "lifestyles of the rich and famous"-- or to "give to our own intel, while telling them its' done by others"-- probably both-- not sure how much that was actually done-- but some (actors, I think) report being "posted" on others with classified info-- and it looks like an obvious "rule the world power grab" that turned into: "rape and murder the most powerful public figures... something..." (neither Jesus teaching history or Alexander the Great seizing it) .

b) McDonough:

i) Before being the "gate-keeper" chief of staff, Denis McDonough was the deputy national security advisor-- when Bin Laden was captured-- (speculative): I have reason to think that Bin Laden was implanted (the rectenna powered implant would still be live in his head-- but dumped at sea = out of radio range-- other reasons: the "911" (emergency call "pun")-- Don S Levi in Bangkok at the time of the attacks (Clapper has experience in Thailand too); the "trajectory" shift from the "usual Bin Laden terrorism" (his confused statement, and the US confused response "they must hate our love of freedom"-- indicating the confused identification of motivation and action elevation)-- Point: McDonough got "a raise and a position advance" after the Bin Laden capture-- may have had an inside track on Bin Laden's location via Clapper or Don Levi (via Levi's son Adam H Levi)-- or otherwise used his implant access in a way prohibited for the rest of the intelligence community-- and gained more WH power.

ii) His intel specialty includes communications tech (the implant is communications tech)

iii) He trained at Georgetown -- they have the National Security Archive there-- but Clapper has worked with Georgetown too-- a potential apprenticeship.

https://en.wikipedia.org/wiki/Denis_McDonough#Obama_administration

iv) Speculative-- Adam H Levi's mom is a former nurse-- there may be some "out of office" drug supply-- either an opiate from a hospital, or an opiate traded for another addictive "reward" (like cocaine)-- could be Clapper set up McDonough on the inside, and Adam Levi in DC on the outside-- with the tie to Don Levi -- who looks like Clapper's "abuse partner" going back 20-30 years (whether Don knew or not)-- with "backup control" measures available ("rewards" become addiction "leashes").

If not drugs, or just plain info control (who hears what and when) from Clapper, et. al: maybe blackmail-- maybe just Clapper blackmailing everyone, not letting them know anything actionable, and using not only agent implants but administration security implants as well to violate and control people.

From my estimation-- Clapper and MCDonough (their "information air lock," and, of course, the abusive UO profs)-- would explain more than 90% of the current and past problems.

(The president-- probably being implanted ~'93-- not finding out till a year or so ago-- but "roped in" with security implant about 8 years ago (I think he reported this, over a year ago-- must have seemed like some insider CIA "informal presidential vetting" or the such-- the mind-blower of implants-- and then finding his family hostage in the white house, as an interior reality and exterior reality (his past being influenced, the government-- looking potentially much more corrupt at scale)-- these two realities coming under heavy questioning-- looks like he and his family are up at the top of the list of heavy loads of abuse and humiliation dealt out by the implant criminals.

Clapper-- clearly treasonous (even without treasonous intent)-- McDonough-- either an accessory to treason, or seditious conspiracy at least with Clapper.

Where is the military on this? With the FBI and DOJ?-- despite the "poverty of info"-- maybe every element is un-integrated-- any group of more than like eight 8 people who can talk in one room about this at a time?-- again-- the DNI was created to integrate information (post 9-11 assessments)-- looks like this is being used for abuse now. Again-- my advice-- integrate (maybe bend "compartmentalized classified info" protocol with people that are highly cleared and trustworthy at least informally to start (e.g.: everyone who has a publically recognizable voice in the WH: I've heard them))-- also -- DOJ/FBI-- you have a clear "snipper shot" call here on Clapper -- to simply listen in-- what sort of warrant is needed for the people (at least Clapper), at least indirectly demanding that others be brain-raped: if they don't do that "did you tell the truth" interview (avoiding accidental disclosure of info that they have that might come out in a full-head interview-- no reason to hook up the "brain reader" until after the interview-- and only long enough to verify: "did you tell the truth?")-- if this is refused-- how could a FISA judge refuse a quick "take out the killer with a sniper shot" call-- with no injury or pain-- they (the judge) should know the number and demographic of the hostages-- and that they are

physically raped (tactile) too-- public figures have reported this, and I've heard them struggle too (Matt Lauer reported, Lester Holt & Charlie Rose-- heard in progress (Holt reporting the violation, Rose-- sounding furiously humiliated)-- you may "not be able to verify that"-- do you even try?

Re: the implant switchboard "director"-- Clapper, et. al:

Points I'd look into:

-- People get 'posted' on others-- can't stop hearing them, and can talk only to them

-- People can call and be called (if they know how: gestures) -- and may need "phone numbers"

-- The 'posting' is a heavier switchboard level, and would interface with transmitters and receivers

-- Looks like most physical is now "fronted"-- look at the Netherlands for a Receiver (LF with radio-telescope sensitivity: rare at LF)-- at all VLF transmitters (usually Navy-- also the Very Large Array might go there-- not sure)-- and navigation beacons (for rectenna power).

-- Who can do the 'post' procedure-- does it have a "sign language" gesture control?

(Seeing-- could be that US equipment is no longer used: cp. The Omega Navigation Beacons powering an ear-stopper)

Why Fronts?

-- obvious-- Malignant Narcissists (major criminals to the bone)-- put others out for risk (cp. Blair)-- Clapper may felt comfortable (suburban sprawl, no close calls, almost retired)-- comfortable enough to retire at the top of his career trajectory ("#1 Spy"-- went to North Korea earlier-- maybe looking into an exit without an extradition treaty-- not working with them; but hiding in a hard to get to territory for legal, etc.)

Forth email since 10:53 am--

Included this to a smaller top leadership email list: consolidating, given the info partition issues:

I now use a mailing list (implant-hostage-situation^{(b)(6)}) with a considerably larger number (all previous contacts + joint chiefs of staff + INSA hack list -- probably reaching (if let through), around 1000-2000 people)-- have sent basic info through-- about 1000 in the INSA primed in 14 October 2014 (isolated islands info that can already recognize for a start, integrating and growing)-- with top integrators having some info going back to ~20 FEB 2013-- the scope of the situation being greater than I thought (from a backyard abuse of tech stolen by a developer/contractor TO ~2000 of the most prestigious and powerful people in the world having their bodies and head-space access sold to an exclusive clientele (at least Clapper himself)-- if this was just being set up for his retirement plan)).

I will be adding more "civilian" names to that list soon: friends I know are implanted, etc.-- will give a list of names soon (it is "auto-trimmed" for wrong addresses, etc.)-- might keep an eye on that: using HostGator-- servers in Texas (not Denmark (one.com) or run by surfers (DreamHost in California)). I use Site24x7 to monitor from 8 global locations (the inverse of web-site-stats: what the internet "sees" stats-- up-time, changes--- looks hit all the time-- see the "Monitor" folder (auto-loaded with the Site24x7 stats) in the email PST uploaded daily).

I'm sensing that the full forces of the NSA are not employed-- something like "pro-consumer" computer hacks + NSA (as others, even agents in my neighborhood): "conspicuously inconspicuous" : hence-- I'm on the map, know I'm "sand-boxed" (communications air-lock = mail, internet, I assume phone)-- but there could be many de-centralized elements providing flak now (insider trading logistics research for "money on day one of disclosure" stock-market, investment issues, etc.).

Will repeat this top part on my email list too

Re: the use of the DNI--

--9-11 brought intel integration issues into focus

--This integration focus may rely too much on the DNI-- and its ability to partition "who knows what" information

NB: the presidential WH issues look peripheral (a frame diversion)-- but: I'd still focus on the intel "info air lock"-- are they "controlled" -- by who? If Adam H Levi is used as a drug conduit-- I think you'd see the "James" and "Don" (Targeting me: a "JD" later) as a symbiotic synergy-- conscious, even if not coordinated explicitly) (My suspicions: an opiate (Diladid) supplied through Adam's mom (a former nurse: Katherine P Levi-- doctor's prescription slips, ER access from former peers, etc.)-- may be converted to cocaine through a known dealer-- and introduced through a 3rd party: I'd focus on Chief of Staff, and former Deputy National Security Advisor (during the Bin Laden capture: see below on that and put 2 + 2 together) Denis McDonough (supplier, or controlled)-- the "WH gate keeper": and his relation to ALL the national security leadership being replaced since I got through 20 FEB 2013 (potential stacked deck: but, from my experience-- no patterns: full spectrum from "douchebag" to "victim/survivor" to "clueless."

--

--Caustic: could be the "they implant themselves, we have access" was used in Saudi Arabia too-- and look at Bin Laden dumbed at see-- the implant would still be live-- but now out of range (also look at "trajectory jumps" (their press release, us scratching heads: "they must hate our love of freedom" (the same old same old: bases in the region)-- the "9-11" pun-- pointing to "Manhattan" (think Don Levi & Ray Hyman-- Jewish-- at least Don from NY-- Brooklyn-- and the class difference with Manhattan-- getting heat on the Mid-east for Israel-- and pumping military contracts-- and their "stamp collection of evil"; Don is at Bancok, Thailand during 911-- Clapper (and some AF Space Commanders) have Thailand and flight experience. Point-- 9-11 at least appropriated, to some extent-- to give more centralized power for use (by Clapper)-- if not part of the plan-- might ask around: was anyone surprised that a "9-11" like cost/benefit assessment actually happened? (See Stephanie O'Sullivan-- DNI, Navy).

Not much new info in these last two posts-- some integration work from my long time immersion here and internet research

Re: legitimation background for my research: my skills: clarity through the complex and prioritizing (see my philosophy book on information theory (AI, systems theory, complexity, deconstruction)-- computer skills (published in HS), some journalism, info gathering course at UO, some "combat tactical reflex" (11B, ft. Benning '87 (probably on the SF map: smart (my honorable

discharge letter: written by a SF officer)-- I know that what I hear is ~97% BS-- and that it can be used for diversions-- but I have much experience in dealing with the BS flack, manipulation and "prove the lie" scenarios-- i.e.: the immersion experience and "learning to swim in a sea of flack and lies" (seeing "reality on the other side of lies" through the "spaces" in the fence of BS posts/slats as I walk by for years-- the indirectly implied being stratified and some issues assumed just about constantly, etc.-- my immersion in this space, and motivation to help get out needing truth to pan out for power (only words here))-- but again-- I demand you stop my out and inbounds (no need to notify me: a "direct deposit" (some Will from a (b)(6) fan way back when, or the such-- and subtract from projected restitution)-- and of course: legal can use all the tapes for legal pursuits (and intel-- needs to help end this-- but understood they might use it too)).

You should also be blocking the out-bound signals of the most severe abusers-- those with "OCD Narcissism" ("YOU have incessant problems and need a 10 hour shower of nag to get you clean daily" (OCD = "I have those problems)-- with tactile buttole rapes, etc.; "I'm not just perfect-- I'm God" (narcissism))

Subject: Re: [Implant-hostage-situation] Implant Hostage situation

Quick email-- some supposition:

-- Looking at the minimum logistics necessary going back 30 years:

-- Clapper is obvious for me (double agent?):

a-- His background position "behind the scenes" with Tech Application (Col. Clapper, 1984 -- when the implants would be developed by Gen. D. Kutyna (AF communications control), Gen. M. Padden (Reconnaissance) (Both Kutyna and Padden become AF Space Commanders: "radio-telescopes" are like "NASA grade receivers" able to detect the very faint implant signal globally), etc.-- I'd expect a "flip-side" for the Navy (eventually Adm. Blair)(VLF transmitters and navigation beacons)-- NORAD (both Air Force, Navy, US and Canada)-- it too. Clapper's "high up desk where tech for use passes through"-- could have snagged a "remote viewer glasses" schematic-- or "Borrowed" implants and put them up his nose (with tooth floss) for use off time. Also-- the "Tech Application" spot (like Dawn Meyerreik's "tech buyer" spot: a major target for the KGB, etc.-- "we get first pick" or "we know your material (think Marx) advantage"-- and slick KGB intel in the 80s).

b-- His current positions (DIRECTOR of national intelligence (a potential psychopath calling card "aesthetic touch"-- and, I suspect: at least in control of who runs the compartmentalized implant security program (two programs at least: 1-- foreign agents (outbound on ~136kHz (global "ham LF experimental ham radio range)) and government official security (like 39.1kHz for Carter) (also: Russian ALPHA navigation beacons to power the implants (powerful and VLF -- power through land masses at a distance) and the defunct (since 1997) US OMEGA navigation beacons powered the "stoppers" for, at least, agents to block the outbound, and turn off the inbound (again-- I think that a pre-'97 switch to sensing an ear-piece to simulate a stopper signal working was implemented-- shit hits the fan HARD for me '93-'94-- already "lighter" sanity 'observation' and 'private info echoes with double-meanings via a few people' issues: '91-'93). The DNI Director position now gives Clapper the ability control the partitioning of information-- to buy time (long term: replace the ALPHA-- short term: frame someone else, and slip out to retirement for "full-Miller-time use."))

c-- Clapper's wife Sue Clapper-- I doubt Clapper slipped out for an hour every day/night to implement his daydream strategies-- maybe-- but she is NSA (Clapper has an NSA background too)-- and their pattern recognition systems (with play: 100% accuracy not needed-- and in the '80s -- they would have that capability)-- that would be needed for the "hand-gesture control (even sample editing for field agents)"-- and a "sensation" like a non-working ear-stopper could be used to simulate the stoppers working (intercom shut off-- but still 2-way accessible). I'd look into Sue's specialty-- and if the people working on "gesture recognition"-- the "radio-telescope receivers" and the "Navy transmitters" are implanted-- and what they know. (again: info control going way back: and Clapper, viewing perspectives remotely-- would have a visceral intuitive sense of how important info control is (epistemology)).

Here is what I see as the core crimes:

-- Implanting people to sell access to others (these others-- with glasses, or tricked into being implanted too)-- three targets of monetary value:

a-- classified info

b-- insider trading info and trade secrets

c-- "Lifestyles of the Rich and Famous"-- and "rape the stars"

Although I doubt a livestock auctioneers was used an arthouse for this-- it would be a way to make money-- and, I'm not sure how "full-swing" it was when I got through 20 FEB 2013-- I may have been "sold" to "Don Levi" and his family decades ago-- with him taking maximum advantage, for all I know.

My suspicions about the KGB billionaires-- and other private/public sector intel-- at least the last two years-- but most are probably hostages if implanted-- it would be the remote glasses (that play the signals through eye sockets, etc.)-- or "hats."

Advice:

--a simultaneous "call to the survivors" to de-implant them at military hospitals globally-- may have to "power the signal up and down slowly" as I estimate the implants have "auto-gain" off-boarded to the transmitters (maximizing the echoed info (clipped inside with the third frequency-- probably in the AM range-- would bounce off bone better, and higher than the other two, and probably a multiplier (x10)).

--after emergency assessments (no nukes-- no fast scale problems with inevitable press release (this tech fits into the spectrum of tech you already deal with: monitors shielded without zero-info loss tolerance too (look at Codename TEMPEST issues)-- and headbands (Faraday fields or neuron fire camo hats : doable)-- remote readers: doable (and with now public patents converging: R G Malech; J Gallant, etc.))

-- Pre-pre (internal); pre (global security) and public press releases (I suggest: "bad news going back" talking about crimes, and general demographic of victims (their privacy)-- the tech held back-- and the "good news going forward"-- by now-- a public demonstration of "cure for the blind" -- (a monitor shows the "president's perspective" etc. -- a symbol of the not "keeping people in the dark" and a "bright future with potentially less suffering" (auto-pain reducers without drugs, etc.)-- immediate news priority: that parade for about 2000 hostages (estimate based on voices heard, and three decimal places on the 2200 meter (~136kHz) range (~135-137))-- the huge "crime" is the emergency "strobe light" event-- but the science is mind-blowing and will distract attention immediately to : direct brain VR on your game consols, etc. (attention from: revenge on broader institutions when it's a small cluster of criminals-- and also NB: looks like a "Libertarian" political agenda, re: public figure privacy invasions-- disclosure would mitigate that for them, I'd think).

The information below is somewhat of a mess-- not much time to organize it-- you should see both researched assessments and evidence of diversion attempts I hear on the implant signal:

(Only difference: IF any drug "leashes" used in WH-- I'd focus on Adam H Levi and the intel information air-lock with the president-- maybe Denis McDonough (former deputy security advisor)-- and note that all intel was replaced (potential stacked deck) after I got through with a report (20 FEB 2013)-- and saw what the CIA documenting me (24 MAR 2013) and some government officials on the line (no government officials heard prior to 2013)):

===-

Looking at: what is the largest integrated group that can help end the crimes? It may be you.

What is the minimum number of people needed to implement and protect the crimes and criminals, now, and going back-- I see two figures in the way: #1: Clapper; #2: Obama -- #3: Levi-- his logician skills and "drug" sadist addiction used.

Besides the Russian business "contractor intel" (a "synodoche": probably appropriated by various intelligence agencies too (private/public: maybe with direct Clapper contact)-- outside listening)-- that problem: facilitation and catalyzing of people being implanted and "accessible" -- and accessing them-- a fundamental violation of human rights (beyond your epidermis: think legal liability)-- I point to the KGB (Putin, Medvedev-- because they came forward first-- and appeared to want to help: but where are we now-- and a press release ends this-- with, at most-- a war time effort to prepare for computer brain interfacing issues, and no shots fired).

(Advice-- get the pride out of the way of internal legal accountability-- full stories and honest ability to correct any errors becomes a chance to teach others as you learn yourselves-- Russia: you have that switch to lower the volume (more "patch-work like"): still not used at a government level-- but understood this is not an institutional response, but something like a private interest group with hands in several institutions (at least Clapper + the Levi family)).

Passive observation of the general phenomenon-- a bit beyond callous journalists taking pictures of people on fire before calling the fire department.

(Advice: Report this web page to your local legal authorities-- they can have internet access-- verify that they see the page here that you see.)

Local US executive: speculation-- why the obstruction and sedition? With evidence: president is already using a dilaudid heroine drug supply to "control" (reward, habit, cold-turkey need) his staff and associates-- probably getting this supply from Adam H Levi. After I get through, he finds out about Don S Levi's abuse of me, his wife Katherine as nurse, and the supply to Adam. Further he begins to find he was implanted by Adam-- a Harvard student/peer -- probably around 1993-- but was already familiar with executive security implants-- this was not the surprise-- being caught as a ruthless CEO psychopath was.

(Advice-- make victims whole -- some may prefer that in private-- others will have their say, as to their personal public history on record).

Clapper and the DNI: could be Clapper in the back all along-- the "secret observer" with the most consistently off-the map but "knows what's going on" perspective-- potentially "your neighborhood molester" vicariously enjoying what he facilitates, catalyzes, develops, and protects (don't think the KGB billionaires developed this-- not sure on how they might have protected this tech (patent office blocks, etc.)-- that would get bad, re: their culpability-- and it could be that, unlike the Air Force Space Commanders, etc. promoting the "they implant themselves" strategy (admittedly violating and uncool)-- I think their objective included forcing the tech public for wider public benefit soon after use-- Clapper seems to be clinging to a cover-up for his own abuses-- and may have messed with everyone involved, cloaked as Don S Levi (who may have been unsuspecting of the extent of Clapper's involvement with his life-- and using his identity (imitation?) for his own ends in others heads who heard Don too (not sure how large Don S Levi knew the "audience" was, as it grew (I think about 2000 people))-- if Clapper "directs the posting" (24/7 = a partner at least: maybe he wife) -- brings in his relation to the KGB and their families under focus-- to what extent was there collaboration? (did they even know Clapper? As some "Wizard of Oz" mystery?-- less can be more-- and people tend to project their own concerns and intelligence (a shallow mirror tain on the other side of deep reflection: again-- Clapper's "hobby" ruined so many lives-- and still abuses many more)-- seems this guy (and again, probably his wife Sue, paralleling Adam's parents offering 24/7 security with fire-guard) were growing an ornate maze of murder and abuse that sprawled on, with psychopath calling cards laid here and there-- including just about all the elements (implanted people and groups) that were used and abused.

(Advice-- Fire or eliminate Clapper: getting him out would probably unlock the information grid-lock-- Don, Sue, and Katherine could significantly reduce the abuse.)

The UO folks-- looks like they did much to "blow this up big"-- some to get it out in the open (Cheyney Ryan: wiring every scale public figure he could), to end the abuse-- others-- like and esp. Don S Levi-- indulging in their abusive behavior-- and pursuing their own interests to the extent of facilitating and catalyzing and working hard to extend their abuse "opportunities" (like a sadist drug habit)-- seems many of the logic ploys left and right to buy time repeat those used by Don Levi himself-- he supplies the BS weaponry-- and some use it-- mostly Clapper and Obama.

(Advice-- the institutions do not own this (e.g. by cover-up)-- two issues only need go public -- brain computer interfacing, and the crimes in general-- the interfacing-- fits in the spectrum of tech issues already out there-- monitors emanate more electrical than brains, can have "base-line divergences" (like differential oscilloscope probes)-- and zero-tolerance there would be more difficult than "Faraday Yamaka's that hide your thoughts from God" (cp. lightning towers for rockets)-- or "brain camouflage hats" that bury activation patterns with activation noise (that does not present patterns any more than Wi-Fi)-- spy culture-- already going from cloak and dagger weaponry to undercover reporters-- illegal groundwork is intel frosting on the intel cake, and intel is the frosting on the military cake (budgets, etc.)). The crimes-- in the US-- people have 20+ years of privacy (sealed court records)-- and the right to tell their stories. Hence-- the institutions sever the severe criminal elements, do not own the crimes-- but triumph in ending them).

Some background (more at (b)(6))

MAJOR RE-ASSESSMENT: -- In 1997 the Omega Navigation System ends (probable: ear-stopper rectenna is now "imitated"-- finger in ear? (no: finger used tactile data-- those posted on: too bad)-- the "classified information broadcasting intercom" still works (turned off/on), but is always accessible

-- This means there was a pre-'97 prep: how many minimum people (and resources) needed for this? I suspect Obama was implanted '93-- (I think I was implanted back to '89 by SF Maj. David Capp (my landlord; private "echoes" with specific professors starts ~spring '91)-- but I "woke up to being sedated" by three women in the summer of '93 (I suspect: Katherine Anne Pearl Levi, Adam H Levi's wife Joanna Lyons Levi, and Winona Ryder's "introduction" to the implant-- really looks like a "practice run" for Don S Levi's son Adam H Levi (Now a DC asst. Attorney General -- investments and securities-- never seen him-- but for a brief awakening (the sedation event): strait brown hair (medium length, medium build, and glasses)-- a probable Obama student at Harvard (legacy, graduates HS ~1986); other male suspect-- a philosophy grad student ~'88 -- corrected papers for Don's Philosophy of Ethics class (brown hair, glasses-- tweed jacket-- Adam is my age; this guy was a few years older-- maybe a son, foster son, or intimate friend of Don's (I saw Don stroke the back of the man's hair-line / neck at a lecture they were attending))-- and I'm tortured 24/7 starting in the summer of '94 (still going: violated on pillory with rotating "guests" (hostages) with implied wider audience too-- they are "posted" on me-- why

is there this procedure?: they hear me all the time-- cannot stop that inbound (not sure if they rotate through, or just get called in ("on-call" or maybe "round-robin" with other targets))-- and can talk to a target when they "want"-- looks like that "contractor intel" thing-- and now they are all on me instead of someone with insider or classified info).

-- Probable NORAD (or Air Force Space Command)-- receiver (radio telescope LF), Navy transmitter (VLF) (Note : Admiral Blair (EDO, DNI #1) and DNI #2 O'Sullivan -- Navy; Gen. Clapper (GeoEye / ITT; DNI #1): Air Force (Gen. Kutyna-- NORAD / Air Force Space Commander);

-- My suspicion: Colonel Clapper as Tech Applications head ('84 - see link below) sees implants pass through his "office," out of site of the "Air Force Space Commanders" (Gen. Kutyna-- communications control specialty in '84; Gen. Padden-- reconnaissance specialty in '84)-- Clapper and his wife check out the implants (in nose-- tooth floss (put back next day), or just implanted already) at night-- and their suburban sprawl of abuse is started via the implanted UO professors (Don S Levi-- probably already abusive). I think CLAPPER does this with his WIFE (profile: attracted to spy with big hands-- but not ultra handsome)-- a "Dr. mental Don and nurse physical Katherine" parallel (Don-- gestured once in class-- proud of stubby fingers):

<http://www.afhso.af.mil/shared/media/document/AFD-130515-026.pdf>

-- Ear-plug simulation (and gestures) require NSA analog-digital recognition (the gated analog frequency slicing; and "near miss" pattern matching-- the gestures-- and the ear plug feeling would be an extension of this-- think: works in '84-- no satellites-- I think they never updated the implant equipment since then (maybe using generally updated VLF transmitters and LF receivers-- new computers, etc, but old implants; I estimate ~2000(0) frequencies on the 2200 meter (maybe frequencies separated like an "every other tooth" comb-- so that geographically near people's signals do not bleed into each other)-- three decimals on ~135kHz~137kHz-- 100s of public figures identifiable by voice/personality-- many more now that I do not recognize)

-- NSA does not necessarily have to know why they are doing something (info management)-- what did NSA know about stopper simulation and WIDESPREAD use? For "unsuspecting double agents?"-- or EVERYONE? (Gen. Alexander does not "endorse this at all.")

-- VERY evil agendas are RARE-- hence a smaller group is expected (despite suburban sprawl over decades-- night by night, year by year-- using UO folks, including actor Robert Ryan's son, UO philosophy professor Cheyney Ryan (perceives problem: wires many to "get this huge, out in open"), and Don Levi's contact with Winona Ryder (via Timothy Leary-- Don met him getting his Ph.D at Harvard-- Ryder's Godfather)-- points of entry in "six-degrees of separation"-- politicians-- at least former first lady HR Clinton "implanted for her safety"-- actors for assistance-- without knowing mind-reading aspect-- and some probably tricked from being approached as "MOSAD consultant" to surprise: implanted "MOSAD spy"-- with no real MOSAD

contact-- ie. Some coerced, blackmailed for unreal BS; at least for "sadistic satisfaction" and more control, etc.-- seems the top leadership "safety system" that is operated by Clapper (potentially covertly at first).

-- I suspect the Omega Navigation System is being brought back on-- Gen. Dempsey maybe thinking receivers for LF/VLF triangulation, but actually Russian ALPHA rectenna powering beacon replacements ("options")??-- not cool in my book-- looks like hostage extension plan

-- The current US government situation: plenty of folks now know of large-scale crisis-- but leadership is HIGHLY non-integrated at the top: the info management-- Clapper is probably dividing info (partial perspective "perception management" with a major immersed understanding of clues and figuring things out from observing people with few clues for years (vicarious observer)-- he seems to be a "knowledge of secrets" hobbyist too: his pro cloak and dagger taken into mob code of silence interest, etc.-- and his front "Don.")

-- The cleared people seem very unconnected up top-- but I see SO MANY investigators-- agent looking people in my neighborhood-- maybe some just implanted and checking each other out-- but clues seem to pass-- this means more than gossip-- and no way they will ever let go of the official grip and entry into the inevitable bust.

(NB: Don "puppets" many voices (common negative thread)-- why the necessity to make it sound like many villains-- or more than they are?)

Problem-- Clapper is central-- many in WH know: maybe all do-- but there may be mistrust-- and the first family: seem to be hostages, and I suspect the rest of the White House staff are "internal hostages" within the broader hostage situation mostly attacked by Don Levi and his family (w/ Ray Hyman)-- CLAPPER having access to the "security frequencies" that are probably different than the "agent implant" frequencies-- gives access that was not suspected-- and they continue to be hostages.

There is some military integration in response-- I've heard generals (Dempsey, Alexander and maybe Breedlove) -- Dempsey considering solutions, Alexander concerned about my patent info-- etc.-- but unclear why they have not integrated a constitutionally appropriate response-- many officers/soldiers may be hostages too, and getting info via a Clapper who is implicating the president. How much "official information" (not mine) is not vetted by Clapper before distribution? The WH hostage situation: again-- looks like they have as separate frequency range for WH security-- Clapper runs this too-- and Clapper is at the heart of the criminal problem going back decades.

-- Hearing that some leadership (FBI head Comey, maybe others (maybe Clapper and his wife Sue too))-- are implanted, facing massive flack, and afraid that if they leave their positions, they will be "permanent hostages"-- not sure what they see on the other side of the question marks-- the classified info wall controlled by Clapper (et. al?).

I can see some leadership de-motivated by perceived legal consequences-- I hear many politicians-- and have notified them that they endanger their own lives by not acting quickly-- and not to be stalled by tech BS (Clapper et, al.: anecdotal crux issues) buying time for psychopaths to kill families, etc.

A bit speculative-- but looks like a Levi MO-- if a narcotic is used-- I suspect Dilaudid-- mentioned at local ERs in Eugene when I've taken my mother there-- Don S Levi's wife was a nurse in Eugene-- schedule 2-- very addictive opiate, ~2.5 x as strong as oxycodone per mg-- shorter 6 hour high-- extreme withdrawal from cold-turkey.

I hear much in the way of "anecdotal crux issues"-- seems to be a "hypothesize problems we may face" crew-- mostly young people-- "a pre-Codename Tempest (mid 80s) generation; easier for Clapper to intimidate-- can use new jargon to intimidate non-tech managers, etc.)-- are they the only ones cleared to solve problems here? Problem generators? Told to buy time to get the Omega up to power rectennas if the Russian Alpha is taken down? The entire situation looks like Clappers fantasy-- but I'd suspect that it may have been "appropriated" by others for criminal monetary, etc. gain-- unbeknownst to him.

On 10 April (DJ) 2014-- seemed "global went down with local relays"-- Russian ALPAH down? 11 April 2014 --the 411-- "Bush is in lockdown"-- a clue from a man on a phone indicating a message (maybe Russian? 41 and/or 43-- 41 appologized to me (for what? maybe the '89 implanting: computer wiz kid); 43 said his administration pushed waterboarding to see why their security mind-readers were not available for use)-- cp: Putin demanding a Destroyer (seeing Adm. Blair at EDO?)-- so I'm not certain where they were in their investigation at that point (I may have heard Putin recently-- thinking he might remember, many years from now, my comment: "there's a beacon in my backyard" -- long after turning off the ALPHA rectenna powering navigation beacons (which amateur radio operators suggest has info-- see link):

<http://www.vlf.it/alphatrand/alpha.htm>

This may just power up rectennas, but may have implant signals too (inbound): or just used for other info transfer (divide by 10 (cheep smaller electronic parts (auto-gain off-boarded with echo)), 2200 meter as global "ham LF radio" (low signal competition), etc.-- suggest a parallel implant line).

30 July 2015b

Below-- executive summary-- does the president get this clarity from you? If big scare #s-- and not nukes-- please elaborate how, and how fast.

Subject: Clapper: fall guy for Dempsey? I'm not sure if Clapper is in a vs with Dempsey-- but consider:

1) going back to '93-- this looks a like a tactically organized approach-- Dempsey is 11B too-- and the spy shit looks sub-par (diversion vs. ? (double reverse psychology, etc.))-- preparing the switch-board relays to simulate operating ear-stopper-plugs by the feel of one in the ear: turn of inter-communication, while the outbound (and inbound) still is available-- this, set up before the Omega beacons (powering ear-stoppers) were shut down.

2) Clapper may have been asked to buy time (by Dempsey) while the defunct since '97 Omega was set up to replace the Alpha -- seeing that Russia had the power to drop the implant powering beacons ("Options"-- to do what?)

3) Clapper may have been used by his peers: fool Dempsey (peer support / manipulation too), etc: that Malech reader doesn't work-- you don't have to worry... (and they get recorded)

I don't accuse the military command of anything other than what they are doing now (using a rape-cult and raping people into silence: not "suppressive fire"-- unloading on a crowd)-- and how far does this go back? Again-- Clapper as "#1 spy" is a bit different than Dempsey as "#1 soldier" Also: Dempsey, appearing to "be a problem solver" and Clapper a "problem maker."-- both are suspects for me-- but Dempsey could stop this in a way that Clapper could not prevent (and not vice-versa (other than a "press release").

Also-- I'd look into '87 at Ft. Benning-- how many implanted? Me? There was a "Battalion name change parade"-- HUGE-- Dempsey, again-- 11B-- West Point-- but Ft. Benning is VERY infantry (Infantry, Air Assault, Airborne, Ranger, Special Forces).

Again-- severe this blight: disown, and triumph with a huge bust-- a PR would do-- full response from every legal angle-- and no more risk than CodeName Tempest Issues-- much bigger-- and this would also bring on full forces for preparedness for the inevitable (already here): brain-computer interfacing and Malech distance mind readers (less of an info loss threat than un-shielded monitor emotions decoded at a distance (human memory: fallible-- daydreams-- quantity of info-- biggest "integrated" priorities already implied by budgets (bombs, troops, and deployment-- and the defense against such))-- any reference to Nukes: BS (faraday cages, authorization codes from top to bottom, major safety and speed of deployment backups))-- information attrition and information inflation, etc.-- and counter-strategies to a slow to grow problem needs fuller force immediately against the soon-public knowledge (e.g.: don't surprise your full capability forces with a science announcement from left field))-- + the cost of hostages, and diplomatic impact by trying to own these international crimes longer.

Also-- people were fooled that they were "double agents" here in the US-- as if Mossad, etc. would not simply deny this if it were real-- and of course, another trick to manipulate.

Mind-Radio Brain Implant Tech

CT scan locates a Brain Energy-wave Transceiver

Seen on the right side of the Computed Tomography (CT) Scan of (b)(6) skull interior, in front of ear canal (tympanic chamber)-- circled in red at left-- verifiable: CT scan is in (b)(6) on-line medical records.

- a) It is small enough to be inserted via the Eustachian tubes (no skull breach necessary, no scar tissue)
- b) It is in the location where verbal thoughts have been decoded via electrode nets (see Guardian link below)
- c) It is located on the left side of the brain (language is processed on the left side; CT scan is L/R reversed)
- d) It is anchored to the interior of the skull so it would not move around (mounting problem solved)
- e) There is evidence of calcification (calcium build-up that occurs with implants in body)
- f) It is geometric (not organic) and has a node with two prongs, suggesting a micro-electronic device
- g) It is more dense than air, but less dense than bone (possibly some sort of plastic or other material)
- h) It is probably powered via rectenna and operated via signals in the low frequency radio spectrum (see discussion below)
- i) There is evidence of this device, or one like it, being in (b)(6) head since 1991

Looking at: what is the largest integrated group that can help end the crimes? It may be you.

What is the minimum number of people needed to implement and protect the crimes and criminals, now, and going back-- I see two figures in the way: #1: Clapper; #2: Obama -- #3: Levi-- his logician skills and "drug" sadist addiction used.

Besides the Russian business "contractor intel" (a "synodoche": probably appropriated by various intelligence agencies too (private/public: maybe with direct Clapper contact)-- outside listening)-- that problem: facilitation and catalyzing of people being implanted and "accessible" -- and accessing them-- a fundamental violation of human rights (beyond your epidermis: think legal liability)-- I point to the KGB (Putin, Medvedev-- because they came forward first-- and appeared to want to help: but where are we now-- and a press release ends this-- with, at most-- a war time effort to prepare for computer brain interfacing issues, and no shots fired).

(Advice-- get the pride out of the way of internal legal accountability-- full stories and honest ability to correct any errors becomes a chance to teach others as you learn yourselves-- Russia: you have that switch to lower the volume (more "patch-work like"): still not used at a government level-- but understood this is not an institutional response, but something like a private interest group with hands in several institutions (at least Clapper + the Levi family)).

Passive observation of the general phenomenon-- a bit beyond callous journalists taking pictures of people on fire before calling the fire department.

(Advice: Report this web page to your local legal authorities-- they can have internet access-- verify that they see the page here that you see.)

Local US executive: speculation-- why the obstruction and sedition? With evidence: president is already using a dilaudid heroine drug supply to "control" (reward, habit, cold-turkey need) his staff and associates-- probably getting this supply from Adam H Levi. After I get through, he finds out about Don S Levi's abuse of me, his wife Katherine as nurse, and the supply to Adam. Further he begins to find he was implanted by Adam-- a

Harvard student/peer -- probably around 1993-- but was already familiar with executive security implants-- this was not the surprise-- being caught as a ruthless CEO psychopath was.

(Advice-- make victims whole -- some may prefer that in private-- others will have their say, as to their personal public history on record).

Clapper and the DNI: could be Clapper in the back all along-- the "secret observer" with the most consistently off-the map but "knows what's going on" perspective-- potentially "your neighborhood molester" vicariously enjoying what he facilitates, catalyzes, develops, and protects (don't think the KGB billionaires developed this-- not sure on how they might have protected this tech (patent office blocks, etc.)-- that would get bad, re: their culpability-- and it could be that, unlike the Air Force Space Commanders, etc. promoting the "they implant themselves" strategy (admittedly violating and uncool)-- I think their objective included forcing the tech public for wider public benefit soon after use-- Clapper seems to be clinging to a cover-up for his own abuses-- and may have messed with everyone involved, cloaked as Don S Levi (who may have been unsuspecting of the extent of Clapper's involvement with his life-- and using his identity (imitation?) for his own ends in others heads who heard Don too (not sure how large Don S Levi knew the "audience" was, as it grew (I think about 2000 people))-- if Clapper "directs the posting" (24/7 = a partner at least: maybe he wife) -- brings in his relation to the KGB and their families under focus-- to what extent was there collaboration? (did they even know Clapper? As some "Wizard of Oz" mystery?-- less can be more-- and people tend to project their own concerns and intelligence (a shallow mirror tain on the other side of deep reflection: again-- Clapper's "hobby" ruined so many lives-- and still abuses many more)-- seems this guy (and again, probably his wife Sue, paralleling Adam's parents offering 24/7 security with fire-guard) were growing an ornate maze of murder and abuse that sprawled on, with psychopath calling cards laid here and there-- including just about all the elements (implanted people and groups) that were used and abused.

(Advice-- Fire or eliminate Clapper: getting him out would probably unlock the information grid-lock-- Don, Sue, and Katherine could significantly reduce the abuse.)

The UO folks-- looks like they did much to "blow this up big"-- some to get it out in the open (Cheyney Ryan: wiring every scale public figure he could), to end the abuse-- others-- like and esp. Don S Levi-- indulging in their abusive behavior-- and pursuing their own interests to the extent of facilitating and catalyzing and working hard to extend their abuse "opportunities" (like a sadist drug habit)-- seems many of the logic/debate ploys left and right to buy time repeat those used by Don Levi himself-- he supplies the BS weaponry-- and some use it-- mostly Clapper and Obama.

(Advice-- the institutions do not own this (e.g. by cover-up)-- two issues only need go public -- brain-computer interfacing, and the crimes in general-- the interfacing-- fits in the spectrum of tech issues already out there-- monitors emanate more electrical than brains, can have "base-line divergences" (like differential oscilloscope probes)-- and zero-tolerance

there would be more difficult than "Faraday Yamaka fields that hide your thoughts from God" (cp. lightning towers for rockets)-- or "brain camouflage hats" that bury activation patterns with activation noise (that does not present patterns for the brain to recognize any more than Wi-Fi)-- spy culture-- already going from cloak and dagger weaponry to undercover reporters-- illegal groundwork is intel frosting on the intel cake, and intel is the frosting on the military cake (budgets, etc.)). The crimes-- in the US-- people have 20+ years of privacy (sealed court records)-- and the right to tell their stories. Hence-- the institutions sever the severe criminal elements, do not own the crimes-- but triumph in ending them).

02 August 2015

Ocham's razor -- efficient alternate scenario:

-- All sort of people implanted-- US government resources abused-- but many think they are just special agents.

-- "Contractor Intel" is the real deal-- using the implanted people for info

-- When I get through-- Contractor Intel posts everyone on me, rather than marks

-- The Don S Levi group-- just one of many-- and in this case-- severely abusive

-- Don, etc. -- just jump on any voices put in

-- Seems to be a "director"-- probably hooked up to US government: Clapper
-- and Putin, and Levi-- have similar voices.

That "contractor intel"-- the KGB involved with the implant (see long drift from original insight-- Chanselor Merkel noted Putin not "truthing out" in a safe environment; Many hits on 20 May 2013 (Don S Levi's B-day) from Moscow-- a diversion from them-- but a sliver of conscience (I already had confirmation I got through)-- the mis-direction from them as the villains begins (not sure what support they have-- if there is any dissent among their group) : Looks to me like they were implanted by the Air Force Space Commanders (the founders)-- who probably did such to force the technology public ("they implant themselves, we have access"-- and then... they have it: we must go public). Probably used Clapper-- and the UO professors. Look for not Russian intel-- but the private sector intel from Putin and his KGB Billionaire friends-- their spies inside the US government at key points: "James Comey" -- Commie, etc.

Call the FBI and report this page (verify they see it on their end: they will have internet access): quantity of reports, and no "inbound phone number" tapped, when you find your own numbers: more than one (also: below-- do the specific (you are on their map) last.

>

MAJOR RE-ASSESSMENT: -- In 1997 the Omega Navigation System ends (probable: ear-stopper rectenna is now "imitated"-- finger in ear? (no: finger used tactile data-- those posted on: too bad)-- the "classified information broadcasting intercom" still works (turned off/on), but is always accessible

-- This means there was a pre-'97 prep: how many minimum people (and resources) needed for this? I suspect Obama was implanted '93-- (I think I was implanted back to '89 by SF Maj. David Capp (my landlord; private "echoes" with specific professors starts ~spring '91)-- but I "woke up to being sedated" by three women in the summer of '93 (I suspect: Katherine Anne Pearl Levi, Adam H Levi's wife Joanna Lyons Levi, and Winona Ryder's "introduction" to the implant-- really looks like a "practice run" for Don S Levi's son Adam H Levi (Now a DC asst. Attorney General -- investments and securities-- never seen him-- but for a brief awakening (the sedation event): strait brown hair (medium length, medium build, and glasses)-- a probable Obama student at Harvard (legacy, graduates HS ~1986); other male suspect-- a philosophy grad student ~'88 -- corrected papers for Don's Philosophy of Ethics class (brown hair, glasses-- tweed jacket-- Adam is my age; this guy was a few years older-- maybe a son, foster son, or intimate friend of Don's (I saw Don stroke the back of the man's hair-line / neck at a lecture they were attending))-- and I'm tortured 24/7 starting in the summer of '94 (still going: violated on pillory with rotating "guests" (hostages) with implied wider audience too-- they are "posted" on me-- why is there this procedure?: they hear me all the time-- cannot stop that inbound (not sure if they rotate through, or just get called in ("on-call" or maybe "round-robin" with other targets))-- and can talk to a target when they "want"-- looks like that "contractor intel" thing-- and now they are all on me instead of someone with insider or classified info).

-- Probable NORAD (or Air Force Space Command)-- receiver (radio telescope LF), Navy transmitter (VLF) (Note : Admiral Blair (EDO, DNI #1) and DNI #2 O'Sullivan -- Navy; Gen. Clapper (GeoEye / ITT; DNI #1): Air Force (Gen. Kutyna-- NORAD / Air Force Space Commander);

-- My suspicion: Colonel Clapper as Tech Applications head ('84 - see link below) sees implants pass through his "office," out of site of the "Air Force Space Commanders" (Gen. Kutyna-- communications control specialty in '84; Gen. Padden-- reconnaissance specialty in '84)-- Clapper and his wife check out the implants (in nose-- tooth floss (put back next day), or just implanted already) at night-- and their suburban sprawl of abuse is started via the implanted UO professors (Don S Levi-- probably already abusive). I think CLAPPER does this with his WIFE (profile: attracted to spy with big hands-- but not ultra handsome)-- a "Dr. mental Don and nurse physical Katherine" parallel (Don-- gestured once in class-- proud of stubby

fingers):

<http://www.afhso.af.mil/shared/media/document/AFD-130515-026.pdf>

-- Ear-plug simulation (and gestures) require NSA analog-digital recognition (the gated analog frequency slicing; and "near miss" pattern matching-- the gestures-- and the ear plug feeling would be an extension of this-- think: works in '84-- no satellites-- I think they never updated the implant equipment since then (maybe using generally updated VLF transmitters and LF receivers-- new computers, etc, but old implants; I estimate ~2000(0) frequencies on the 2200 meter (maybe frequencies separated like an "every other tooth" comb-- so that geographically near people's signals do not bleed into each other)-- three decimals on ~135kHz-~137kHz-- 100s of public figures identifiable by voice/personality-- many more now that I do not recognize)

-- NSA does not necessarily have to know why they are doing something (info management)-- what did NSA know about stopper simulation and WIDESPREAD use? For "unsuspecting double agents?"-- or EVERYONE? (Gen. Alexander does not "endorse this at all.")

-- VERY evil agendas are RARE-- hence a smaller group is expected (despite suburban sprawl over decades-- night by night, year by year-- using UO folks, including actor Robert Ryan's son, UO philosophy professor Cheyney Ryan (perceives problem: wires many to "get this huge, out in open"), and Don Levi's contact with Winona Ryder (via Timothy Leary-- Don met him getting his Ph.D at Harvard-- Ryder's Godfather))-- points of entry in "six-degrees of separation"-- politicians-- at least former first lady HR Clinton "implanted for her safety"-- actors for assistance-- without knowing mind-reading aspect-- and some probably tricked from being approached as "MOSAD consultant" to surprise: implanted "MOSAD spy"-- with no real MOSAD contact-- ie. Some coerced, blackmailed for unreal BS; at least for "sadistic satisfaction" and more control, etc.-- seems the top leadership "safety system" that is operated by Clapper (potentially covertly at first).

-- I suspect the Omega Navigation System is being brought back on-- Gen. Dempsey maybe thinking receivers for LF/VLF triangulation, but actually Russian ALPHA rectenna powering beacon replacements ("options")??-- not cool in my book-- looks like hostage extension plan

-- The current US government situation: plenty of folks now know of large-scale crisis-- but leadership is HIGHLY non-integrated at the top: the info management-- Clapper is probably dividing info (partial perspective "perception management" with a major immersed understanding of clues and figuring things out from observing people with few clues for years (vicarious observer)-- he seems to be a "knowledge of secrets" hobbyist too: his pro cloak and dagger taken into mob code of silence interest, etc.-- and his front "Don.")

-- The cleared people seem very unconnected up top-- but I see SO MANY investigators-- agent looking people in my neighborhood-- maybe some just implanted and checking each other out-- but clues seem to pass-- this means

more than gossip-- and no way they will ever let go of the official grip and entry into the inevitable bust.

(NB: Don "puppets" many voices (common negative thread)-- why the necessity to make it sound like many villains-- or more than they are?)

Problem-- Clapper is central-- many in WH know: maybe all do-- but there may be mistrust-- and the first family: seem to be hostages, and I suspect the rest of the White House staff are "internal hostages" within the broader hostage situation mostly attacked by Don Levi and his family (w/ Ray Hyman)-- CLAPPER having access to the "security frequencies" that are probably different than the "agent implant" frequencies-- gives access that was not suspected-- and they continue to be hostages.

There is some military integration in response-- I've heard generals (Dempsey, Alexander and maybe Breedlove) -- Dempsey considering solutions, Alexander concerned about my patent info-- etc.-- but unclear why they have not integrated a constitutionally appropriate response-- many officers/soldiers may be hostages too, and getting info via a Clapper who is implicating the president. How much "official information" (not mine) is not vetted by Clapper before distribution? The WH hostage situation: again-- looks like they have as separate frequency range for WH security-- Clapper runs this too-- and Clapper is at the heart of the criminal problem going back decades.

-- Hearing that some leadership (FBI head Comey, maybe others (maybe Clapper and his wife Sue too))-- are implanted, facing massive flack, and afraid that if they leave their positions, they will be "permanent hostages"-- not sure what they see on the other side of the question marks-- the classified info wall controlled by Clapper (et. al?).

I can see some leadership de-motivated by perceived legal consequences-- I hear many politicians-- and have notified them that they endanger their own lives by not acting quickly-- and not to be stalled by tech BS (Clapper et, al.: anecdotal crux issues) buying time for psychopaths to kill families, etc.

A bit speculative-- but looks like a Levi MO-- if a narcotic is used-- I suspect Dilaudid-- mentioned at local ERs in Eugene when I've taken my mother there-- Don S Levi's wife was a nurse in Eugene-- schedule 2-- very addictive opiate, ~2.5 x as strong as oxycodone per mg-- shorter 6 hour high-- extreme withdrawal from cold-turkey.

I hear much in the way of "anecdotal crux issues"-- seems to be a "hypothesize problems we may face" crew-- mostly young people-- "a pre-Codename Tempest (mid 80s) generation; easier for Clapper to intimidate-- can use new jargon to intimidate non-tech managers, etc.)-- are they the only ones cleared to solve problems here? Problem generators? Told to buy time to get the Omega up to power rectennas if the Russian Alpha is taken down? The entire situation looks like Clappers fantasy-- but I'd suspect that it may have been "appropriated" by others for criminal monetary, etc. gain-- unbeknownst to him.

On 10 April (DJ) 2014-- seemed "global went down with local relays"-- Russian ALPAH down? 11 April 2014 --the 411-- "Bush is in lockdown"-- a clue from a man on a phone indicating a message (maybe Russian? 41 and/or 43-- 41 appologized to me (for what? maybe the '89 implanting: computer wiz kid); 43 said his administration pushed waterboarding to see why their security mind-readers were not available for use)-- cp: Putin demanding a Destroyer (seeing Adm. Blair at EDO?)-- so I'm not certain where they were in their investigation at that point (I may have heard Putin recently-- thinking he might remember, many years from now, my comment: "there's a beacon in my backyard" -- long after turning off the ALPHA rectenna powering navigation beacons (which amateur radio operators suggest has info-- see link):

<http://www.vlf.it/alphatrond/alpha.htm>

This may just power up rectennas, but may have implant signals too (inbound): or just used for other info transfer (divide by 10 (cheep smaller electronic parts (auto-gain off-boarded with echo)), 2200 meter as global "ham LF radio" (low signal competition), etc.-- suggest a parallel implant line).

30 July 2015b

Below-- executive summary-- does the president get this clarity from you? If big scare #s-- and not nukes-- please elaborate how, and how fast.

Subject: Clapper: fall guy for Dempsey? I'm not sure if Clapper is in a vs with Dempsey-- but consider:

1) going back to '93-- this looks a like a tactically organized approach-- Dempsey is 11B too-- and the spy shit looks sub-par (diversion vs. ? (double reverse psychology, etc.))-- preparing the switch-board relays to simulate operating ear-stopper-plugs by the feel of one in the ear: turn of inter-communication, while the outbound (and inbound) still is available-- this, set up before the Omega beacons (powering ear-stoppers) were shut down.

2) Clapper may have been asked to buy time (by Dempsey) while the defunct since '97 Omega was set up to replace the Alpha -- seeing that Russia had the power to drop the implant powering beacons ("Options"-- to do what?)

3) Clapper may have been used by his peers: fool Dempsey (peer support / manipulation too), etc: that Malech reader doesn't work-- you don't have to worry... (and they get recorded)

I don't accuse the military command of anything other than what they are doing now (using a rape-cult and raping people into silence: not "suppressive fire"-- unloading on a crowd)-- and how far does this go back? Again-- Clapper as "#1 spy" is a bit different than Dempsey as "#1 soldier" Also: Dempsey, appearing to "be a problem solver" and Clapper a "problem

maker."-- both are suspects for me-- but Dempsey could stop this in a way that Clapper could not prevent (and not vice-versa (other than a "press release").

Also-- I'd look into '87 at Ft. Benning-- how many implanted? Me? There was a "Battalion name change parade"-- HUGE-- Dempsey, again-- 11B-- West Point-- but Ft. Benning is VERY infantry (Infantry, Air Assault, Airborne, Ranger, Special Forces).

Again-- severe this blight: disown, and triumph with a huge bust-- a PR would do-- full response from every legal angle-- and no more risk than CodeName Tempest Issues-- much bigger-- and this would also bring on full forces for preparedness for the inevitable (already here): brain-computer interfacing and Malech distance mind readers (less of an info loss threat than un-shielded monitor emotions decoded at a distance (human memory: fallible-- daydreams-- quantity of info-- biggest "integrated" priorities already implied by budgets (bombs, troops, and deployment-- and the defense against such))-- any reference to Nukes: BS (faraday cages, authorization codes from top to bottom, major safety and speed of deployment backups))-- information attrition and information inflation, etc.-- and counter-strategies to a slow to grow problem needs fuller force immediately against the soon-public knowledge (e.g.: don't surprise your full capability forces with a science announcement from left field))-- + the cost of hostages, and diplomatic impact by trying to own these international crimes longer.

Also-- people were fooled that they were "double agents" here in the US-- as if Mossad, etc. would not simply deny this if it were real-- and of course, another trick to manipulate.

30 July 2015

Russia could take the lead in the ending of the international implant hostage situation (and idiotic world take over attempt): drop the ALPHA Russian NAVAIID immediately-- all implants go dead? (rectenna range).

(Watch out for US criminal military leadership (not all, I hope-- no signs of dissent yet for me: really ashamed of the US military at this point: not defending The Constitution, defending your leadership's "brilliant higher values" (they don't deserve morale, until they are moral-- but I already see it now: they care shit zero about me, and the current state of war crimes under more scrutiny indicates a long past even worse) bringing on the old OMEGA to replace this (Martin Dempsey: untrustworthy-- other covert nations sabotage these)).

29 July 2015

Looking back-- (and see below) -- I think the Omega Navigation System was taken down on purpose-- and that there was pre-planning going back at least to 1993 (the practice run on me by Adam H Levi-- probably for Obama later-- a Harvard Law prodigy (think: Harvard, Yale, lawyers, managers-- the

"presidential demographic"-- who else would look like such an obvious future candidate)-- this is looking militantly organized-- criminals "learn by doing"-- military learns to train and practice. Me being tortured 24/7-- starts in the summer of '94-- less than three years before the 1997 closing of the Omega Navigation System (see just below). Again-- obvious "secret world take-over attempt"-- but I'm not sure where a "mis-guided (simple minded) good utilitarian intentions" end and the criminal "make money and rape" agenda starts (personel)-- buying time now gives obviously evil and criminal elements time to do more crimes-- if a nuke crew was placed-- buying time to find them makes a nuke launch more likely: a press release ends that threat just about immediately as the full force of the institution is brought to bare (think: nuke crews not evil-- but brain-washed and tricked into thinking they would be doing the right thing-- what patterns do you see now?) Look at the current solutions used by the military-- out in the open, doing the crimes they are denying they did in the past.

28 July 2015b

I'm certain that Joint Chiefs of Staff head Martin Dempsey is hooked on an opiate. His "think I'll get in the kool-aid line" remark a couple years ago (hinting at "get out of jail by pretending to be hostages"-- implicating the entire White House)-- and hearing what sounded like him shooting up (thought it was diaphragm attacks)-- and the dumb pun on his name (MD) -- probably hooked-- coerced, or using this as an excuse.

Over the years-- I've heard one "not the Pentagon" senario after another-- also-- look at the Pentagon issue with gambling and prositution paid for by US tax payers-- these idiots probably started pushing implants post 1997-- after the Omega Navigation Network was dismantled, and the external ear-canal stoppers stopped working. Of course the UO folks are evil-- but thinking these professors pulled this over on the Pentagon is ludicrous-- they don't have that organized training that would lead even to ideas like doing a practice run on me (summer 1993) before impanting Obama at Harvard-- looks like Comey was placed for soldiers to think they needed to kill the president, since his pattern was to not let a wounded leader be coerced. These are WAR crimes that delay full institutional preparedness for the inevitable computer brain interfacing-- and not due to Nukes (Faraday Caged-- protected from all electro magnetic attacks)-- nothing fast and huge-- this is insane--beyond incompetence-- they (the military leadership) are most likely trying to cover for raping celebrities (the prositutes on expense accounts thing)-- and for raking in money with insider trading (the richest people on the planet: I've heard them). The idea that some small contingent-- the UO profs, "Adam & the President," molestor Clapper, Vectrus-- some retired Air Force Space Commanders-- doing this: what a joke-- but what would you expect from criminals to divert to, when they are so stupid, they think that their hostages will not RUN to that tank of computer-brain interfacing and verified testimony coming down the road (foreign intel folks must have already reported: low voltage differential oscilloscope probes in noses, ears, etc.) Where else would you expect an OBVIOUS world take over attempt, using US taxpayer money and resources with a bone-headed reduction of values to utilitarianism and their "science" of "we know better" as an exuse to themselves. They are rapists and

mass-murderers-- plain and simple-- look at their approach right now (expect the worst to be "reluctant supporters"-- this lends even more credibility to the crimes: "I don't want to-- but we must.") Shame on you to all military folks who are active, and know. I'm an 11B NG specialist from '87-'93-- and these war criminals are not the heroes of World War II-- these are spoiled brats who'd start World War III since THEIR lives are over (current global provocations)

A voice claiming to be from communications contractor Harris sounded floored when reporting the Pentagon refusal that they jam the signals-- but had expected such from the WH (given the "radio show.") The soldier reporting that he'd called people into a signal free zone to see what the hell was going on reported: "they already knew."

I'm not sure how calls are done (I was implanted in my sleep 24+ years ago)-- you don't need "equipment"-- even samplers can be done by sign language (agents in the field, time-stamping recordings with gestures); but I'd look-- have the "stoppers" seemed to work? Test them (do they emit a radio signal when an inbound signal should light up the rectenna?)-- how many "young soldiers" would it take to make this seem to work? or the tactile feeling (sent in signal) of one in the ear? (maybe try a finger in the ear, or nose), Or some "fake controllers?" Also-- who are the marks? The actors and/or the soldiers and/or the rich and powerful people?

Again-- the current approach to solutions indicates the crimes they are trying to hide.

28 July 2015a

Given that the implants are rectenna powered-- maybe the "ear-stoppers" are too: could be that the Russian ALPHA NAVAIID beacons power the implant (~16.2kHz)-- makes sense, if framing the USSR-- but the US Omega navigation system beacons may have been used for the ear-stoppers (maybe a joke on "heroic help")-- but this was dismantled, ending in 1997. Could be the crimes were widened dramatically after that, as the program managers did not update the stoppers.

28 July 2015

Given that the top would truth-out at this point-- this makes sense:

I've heard about 50 people who are criminally involved with the UO profs-- Don S Levi, Ray Hyman-- etc.-- basically "stress-emotion drama drug addicts" protecting their fix supply.

These people may be misinformed that helping them against the top US leadership (that the UO profs have access to): Again-- about 50 family members, friends, peers, and former students-- involved in opposition to the US leadership-- who are obviously looking suspect with their current barbaric approach to "safety."

So-- yes-- look into a flaw (battery or rectenna (what frequency? Omega? Old? Burnout)) that the senior leadership did not know about-- and this (still) being exploited by the UO "radical" professors, etc.

27 July 2015

<http://www.afhso.af.mil/shared/media/document/AFD-130515-026.pdf>

This is from Air Force magazine November 1984 -- The Malech based mind-radio tech goes back to 1974, and there are less than a dozen people in the Air Force leadership that would be relevant to the implant tech: the Air Force Space Commanders (the founders) look like they had this ("NASA grade receivers")-- e.g. Gen. Kutyna (p. 157 - no photo) running communications and sensor tech, Gen. Paden running reconaissance (listed), etc. Col. James Clapper was running that "office with a desk" at the top of AF tech intel-- this tech would have passed through there-- and just about only he could steal this without the group knowing.

Looking back on the Codename Tempest issues (public for some time)-- many tech issues including monitors not being shielded: they could be decoded at a distance by monitoring their emanations remotely-- and there is much more information throughput on a monitor than through a person's head that would be valuable information (both government and private sector: at the time-- less monitors = more valuable throughput per monitor)-- this was a global issue-- still addressed: but you can see that this issue, caught in progress, would provide more info with less diplomatic or legal risk (humans not violated, just machines). And monitor sheilding was just one issue. Every country would have statistics on this-- I don't recall war crimes being done to deal with it. Again: get your humanity-- some many national treasures (here and abroad) may die after years, if not decades of being hostages-- probably many in Clapper's sphere.

25 July 2015a

Hostages: please back-up my call to the FBI, ODNI, and DOJ-- a good lie: "I have a friend who I reasonably suspect is implanted with some sort of communications device-- they pointed me to (b)(6) website-- and I see this as real-- more than a paranoid suspicion-- could you please look into it-- I'd rather not compromise my friend's privacy." -- or just relate your real story-- probably the best. No legal consequences to express you very real suspicions about a crime-- you will not be busted for seeming crazy (those implanted in their sleep, etc.)

The DOJ intel switchboard (202) 514-1057 -- getting (b)(6) directly (no operator relay) and hearing her deny she knew who I was, and our prior conversation when she had called me back and confirmed my contact about a year ago: (b)(3)

25 July 2015

At this point: realizing. - I will have to wait 5-10 years for the science of brain-computer interfacing and verified testimony to emerge: my contact was contained.

Codename tempest (the 80s discovery of emanations being analyzed (like seeing computer screens from the electrical emanations)) . this was a much bigger threat caught in progress: tech levels of info. stolen remotely, without the legal diplomatic risk of violating human beings. look at the impact assessment for that. you will see this radio-mind tech. has much less info at stake, and having to at least "brain-rape" people to get the info. this alone demonstrates the REAL intel leadership already had a feel for the real threat. less than that from Codename Tempest adjustments. This includes private sector.

Also. Nuke crews are radio protected (think MX "garages" having Faraday cages). they have been since the beginning of electronic warfare analysis (protection from electrical bombs and satellite attacks to knock out the equipment): even if crews were attacked. there is so much back-up on speed of deployment, and safety triple checks. this would not really be an issue either.

So. given that, and that I hear these government officials: clear. my contact has been contained. and we will have to wait for the tank of science developing computer brain interfacing coming down the road (incentivized by money. think Nintendo We, Sony Playstation, Microsoft Xbox and an HDMI interface. a pair of glasses or hat where the electronics in the glasses or hat do the high speed pre-calibrated "reverse speed triangulating" of the signal to sum weaves of 60 gig a Hz wi-fi and have independent timing for different regions of the brain (think the cord of nerves going back from the eyes and the visual areas at the back of the brain (and user adjusted "focus" variables)). the information provided by the computer can be any speed: like 24Hz or 60Hz or 120Hz . the patterns generated by the interface, probably in the kHz. Hz here seen as frames per second)). When used in reverse (stimulating signals recieved), this will also bring the inner voice out (already discussed publicly by scientists: the data. your voice as you speak has the parallel of the inner voice too)). this will bring verified testimony (the estimate by Brian Pasley. a public international science development in about 5-10 years out (see the 2011 Guardian article)). and improved precision in investigations. then, the hostages can begin to verify their testimony, and break up.

The "fascist rape cult" running the US government. (Fascist here: although not really about utilitarian efficiency (somehow. my delayed additional foundation with restitution. is less valuable than rape for crowd-control). they really are about total control of a government-private sector synergy. but just end up killing, raping, and stealing money. not changing democratic public attitudes through education, but probably obstructing help (like now: "you won't turn our weapon in to justice and medicine" like a cure for the blind and auto-pain or chronic depression reducers that detect, and offset

pain or depression with pleasure without chemical side effects.

My additional charity foundation to reduce suffering and protect bio-diversity: always good to increase the variables (goals, initial money). to make additions tied to any other variables (good or bad) = evil.

And me: I would offset delays from lower initial principle (lower than all my money, minus living and project expenses). keeping more money for my "added value" use. and I would pay the future loss from any one lower initial principle foundation in the future with "interest" by starting a secondary foundation (some project money): more than making up for the "one-time" losses of gift arising from hitting the same goals adjusted for inflation later (an area. not perpetual losses). these secondary foundations. all this. no more logistically controversial than the global pension system lasting three back-to-back retirement funds and perpetual foundations not being outlawed globally. Delays in justice, due process, and restitution for me result in thousands dead daily.

23 July 2015b

Called the ODNI General Council today: 23 July 2015 -- after calling the DOJ intel switchboard (202) 514-1057 -- getting (b)(6)(b)(7)(C) directly (no operator relay) and hearing her deny she knew who I was, and our prior conversation when she had called me back and confirmed my contact about a year ago: (b)(3)

<http://www.dni.gov/index.php/about/organization/office-of-general-counsel-who-we-are>

NOW WOULD BE A GOOD TIME TO BACK UP MY CONTACT FROM EVERY DIRECTION : BOTH DOJ (ask for (b)(6)(b)(7)(C)) and (b)(3)(b)(6)

23 July 2015

I've noted in my emails to US leadership: the hostages need to be interrogated in any event-- why do I, or anyone, have to be raped on a pillory up here? Don S Levi is the most vicious rapist, with Ray Hyman a distant second-- they could be removed-- and it sounds like you contact them and deal with them anyway: tell them they will be arrested if they do anything but police the info-- if you are worried about other people being "thrown in the zone." But-- better yet-- instead of using a rape cult to "verify that people are not going to the press or FBI"-- why not use intel

to do this-- and only verify that they are not going to the press? This way, any other classified info (I've heard people were posted on government officials)-- this info would be less in risk of being sold.

US Intel-- the rape cult is not huge-- replace them with your own in the head interrogators. Safer-- more controllable-- and it is already obvious that you are USING this cult now.

And also-- Nukes are not at stake (more than triple back-up on quick deployment and robust verification: 60+ years and no false bombings).

Where are any "scare numbers" coming from: economic impact from information attrition, in an era of information inflation? Again-- new ways to do crimes, but the same number of criminals on average; new ways to gather info, but the same budgets on average (and baseline with current methods with less risk: blow-dart radio listening devices, cameras and microphones in rooms, monitor emissions, and hacking computers and remotely viewing)-- and then the endless benefits, like verified testimony (question mark / green light); cure for the blind (with independent brain regions and timings); automatic pain reducers (sense, and compensate with pleasure); automatic depression reducers as well: think-- global reduction of domestic abuse, and pain. Women having a baby might like this, etc.-- you are holding back a considerable amount of suffering reduction on planet earth.

20 July 2015

An idea-- run quickly down the chain of command to everyone (even in the mail)-- give everyone an "ear stopper" for the mean-time-- given them enough for friends and families-- if not manufactured-- they are simple-- make the equivalent ASAP-- engineers do not need to know why they are making "wideband radio tone" devices (eg: blocking the outbound (and hence, also the inbound auto-gain calibrator)-- this would be low-power radio noise)).

19 July 2015

Here is my current speculation: What Don S Levi does as a "full time job" -- James Clapper does as a "hobby."

--Hearing a voice -- Gen. Denis Blair-- we didn't set up that "ready-made conspiracy theory" that the UO profs stumbled upon (ditto with Gen. Kutyna)

--Clapper-- now in charge of DNI (where's Lt. Gen Stewart?)-- probably in charge of the compartmentalized implant program, and "who gets to know about it"

--Clapper-- would know that replacing every intel head (top, and specific intel branch: FBI, CIA, NSA, DOJ, etc.)-- buys time, and slows preparedness-- staffs have to get up to speed.

--The DOD did not need more time to prepare with an intel buy-time

diversion: they are "good-to-go" (verify this: I've heard it plenty-- looks like they had to discover the problem independently)

--Hearing: every significant figure is not in harmony with Clapper (S O'Sullivan, R. Litt, Kutyna, Blair)-- Kutyna, Blair, Meyerriecks-- willing to "truth-out" with verified testimony.

--Clapper seems in tandem with Don Levi at times: "tech cruxes" that don't take full "negative feedback loop" ecology of information, threat mitigations into accounts-- basically: looking at future inevitable problems, not solving the current crisis-- actually using hypotheticals to buy time: and knowing buying time means people are brain-raped, butt-raped, injured, and killed.

--The implant program-- they would know about "ear stoppers"-- radio white noise generators that operate as an external switch-- for those who got one: not adequate to the highest levels of classified information: the implants were designed for field agents (and unsuspecting double agents) with "need to know" levels of knowledge-- not managers only getting 10% of the broadcast info on a "secret phone line." (more info broadcast out from agents, as they observe: only vocal needed for communication). Did everyone get "ear stoppers?"-- seems the UO profs did not-- and they discovered more when they randomly tuned into frequencies (the "ready-made conspiracy theory")-- and they look like a common martial arts tactic: diversion-- a flashy (LSD drug users, and molesters) diversion-- given that Clapper did not know when the crimes would be "caught."

Again-- my speculation: A young clapper in his 30s-40s -- USAF, in his spare time-- sets up the UO profs (before Don S Levi has President Obama implanted at Harvard ~1990 via his son, a student there: Adam H Levi (now a DC assistant AG)) (Clapper sounds a bit like Don S Levi-- like Moe from the three stooges). 30 years later: he is in charge of the DNI (go back a year or so: hear his confession, as if he were being puppet-ed to make it with "Cheyney Ryanb" who sounds a bit like the "Gen. Kutyna voice" (strong tenor))-- may have tried to frame Gen. Kutyna with "dumb puns" and "psychopath calling cards").

05 June 2015

Under the radar solution: call every head directly or with public address recording on the implant signal line (call this #): ~\$5000 direct deposit for lost work and transportation costs to a hospital for de-implanting (potential: plane reservations made for rural, international survivors, etc.): Deposition at hospital (might be a "recorded" swearing out before de-implanting) and implant material kept: ~\$500,000 direct deposit after; keep in touch for any further litigation, etc.

04 June 2015

I expect a 2016 presidential election ETA goal for the criminals-- with the

"no info" lid on the "raped press" pressure -- lifted (at least by Don S Levi and Barack Obama):

1) Don S Levi (age 79-- and liberal, not progressive)-- would motive: narcissistic spectacle, and damage risk (historical spectacle)

2) Barack Obama (meeting Don over 20 years ago, would like to "win for the Dems") would go for a "last minute swift boat veterans" framing of the candidate (think the 411 (info, Bush 41-- after DJ 4-10, more global communications networks down to check local influence) : "Bush is in lock down" clue I got April 11, 2014)-- would be a too late to prove wrong framing that would impact the election: motive-- narcissistic spectacle and "winning."

Method: multiple question marks (red herrings, etc.), non-compliance, restrict size of force deployed to issues ("top secret"), exploit manager psychology (accountability, black-mailing from in head info (Rice (look at her "public" actions: freeze, assess, then: this is no a solution)), exploit bad department cultures, use fellow criminals (Pentagon contractor interfaces).

US GOVERNMENT: PEOPLE HAVE COMMON SENSE-- FREEZE WHILE WE LOOK AT NUKE ISSUES WITH QUICK IMPLANT VARIABLES (CREWS & LEADERSHIP + PREDELGATION ISSUES)-- THE ONLY SCALE FAST THREAT-- MAKES SENSE. TWO YEARS INTO THIS: YOU HAVE RADIO THREATS TAKEN CARE OF ALREADY (more "conversations" in heads, when outer ones were already addressed)-- OTHER THAN YOU DOING THIS TO YOURSELVES (frequency "doors" opened by US). OTHER THREATS TAKE TIME TO DEVELOP -- ONLY CRIMINALS WANT THIS TO REMAIN SECRET-- OTHER THEATS WOULD BE MET BETTER WITH A WIDER FORCE ADDRESSING THEM.

I am not confident that the real Pentagon has been cleared-- most likely that "3rd option group" simulated this: nuke crews-- still accessible and pliable. Four months after clearance-- and still war crimes?

Also the solution is simple: call up everyone on the implant line, one at a time: offer restitution (direct deposit) and a de-implanting scheduled at a local hospital. Public disclosure necessary.

03 June 2015

Noting-- you may have a hard time finding those NASA grade Low Frequency (2200 meter band, 136KHz) receivers to triangulate signals (esp. w/o military or government cooperation globally).

A couple of options:

1) Use the inbound as a PA: -- with a recording on repeat, give a phone # -- and offer initial restitution and de-implanting just about all languages-- could be done off me line-- the local abusers -- are not checking everyone-- people who used to hear government tech buyers now hear only me.

2) After FAST emergency preparedness (implanted nuke crews / leadership +

predelegation events)-- a press release that reveals the suspects (probably plural)-- those providing inbound signals-- anyone caught at that point is an idiot-- slower issues with implants (e.g.: abductions to gain nuke communication line access) = problems of scale that are addressed more quickly with more expertise that comes with a press release. The militaries of the world will do this press release without a coup, or firing a shot-- looks like global leadership had too much conflict of interest, and complete detachment from impact realities.

AP -- Eugene local (today) and global press violated -- the pressure with the not-enough-info lid on tight : goal is clear-- massive risk, and a huge "look at me" (for those already narcissistically addicted at scale).

This implant was designed for agents-- the inbound is low-bandwidth (VLF-- for the low powered internal receiver)-- the outbound has more info (LF-- can be heard with very sensitive receivers)-- there would be "remote viewers" going back to the original conception-- where are these people? The inbound signal is not necessary (powered by the beacons ~16.2KHz)-- and might be detected. The 136KHz range (2200 meter LF) is globally set aside for "ham radio" testing.

That "dumb idea" : "they implant themselves, we have access" (probably Reagan's idea, revealed by Putin (with double meaning joke)-- still bad (violating)-- but would imply: this is used publicly in short order-- they would have it too. Nuke crews made accessible to local transmitters was never a goal: radio waves are perfect sine waves-- you can predict the next peak just out of the curve of the present one-- and phase cancel and add to replace local signals with yours (AM type-- even with static)-- maybe peppered implanted crew members were found by military dragnet implanting (I was at Ft. Benning in 1987-- and a published wiz-kid by then).

02 June 2015

http://en.wikipedia.org/wiki/Battlefield_Airborne_Communications_Node

http://en.wikipedia.org/wiki/Exelis_Inc.

Note the BACN debate (technical vs. bureaucracy of acquisition): the scientists were hitting a block when pushing for moving to an air command that may have reassigned some radio frequency ranges. Beyond radio frequency assignment relating to any implant contractor, this relates to Exelis specifically: they are a ground communications company, and air tech contractors would be used-- and my research indicates they have the implant tech (property trail: RG Malech (1974 patent), Dorne & Margolin, EDO, ITT, Exelis (Vectrus))-- it makes sense that they would use their marks to resist this. I think that the "artist collection" (like actors, tricked into being implanted with "fail-safe script recitation" (embarrassing to disclose)) were hearing people they were posted on, much like many hear only me now-- the marks of the contractor (intel) (the implanted bureaucracy of acquisition). They probably were there to report (when interrogated in their heads) if they heard anything-- and that might trigger closer looks at potential tapes. The contractors would have "remote glasses" w/o implants--

could experience the stars with at least 10x as much information (vivid sex, etc.). Excelis is a global contractor (as is ITT)-- and have probably placed leadership in many governments, at critical security points.

Those arguing for non-disclosure for preparedness seem to forget: getting the full force on board gets you more prepared faster. And computer-brain interfacing is a tank of science coming down the road (already here)-- you have no choice, and getting the full force working gets this resolved faster. Ask-- do these "experts" demanding non-disclosure have a conflict of interest (they will face trials). From what I've seen-- the president is hooked up to the University of Oregon professors and Don S Levi through his Harvard contact with Adam H Levi-- not the contractor intel, which may have been initiated by the "Levi-cult"-- but which probably detached with some folks who did not need to be raped into compliance, but wanted to do this. Of course: any people who "got into" doing the contractor intel would not stay connected to the UO/Levi-cult group or those raped into compliance.

01 June 2015

People seem to shut up when I ask "Do you work for ITT?" (ITT would have had the "trade secret" that is now public domain).

I've heard "we've wired nuke crews globally to keep the world safe" scenarios-- this is dangerous, as LF & VLF amplitude modulation signals (where only the peaks are changed in a perfect sine wave)-- can be "anticipated" by the change in the sine wave curve-- a computer could anticipate then next peak, and not only phase-cancel the signal, but add/subtract to create outbound signals and inbound signals that they control (their content)-- and this could be faded in slowly over weeks (using "typical recordings" etc.)-- also violates so many democratically approved treaties-- and is egregiously provocative and invasive into core national defense measures. I suspect crews were "peppered" with implanted people-- due only to drag-net implanting (West Point, etc.) in the contractor demographic.

The "Barrack Obama" voice-- at just about the only time sounding decent and helpful: a lie. He claimed-- the outbound is 162KHz-- but there is a 162KHz 2 Megawatt transmitter in France-- and global "NASA grade receivers" would not hear a 162KHz rectenna powered implant (the 16.2KHz band may be used for the rectenna power-- looks like a Russian Alpha navaid beacon frequency).

162KHz - French time beacon

http://en.wikipedia.org/wiki/TDF_time_signal

This indicates-- more like 136KHz on the outbound-- ~13.6KHz on the inbound (again, process of elimination with those who have the equipment).

The "Barrack Obama" voice-- at just about the only time sounding decent and helpful: a lie. He claimed-- the outbound is 162KHz-- but there is a 162KHz 2 Megawatt transmitter in France-- and global "NASA grade receivers" would not hear a 162KHz rectenna powered implant (the 16.2KHz band may be used for

the rectenna power-- looks like a Russian Alpha navaid beacon frequency). Any "I was providing a diversion" notion is ludicrous-- people would not stop trying a "jammer" if 162KHz failed-- he was going for the "I'm attacked, need help, and am trying to help."-- BS. (Ham radio-- I've revised my estimate-- looking at Europe too: 136KHz out from the head-- maybe a 1360KHz inner-- divide by 10 and multiply by 10 components, I think, are more common (hence developed more)-- 16.2KHz-- maybe used for the rectenna).

Also-- I've been moving server hosts-- back to the US (from one.com in Denmark)-- with a VPS (faster, can scale up-- my front lawn is mown too, and I'm prepared for press releases strait from my head when the press has a usable "inner voice on a speaker"-- given the current need for an citizen information militia in light of the legal and military failure. PRESS-- go to MIT, etc.-- they can put inner voice on a speaker: a citizen "information militia" has become necessary in light of legal and military failure.

(This is nowhere remotely near legal-- the conflict of interest is clear-- AG "Lynch" and "it depends on what the meaning of word 'is' is." Clear to me-- a malignant narcissist-- in a "look at me temper tantrum" -- make the "look at me" huge. Again-- when it sounds like officials are on the line (recognizable voices) starlets (including my friend Winona Ryder) let them know she's been raped over the implant by Obama-- she wouldn't fuck around with something this important-- others have said the same-- looks like a "my life is over, I'll take advantage of opportunities" thing-- and the "no one will believe this MO.")

FBI approach is probably the block priority (don't let hostages pursue legal action, under the radar-- make the press furious, and blow the lid off big-time).

Death sentence-- not for President (probably the Hague, or solitary-- too big, unprecedented)-- for peers roped in over the last two years.

Noted the racist Idea I heard about (either Rice or Lynch relating: "they want to foment a black rebellion"-- as if black people in general can't distinguish a black man from a psychopath).

Re: Susan Rice-- she did the right thing-- there is a "car crash" crisis-- "freeze" for initial assessment makes sense-- any thoughts she had (probably manipulated)-- should have been private-- not "real"-- and irrelevant. A middle finger response from the president-- instead of a sigh of relief when she says ~"we don't do this"-- now, a year+ later-- pretty clear.

Why am I still violated? Because people are getting less info to report? Are less motivated? Don't have books to read if thrown in permanently in a public space?

The press: will "double blind" with investigators (if they have not already)-- and approach scientists for "inner voice in a box"-- (Gallant's Berkeley group-- B. Pasley, Kurzweil, etc.-- many scientists could do this, given the initial ideas).

Again-- hard to confirm-- looks like Malia backed up Sasha-- "tension release for the president"-- but may not have known about Sasha: "Sasha too?"

I know this sounds hard to believe-- might be "lowering expectations"-- but look where we are at now:

I see:

President sides with "option 3"-- the military contractor interface people who knew executions for them were coming down the line.

Intel is told: buy time with phony assessments (at least on the implant signal)-- buy time for the DOD to get their shit together.

DOD is not told-- their intel sees the CIA converge in Eugene, and begin the process of: "this is real, pay attention-- action needed"

Pentagon finds they are saturated beyond expectation-- due to soldier hostages interacting on the implant signal (me)-- and developing (with me, and with each other-- the "go into a war room, and pull senior cleared trusted staff into to find out what gives")-- find out "they already knew"-- evidently-- not how much-- days later: barrage jammers to clear the space-- and the rest of the DOD-- finally the military intel is heard.

I hear (in my neighborhood) "good to go"-- this indicates the military is ready: given the scope of "reconnaissance Ranger split off teams to implanted people take a vacation or have a "stop-gap" non-implanted assistant, nuke crews and predelegation issues addressed (short-term jam cover + implanted leaders already know (they hear me-- and could be approached directly)" being quickly addressed-- military preparedness--- so much more fundamental than intel-- should not be an issue now.

(Also-- Intel-- this is a technology that fits in the spectrum-- radio listening devices picking up speech are unacceptable too-- this just adds extra-- these issues--mostly covered-- abductions of foreign agents -- rare-- because their identities are not known (pseudonyms: redacted)-- and there is value in just observing agents (the observers are not revealed-- more data later with "following") and abductions can lead to added value too (observed channels can be confirmed as intel communication lines with "statistically tagged" data flow measurements).

People being fooled need to see-- history never diverges far from it's trajectories-- even computer brain interfacing is a slow tank coming down the road (already hear, at least with my advances)-- radio listening devices, and defenses-- go back a century. More than "verified testimony" "auto-pain reducers" and "treatments for blindness" are being held back... so is enhanced national and global security (new tools-- with advantage over the new adversaries: terrorists and international organized crime-- and at least parity with traditional adversaries).

Of course, a crisis takes time to assess, esp. when your QB is raping you

from behind.

Please play my "I hate you" tape (if you have it-- microphone in my room/neighborhood from ~two nights ago) to the leadership-- I feel this way-- it demonstrates the "point break" of "Chinese water torture" drips.

28 May 2015

Looking at some frequency use:

162KHz - French time beacon

http://en.wikipedia.org/wiki/TDF_time_signal

100KHz - Russian radio navigation:

<http://en.wikipedia.org/wiki/CHAYKA>

MANY:

http://genesistradio.com.au/VK2DX/time_signals.html

25 May 2015

NB: if you have not found the inbound frequencies (I suspect 13.6KHz and 16.2KHz)-- use the process of elimination with adjustable wideband radio noise generators (block all, then some, etc.)-- if you only have my signal to look at, listen on my outbound, to see if I'm being addressed on the inbound-- I never have more than a three minutes of "non-engagement" (although when engaged in some activities: checking email, etc., rarely-- their will be less -- just reminders about every 5 or so minutes that I'm still being observed).

It looks like Barack Obama is running out the clock of his presidential term, in hopes of escaping after out of office.

Department of Defense-- you should see by now that the White House, DOJ, FBI, DNI, etc.-- can not do their jobs. I advise a press release -- any employees in the other agencies are too intimidated, re: "national security issues"-- you should know better-- and a quick assessment should lead to you, not "going for Mutiny on the Bounty"-- but simply letting the world know what's up-- the sort of assessment I'd expect from the DOD:

1) Weapons of Mass Destruction-- understood that a quick check for implanted crews, and "pre-delegation" (auto-nuke policies) that might be triggered by implanted leadership (domestic and foreign) would be a first-- i.e. the common sense that such issues might take priority over hostage release-- a reasonable amount of time for the smoke to clear and take care of "fast huge" potentialities.

2) If the DOD has many people implanted, and did not know this-- they get paired up with a "watch"-- most were probably "observed" for info, if

anything.

3) Other threats take time to develop-- for combat, Ranger's attached to platoons or companies in the field would hit the obvious threat-- reconnaissance teams being captured, and the base location disclosed-- like Marines having wide left and right elements on a road march-- the Ranger elements could split off early and provide reconnaissance info (radio & otherwise) (other than that, need to know = don't know; abducted soldiers gets nothing).

The REAL DOD does not do war crimes for preparedness-- the intel would have been lied to (have heard: the White House has failed in its integration duty-- my head-space-- used as an alternate-- multiple intel agencies probably using my record for the same).

I'd look at: DC lawyer Adam H Levi (Don S Levi's son) as a potential "drug dealer" -- look at John Carlin, and Barack Obama (he probably met Adam at Harvard)-- Obama would need more support than a rogue (unlawful) DOD element-- and may be using info from his staff's heads as blackmail, and forcing them into rape scenarios at night (see Dempsey and Blinken).

Investigators (and others) should be asking the leadership calling the shots: "if this situation was disclosed, would you be charged, and put on trial?" "if hostages were let out of the situation, would be charged, and put on trial?" "do you think this colors your judgment?"

24 May 2015

Foreign (and private sector) intel-- if you are providing "flack" to buy time to obtain more US classified info-- might note that your adversaries are too-- poaching US intel against you. Could be that US intel thought they were "buying time" with their intel analysis (heard on the implant signal) for the DOD to prepare-- while the DOD was not even closely to being adequately informed about the situation and threats (think weapons of mass destruction-- nuclear, biological and chemical: after about two weeks to assess the nukes (crews implanted and "pre-delegation" auto-nuke policies (both domestic and foreign (with leadership implanted and manipulate-able / killable (surprise accidents, falls, etc.))-- the rest of the issues of scale take time-- and buying time, buys time to enact these other threats (chemical, biological).

Thinking about the consistency of voices, despite the "puppeting" -- see three couples: Don S Levi (the "nag dad" out to make you ashamed with Ph.D. logic) and his wife Katherine Pearl Levi (gruff voice-- rare-- the "physical" nurse with drugs); Adam H Levi (mocking and stupidity, the DC drug dealer for mom) and his wife Joanna Lyons Levi (the "shrill" immature drug abuser); Barrack Obama ("Jude the rape messiah" who does not resist tandem with Adam and mocks me with him) and his wife Michelle Obama (pretends to be Winona Ryder (a friend of mine), and demands respect from me (were success respect means more than the actual accomplishments)). This makes sense: the Obama's met the Levi's decades ago (given the present situation, and the probable connection at Harvard in the late 80s, early

90s).

22 May 2015

I'd look at both the 136KHz/13.6KHz (international) and 162KHz/16.2KHz (US focus) pairings of frequencies (outbound from head LF, inbound VLF) -- some people may have been "double tapped" (e.g. presidents)

19 May 2015

nb: INTERNATIONAL BAND-- more likely 136KHz outbound from heads, 13.6KHz inbound from remote source (international frequency zones-- in US 136KHz-- still ham hobby- but licensed)

Looking like Adam H Levi-- an Assistant Attorney General for the District of Columbia-- which brings the spotlight from the DOJ (although they may have drug issues, and/or connections to lawyer Adam (<http://www.nasaa.org/>)) back to the White House (nb: the small scale of supply that could be obtained from an ER in Eugene, and smuggled in with Pali Noe coffee)-- could be Obama (who probably met Adam at Harvard) is using drugs to control his staff (makes sense, sense I can recognize their voices, making assess of themselves)-- pretty sure that "covert hair drug tests" are already underway:

<https://www.omegalabs.net/hair-testing-service/hair-testing-faqs/other-services.cmsx>

Really sad: looking like the president semiconsciously nailing his name to the Status Quo big time (no huge innovative ideas being promoted-- and also, an unprecedented temptation for a CEO psychopath-- again, the expected stereotypical response)-- yes, the WH has been captured-- looks like it's by a treasonous president, taking Don S Levi's gift to his son Adam (the implanted hostages), and trying to take it for himself.

16 May 2015

Looks to me like a DOJ QB situation: didn't think about other agencies independently investigating (military).

DOJ counter-intel operation developed to maintain their drug supply with former assistant attorney general Adam H Levi (Don S Levi's son; met Obama ~88-91 at Harvard)

Probably opiates from a hospital his mom worked at (probably Sacred Heart), former nurse Katherine Pearl Levi and her line to implanting her peers (she is now 72)

Potential shipping method -- Katherine sends coffee to Eugene; medical-grade opiates are packed in coffee from her Pali Noe coffee farm in Hawaii (dog-sniffing deterrent) and sent to Adam in Washington DC

Adam uses drugs to control peers-- and implants them:

1) free drugs at first, then requirements-- and "gambling scenarios" to build up more addiction, and they are implanted

2) May be used by Obama ("MALia," control DOJ, the Levi's and UO profs used for decades) or Adam may simply be his dealer, or both.

(IF Obama is using Adam H Levi - then he may have "capos" in other departments -- drug supply lines set up for control-- may be entire implant community branches).

15 May 2015a

Current situation lead narrative: Adam H Levi (former assistant AG (2009-- despite a bar failure in DC), drops back to general council (by 2014)-- using his connections in the DOJ and his connection to Obama from Harvard (1988-1991) to hook key people on opiates supplied by his mom (former nurse (could be Sacred Heart in Eugene, Oregon-- former employee peers, etc.) and potentially packed in coffee (the Pali Noe farm the Levi's own in Hawaii)-- his dad, Don S Levi, Harvard alumnus, logic/debate professor (philosophy for lawyers, the "Moe" voice that was most abusive prior to 2013 (he implanted me because he had a crush-- is a "bottom" (and aggressively homophobic and misogynistic)). They can "peer in minds" and will try to supply evidence for suspicions.

15 May 2015b

Adam H Levi is a former Assistant At tourney General and Don S Levi's son-- the three points: Adam Levi at Harvard at the same time as Barack Obama (~1988-1991)-- with a law study trajectory-- and Adam being Don Levi's son, and Don Being the main abuser on the line for me (1994-2012 (has relayed through others 2013-2015)-- I took over 8 courses from him-- can positively identify him-- sounds like "Moe" from the Three Stooges). Clear that the President is has a smaller number of "soldiers"-- and the root should be fairly dense and smaller than it sounds on the line:

http://disb.dc.gov/sites/default/files/dc/sites/disb/publication/attachments/kristina_p_johnson_final_default_decision_and_order_of_revocation.pdf

14 May 2015

If you are being abused on the signal, please relay this to me (press to send to me)-- I've heard this reduces the diaphragm spasms (maybe some bandwidth reduction)-- OK even if I'm asleep.

13 May 2015

All Intel #1s have been replaced since I got through in 2013-- obvious why: buys criminals more time by causing intel staff to take more time to get up to speed: intel solutions made to take more time in a intel crisis?

1) Barack Obama at Harvard (1988-1991; Harvard Law Review editor 1990-)

2) Adam H Levi (Don S Levi's son)-- a lawyer (in DC-- looks like Investment and Securities Regulation)

3) Don S Levi got his PhD in philosophy at Harvard (math, logic = lawyer debate teaching)

4) Harvard is Ivy League -- they often respect "legacies"

5) Adam H Levi is 47-49 -- about 10 years younger than Barrack-- would have been an undergraduate starting around 1987 -- could have been in a law program into 91)

<http://radaris.com/~Adam-Levi/279764970>

NB: Radaris is a free people info site-- gives addresses and phone numbers, etc.-- see also: spy dialer (second link: my # / "auto message machine")

Point-- Barack Obama could have met law student Adam H Levi at Harvard when Adam was a student (I'm thinking -- Obama as Graduate Teaching Fellow or Adam involved with the Harvard Law Review)

Much more likely Obama-Levi connection, than a "Jude" who is Barack's twin brother...

Could be Obama was part of the implant crimes going back fairly far...

If there is a "Jude" (again-- I saw a family photo-- about 5x7 at about four feet away in Don S Levi's University of Oregon office-- big family photo with one tall skinny black kid-- my thinking then: Don talks about many kids-- has a van-- probably an extended "foster child family")-- later-- hearing someone who sounded black in the group that was added on two years ago-- must be that kid-- later thinking-- maybe he was an "Obama manipulator"-- later-- he claimed to be "Jude" (short for "Judas")-- later, thinking that voice is Obama himself (matches the shots being called-- rude, detached from my being victimized (no gratitude shown-- makes humiliation matters worse)-- arguments go into sophistry when he's caught lost)-- point here-- may be some other Levi connection than Adam.

Another issue: not everyone implanted is famous or responsible-- and some may have ham radio abilities:

Celebrities could be "virtual reality sex taped" -- to be decoded later.

"Ham jammers" and broadband RF noise generators should eliminate that

threat, but not an intelligence agency taping.

What has been the cost/benefit analysis of using Don S. Levi to rape people, and to keep me out here being fight-baited and humiliated all day every day in front of a crowd of public figures, etc.?

You don't get to put "cure for the blind" in there-- separate issue-- the scientific correction.

1) Are the people implanted more incentivized to report this on the news? (raped, looks like US government is calling that shot)

2) Do they have more information to report now (I am an integration point: how it works, how to get out of signal range, etc.)

3) IF anyone has classified info-- have there been attempts to compromise witnesses with info sales? Or just plain-- "I'm criminal, it will be exposed-- I've got some time to buy an exit with the classified info I have"-- could be government employees too.

Hearing a lot of:

JD-- you don't know what you're talking about-- and sound like you're calling commands.

This is a rhetorical ploy-- they know I know ENOUGH, and disregard of the constitution and laws on the part of leadership is obvious. I've maintained all along that you needed to look at the continuum technologies (this is radio-- you had "blow-dart radio moles" taken care of long ago: points of info integration have heavier protection: if not under a 24/7 "radio spotlight check"-- their hats, glasses, clothing, etc. are checked either by others (high level) or by themselves (lower level info & integration)-- the more I research, the more "you already had it covered" comes into focus-- with shifts here and there (like protecting agent identities more, when they NOW have higher assessed value (pseudonyms)-- most critical redacted info is not cyber accessible, etc., etc). You may have noted my "qualifications" early on (phrases like "if you haven't already")-- not due to my ignorance, but my expectation that the professional scientists and managers, etc. would know more-- and I was making sure these issues were on their maps-- the obvious can hide in plain site. Now-- clear-- you do not know what you are doing, need help (and need to bust managers not consulting scientists). I'm sure no one (including me) was expecting the smoke to clear with the president revealed as criminal-- if not depraved.

Also-- I engage professionals, and they have passed on non-classified info to help ("signal signatures"-- vocabulary can be an entry for research)-- and have some 11B military experience, and am an "information philosopher"-- some of you may see the expertise relevance there. I'm good at research and

"procedural problem solving" and have a wide, if not deep, knowledge base.

On my map:

Military

Relax pre-delegation nuclear first response times; esp. if the president himself (implant manipulated or otherwise) could set one off-- the post-Kennedy assignation "line in the sand" was barbarically dangerous-- even if just to get Chinese and USSR "bodyguards" for the president-- my knowledge of current "lines" is absent-- but given the past, a close look here seems an obvious priority after "nuke crews globally" are not accessible

Look at other country's "pre-delegation" "auto-nuke" policies too-- partner up-- they already know (at leadership levels-- hence they might be manipulated to trigger a "auto nuke policy")-- no one wants a third-party triggered nuke.

Do any other countries have a policy like this?:

<http://nsarchive.gwu.edu/nukevault/ebb406/>

U.S. Had Plans for "Full Nuclear Response" In Event President Killed or Disappeared during an Attack on the United States

Both USSR and China Were To Be Targeted Simultaneously, Even If Attack Were Conventional or Accidental, and Regardless of Who Was Responsible

LBJ Ordered Change in Instructions in 1968 to Permit More Limited Response, Avert "Dangerous" Situation

Newly Declassified Document Expands Limited Public Record on Nuclear Predelegation

National Security Archive Electronic Briefing Book No. 406

Combat-- need to know means you don't know, and you don't ask soldiers to shut up under torture conditions-- I'd look at reconnaissance team protection (see below-- thinking through what for me, having six years of infantry experience in the national guard--would be a problem on the ground with combat-- the clear and obvious).

That General in Afghanistan-- killed-- rare-- could he have been captured and mind-read?

(You have confidence here-- I should be part of a river of confidence backed

by history, law, science, etc.)

FBI

You HAVE to stop the violator's outbound signals (Don S. Levi, etc.)-- you can, so you have to.

I'd look to these individuals as "flip points"-- given what I've heard on the implant signal:

- 1) Susan Rice ("got flipped off" by Obama with her fog-cleared "we don't do this assessment"-- should have gotten a sigh of relief)
- 2) Anthony Blinken ("why won't the president get de-wired when approached in the situation room" dismayed)
- 3) Joseph Biden (boot him out the door gesture after the state of the union-- disgusted)
- 4) James Clapper ("Noooo..." joke about Obama sending an early letter to Iran (not the latest Iran letter issues)-- worried)
- 5) Gen. Dempsey (getting in the "we get out of jail" coolaid line-- not Obama specific-- he was seeing alibi intentions-- disgusted)
- 6) Jay Carney (took shifts early on-- recently: "resigned in disgust")
- 7) David Axelrod (took an early shift-- maybe tried to use ham radio defense solutions-- maybe a tie with HR Clinton-- she seems a target-- Katherine Levi sounds like Hillary-- given "sabotage" being more effective than "eavesdropping" they may have a "you have no choice but to win" threat for Hillary-- would be Obama + Don & Katherine-- and their "cult").

More speculative (voices hard to pin down, etc.):

- 8) Robert Mueller-- hostage (could help-- get him in a cleared space-- dismayed is what I hear)
- 9) Gen. Alexander-- probably a hostage-- apologetic, with a bit of "cover ass" attitude
- 9) Gen. Kutyna-- probably developed the implants-- needs an escort
- 10) Gen. Moorman-- needs an escort too (former AF #2, friend of Gen. Kutyna-- early in on implants)
- 11) Lt. Gen. Hunzeker (Vectrus head-- a question mark-- probably "raped into compliance, though he could do this more responsibly-- cp. The 60 minutes spot on PRISM-- there's breaking the law, and then there's trying to "do that right.")
- 12) Adm. Blair ("They made their liberal conspiracy theories happen")

Maybe current NORAD commander Adm. Gortney

Maybe: Adam H Levi (and Joanna Levi)-- in DC or Maryland-- Don's son and his wife-- probably not "evil to the core"-- may need help-- I'd trust him more than Barack at this point.

I know that you have to look at my points as suspect and manipulated-- but

I'm not an idiot, I'm immersed in this context like no one else-- and have much experience dealing with manipulation attempts (hence my written scripts when calling the National Security Council (AF seemed to internet hit verify); DOJ (call back verification + internet hit); and FBI counterintelligence (hung up on me)).

If you come on the line-- keep a pad and pencil-- jot down the thought, then "say" it-- communication here is distorted massively-- but it has turned into an info integration point, despite claims that using Don Levi to violate me in front of an unknown crowd of scale is used to strop info integration.

Given the FBI failure (and DOJ)-- this is their failure-- and that the Military is a bigger institution (budget, #s of people)-- and this crisis is of that scale (bigger than 9-11 in some ways-- there is a "tech held back" impact, etc.) they need to make sure the FBI get's it's shit strait a long time ago.

(those looking, and knowing where they're looking from-- could report locations of origin)-- probably too frequent to "spot-light confuse" (disable their language ability remotely?)-- like a "mind confusion bomb" in a vicinity-- not sure if this is possible but: a loud radio signal, that the brain can recognize-- would be like other bombs with radius, etc. (loud sound psychological warfare, etc.)

A potential solution--more reliance on signal signature measurements:

https://en.wikipedia.org/wiki/Measurement_and_signature_intelligence

Looking like real-time mobile radar (but with much more than radio)-- how many "hot-spots" could the NRO look at simultaneously?

1) How to do reconnaissance without risk of base location exposure (do you need teams? Can you do this with \$ effective tech? (Current signature science-- how cheap to locate what (people, equipment) at what distance?-- I'd imagine you have "VLF radar" to look through terrain, etc.

2) Could you have reconnaissance teams not expose base location? (separate split off units reporting by radio and don't know current locations-- like the Marines with soldiers posted wide left and right on a road march). Some sort of disruption-- implants are cheap-- if they could trigger them themselves internally (repeated word)-- could help-- this looks like an approach to more sensitive sophisticated missions-- but there would be the "abducted into radio-free zones" for interrogation events).

12 May 2015

Why has Don S Levi not been stopped from violating me and others?

It is obvious that more info has been shared about the implant (Broadband RF noise generators-- me inventing brain-computer interfacing in front of a crowd, etc.-- how would they know to join me in development discussions otherwise?) This means that the crowd now knows how this tech works, were before, most did not.

Any argument: " we have you and others violated, so you cannot integrate and share information":

Share what information? That they are implanted, all fooled into that (no one wants to be accessible)-- and have CT scans and theories and contact points they can no longer contact?

NBC has already probably done the responsible thing with double-blind information spreading:

I bet you have a "rule" that only criminals can know about the tech-- when you should know that many more government officials should know about this-- why should Don S Levi-- at large-- know more?

You do not infringe on any rights by blocking their outbound communications-- civilians could block the ham radio experimental hobby frequency range (160KHz-190KHz-- I heard Obama's voice say: "its 162KHz").

WHY IS DON S LEVI STILL ALLOWED TO BROADCAST OUTBOUND?

HE'S THE ONE THAT SOUNDS LIKE "MOE" FROM THE THREE STOOGES-- AND TRIES TO MAKE IT LIKE HE IS:

JOE BIDEN
JAMES CLAPPER
GEORGE H W BUSH

NO-- IT'S JUST DON-- I've been here 20+ years-- always him-- I took ~8 philosophy courses from him at the UO: he is a pathological malignant narcissist (anti-personality disorder + pathological narcissism)-- addicted to strife, stress, and constant crisis.

I have facts that show that using him compromises state secrets, and it stands to reason that he incentivizes disclosure of classified information.

Are anyone in the US government broadcasting classified information, as a direct consequence of executive order (etc.)?

How is this not treason? (Intentional, known consequences-- at what scale, and for how long?)

I've heard voices sounding like Barrack and Michelle extensively-- I'd not be surprised to find that Barack has a twin brother "Jude" and that he either killed Jude or they are a team (Jude being former foster child of Don

S and Katherine P Levi).

The Obama voices are consistently what you'd expect from the unexpected criminal as president (sabotaging the 2008 election, etc.): insulting and rude, lacking the emotional depth to connect with the consequences of their decisions-- and demonstrating a "black-belt in sophistry" when confronted with real debate.

I've heard a voice claiming to be "Sasha" extensively-- these kids need help too.

10 May 2015

1) Clear at this point: people are targeted for "dizzy falls" without warning-- warnings would prevent murders-- the Levi-cult targets people at random (other than "psychopath calling card tags," re: victim names, etc.)-- this means that more time taken = more people killed.

2) Have you given poeple more integrated info, by having me raped in front of these public figures? I've given them plenty-- as I discover the corruption in US leadership. The news crews have converence rooms-- many have had no info for years, if not decades, and knew something was wrong that they'd like to approach the FBI about: I've heard NBC anchors-- we'd roll with the news if we had any information to go with-- would sort of info would people facing sanity issues have-- and how does raping me or them help with national security? Pentagon-- think of recent news-- is this your culture? Do you know who your hostages are? Do you care about diplomacy and foreign policy? Your corrupt leadership knows at this point: sacrificing ALL human values do delay their trials-- 1000s dead daily just from my delayed foundation alone: charity is necessart too-- but you do not rape people for charity or national security efficiency issues-- you'd need a 1% chance of a half million people dying every day (a new threat every day-- probability does not change given occurences)-- to equal the average losses due to delaying justice, my resitution, and my foundation-- your fault, my impact assessment-- you can verify this yourselves (5000+ lives (1 year of added longevity)) lost every day (see below were I address Excellis, Vectrus, and their probable foundation issues-- my plan doesn't need more initial \$-- they would do better to use my plan too)).

09 May 2015

What proof (#s etc.) does the US have that raping me and others stops people from reporting to the press and FBI?

They've made it clear (30 Rock has-- they're wired, would go with a story if they had anything)-- what is your legal endgame on this US leadership?

Again, I've advised the US to arrest all people who have advised violations (direct or indirectly)-- do not own these crimes-- these criminals should not have government jobs (seeing the Pentagon gambling and prostitutes on the government dime issues lately-- wondering if this is indicative more systematic ethical problems)-- the military does not do war crimes for

preparedness-- the US would not do war crimes against their enemies if tanks were crossing our borders: they aim higher than average-- average does not do war crimes.

AGAIN:

YOU HAVE NO SUBSTANTIAL EVIDENCE THAT RAPING ME AND OTHERS SERVES NATIONAL SECURITY-- NO EVIDENCE THAT YOUR DUTY TO STOP THESE VIOLATIONS SHOULD BE SUBVERTED (Seditious Conspiracy, UCMJ 94, etc.)

IT IS THE POVERTY OF ANY INFORMATION TO REPORT THAT STOPS PEOPLE FROM GOING TO THE FBI & PRESS -- rapes incentivize an approach to the FBI & press in light of FBI failure.

Clear: These people are between a spectrum of self-consciously hostages of the US leadership to facing insanity issues-- both ends being violated.

Me-- I tanked my way through 18 years of 24/7 abuse (since 1994):

- 1) I got a CT scan of my brain (2005)
- 2) I studied the CT scan enough to provide help in identification (a key to aspects suggesting a radio listening device)
- 3) I mailed the top US intel (email "protocol hacks" Feb 2013) and gave this CT scan and a fact-report (suspects, some research)
- 4) I've provided a web site with information for the investigators and hostages (b)(6) -- Russia hits on 20 May 2013
- 5) I volunteered my implant frequencies for an "FBI tap" (knowing phone taps and snapping fingers would be useless)
- 6) I provided entry points to decoding for the NSA (connectionism (I wrote a program in 1992) + phone tap base-line)
- 7) I've called the National Security Council, DOJ and FBI to confirm I got through (DOJ confirmed)-- went to my local FBI office (denial 2014)
- 8) I researched the implant, developed brain-computer interfacing (from usable verified testimony to cure for the blind)
- 9) I emailed 1700+ at an INSA US intel internet hacked email list (1000+ appeared to get through: Oct 2014);
- 10) I researched the background of implant control (speculative reconstruction):
 - a) mid 70s to mid 80s (USAF : Malech + Kutyna)
 - b) mid 80s to mid 90s (UO Profs: psychology (Posner's) + philosophy)

(Levi's)

c) mid 90s to now (Barrack "Jude" Obama & the Levi foster children)

Let's start to talk about gratitude-- already you have, by using the Levi-cult:

1) Killed my dad (dizzy fall)

2) Had me raped numerous times (tactile, in my butt hole)-- in front of a crowd -- my soul on a pillory with no place to hide

3) Paraded public figures through my head space and bedroom for years-- again-- no space or time to hide: more brain damage (quantity of brain-engagement)

(b)(6)

6) Pushed my intellectual property rights beyond my use (one year public prior art limit on ability to patent), despite my intent to not profiteer (no medical use license fees)-- and intent to be an additional safeguard on the tech (implants can now be manufactured more conveniently in territories that have patent agreements, but are out of other US legislative jurisdiction-- use would be prohibited-- but pragmatics says: make it hard to do).

05 May 2015

Clear: Who is calling the shots: The President; who is paying the phone bill: the Pentagon-- they control this frequency range. The Pentagon probably has wider criminal elements avoiding public accountability-- those who have "gamed the system" with distortions of abilities and methods of situation appraisal (the 1% doctrine-- not multiplied through like insurance actuaries do-- not a mistake; I've seen abilities concealed-- PRISM could have been done with phone database interfacing: little added value other than "budget smoothing"). When proposed solutions have a common denominator: "public accountability is avoided" and is tied to other problems with other (even if more costly) solutions-- you go with them. The notion that the public in general must not be disturbed by this crisis is ludicrous-- and the military was already prepared for radio listening devices (from Raytheon radio spotlights to hats, glasses, etc. being checked for those with classified info). This is clearly a hostage situation-- where the Pentagon does not have demands, they have dreams-- a non-viable five year plan for reality. (Cost-- my intellectual property rights: implants-- gone today: now

public domain-- lost wages times multipliers, to make public domain implant manufacture in other districts (out of US legislation authority) more convenient-- no Patent restrictions with regions that have patent agreements-- next: my computer-brain interfacing intellectual property rights-- lost wages times pain and suffering and punitive multipliers).

03 May 2015

THREE PART SUMMARY -- BACKGROUND, MY CONFIRMED CONTACT US AUTHORITY, THE CURRENT CRISIS

Background:

- 1) 70s: USAF develops the Malech radio sensor/stimulator into an implant (may have done "they implant themselves, we have access")
- 2) UO profs take an independent idea to DARPA in the 80s for a grant
- 3) DARPA says: "we've got better: experiment with being implanted, and see what you can do with samplers"
- 4) The UO profs "dumb dial" numbers (like frequency scans or random numbers) and listen in on others
- 5) They get more numbers, show up in people's heads like a "Wizard of Oz rape cult"
- 6) Government folks who have clue zero who is in their heads are raped and/or tricked into into compliance:
- 7) They get more implants for their own use (I was implanted in my sleep: at least by 1991, sleep abducted again: 1993)
- 8) They figure out what they can get away with: by 1994-- a 24/7 fire-watch-- always a guard on duty; no information allowed to be passed in public abuse space (me)
- 9) They "make their conspiracy theories happen"-- orchestrating the "contractor intel"-- from their living rooms and easy chairs-- the 24/7 watch indicates a suppression hierarchy.

Current:

- 1) I got through in FEB 2013 (email to top intel leadership (reverse-engineered emails by protocol and current names and included my 2005 CT scan with my initial reverse-engineered key to: this is real)-- the DOJ confirmed my contact about a year later when I called (b)(6) called me back, after the point of contact receptionist at the DOJ intel switchboard operator said I'd get a call-back)-- Me: "have I gotten through?" (b)(6) "yes." A DOJ and Air Force (I called the National Security Council first) internet hit on my, then secret website (this one) that day too.
- 2) I've seen 100s of investigators, not trying to be inconspicuous-- with "winking signs"-- starting ~2 months after a very disciplined approach to US intel and legal-- swelled in and out like an ocean wave (from "is this real?" to "it is!" to "there're more people implanted in Eugene" to "foreign intel and Pls are involved" to -- we seep out, this is international.
- 3) Looks like the state of the union indicated: congress was fooled that

this situation was resolved; haven't heard from the Pentagon since February:
"we're clearing the rest of the DOD" = war crimes now.

4) I still hear celebrities-- looks like they've discovered, that after an initial round of severe abuse, the abusers have limited resources and time, and give up on them-- seems this way, as I still hear the most famous and powerful people, but they are rare, stopping in to express their disgust at the US government leadership-- I hear Obama often-- his approach ranges from mocking me, to "we have company, and I have feelings: I'd advise you not to masturbate" (as if my entire sexuality should be being raped by Don Levi, and I should help with crimes I do not endorse: I'd shoot at people to get them to run for the exits). I am not buying in to some imitation at this point, who is in charge?-- his disgusting personality fits right in with the shots being called.

5) Rape is about control and humiliation. I am put on a public pillory, where I cannot hide my thoughts, as I am continually molested by Don S Levi, and others-- with tactile butt hole violations, fight-picking about 10 hours out of each day-- probably less than a second or two on average time intervals between one "interrogation, fight, or tedium response" from me and the next fight or tedium prompt (severe repetition).

6) My outbound can be blocked-- I can't do this-- I demand it; I'm not given enough time and space to do the research to do this myself, which is out of my specific expertise-- the FBI could block all outbounds that end in abuse, without any disclosure and without violating anyone's (the criminals' etc) rights by placing broadband noise generators focused on the outbound range at my house, and the houses of the perpetrators (international too) (by my reverse engineering: the hobby ham radio frequency range: 160KHz- 190KHz (I heard an Obama voice at one point: 162KHz)-- anyone can jam this in their neighborhood legally.

7) Looks like my life has been managed, to isolate me from friends and family and community (even internet search engine drops)-- to "get rid of JD in silence"-- probably for someone else to claim to be the inventor of "the cure for the blind" and computer-brain interfacing (Obama has been pointed to: "he applied for the patent.")

The Obvious:

1) Why hasn't the FBI blocked the abusive outbound signals? This is the most fundamental constitutional duty here-- laws egregiously broken from here on out:

2) Looks like the military (full Pentagon-- they've known at scale about me for at least two years)-- are covering their asses, and sacrificing me and other citizens (they are raped, with some facing sanity issues: how did they discover "voices in their heads.")-- seems 30 Rock is wired; and PBS all know it, but acknowledge this in silence, or they get raped. Again-- looks like the pentagon is using the criminal in the oval office to buy time for preparedness-- knowing full well they are committing war crimes.

3) The Radar at the WH-- two failures? Looks like they are using it to jam local-- why wasn't another radar put in to do the job, even if indulging the president's paranoia?

4) Looks like at least two separate elements: the WH & Pentagon-- the WH went with the Pentagon element that was already seeing legal issues with their misuse of the implants: "we've been wired, and using this for years, but we're not prepared for the slow public development of brain-computer interfacing"-- turns out: horse shit-- radio implant devices that didn't read minds, but could get info in other ways were taken care of decades ago (radio tech)-- with "hat checks" and even Raytheon "radio spotlights" on those with "level A" information (I'm using codename Tempest nomenclature).

The president's attitude: "I know how the meatloaf of laws gets made" -- laws are pliable, hence: so are fundamentals (like the 10 commandments)-- you being molested on a public pillory is NECESSARY-- but my giving to charity is not necessary.

When I get out, be advised, that I'm ready for:

- 1) More manipulation tactics: "your dad is alive" -- "we had this plausible sounding excuse"
- 2) Here's a shit-load of money-- take it now... or...
- 3) Here are crimes we are going to press charges against you... comply

Adding more manipulation insult to manipulation rape injury-- the last 2 years has caused more brain damage than Don the previous 10-- a quantity of button pressing he could not pull off with a smaller audience.

You should already know-- I may not be Jesus' great^? nephew-- but I am a minor prophet-- I invented cure for the blind-- wrote some poems, etc.-- I take me, the law and science-- your enemies, seriously-- I not only take the responsibility for resolving this situation more seriously than the president has (this is obvious)-- I am a minor public figure, a some-what self-conscious universal citizen (looking at the Fermi Paradox issues--- looks like I came up with the computer telescope idea first too (over a decade ago: cosmological singularity starting state, a small bubble of calculation was what I thought of, when thinking of the calculation-memory problem-- I'd been thinking of the starting state issue since I was an undergraduate in college: before I read Kant on teleology and Derrida on eschatology)). Long story short-- I will be right.

Again: FBI-- this will be the biggest bust in the entire history of planet earth: -- you know this-- the past, of course; the future-- verified testimony would not let this happen again. The Nazi's and other war criminals-- had ideological and cultural stratification for their actions-- these people are self-consciously evil-- and do not have mental illness to blame like Don Levi-- an attention addict due to physiological dysfunction. Benedict Arnold? Richard Nixon?-- not even close to the scope and scale of depravity here-- much more than seditious conspiracy and murder in the

second degree, when you know your impact assessment from holding back life-saving technologies, and your victim's restitution foundations.

02 May 2015

FBI, and all legal investigators (international too)-- use my name (b)(6) and records as a point of entry into classified information please-- I've heard info passed on my channel (forbidden, but more public)-- in light of the failure of WH info integration. I'd look at the public investigation records too (CIA, military intel, etc.)-- at every level, I'd go as far as you could, with byproduct clearance requests, etc. This will be the biggest bust in earth's history-- war scale impact over decades, beyond immediate impasses. (reminder: my emails, uploaded just about daily: link below)

29 April 2015

Re: the "mail and place RF noise generators on the hobby outbound frequency near perpetrator's homes":

A good free search engine-- could be some "problems" are decentralized and local-- could be that Adam H Levi has a "VLF booster" in DC to enforce physical violations:

<http://radaris.com/>

28 April 2015

Slowly developing a plan-- difficult as I rarely get a 15 second break from engagement these days:

- 1) 20-30 layer aluminum foil wrapped box (booster-bag Faraday cage radio signal muffler)
- 2) Wired internet connection to go into box -- internet research to make broadband radio generators focused on 160KHz-190KHz (legal, hobby band-- likely used for weak outbound signals)
- 3) Make many (proto-boards (component plug-in)-- initial research : not complex-- 3-5 times as complex as a crystal diode radio)
- 4) Mail these (live or timed-- legal and postal protocol research first) to the perpetrators' homes and their neighbors (maybe have note for neighbors: use and why)

26 April 2015

(b)(6)

(b)(6)

24 April 2015

A legal and effective way to massively reduce the violations and potentially unravel the "beat-down" hierarchy" of the 24/7 "fire-guard" having someone always awake to suppress resistance.

1) Get or make or get a friend to make (easy for radio hobbyists-- these can be bought too) a frequency range selectable broadband radio noise generator (selectable, as to not knock out a neighborhood's radio & local TV)

2) If you are implanted (or suspect such)-- get someone who is not (roll dice, and go for as many as you can-- to avoid being manipulated into choosing another implanted person): to hide this (with a good power supply) and not tell ANYONE where they hid it-- near the families of Don S Levi and Mike I Posner (and them-- you may need to use online "people search" services: Don was born in 1936-- and was a UO logic professor (see the Pali Noe farm in Hawaii, and 365 W 28th in Eugene (Adam H Levi's old house), etc.)

Effect: The inbound that is abusive for us (on an illegal frequency) is the out bound for them (on a frequency legal to "jam")-- much less murder and rapes and abuse-- they'd have to go out of their homes-- and they are not wealthy (think of their fantasies: "Meyer Lansky didn't own money, he owned people" (Lansky-- head of Murder Inc, mob code, etc).

Fairly clear: enough of the US leadership is composed of a private interest group that seized power (not all the positions-- but enough to do war crimes with US government resources to defend themselves)-- beyond BO, I'd look at the five who implicated him (I've recognized their voices-- they were expressing frustration-- but then: they don't need the president's permission to enforce the Constitution)-- they are just as responsible: Joe Biden, Denis McDonough, Susan Rice, Anthony Blinken, and James Clapper (Holder, Comey-- they have responsibilities-- not sure if they would be part of a private interest group from what I've heard-- NB: Comey related non-implant death threats about a year ago (against him)-- might look into Obama being threatened right in the WH (his family too))

23 April 2015

If anyone places broadband radio noise generators on the legal "Lowfer" frequency range (or any outbound) near the perpetrators (legal for everyone on 160KHz-190KHz)

1) Less tactile rapes-- the violators would have to violate each other (I don't think they have physical abductees)-- instead of samples-- if they do

have abductees-- I have no knowledge that they are not using them now instead of recorded samples (the diaphragm spasm seems to be a single spasm-- triggered one at a time-- I heard (month(s) ago I think) they couldn't record someone being attached for several minutes for a new long sample, as that reduced the intensity):

2) No murders over the line (other than suicide promoting, or distraction during dangerous activities): "murders would be much more difficult without diaphragm controls (micro: fainting; intense: panic attack stimulator-- might have caused heart attacks).

As I understand it-- the UO professors got their samplers from the US government (DARPA--80s)-- my current thinking in sum:

- 1) 70s: USAF develops the Malech radio sensor/stimulator into an implant (may have done "they implant themselves, we have access")
- 2) UO profs take an independent idea to them in the 80s for a grant
- 3) DARPA says: "we've got better: experiment with being implanted, and see what you can do with samplers"
- 4) The UO profs "dumb dial" numbers (like frequency scans or random numbers) and listen in on others
- 5) They get more numbers, show up in people's heads like a "Wizard of Oz rape cult"
- 6) They raped government folks who have clue zero who is in their heads into compliance (or by trickery):
- 7) They get more implants for their own use (I was implanted in my sleep: at least by 1991, sleep abducted again: 1993)
- 8) Over the course of 2-3 decades-- they figure out what they can get away with: by 1994-- a 24/7 fire-watch-- always a guard on duty
- 9) They "make their conspiracy theories happen"-- orchestrating the "contractor intel"-- from their living rooms and easy chairs

A 24/7 fire-guard indicates a "beat-down hierarchy" capability-- two watch four, four watch eight and so on...

21 April 2015 (note update on 12 April 2015)

NB: US Intel-- this is a well-documented situation, domestically, internationally, both governments and private sector.

(When I got through, 20 FEB 2013, after ~18 years of trying, slowly, I found I had: first, being documented, then, being protected, then international and private investigators began to become apparent-- this has died down a bit-- but not entirely).

But-- given the failure of my FOIA request, etc.-- and demands that legal press charges against an obviously criminal leadership--- I ask:

Is intel not cooperating with legal: the crimes are committed by FBI counter-intelligence-- who then can bust the intel involved, if intel will not disclose the info needed to bust them? Hearing White House staff take shifts on the line, and doing nothing to intercede in the abuse and rapes

(adding their own)-- and their radar failing twice -- why?-- because it's jamming implants, not doing the regular job?-- looks like they are criminals in line with the Levi-cult (who pull a 24/7 fire-guard-- these idiots in the WH may think they are using Don Levi-- his cult controls them, and Don himself is probably the top of a beat-down hierarchy-- since they took control from small-time criminals in the US government sometime in the '80s).

A SOLUTION is not through government legal document requests--- but it is legal:

USE BROADBAND RADIO NOISE GENERATORS THAT ARE FREQUENCY RANGE ADJUSTABLE-- KNOCK OUT THE "LOWFER" HAM RADIO (160KHz-190KHz) at the locations of all the abusive people (outside their property-- follow if necessary).

These radio devices are legal for everyone-- including FBI legal-- but will have to be constructed or bought (easy for pros and enthusiasts)-- this frequency range is for experimenting ham-radio hobbyists. It should knock out the out-bound-- and then: when Don S Levi (and probably: Adam H Levi (Don's son), Katherine A Pearl Levi (Don's wife (Harriet too)), Joanna E Lyons Levi (Adam's wife, Naeme too?), and potentially: Mike Posner and Sharon Posner (indirect evidence-- plus Mike's voice working on getting my ill mother to refuse medical care))-- when Don is knocked out of "suppressing" people with abuse-- many more will be able to cooperate with the FBI

NO DOWN SIDE-- LEGAL-- WORTH A TRY!

At worst, you stop war crimes (including tactile butt hole rapes against US and international citizens and soldiers) for preparedness.

12 April 2015:

NB: Looks like the core criminals are two couples in the Levi family; and Mike + Sharon Posner (& maybe the Posner children-- Mike has an unemotional, unmodulated "professional" sounding voice-- his male kids might too).

1) Don S Levi -- ~78, retired philosophy professor-- specialized in informal logic (debate)

2) Katherine A Pearl Levi -- ~73, retired nurse-- physical counter to Don's mental abuse-- does Yoga, access to drugs (sedating, addiction control)-- may do the broken necks and murders

3) Adam Hosea Levi -- ~45, Lawyer in DC-- convicted of Grand Larceny (1992)-- claims to have vicariously piloted 9-11 planes, and tried to get MX crews to change targets (and failed)

4) Adam's partner Joanna E Lyons -- 40s, pretending to be "Tiffany"

5) Mike Posner-- have been seeing external clues about "Mike" (in the FBI office, etc) for some time-- but when I heard his voice through my mom recently, working up a "refusal of medical treatment" (this was done

before-- a 911 call lead to: "you would have died had you gone a day later without treatment"-- then, I could SEE Don Levi's facial expressions through my mom-- this time, Mike Posner's "baby talk" voice)-- clear: Mike is bad.

6) Sharon Posner-- speculative: Don revealed himself as a "bottom"-- thinking: maybe Mike his his top-- Sharon has a short haircut, that some lesbians have-- I think Katherine has long hair-- could be that the two couples found a good way to avoid any social castigation-- some back in my family may have done the same (sad pragmatics)-- but: could be the "radical lifestyle" of gay sex, LSD (Eugene culture + nuresse Katherine's access), the implants, etc-- fed into a psychology of transgression and excess-- so, their crimes: excessive too (although the victims face insanity and rapes-- these poeple are basically on the phone-- so they are, default-- out of touch with what they are doing in full-- but they know they murder, and they know they rape-- so their emotional detachment is not matched by intellectual ignorance-- although they have a hard time accepting that they have accolished "stupid" at an unprecedented scale).

Currently -- I think Don & Katherine (and/or maybe Adam and Joanna) are at Adam's old house in Eugene, Oregon: 365 W. 28th -- Adam and Joanna may be in Washington DC-- he may still work (as a lawyer)-- The Posners have not been on the line verbally much-- but, given that Adam and Joanna had jobs (and I hadn't heard them since the mid-90s-- that Mke and Sharon were doing the switchboard operation while Don did his abuse.

These people probably donot have a captive (not sure about autistic-savant Aaron "Abe" Levi-- seem's his skills are exploited-- and he has not been abusive-- hope he is not captive in person).

When I noted the "artifacting" on a voice I heard that sounded Slavic-- I had expected that a conversion would lead to a less loud and vivid signal-- could be that the artifacting sounds (like round edges becoming square in sound waves) came from a connectionist conversion-- the voice might have been someone who was not implanted, or using an implant, but someone using a microphone or headset.

Also-- re: what is still happening to me, my family, and friends:

1) I know I got through (100s of investigators-- some right in the FBI office here in Eugene, not trying to be inconspicous and plenty of "winking"-- and that the issues raised over the signal are FBI counter-intelligence (even if through the DNI)-- clearly, FBI counter-intelligence blocking FBI legal-- probably due to Obama White House and Pentagon hawks (see below).

2) US government refusal to stop the crimes against me, or even notify me that I got through is illegal at a fundamental constitutional level.

3) Having broken such basic laws (basically: war crimes against your own citizenry for preparedness and/or strategic advantage)-- you have no legitimation or foundation for your decisions (utilitarianism goes out the door too: although the current situation is a criminal problem-- US negligence goes back to the 80s -- and ITT, etc. as well-- my restitution foundation is still being delayed to the tune of 1000s of lives lost daily).

The current US leadership has joined the criminal group that, going back decades, and holding back a scientific correction, as well as my and other's restitution foundations, has caused more deaths and casualties (includes wounded-- I'd put rape victims and the child sex slave trade here) than any other group in history (more than current assessments of WWII in its entirety)-- you can do the research.

Again: what I see went wrong:

1) The Obama campaign used this implant to gain info from adversaries in the 2008 presidential race

2) When I got through, the White House went with Pentagon "Hawks" who advised: sacrifices to keep options open (uterior motive: to buy time to figure out their own legal culpability, and options)

3) The White House eventually figures out they are guilty of at least Seditious Conspiracy (& Sedition)-- and work with the "hawks" to resolve this situation without any public disclosure (to avoid accountability)

4) The managerial psychology of "we defend what we've already been doing" is exploited-- as more leadership is implicated in the developing crimes, and they too go for : no disclosure solutions (so they avoid legal consequences too).

What I see now:

1) The criminal group is still in control of the implant and implant network

2) US leadership think they have this resolved (or... with their "hail Mary" long-shot-- waiting to see if they get caught).

Future:

It will take time-- but I see this ended in about five years-- not due to the US government doing its jobs, but due to me and others using the info gained in the last two years to further get past criminal US leadership and start the investigation of root criminals who operate the implant networks.

For those only hearing voices-- a bit of a key-- most, local to Eugene, Oregon (even Don and Katherine, who have a farm in Hawaii too-- probably at 365 W 28th -- Adam Levi's old house-- might call 9-11 to get Aaron / "Abe"-- their autistic son hostage out of being abused) : procedure -- call 9-11,

report domestic abuse in progress -- payphones are free-- you know this from what you hear on the implant signal, but reporting that could be impossible-- so if asked questions (on the phone-- only provide address, crime in progress, suspected people (a 50 year old autistic man abused by his parents in their 70s) and then hang up and leave (prepare a written script if you can); if approached later: "I kid reported this to me, and asked that I help: you don't mess around with domestic abuse, even if it is a potential prank"-- this should take out the ONLY sadistic abuser and the two-person fire-guard suppressing the entire hierarchy of control.

1) Don S Levi-- aggressive: sounds like a cross between "Skeletor" (from the He-man cartoon) and Archie Bunker ("All in the Family"), anxiety-OCD-sadistic-molesting, (Jewish (Russian?)); 99.9% of abuse-- uses other people's voices -- as puppets-- a malignant narcissist, and a sexual "bottom" (may be gay, and aggressively homophobic (bring this up to stop his "bullying charge" (keep it "PC" to avoid his "righteous arguing")))-- his thinking at this point-- almost every thought is a tactic to distort perceptions in favor of: "I don't go to jail"-- brain washing tactics every waking hour: a broken brain.

2) Katherine-- speculative (not heard in person)-- "croaky voice, low volume, slow cadence" "time to make the donuts commercial"-- lower, few words: minimal Aspergers syndrome; former nurse-- got the sedating drugs (implanted in sleep); and probably drugs from hospital employees for more control and abuse of victims-- Don's dominatrix-- thinks she is "black witch" (claim from the mid '90s).

Don and Katherine have had a "two-person fire-guard" -- taking alternating shifts around the clock since at least mid 1994-- Katherine could have ended this years ago. Don Levi was never arrested-- Katherine was a major actor in deception-- with a multi-day scenario that claimed Don had been arrested.

The rest: I can note (except Adam-- just not sure)-- have been abused and not abusive (until, it seems some were raped/fooled into it the last two years (since 2013))

3) "Adam" or "David" -- "weekend DJ" voice-- younger, seems "jazzed"-- was sexually abusive in the mid 90s -- gone until ~2014; Don and Katherine's son, and a lawyer in DC, who failed to pass the bar the first time on ethics issues.

These people appear to have been raped and abused for years, with no legal recourse, before "working" for Don and Katherine

4) Ray Hyman : <https://www.youtube.com/watch?v=US2SMkqdEEg> -- never heard until Jan 2014-- probably "puppeted" by a Don Levi not in jail. A family friend (uncle knows his son).

5) Will Davie-- outer voice sounds like a depressed "Snagglepus" (the pink cat from Hanna Barbara cartoons)-- inner voice-- jolly-- think: a younger, happier (on cocaine) voice (Scottish)-- occasionally there the past 20+ years-- seemed a prior victim-- only one added element to a utilitarian argument, no abusive behavior, until (maybe) 2014. A friend of Don's-- but

did not seem to take Don too seriously as a "real person."

6) Anne Forsythe-- soft breathy voice-- Marlin Monroe-- but with a squirly-weasle wine (maybe Irish and Jewish)-- seems to be raped on the line (if not raped-- a bit abusive with her voice)-- clearly a victim, seems like a "Patty Hearst" project for Don and Katherine-- a friend of mine. Participated in a major deception: Jan 2014 "stand-off."

7) Aaron / "Abe"-- speculative (not heard in person-- may be blonde-- Anne's fiancée in 1988/89 was a quiet blond guy)-- "Carlton your doorman"/"Garfield" (out voice-- inside-- less vocal)-- few words-- more Asperger's than Katherine-- into autism-- math savant, into computer skills (used by Don and Katherine to hack computers, with known passwords): participated in a major deception: Jan 2014 "stand-off."

8) Mike Posner-- "Skeletor"-- but this time, without Archie Bunker-- very little emotional modulation (Jewish (Russian?))-- rare-- seemed to pose as an "official US scientist" in the mid 90s.

ME: (b)(6) many people "speak through me"-- but my voice would sound more militant-- articulate and pissed off... or goofy, and light-- a range between a drill sargent and a hunky-dory Keanu Reeves (JD's Celtic)-- implanted in my sleep ~1990; on the "public pillory" since 1994 (no break from engagement to reflect, every waking hour-- no way to hide my thoughts from a crowd including public figures-- as I get raped and violated in front of them).

31 MAR 2015:

My (b)(6) email-- back on.

FBI - the problem

1) James Comey -- on the signal -- caught, thinking I (JD) am the devil (after discussing cost/benefit)-- Don Levi has "check-list stamp collection" approach to current understandings about evil and the Anti-Christ -- but even he is not the devil (I see "the devil" as an archetype cluster of evil traits (think Greek gods (mercury = god of communication), and Arch-angles (Michael -- angel of death)-- sort of like "embodied concepts")-- if Comey wants to see some Jesus philosophy, I suggest Philo-- or maybe-- get in touch with your own heart-- and it's connection with the Holy Spirit already)-- may he needs to discuss this with the Pope-- who, it sounds, was violated too.

2) Holder-- like a high-five thought about: Federal Marshals are DOJ directed, not FBI

3) All the arguments I hear: counter-intelligence (FBI)

4) The legal obligation: FBI

ISIL has a strong mobile VLF transmitter in a secret Israel location (near a

wired nuke crew-- to set off a nuke to a pre-assigned target, and one in China to hit the US too)-- you risk this irregardless of any other action. Public disclosure would reduce this risk the most. You risk this, whether citizens are taken out of being violated or not. (ISIL & Israel, and China-- could be others) what are you risking? Democracy has already said no (treaties signed, US laws, etc.)-- and you make sacrifices of life every day-- consider, my restitution foundation will not be the only one held back: already WWII death toll level-- add on, at least me being a scientist held back (I was implanted, did not know it, when I was working on Connectionism with UO psychologists (& linguist Tom Givon) in 1992)-- holding back verified testimony and cure for the blind, deaf & drug-free treatments for pain and depression -- the logistic role out of this delayed for a decade or two: probably about a billion casualties (casualties include assault and rape victims, etc.)

The most horrific crime/war stats for a group in world history-- and you are still sticking to this.

I hear: the is an FBI problem-- and the Pentagon did have to clear it's space.

--

DON KATHERINE (two person fire-guard: 20+ years)

WILL ANNE RAY (Patty Hearst-- decades of abuse, hopeless to escape)

"ABE" / AARON - Autistic-Savant + Adam (his house in Eugene - 365 W 28th)

Adam-- used to be Don's accomplice-- not sure if he's trying to joint the Cheney route (sacrifices to get the larger criminals out of power).

The locals set up: DK WAR ?

(NB: voices claiming to be Kennedy's have tried to connect my family to the Genovese crime family (think: Lucky Luciano and the Kennedy assassination), despite my noting that my heritage is about "teaching for long term evolution" (think: intermediary steps and Jesus, not Alexander the Great)-- and the Lord & Taylor family involved ("Dandy" Phil Kastel advisor, and later, others in LA) were trying to help everyone withdraw from violence (eg: gambling and bribes then later, info magic and psychedelics)-- looks like they may have been local Catholic church secret-liaisons)-- NB also-- those voices-- seeming to be taking such with a grain of salt-- one noting-- the caustic speculation: Jackie was thankful for the hit, after the Marilyn Monroe rape.

30 MAR 2015:

FBI & FEDERAL MARSHALS, State, County, City legal: How to bust the criminal top?

(War crimes, for over 2 years of intel preparedness?):

Stop the crimes local, and bust your way up the chain of command-- will lead

at least to the FBI top, DOJ top, and White House national security staff.

Let's make that mushroom cloud a trajectory of busts up to top command.

Eugene-- I've heard that the Levi-cult was trying to change MX targets to the Emerald City (crews wired, would not change the #s-- inbound local)-- not sure if POTUS is in a corrupt national security command bubble-- or the cherry at the top, .

Don't buy into "we need to wire nuke crews abroad for global security"--codename Tempest-- adversaries already know-- and then needed to be implanted to be held in check-- this Pentagon integration with criminal arms dealers has risked nuclear war (are these crews accessible by unknowns? why would only listening be useful? A local transmitter could-out-power any remote-- organized criminals could try to set off nukes aimed at the US with VLF transmitters); Democracy has already decided on THIS issue-- laws have been broken-- treaties, approved off by democracies: broken-- currently -- sedition, as one department obstructs another from mission duties, and abridges the constitution.

And have held back verified testimony (oscilloscope in left ear + connectionism-- held back for decades) = ~ a billion casualties going decades into the future too (deployment time) + 10s of millions dead (my delayed foundation for decades)-- the US will not cover these gross criminals in the Pentagon-- they will be executed-- 100s.

Was there a 5-point wired-tandem general crew in the Pentagon? These are Armageddon level stats-- looks like Satan (Ouiji board style) occupied the US military command for decades-- at least: a metaphor. How long is it taking for the real black-belt educators and military first responders to clean house?

Generals: did you need some knowledge drop-kicked on your Adam's apples? Are you speechless now? Make IT being right, rather than YOU being right a priority.

29 MAR 2015 (revised 30 MAR 2015):

After thorough consideration of a few deceptions being exposed, and the implications of what has followed, given a temporary "buying into the lies" and who went with that; and also-- cross-referenced with the abuse and voices going back to 1994, and with evidence going back to 1988:

The hierarch of control, re: the crimes in Eugene, Oregon-- NB-- from 1994-2012, Don Levi: clearly revealed as the cult leader-- a depraved and violent malignant narcissist-- abuse: 99% by Don Levi-- lately-- "Keeping up Appearances"-- seems subdued and in the background-- using other's voices.

1) Don S Levi-- the cult leader-- has put in time and half for two decades brain-washing people and violating me: his reflex-- almost 100% tactics all the time

- 2) Katherine Pearl Levi-- could be the "first hostage"-- and obviously abused and brainwashed by Don Levi for decades-- a Jan-Feb deception participant-- needs to pull out of obedience to Don
- 3) "Adam" or "David"-- younger voice-- maybe Don Levi's son Adam from DC-- was abusive in the mid 90s too
- 4) Ray Hyman -- probably puppeted by a non-jailed Don Levi in Jan-Feb 2013 -- I never heard him before this-- seemed tired, didn't want to do this
- 5) Will Davie -- not abusive in past-- I suspect he was roped into guilt: "now you will pay the legal price: too late" (a Don Levi tactic-- after seduction into crimes)
- 6) Elizabeth Anne Forsythe -- looking like a "Patty Hearst" brain-washed victim-- looks like a deception participant (Jan-Feb 2013)-- needs to pull out of the cult obedience mentality
- 7) Aaron Levi ("Abe")-- Asbergers-Autism spectrum-- not sure of his relation to Anne and Don-- potentially a math savant-- with his computer skills used by the Don

Given the above, who is the core fire-guard (people with samplers, who enforce compliance-- not people showing up for a talking/listening shift)-- how far on the list above does that "do or die" pact go.

No hostages-- Will: an accomplice, not a major (probably addicted to nurse Katherine's drug supply-- has posed as Don's son "David" (mid '90s), and Don's son "Adam" (2014-2015) (Wills interior voice, not exterior)); Ray & Cheyney-- trying to get this out, recognizing the huge international organized arms dealer criminals. Others: John (potentially Anne's target (she's said she liked John romantically)-- Winona too (Anne liked "post-modern" ladies in the 90s (Sarah and Wendy)-- the "collection of artists": Anne's taste-- probably a manipulation tactic on the part of Don Levi: "occasional indulgences")); Mike (probably got the implants with Ray)-- I've heard on the implant signal John and Mike since 1994-- John, sounding abused, Mike posing as an official US scientist. I've heard a voice, claiming to be Anne's dad Rick-- "She's a drug addict" and she claimed credit for your connectionist stock predictor idea (JD had a super-efficient connectionist program in 1992)."-- Rick would know though-- Don Levi uses drugs to control victims-- look at me and 17+ years of anti-psychotics (maximum testec/recommended dose).

Although it is clear that Katherine and Anne F revealed themselves as accomplices when the 2013 Jan 5th "Pali Noe" arrest of Don was revealed as bogus (he was never arrested-- and Anne & Katherine played their parts-- complexly, and without err, as if that were the fact)-- it looks clear that Anne (and probably Katherine-- over a longer period) was: 1) Brainwashed, 2) I've heard her raped in the flesh from the rapists' perspective (her panting-- not comfortable with it) in the mid 1990s-- she said the last time (I did not hear this: one month ago); 3) The cult has discussed their use of cocaine and drugs to control their victims (at least Ray Hyman and Catherine

Wilson-- could be victims letting the news out)-- looks clear that this drug manipulation has happened with Anne-- she almost always sounds terrified, and distraught-- this is the Forsythe Technology heir (100s of millions of dollars)-- looking like a much more severe Patty Hearst situation--- the US-- not helping with any "exit counseling"-- I'd give her (and Katherine) a break-- with a stern: cult activity (preservation of Don and his goals) is unacceptable.

http://en.wikipedia.org/wiki/Patty_Hearst

ALSO-- US leadership failure-- NB-- after I got through (20 FEB 013)-- all intelligence top leadership were replaced (except James Clapper)-- indicates, given the current delays: they were placed to protect the private interests in control of the implants (placements get more done than implant victims, who are probably elected-- it would be difficult to get an "assisted" person elected-- and potentially for only four years; but "getting that job" because: 1) you have a team of brains on the implant line-- and you can do push-ups (etc.); and 2) the boss is already part of the implant crew-- full-timers would be ideal to place, and not have to try to manipulate to get things done. Given this...

At least four government leaders could have ended these ongoing crimes, single-handedly, given their scope of authority, and the law behind them:

1) Barrack Obama (would have to be clueless, and not want to be (e.g. "no body told me (but I know)"), to be innocent of at least sedition level crimes, if not knowing of treasonous consequencers (foreign intel would be remiss not to record, after multiple agents converged on Eugene (me) and then they took a look))

2) Eric Holder (enforce the law)

3) James Comey (enforce the law)

4) James Clapper (could have noted the bogus intel assessments)

20 MAR 2015:

Reported-- Hillary Clinton's voice-- had an hour meeting with Obama-- and he disabled her personal jammer-- and she has not been able to tell people this (may not have known)-- not sure on lothario reports with various other women. How many years into assessment and perparedness here?

Get a clue-- who is sticking to:

1) Incentivizing classified info sales

2) Blocking victims from approaching the FBI

3) Lying about "hat-trick" speculation, and increased cyber-access via that when redacted info always needs to be physically extracted (NSA: we could get any cyber info eventually, would defend against such as default; Level A codename Tempest secrets would require Level A security in themselves; any "huge idea" without too many numbers to remember, that was a big secret in itself-- government would have to explain why such hugeness was never openly debated in public).

4) Combat un-preparedness-- barrage jammers-- did the Pentagon already "test" this? The military does not use war-crime tactics in a time of war-- I know (11B)-- they draw the line at "if you only have a 50 caliber machine gun, Geneva conventions say don't use that on humans-- but... wink-- they do wear equipment"-- a far cry from: we rape folks to get ready, or see if we are-- two years later.

NB: I've heard that my poem "Humbled Beyond a Word" was used to intimidate people (years ago)-- and, given my family connections with the Finnegans Wake crowd (mostly suffragettes)-- I'm a "natural" (born, raised, educated immersed and "designed" to have much just by default)-- I could see the huge Finnegans Wake echo art being used for intimidation too: a different story, than now: advanced weaponry used for self-preservation, and no "causes" or "excuses" panning out.

Suspected hierchy of control:

1) Ukrainian organized crime (broke out of Soviet Union, with implant tech-- at least early 80s (implanted by USAF-- they implant themselves, we have access))

2) UO profs-- implanted, via DARPA (proposal-- DARPA already under control, i.e.: this type of tech ("mind-reading"))

3) UO profs used as front to re-implant US intel

4) US intel, using UO profs to torture-- "Mafia-style" silence threat with "Don"-- but root down-- still the east European criminals (I'd look at AZ mob too)

5)-- potential-- Robert Malech, the root mind-radio inventor, concerned with intellectual property rights, gets implants, and uses their antenna knowledge to gain initial control

Heard a voice-- 3:24-3:25pm Pacific-- the voice that accompanied the decapitation

Where was it from? Ukraine? Don't forget about the Soviet Union criminal gang that may have partied out of East Germany in the early 80s (see way below)-- the fascists, interested in intellectual property rights.

Looking back at the "make-over" link--

http://en.wikipedia.org/wiki/James_R._Clapper#Military_career

Clapper:

- 1) Air Force (think Ft. George)-- looks like the USAF developed this (mid 70s)-- and he can fly a plane (remotely)
- 2) Thailand (Don Levi in Bangkok during 9-11 attacks-- this made me suspect Gen. Kutyna, and friends-- they have Thailand experience-- so does Clapper)
- 3) Involved with ITT-- who has this transmitter/receiver power?-- they are a communications company-- and with the Robert G Malech, Dorn & Margolin, EDO, ITT, Excelis, Vectrus angles-- ITT would still have that valuable asset (that I have the intellectual property rights on-- the implants-- do you want that to go public domain?)
- 4) Motive-- this is weapons contractor intel-- 9-11 to sell more weaponry.

-- from link above:

After a brief enlistment in the United States Marine Corps Reserve, General Clapper transferred to the US Air Force Reserve Officer Training Corps program. He was commissioned in 1963 as a distinguished military graduate from the University of Maryland. He commanded a signals intelligence detachment based at a listening post in Thailand's Udon Thani Province where he flew 73 combat support missions in EC-47s; a signals intelligence SIGINT wing at Fort George G. Meade, Maryland, and the Air Force Technical Applications Center, Patrick Air Force Base, Florida.

Clapper retired from active duty 1995 and became the first civilian Director of the Defense Intelligence Agency for the U.S. Forces Korea, U.S. Pacific Command, Strategic Air Command and senior intelligence officer for the Air Force.[10] He then spent six years in private industry. From 2001 to June 2006 he was Director of the National Geospatial-Intelligence Agency as member of the Defense Intelligence Senior Executive Service (DISES).
Private sector career

From 2006-2007 Clapper worked for GeoEye (satellite company) and was an executive on the boards of three government contractors, two of which were doing business with the NGA while he was there: In October 2006 as chief operating officer for the British military intelligence company Detica, now DFI and US-based subsidiary of BAE Systems, also SRA International and Booz Allen Hamilton.[11] Clapper defended the private sector's role in his 2010 confirmation hearings: "I worked as a contractor for six years myself, so I think I have a good understanding of the contribution that they have made and will continue to make." [12]

Seeing this as more smoke clears:

1) Katherine Pearl Levi (dominatrix, former nurse, drug dealer using implanted hospital staff) + Don Levi (bottom)-- consistently there for 20+ years-- Will Davie-- occasionally backing up utilitarian arguments-- Ray Hyman-- news to me since January 2014.

They are a two-person fire-watch-- could be the crux that would bring down everything-- they, and they alone have samplers-- could be some other Eugene people-- I suspect the Levi's-- right here at their house in South Eugene-- could be Will Davie, Ray Hyman, etc. too.

2) Look at: not manipulated implanted people, but people with implants being placed, with advantages that would give-- e.g. a team in the background, helping James Clapper do his job, and get advanced:

Look at Clapper's "make-over":

http://en.wikipedia.org/wiki/James_R._Clapper#Military_career

http://en.wikipedia.org/wiki/James_R._Clapper

He works for ITT-- ITT probably still providing the signaling, transmitters + receivers-- stupid exec to be held accountable, not 1000s of employees and shareholders-- massive liability would require long-term profit skim.

I suspect Anthony Blinken has some relation to the "Adam Levi" voice-- hear that only on weekends and after hours, for the most part-- Adam-- supposed to be a lawyer in DC-- could be Blinken from the head.

It's been 20+ (2+) years of "buying time"-- looking at problems in the foreground, and laying down response in the background-- criminals using diversions, while they "fix problems."

Could be-- Susan Rice-- really raped, to "maintain control"-- either that, or placed after I got through.

3) Obama could not 100% clueless, and would not refuse to jump his security team-- he is not to be trusted either.

LEGAL HAS PERMISSION TO LISTEN (ONLY LISTEN-- INFO TO SAY?-- GET TO THE POINT FAST & PROFESSIONALLY)

HOSTAGES-- ONLY THOSE WHO HAVE NO ACCESS TO SIGNAL FREE ZONES-- THOSE WITH CALL SPACE TO CONTACT LEGAL AUTHORITIES IN SIGNAL FREE ZONES (PRESS,

HI-TECH, BUSINESS, ETC), WHO DID NOT CALL FOR HELP, WILL BE CHARGED.

19 MAR 2015 My final assessment (not included in PDF)

Hearing:

- 1) Clueless president (no open room discussions with non-intel?)
- 2) His national security advisors trying to implicate him (obviously dumb: My Lai Massacre in progress)

3) "Pentagon" seeing treason, in a double bind with their classified info

C) No real info or commands going in or out of intel advisor circle

-- Makes sense-- contractor intel would target the intel folks

National security: flawed analysis--

Taking "info heist" threats that require physical extraction (any redacted material), and using these to bolster arguments about "hat trick mind-reading" that would reveal cyber-access (the NSA-- could get into any cyber accessible point, eventually, now-- AI in the future, and unknown threats-- this is why some info is only available via physical abstraction already). Legal assessments-- not looking at inevitable swearing out, and crimes going down dramatically across the board-- look at their intel culture too-- looks like "WAR LEVEL INTEL THREAT" did not trigger "MILITARY GRADE ETHICS" -- hence: WAR CRIMES FOR INTEL PREPAREDNESS-- cross cultural miss-fires.

These people have secure conference rooms-- if charges are not pressed against them by the DOJ, FBI, etc.-- I will-- they are the "late mass murderers." They could have camped out in these safe spots until help (FBI + mobile broadband RF noise generators, etc.) arrived. They are depraved, and detached from reality. Some people did help, I hear, and did contact the FBI.

Advice to lingering criminals-- if you have classified info from multiple territories (extradition avoidance), go to The Hague or Paris, turn in others, and avoid a death penalty.

Looks like-- neither Don Levi nor Will Davie has been arrested-- but still freaked out about their "fire-guard" 24/7 small group with sampler beat-down on the others-- FBI-- take these ass holes out first-- and block my outbound (rebroadcast to 1000s)-- and make sure it is not replaced by another (a reason that foil box is not a huge priority for me-- my family and friends would be raped on the line).

New items, not yet edited in below (Pacific Daylight Savings Time)

18 MAR 2015 1:06pm -- There are no arrest records for Will Davie or Don Levi. Still at large:

<http://eugenedailynews.com/c/news/news-mugshots/>

<https://ecrim.ehawaii.gov/ahewa/>

16 MAR 2015 5:52pm Looks like Will Davie has been arrested. (Wideband jamming can be distance limited, if so, use the "24/7 temporal beacon echo slide up and down the frequency range to pair pop-up frequencies (e.g. an implant pulled out of a Faraday "booster bag")-- and use existing transmitters used to "smart jam" the new frequencies).

14 Mar 2015 1:01am (1:06pm update (below too))-- Identifying the "three headed" backbone fire watch ("beat-down hierarchy" shifts at the top-- with samplers to rape and kill)-- 1) Don S Levi -- 78, aggressive bully arguments about why you should be raped-- probably in jail in Hawaii; 2) Ray Hyman -- 86, pathological liar trying to molest you into frustration-- probably in Eugene; 3) Will E Davie -- 73, sadistic, depressed, negative "psychoanalytic" probe to feel out your fears, shame, and suffering, or throw you off his trail. All three: PhDs with brains deformed from decades of abusive indulgence daily-- attack/escape reflex at this point. They "puppet" others to sound like their rape-cult is bigger-- but, over time-- you can detect these three:

Don S Levi - Will E Davie - Ray Hyman

12 MAR 2015 4:49pm (14 MAR 2015 1:23pm update) -- Looking like root evil: (nuclear control (surprise elimination of threat)) weapons dealers (ex-military management (call up ALL the commissions)) implanting bureaucracy of acquisition and global power players, and posting hostages ("collected" artists (some "tagging" (used suggestions)) on the politicians and other power figures to gather info for competitive arms sales advantage (and "budge" law passage (over-lapping agendas))-- using UO professors for front, torture, and experiments in what could be done. Potentially goes back three+ decades. Seems the contractor landed in my bedroom about a month ago, after being kicked out of the DOD. (Evil, Willing, Helpless continuum-- looks like enabler looking for motivation-- but also-- temptation to "roll the dice" with evil, with unexpected magnitude of guilt association).
Hearing better formulation of non-public announcement plan:

- 1) Jam all abuse frequency blocks globally
 - 2) Approach
 - a) Phone call
 - b) Email
 - c) With local legal authorities
- then--

Restitution offer:

- 1) Restitution certain-- deal: "swearing out" recorded for classified info questions-- paid on the spot 1st substantial payment (Will include government employees)
- 2) Surgery scheduling for implant removal -- block jam in mean-time if necessary

07 MAR 2015 1:12pm -- The US government:

- 1) Can stop the mind radio violations with signal jamming (see below)
- 2) They are mandated by law to stop crimes they know of in their jurisdiction

3) They know about these crimes at several levels of government (I've seen 100s of investigators in my neighborhood not trying to be inconspicuous after I got through in 2013 (see below))

4) I hear arguments about national security threats in the future.

5) National defense is never allowed to use these criminal tactics, even in a time of war.

03 MAR 2015 9:37 -- Obvious: classified information is still being sacrificed to avoid a press release exposing a culpable government leadership, who have been in line with and protecting a contractor (or contractors) that implanted the "Bureaucracy of acquisition" for political control, and commercial advantage-- and are still using abusive criminals to rape their hostages into submission and silence.

BTW: It looks like I own the intellectual property (negligence (I was implanted involuntarily), reverse engineering a trade secret, prior art:) A rectenna powered implant, anchored to skull interior, inserted through Eustachian tube (left side = brain language emphasis)-- two receivers, two transmitters (signal = AM amplitude modulation)-- VLF in converted (x32 (an even x2 for data preservation across conversions-- peeks counted, data-loss = less vivid)) to LF into skull interior (input stimulation, and baseline for brain "pop-corn and patterns" measurement); LF interior signal converted (x 1/2 (match interior LF)) to LF exterior; "NASA grade" receivers can "hear" globally (LF refracts); high powered VLF is camouflaged by navigation beacons (VLF + power needed to reach weak powered receiver underground), LF outbound is in "Lowfer ham radio" zone with sparse signals for weak outbound to compete with. Remote "listening" devices (wearable) should be able to experience the implantee experiences with ~16x as much vividness as with implant-to-implant communication. How it works: brain activation patterns (as summed action potentials over time) are transmitted via an amplitude modulation radio signal (the amplitude increased by the extra brain activity)-- amplitude modulation and action potentials are both power differential measurements (oscilloscopes measure this too)-- measuring the "electrical activity" of the brain, and then stimulating the brain with the same signal = adding electrical power at just the right time -- zipping a pattern into ongoing perceptual expectations (priming and timing-- with multiple neurons near a threshold for firing, an extra electrical boost, at just the right time, should push those neurons (sensory and motor) into activation-- and further creating new neural pattern expectations). My computer-brain interfacing developments: <http://psych.technology>

02 MAR 2015 10:40am - Persons of interest: Legal (speculation: scope-- # of implanted people, long history-- a multi-contractor cartel with "Mafia-style" silencing techniques-- contractors include multi-star generals with "Ph.D level organized crime"-- motivated by drug-level addictions (will not be stopped with arguments)).

27 FEB 2015 12:58am - Improvised "Faraday Cage" protected interview with implant: Could look at the VLF inbound frequency (outbound divided by 16). Send a white noise signal on this (or "powerful silence")-- your broadband radio noise generators (the portables, that are frequency selectable)-- just power the rectenna in the signal free zone (LEVEL A, etc) with a VLF signal (as used with jamming the inbound). Step up: "swearing out" robustly after

an interview-- confirm-- "did you tell the truth, the whole truth, and nothing but the truth"-- problems-- if you have external audio-- record, and let the interviewee hear it first-- do they want to veto it? Easier than a live interview for the subject with questions updated by in head thoughts in real time. In high value interviews-- several (random) locations.

Some, legitimate authority (in line with the law, history, science, human and earth values, etc.) has to take charge with natural confidence in the face of terrifying weaponry used by depraved mentally ill criminals with decades of prep time.

(b)(6) Everyone may record my frequencies in and out, 24/7-- and listen-- on external speakers (PDP)

Do not input unless:

1) You are a hostage, and really have no choice but to be here (common sense)

2) If you are an organizational representative, keep the info/questions concise, real, professional.

3) Hostages-- recognize the order of violation reality:

- a) Frequency and duration of input
- b) Repetition of content
- c) Negative content

4) Policy-- my masturbation-- see it as performance art (Vito Aconci, Tracey Emin)-- might be with a partner (Bed-In, Dreaming on Stage)-- if that helps, but many of us are being violated by a technology out of our control, including me-- I was implanted in my sleep-- around 1990-- re-implanted, summer 1993, I've been diagnosed with schizophrenia since 1994, have not had a "coffee break" to relax, reflect or use my imagination in over 20 years-- almost constant psychological torture (two OCD logicians, trying to prove I should be raped with math-story problems-- more than full shifts every day-- and others covering me as I was allowed to "work"-- engaging and remind me

of their presence every few minutes. Listening to the entire 20 years "on tape" would be excruciating-- with convulsive fits and self-inflicted face beatings, and more than one tactile rape session a day on average. 16+ years on maximum doses of anti-psychotics.

BLITZ TO WAR-ROOMS, BUNKERS, etc. WITH HIGHEST LEVEL RADIO BLOCKING (TEMPEST, ETC.)

THIS IS RADIO WARFARE

(Electronic Warfare: most likely with Intel R&D contractors motivated by money gained through competitive advantage)

ORDER VLF & LF BARRAGE WIDEBAND JAMMERS DELIVERED TO ALL LEADERSHIP LOCATIONS (Other frequencies too: look at iterative x2 multipliers, relays, etc. (exceptions))

I'd focus on ~10KHz~190KHz: OMEGA / Russian NAVAIID (cover for loud inbound) & "Lowfer" implant outbound (failed ham radio experiments).

Fade in power level: level signal, or white noise should break up two-way communication-- limit to perimeter desired (radius area, plus air-space).

Command has been compromised, yet still has power-- they need to integrate

with verified non-implanted leadership-- as it will take time for them to "decompress" from brain manipulation (some long-term "brain-washing" effects-- exit counseling: note the techniques used (see the rape-cult methods below))-- and it is understood that major command decisions do not come out of a "brain-rape & brain-washing" zone-- the non-implanted need to work with the brain-washed leadership: their power, your legitimacy, esp. if they fail to cooperate with the US laws and seem to be still off in judgment (nb: if necessary, jump the chain of command to the constitution). Some in command may be criminal (and potentially integrated with the criminals / contractors).

Expected: inbound 10KHz -19KHz; outbound: 160KHz-190KHz. Jamming inbound should be the priority-- classified information takes time to compromise. If Pentagon & White House security radar can do ~10KHz~190KHz, use that? (#s from reverse engineering: weak, rectenna powered radio implants operate on cross-continental flights, work deep into tunnels, hence LF & VLF -- the inbound needs to be powerful (weak receiver) and this requires "camouflage cover" offered by the pervasive Russian NAVAID signal-- the outbound is weak, and needs open space-- the Lowfer experimental low frequency ham radio zone is signal sparse, and odd signals are expected there-- due to data loss with frequency conversions-- an iterative "divide / multiply by 2" is expected-- hence a 16 x difference between the VLF and LF is expected). Other possibilities-- likely under 300 KHz (refracts past line of sight)-- or satellites with mobile and planted relays).

GLOBALLY BLOCK JAM THE RELEVANT FREQUENCY RANGES WITH WHITE NOISE
Maybe: "Operation: Silence the Violence"

1) The Pentagon-- I think they EXPERIMENTED -- said "white noise or silence-- they both destroy the signal":

- a) White Noise-- information is destroyed at greater distances
- b) Silence compresses the signal-- and it might be un-buried (recordings)

2) I think it's just Navigation Beacons (10KHz-11.875KHz (maritime?)), and Ham Radio Experiments (160KHz-190KHz (white noise jamming will start no fires in garages)). This is a quick: "no down side on the frequencies we are destroying."-- You should have better MEASURED / EXPERIMENTED (above) numbers (not my, and others, reverse-engineering).

3) Don't expect to simply "shut off your signal power" and mean shit. Other nations are implanted too. They have capabilities-- private sector as well (Criminal "back-up"-- with criminal elements potentially off the current map).

=====

After the above:

- 1) Maintain jamming until folks are de-implanted, or if 100% of global "radio head space" is secured.
- 2) See public announcement below

3) Triangulate track to approach folks (already started, completion not needed to do 2-- keep outbound open when jamming if you need to keep triangulating (inbound jam blocks tactile, voices, motor: "dizzy falls."))

4) Approach folks, schedule surgeries, negotiate further restitution + swear-out confirmation (these later ones would not have the implant signals)-- incentive to keep in touch, not sell what you already know they have, etc. (might note that you can track info trail leaks).

Including this in the public announcement should deter private sector use:

Barring, "we put fires out with debate arguments"- skip to the Press Release / Public Announcement section:

INTELLIGENCE ASSESSMENTS

WHY BLOCK JAMMING AND NOT "SMART JAMMING, ETC?"

SMART IS SLOW-- AND MISSES WHAT YOU DO NOT KNOW

1) Shovel the shit before polishing the candle-sticks-- this is a problem of scale-- the crisis is colossal:

a) FAST (Today)

b) POWERFUL (Global Distance)

2) What are you losing right now? (Who is emitting classified information? Private sector too).

3) You do NOT know about many other global criminal elements (groups, individuals, etc.)-- and what they are doing.

4) ALL legitimate powers (democratically & publicly stratified) will thank you (long term)-- Help solve GLOBALLY, a problem that looks to be US rooted-- Take initiative.

=====

CURRENT (MANIPULATED) INTEL FUCK-UP -- PSYCHOLOGICALLY TORTURING HOSTAGES GLOBALLY TO SACRIFICE CLASSIFIED INFORMATION FOR YEARS:

Current solutions have blocked access to legitimate authority aid: LEGAL, MILITARY, PRESS-- for the stated purpose of classified information safe-keeping -- while buying time to emanate more classified info (which is obviously recorded-- you do not know the end of this)-- and to incentivize the sale of classified information (making the US and global governments look evil, letting criminals know they still have time to sell info, and letting the evil rape-cult manipulate key witnesses, to sabotage legal cooperation), and which classified information is still being illegally gathered (government, private sector, "ears / manipulators"-- the hostages themselves, still emanating)-- at a rate that could never be equaled with post-press release use of mind-reading (abductions, etc.)-- and classified information losses in a quantity greater than what would have been gathered had a press release happened two years ago (and with future mind-reading tech inevitable with brain-computer interfacing scientific progress-- experts publicly say: 5 years); and, with an ongoing increase in the number of adversaries getting mind-reading tech, even now (each loss can multiply)-- and with your blocking legal and military parity and superiority preparedness (brain-computer interfacing, etc.), you are accelerating that problem. Sacrificing what you over-value (classified info-- Pearl Harbor? 9-11? Did these occur because of stolen secrets?), at the expense of holding 100s if not 1000s of hostages, and psychologically torturing all of them-- RIGHT NOW.

YOU SHOULD BE MAKING THAT FULL PRESS RELEASE FOR DETERENT VALUE ALONE

Culture root: intel over-valuing secrets (they are important, but almost

every expert over-values their area of understanding: don't lose broad perspective)-- the implants-- US developed, stolen (a secret stolen)-- lead to these crimes going back decades-- but if they were not secret, over 500 million casualties (overheard assessment-- think-- a significant improvement in the precision of justice, and a staggering array of new medical equipment), would have been avoided, with the integration with 1959 computer technology (mind-radio + perceptron - PDP - connectionism). Keeping secrets can cost lives too. Deterrent value is decentralized, and more effective, by science, than surprise (prove me wrong-- look at all your secret tech-- what classified tech was evaluated, as to open deterrent value, non-weapon use enhancement of our human values, etc.? Are you of the opinion: "You will not turn 'our' weapons into justice and medicine?"

VIOLATING ME ((b)(6) AND OTHERS TOO) TO KEEP HUMAN BEINGS FROM GOING TO LEGAL AUTHORITIES GLOBALLY FOR HELP-- WITH THE ONLY BENEFIT OF BLOCKING PEOPLE FROM GOING TO THE PRESS (BUYING TIME FOR MANY TO SELL CLASSIFIED INFORMATION)-- HOW LONG WOULD IT TAKE A LEGITIMATE PRESS TO VERIFY THIS SITUATION? HOW LONG DID IT TAKE YOU? WHY WOULD THEY BE IRRESPONSIBLE? WHY WOULD AN IRRESPONSIBLE PRESS BE TAKEN SERIOUSLY? YOU WOULD STILL HAVE TIME, IF YOU STOPPED THE OBVIOUS CRIMINALS YOU CAN STOP TODAY (ARREST AND JAM THEM-- LEGAL CAN DO THIS IN EVERY JURISDICTION). THE COST OF NOT STOPPING THE CRIMINAL VIOLATIONS? : PSYCHOLOGICALLY TORTURING YOUR HOSTAGES-- DESPITE SELF-AWARENESS THAT IS DONE ONLY TO STOP THEM FROM GOING TO LEGAL , MILITARY, AND THE LEGITIMATE PRESS. NO SUM BENEFIT (CLASSIFIED INFO LOSS ISSUES): CRIMINALS STALL FOR MORE TIME TO GET AWAY WITH THEIR CRIMES-- CRIMINALS ON THE LOOSE-- STILL WITH THIS WEAPONRY TO MANIPULATE WITNESSEES TO SELL CLASSIFIED INFORMATION TO SABOTAGE LEGAL: WITNESSES, NOW LESS LIKELY TO FULLY COOPERATE; AND TO INGRATIATE THEMSELVES WITH ELEMENTS THAT CAN HIDE THEM, GET THEM MORE ESCAPE MONEY, AND DO MORE DAMAGE. SOME PEOPLE WOULD JUST SELL CLASSIFIED INFO FOR THE MONEY ALONE, IN A DECENTRALIZED, ONE BY ONE MANNER-- THE CRIMINALS WOULD HAVE NO MOTIVATION TO STOP THEM.

=====

Readiness for computer-brain interfacing with full expertise brought on:

I predict: expertise will advise rapid deployment of brain-interfacing tech for their missions, with dramatic benefits due to vastly increased accountability, etc.

((b)(6) Computer-Brain Interfacing technology development (patent for him, to avoid lost wages multiplied by pain and suffering and punitive): <http://psych.technology>

See my prior work (researched, and with engagement with others (experts, etc.-- ~10% new info they would be raped for, and 90% from engagement: "this is important, this is a problem, what is this?")); e.g.:

- 1) No funny hats (secure all items that are worn near the head).
- 2) Transmit a timing "slide-whistle" signal along the entire relevant radio signal spectrum (different frequencies, different time for-- slide up, with delays (x up, y up: /))-- listen and pair in and out (both in and out are necessary for thought manipulation) - continuously scan for pop-ups (or

implants stored in "Faraday Cage booster bags", or foil lined breadboxes).. Transmission-echo-scans would identify frequencies used: can then record, track, and jam if necessary (outbound transmissions, etc.)-- if the low-power-level signals are hard to find-- it is easier when you are looking for your own signal.

2a) Full spectrum radio signal comparative scanning globally using all receivers and computer analysis (distance adjust (time & power for each receiver) and look at overlap, look for a divergence around focus point x, y (the context) for signals to differentiate from the point of focus (if there is a divergence, subtract context w/o subtracting signal (which will have fades))-- locations can be compared for a "brain" signal signature difference-- should be able to do this in real time). Use multiple calibration signals for all receivers used for data too-- power, timing, accuracy weighting-- individual receiver signals might be cleaned, relative to looking at the x,y location (the distributed receivers context cleaned relative to looking at the the x,y location, itself context cleaned as well)-- a potentially recursive procedure-- programming can get more efficiency out of existing decentralized, no-one-receiver-critical, receiver equipment. Calibrate receivers with various "beacon" transmitted signals to assess accuracy weighting, and equipment lags (power, timing), etc. Defensive classified information protection numbers are adjusted based on current assessments-- looking like re-constructing basic tech to identify solutions that are held back in the current situation::
http://en.wikipedia.org/wiki/Tempest_%28codename%29

3) "Swearing out" (using computer-brain interfacing, speech to text, auto-text-analysis, etc.) -- increased accountability across the board: double agents, bad apples, etc. eliminated-- a tighter-knit intelligence community, that can be held more accountable by congress.

4) Agents not tortured (look at prior numbers on torture, bribes, kidnapped families, tricks, % of info lost, budgets for getting info (cost/benefit analysis -- budget trade-offs of adversaries)); agents can also have more expendable (misleading) information (decreased value to adversaries). With ~95% info loss expected for any one agent, they will probably not be killed unless they have not passed on new info (an internally switch-able brain phone -- the "wire" + a digital controller-- this could reduce that threat too-- although: "what questions were asked" could be a risk). Out-bound only implants-- abduction is necessary. These could be pop-up (remotely)-- lock doors from the inside, trust sleeping partners, etc.

5) When info-types are compromised, go physical; e.g. from passwords to bio-metrics; from nuke-plans to plutonium monitoring-- hermetically "moat"sealed locations -- with "swearing out" detectors at entry/exits.

6) Information can be tracked by identifying "info cue clusters" that diverge from the norm statistically on a looked at communications channel (e.g. feed in a "mission brief," look for relevant echo constelations (no one data piece essential-- maybe some "data-connection" types added too (red links to maroon, etc.-- look at Cyc (AI hierarchical database), and see if there is "context overlap"-- is "what they are talking about" overly

relevant to what we want to know?-- was there a leak?)) on relevant channels).

7) Legal and private intel: the same (think: military, FBI, police, security guards)-- swearing out reduces violations across the board, despite new ways to violate-- most corporate crime would go down with new legal tech tools-- should look into lag between criminal use of "mind reading" and public legal use to counter such (e.g. the current situation).

(Remember-- the only new objective facts available with mind-reading are opinions and fantasies (and they can be gleaned by less risky outer observation too)-- then the cost/benefit of getting info through one agent or employee at a time (like an information drip compared to a hard-drive with numbers and blue-prints, etc.), becomes the relevant factor (see #4 above)).

PUBLIC ANNOUNCEMENT / PRESS RELEASE

Preparation (governmental agencies):

1) Nations are not at war-- not even close-- partner with the full UN-- get all governments on board for rapid press release assessment. Respect that governments are not the only powers, not the only victims, not the only set of resources.-- get other institutions and organizations on board to help too.

2) Life saving tech needs the most expedient deployment (criminals have it, legal needs it).

3) International intel needs to assess criminal private sector gains (a problem of scale: way beyond five eyes)-- current global security threats (looks this way to me): International Organized Crime (political terrorism, black market trade (weapons, drugs, etc.))-- much more unstable and dangerous than slower to grow, nation-state issues. I think integrating with legal, to rapidly gain, at least, technological parity or superiority with criminal use of "mind reading" tech will help.

a) People need to know: help is on the way, etc. (immediate casualties, etc.)-- decades of rapes, abuse, etc.

b) You need psychological global democratic support-- this is too much responsibility for you-- power is legitimated by the broader global populace, by any real ethical metric ("divine and natural law" needs public recognition, utilitarianism: science as means to achieve long-debated public value trade-offs, etc.-- I point this out, as "leadership arrogance," and "we know better than history and the law," seems to have been a problem).

1) Implant signal network announcement:

a) Violations over-- jamming, tracking, recording (? privacy respected-- I'd discuss with many: value of "government having" vs. "I need to know if I was manipulated"-- NB: other groups will probably already be recording 24/7).

b) Call legal authorities (give phone number-- many times) -- note-- call us, but we can find you anyway.

c) You will get \$1 million as initial restitution on the spot, for "searing out" as to any classified information you know--a surgery scheduled to remove the implant-- further restitution negotiations later.

d) I would add: we do not know who is recording and tracking you, so we will too-- you have full legal control over these recordings for your peace of mind.

2) Added value for public TV press release announcement:

a) Deterrent to criminals and adversarial use (esp.-- NB some criminal groups using this may be off your map-- and that "in the head announcement" could tip them off):

i) We can and do transmit up and down frequencies with a temporal - frequency sliding beacon echo receiver (up frequencies with time shift, listen for echo-- x Hz, y time: /)

ii) We identify frequency pairs needed for I/O mind control-- easier than "signal signature" identification-- two-way transmissions needed for manipulation-- do 24/7 for pop-ups, or implants hidden in Faraday Cage bread-boxes or booster bags.

b) Approached hostages need to know the approach is legitimate. I'd have a hard time if the President drove up to say hi (seriously).

b) Hostages feel much more safe, and don't worry about "winners and losers" -- and a government that has slipped into insanity-- and may try to keep this secret (eg: does the real legal deal even know?)

c) News will come out eventually.

Actual content ideas:

Prepare press release with focus groups (don't go out blind)-- start with those in the know, going to the clueless (see assessments above for confidence)

Press release makes the obsolete nature of the implants explicit: echo scan 24/7 -- recordable, trackable, jammable.

Bad news in the past, good news in the future (maybe use the low/high juxtaposition for rhetorical effect-- presentation, not deception-- many survivors-- emotional, etc.):

Bad News Over:

We've wrapped up a huge crime (the largest set of crimes of all time-- war-scale-- the government leaders: last to know they were hostages)

The threat is gone, we can triangulate track, record, and jam any located implants (implants now obsolete)

We will go out to "de-wire" folks, and debrief and assess medical needs, redress and restitution

Alternative (if (A) above is taking time-- an "in-the-head announcement"-- but this is risky, as many will suspect "winners and losers"-- due to many whose privacy should be kept, re: rape survivors, victim privacy rights, etc.-- the news will come out eventually.

(Later, the president, or others, may discuss and/or share survivor issues (the "life support group")).

Good News Soon:

(See my <http://psych.technology>) (maybe later-- assess preparedness, and needs to offset "bad shock" with hope (focus groups)).

Computer-brain interfacing, with a staggering number of medical devices (cure for the blind, etc.) + verified testimony (swearing out after a deposition-- exonerate or implicate, and the precision of justice is improved-- violations go down as repeat offenders are jailed the first time (+deterrent))-- and direct brain virtual reality (war-time economy stimulus with vast array of new manufactured tech and a new medium, etc.)

Demonstrations by scientists

You at least have these ideas to start and work with -- they've been developed with others.

LEGAL RESPONSE

THIS IS NOT WAR-- BUT IT'S THE BIGGEST SET OF CRIMES IN ALL WORLD HISTORY-- WAR SCALE

MILITARY WEAPONS CONTRACTORS AS TERRORISTS, IMPLANTING THE BEAURCRACY OF AQUISITION, AND POSTING HOSTAGES TO COLLECT DATA AND MANIPULATE

I'd get these two for material witnesses, they will be murder targets:

Does Gen. KUnzeker like to "tag?" (Clapper's baldness could be a tag too):

<https://www.youtube.com/watch?v=jWkMhCLkVOg>

REM-- What's the Fequency Kenneth-- I've heard many public figures (100s)-- REM was there around 1994, 1995. I'd look into tastes (iTunes, Netflix lists)-- and cross-reference with any "collection" of public figures.

New tech may help: see NSA for decoder (inner voice on speaker)-- my signals: open for legal recording. To decode: connectionism-- two data streams-- signal, and talking-- the inner voice track should parallel vocal track when speaking out loud-- words, words, and more words. Hostages are

allowed in this space if they have no choice. Others-- should listen only occasionally (understood: curious about the fate of you and your loved ones, etc.)-- don't talk if can-- NB: 1-- frequency of "button pushing"; repetition of content, negativity of content-- goading and fight-baiting: a survivor of 10,000+ rapes (tactile, anus-- sessions, not pokes, over 20 years)-- obvious: issues involving my dignity, pride, and arrogance-- trying to prove that I should be raped because of utilitarian arguments (obvious inverted libertarian lesson ethics-- BTW-- Don Levi, in class, intimated that he is communist, not libertarian-- could be anarchist related too: "autonomy"-- W. John Coletta-- another suspect, may be libertarian (with ecological causes)-- not sure about suspect Will Davie).

Appears to me that there are 100s of people, if not 1000s (from "Hollywood" to the "Buildenberg Group" demographic-- and others-- West Point and the Citadel may have been implant points)-- who are in a "rotating audience"-- some hearing me more often in their heads than others (NB: if you note "topics and vocabulary" that are relevant to my head space or this situation when folks are on the news, etc.-- they may be in this audience). Folks in small groups are brought in to talk to me (take shifts)-- they are not allowed to give me new info (demanded by the criminals: my simulated schizophrenia requires this aspect)-- but they engage me in questions that are relevant to solutions, and sometimes pass on info (and get punished for this: rapes, etc.) Most people appear isolated, but have a clue about what is going on-- do not seem so stressed-- so, probably hostages for years, or criminals.

Currently: looks to me like money is the root of this evil (potentially ITT-- alone, or as manipulated front organization (Excelis; EDO, etc.-- the implant contractor))-- potentially buying time via the White House, Pentagon, Leadership, etc. to try and implant everyone who knows about the implant, use murder and injuries to intimidate people, and, eliminate older "manipulator" hostages that present a threat (witnesses who can identify them)-- or "escaping," while handing over responsibility to front organizations (look at who is getting hurt-- e.g. Robin Williams (his phrase "habituated helplessness," only months into my getting through to US Intel (20 FEB 2013) indicates a long history). Verify with who you've seen get murdered and intimidated (Harry Reed? Bono?) NB: Your adversary obviously has Intel R&D capability -- military hot-dogs, (Some need to think: are these implants helping with your safety? Or your government missions?) What is the stereotypical motivation? Money-- the implant contractors could get an edge knowing others tech, bid ranges, etc-- maybe even manipulate sales (hence: a contractor of scale: ITT, Excelis, etc.: NB -- their geographic customer location-- are most signals in their customer range?)-- even 911 could have been manipulated (with an implanted Osama Bin Laden group (rectenna-- unlocatable at bottom of Ocean)-- look at the current situation-- what would be more difficult to pull off?-- and how evil?) The UO professors I've dealt with-- mentally ill, evil, abusive-- evil deeds are like stamp collecting to them-- may have been used in a "mafia silence threat tactic"-- probably every criminal element using every other.

1) A Press Release will end this situation most rapidly-- you enforce the law, and do not cover for treason (see above intel assement-- they were tricked and manipulated into treason, and psychological torture and rapes by a rape-cult running military contracting, as an acceptable method to buy time to sell classified information, and emit even more).

2) Arerest the criminals you can-- focus on those with "samplers" first (used to murder (dizzy falls, DUI, Suicide) and rape (tactile poking of anus, transmitting sex act to others-- other degrading, humiliating acts (a sampled decapitation has been transmitted, broken necks, a "death necklace" (maybe Robin Williams))).

3) Utilize contractors (Excelis, Harris, etc.) equipment and use it for "smart jamming" if military has not done the block jamming-- best: everyone, 2nd best, clear command space (the implant contractor, obviously not providing security for implanted folks & restricted for government use (water boarding, rendition, etc.))-- Harris, a government communications contractor, can probably jam with their current equipment. Implant contractor communications control equipment can be used to scrub signals recorded for tap use.

4) This is a war-level military issue too (property control may require military intervention (drug money or DUI cars are the only property US legal can take)). Might approach the contractor(s) (potentially with a tank parked by their offices if suspected of treason, etc.)-- and suggest they cooperate.

5) Military officers have a life-time commision. They can be called up for duty at any time (we are at war)-- I'd call up every relevent officer-- the US Air Force Space Commanders, NORAD commanders, all military in contractros that are relevant? With a problem of this scale-- you have to explain why you would see this as excessive.

SUSPECTS:

1) UO professors and students (Don Levi, Ray Hyman-- Don Levi's foster children, Adam Levi (DC lawyer), potentially: Barack Obama -- a foster child with a stolen identity, going back to the late 80s.

2) Excelis (intellectual proprety trade sceret assett user (I reverse engineered the implants, I still own the rights until May 1st, 2015-- reverse enginered trade secrets -- they were negligent (or others-- I was implanted in my sleep decades ago-- I published my prior art-- also have prior art here: make sure my lost wages before multipliers are not in the billions.

3) Look into the chain of development-- Robert Malech (his family), Dorn & Margolin (on his pattent-- sold to: EDO (1992), ITT (2007), Exellis (2011), Harris (2015)-- might look into Vectrus. Also,inthe military-- I think General Kutyna (and his research team) took the Malech radio-brain-wave demodulator, developed this to radio base-lined measured singals adjusted by neurons firing, and saw how to "amplitude slice" stacked activations, to

divide frequencies, and used one implant signal source bounced off the interior of the skull for the full brain measurement, and stimulation)-- probably hooked this up with prior "NASA grade receivers" for low-powered radio-- set up the Lowfer, Navigation signal camoflauge, frequencies, and may have been involved in what may be a self-described "bad idea + negligence": we planted seeds, they wired themselves, we had access-- in the Soviet Union. This may have been a MO in the late 70s, early 80s-- and it looks to me like "star tracking" started in the early 80s (look into when any Eugene group got this-- I think UO professors took an idea to DARPA and got a barrel of seeds" to experiment with, and Don Levi's children stole the implants, just stuck them in ears or noses, and began crimes)-- but-- if there were criminal "celebrity" implants before the UO group-- then the UO group may be somewhat of an "unwitting" front. Not sure how US Air Force developed tech went from their use, to criminal use, and no use for US government issues (waterboarding and rendition-- never needed to happen, etc.) I'm not sure who the evil folks are, and who the "willing" are-- but I'd expect cross over into the US military (current active duty)-- could be fronts, brain-washed, hostages, etc.-- but with knowledge of crimes-- look into those who had the power to go into a signal free zone, call the law and military proper, and did not do so. Why didn't they?

4) I realize this potential: Barack Obama is head of the UO criminals (seems clearly so, even if he assumed this within the last two years)... but be careful-- this could go back decades (from Obama being brain implant brain-washed since before he was elected (implanted = most likely a mark), to being Don S Levi's foster kid with a "(stolen) identity change" back in the 80s or 90s (check the two relevant mothers)). From my experience-- Don & Ray would have been giving any other element lip service to "we are at your service-- but the foster children (who have as yet to grow up) who could insert and remove implants were the exploiters of this advanced weaponry.

=====

Thinking through issues (may be some repetition-- will clean up later):

Contractor motive: Money through competitive advantage. Potentially with an internal rationale that they want to fund their causes (ecological, etc.)-- as they may feel they are part of the security service sector that helps save lives, and by getting competitive advantage (by implanting the bureaucracy of buying tech) they get more money for their goals (which, with EDO, ITT, Excelis, maybe Vectrus-- looks like ecological concerns). (To them: you don't need more initial principle for long term broad objectives, where much more can be given later, as more is pulled out of the market, rather than more up front (minimum payout, harvest a small cap value window: French & Fama, Russel 2000, no need to "park it at Exxon," etc.-- my connectionist stock predictor may do better)-- I know there are many details (Eminent domain, bio-diversity hotspot regional governmental long term stability and economic needs, "social dividends" don't compound like Wall Street (or a penny given in the time of Jesus: problems solved); the rate of extinction doesn't accelerate that fast either (1 lost a day now, 1000 lost a day 100 years from now?-- and also-- maintaining what you already have, etc.)-- I covered them 100% in over a decade of argumentation with the Don S

Levi-- see the emails to John Coletta). I'm reminded of the Westboro church, their internally consistent arguments with points of contact with the rest of the world, but they do not pan out in the full world reality (end up trying to saw down the trunk (of love) with an obviously questionable limb). Note the procurement beauracracy vs military tech conflic over radio translation-- indicates manipulation over relevant issues:

http://en.wikipedia.org/wiki/Battlefield_Airborne_Communications_Node#BACN_a_s_a_concept

Executive: dive into under WH bunker and hold yourselves hostage for DOD cover-- you: need to go to the DOJ now-- Obama (and potentially former CIA #2 Mike Morell-- see below)-- and/or others-- may be stalling (or manipulated to do this) to get past my property rights (do not: impact assessment-- 1000s dead daily despite lost wages and punitive & pain+suffering multipliers-- see above on contractor motives); or out of some statute of eliminations (2012 revised fed code, rape potentially = object & orifice)-- could be for using implants for campaign advantage (2008 campaign) or some other crime with a statute of limitations. They may know they have leaped into treason and international crimes, clinging to that "short term goal," and don't have the skill set to admit they were wrong (past malfeasance-- I'd hazard-- manipulated for further blackmail control)--I've seen frustrated investigators (100s in my neighborhoods, out of demographic), and heard many experts helping pass on info (implanted experts not trusted by implanted leaders?), and furious that they have not been consulted-- with top-secret issues-- the top needs to connect the resources.

History: I see a root down: Excelis (ITT), EDO, Dorn & Margolin, Robert G. Malech (Hamptown, NY?) family (they have the implant trade secrets (I have the intellectual property rights, via my prior art publication). Implanted politicians, did not let US Air Force tech development be used to prevent water boarding, etc.-- probably used Don Levi's basement abduction rapes, potentially since 1994 (or before, with others) as a threat to others implanted ("Hollywood," etc.)-- who were used to post on politicians (those hostages with voices similar to their marks)-- I don't think their political agenda got much (2012 patent code changed, etc.-- a "both for you and us" approach). I'd look hard at EDO-- looks like shit hit the fan when they got control of the implants, and used the in progress UO crimes as part of their arsenal.

Hearing folks trying to help, and only having a "microphone in a basement"-- seems to be my spot too-- but I'm a relay point as well for many points of view who take the stage in my voice.

Gen. Kutyna should be a material witness-- he may still be facing 24/7 feedback in his head-- and can't get to his garage to make a ham-radio-jammer.

A current lead for me: Phillip C. Widman. Path-- Excelis, Vectrus, Terex: Two white "utility vehicle" incidents outside my residence in Eugene-- 1st

with VLF and LF measuring equipment-- two vehicles (white) + folks in black (saw when taking my nephew to a doctor for chronic barfing)-- later-- a "phone pole" inspector (not from EWEB), after two days of peace from manipulated domestic strife, after asking (on my old Facebook) for a head-space clearing jam for my mom and nephew (who do not know they are implanted)-- shows up in my backyard, and I suspect he plants a "booster"-- then-- I call the police when my nephew punches me the next day. I'd think: trying to help (identify and jam (i.e.-- dosen't have the frequency #s already... probably not to control situation?))-- may be a material witness-- may have a safe space, but protect him please. Not with Excelis now-- but worked there before-- this may be an indirect angle; as Excelis has not verified my report:

Vectrus had confirmed a "thorough investigation" had been initiated on behalf of my report to them on Monday, 02 FEB 2015 - and concluded by 05 FEB 2015:

"concerns are not appropriate for ECRB investigation and/or action"

Potential bad-culture psychology and institutionally motivated distortion of reality-- DOD contractor conflict of interest ("military industrial complex"), some CIA employees hyping secrecy value-- note implanted, and valuing their department morale over the morale of abduction victims who have been raped 1000s of times. Former CIA #2, Mike Morell: another potential material witness, and potentially manipulated by Excelis, etc. private sector interests (any connection with Excelis?)-- off the map CIA... potentially using CIA trained "weaponry" (skill set) to gain control of the executive? Note these diversion delay tactics: how many intel "resigned": FBI, NSA, etc. to make delays (see below-- statute of limitations)-- new AG,

Defense Secretary-- will need time to "get up to speed"-- delays after delays)-- & also-- when I went to the local FBI office on 7 January 2014 (to report Don S Levi as being arrested, etc.)-- the FBI agent behind the glass raised a black cell phone diagonally-- with a corner to his left ear, the black back face perpendicular to his head (out Mickey Mouse ear-like-- note: "Mike M" (also microphone))-- also an Italian gesture for "stupid" (and the opposite: intelligence" (mob connections?))-- These FBI, etc. signs have been consistently polysemic (almost all interpretations pan out in some direction: c.p. the CIA and "pseudonyms")-- like "Disney Land" = dizzy falls implied by the Mickey Mouse ears-- the camera lens was pointed at me-- my first confirmation that I got through to US legal & intel was a "conspicuously inconspicuous" agent "filming" me with his cell phone at a Fred Meyer Starbucks (when I looked over at him, instead of lowering the camera-- he asked me questions in a loud voice-- ~March/April 2013)-- and also-- this was in the temporal context of me discussing connectionism decoding of the signal with the NSA via my emails (Helen Keller style-- as I have not had direct notification, but plenty (100s) of agents with some obvious signs-- and have heard plenty of identifiable government leader voices (hostages too)). Could be that Morell and president Obama think they are smarter than history and the constitution-- but they have no legitimating discourse (not the law, not utilitarianism, human rights, etc.) that justifies what has gone on here (difficult to understand how one could be raped to accept rape-- and not see that this is so serious that you'd hold yourself hostage in the situation room, for mobile cover); the president's closest CIA, etc. advisors could be seen as some president's secret police agency gone mad, when the CIA should be like the government's journalists (undercover reporters, subversive pr, etc.)-- the eyes, ears, and analysis that doesn't rely on the New York Times. Morell and Obama-- know how to sound smarter than they are (cp former NSA selected #1-- sounding less smart than he is, creating question marks)-- even tempered-- they ask questions to find the answers and sound like they already knew them-- they ARE smart-- and that is what they can use to bully people: authority, and skilled lawyer debating-- but they are not smarter than a constitution that includes the intelligence of millions of discussions and debates over how to adjudicate competing values (like life, liberty, and the pursuit of happiness) over 1000s of years (back to the 10 commandments, etc.). With their actions in direct contradiction to their cool intelligent and well meaning appearances... Is Obama a puppet of Morell? (Literally?-- would explain any demands to keep his signal live, or at least usable). Maybe both have been severely manipulated. Think former CIA head George H W Bush and "The Great Communicator"-- although this looks like some informal "CIA" take over of the presidency using the mind-radio technology, with Morell involved, just an advisor, or an under duress manipulator.... any secrets disclosed to an ear-piece advisor with #2 CIA clearance-- the president's fault. How much of the agency would be on board with this, and wipe their ass with the US Constitution and flip the bird at democracy. too? There may be some psychopath calling card "pun" here though-- Morell is a very "white" guy (looks a bit like "John Boy" from the Waltons-- very moral-- some sort of art-contrast with Obama). Again Morell may be a material witness-- It is understood that the CIA is not monolithic in opinion, but some folks let water boarding slide, w/o wanting to expose non-use of implant tech; and some were not implanted, and may have wanted

these current delays to collect more info that will be obsolete within a year (the terrain always changes: know facts change-- new tech is developed).

Again: delays-- top leadership replaced, one by one-- staffs have to get up to speed again and again. Top secret aspect of situation being used to avoid getting expert solutions (connecting investigators and problems with those who could help-- recall the 911 assessments that noted that intel agencies needed to inter-communicate more)... with the (stereo)typical exaggerations of Pentagon (which presidents already have a feel for (again, the "Military Industrial Complex" - Eisenhower), and must weigh against other governmental responsibilities: justice, etc.-- departmental and "issue" competition for "attention") may have been exploited. Could be the staff was kept in the confusion zone too-- again, causing delays.

SEE MY DAILY UPLOADED EMAILS BELOW FOR INVESTIGATION DETAILS

(b)(6) "situation folder"-- please respect my friends' privacy-- common sense, etc.)-- updated daily

Too much psychology, immaturity, and bad culture came to a head here-- people can only be manipulated to do what is in their predisposition range-- even a "heat of the moment transgression" should lead to guilty self-censoring, in trying not to do that again. Action can be diverted for awhile-- but look what I've done-- other hostages are different than the leadership-- they have NO options that look real. The governmental leadership have options to go into signal free zones, and demand coverage 24/7, which could be easily provided by the military (not an option for some criminal leadership)

Don't be intimidated-- they just used this weapons advantage-- we all respect me more than any criminal element in charge... (the "juvenile delinquents" see or will see: from intellectual martial arts expertise (mental: logic, poetry, philosophy, spirituality, etc.) to owning the intellectual property rights for this implant (material: law and science), (b)(6) with his "microphone from an abduction basement" (JD has two decades+ of "24/7 engagement air-time" and has, in a public mind-open space, while being psychologically tortured every waking hour (and some in sleep)), has kicked these organizations' asses sooo hard-- they, as individuals, will suffer stomach sickening shame (having failed by their own standards and values (now self-consciously)), in their own brains and bodies until they die, without the aid of diversions and delusions, or becoming someone different-- recognize that they fear JD, see him as a threat to their evil, etc.-- common sense-- join the confidence of a history going back before human knowledge and through it too), ...our hearts should easily be aligned.

IF YOU WANT TO FEEL JUSTIFIED : FALL IN LINE WITH THE LAW

WHO IS "SPINNING DOWN THIS SITUATION?": THEY ARE LEADERS FACING ACCOUNTABILITY: IT NEEDS TO BE RIGHT, NOT YOU

WHO IS "PRESENTING QUESTION MARKS, AND COMPLICATING THE OBVIOUS DURING A FIRE?": AT THIS POINT, THEY ARE CRIMINALS BUYING TIME TO SELL MORE CLASSIFIED INFORMATION, AND EMIT MORE AS WELL

USE COMMON SENSE-- HOW MUCH CLASSIFIED INFO WAS LOST BUYING TIME TO "FIGURE THINGS OUT?" FIRES ARE NOT PUT OUT WITH DEBATES AND SPECULATION-- THIS IS WHY THE MILITARY DOES NOT HAVE AN DEBATE COMMAND STRUCTURE FOR EMERGENCY RESPONDER ISSUES-- REFLEX WOULD HAVE DONE BETTER YEARS AGO (LEGAL SOP)-- TRUST HISTORY MORE, TRUST THE MAJORITY OF PEOPLE MORE, ETC.

NB: Record all signals 24/7 -- respect privacy-- but keep records -- some may need to know: how was I manipulated? Realize-- there will be multiple global groups (legitimate and non-legitimate already doing this too).

Major blow-up with my nephew after Super Bowl, he held back suicide and punching me (implanted, does not know it-- again: please jam his signal-- multipole suicide attempts already):
When the SeaHawks lost, and I presented my 100% proof that going for more charity \$ will not help-- the impact assessment is about time: I'd look at Washington and foundation promoter suspects.
(Discover they are a mass murderer of people and species, treasonous... and the Patriots win).

On executive culpability, NB-- manipulating a crime and using blackmail as a further manipulation tool is a tactic used by the rape-cult-- they also manipulate drug addictions compounded by gambling addictions (you don't always win = more addicted)-- they use science. See Biderman's Chart of Coersion (helps detangle from brain-washing tactics used-- exit counseling):

<http://www.nwrain.net/~refocus/coerchrt.html>

Informal local radio defence: --make a power-adjustable broadband noise generator (at least 10KHz to 190KHz) or ask ham radio friends (antenna design variables are complex) to make "jammers" (10KHz to 20KHz (ship navigation-- do not worry-- your jammer will not signal far) + 160KHz-190KHz (Lower zone-- used by hobbists).

I think the president (or "Jude") told me that his outbound was measured at 162KHz-- I would not assume all frequencies are within the same ranges (translation issues)-- "remote listeners"-- if up the range-- would have more intense sensations (& motor)-- but why would they be implanted?-- they could get cover in a tunnel most likely (not VLF)--and... where would the "camouflage cover signal" (like Russian NAVAID) be?-- the inbound would still be LOUD if a rectenna powered implant is used.

Due to the NAVAID camouflage cover being higher than 10.125KHz, and many loud signals being in the air, and the "divide by 2" helping keep peak to

peak divisions clearer (for a louder signal)-- could be some are not in the "typical" range I'd expect (more like 190KHz and 11.875KHz):

<http://www.vlf.it/alphatrand/alpha.htm>

Was the White House Radar jamming only the 190KHz and 11.875KHz ranges?-- the staff, free and clear-- others-- not? Has DOD and Pentagon notification been verified robustly? This is huge-- they would not blow this off.

These might be on separate bands-- spread out? Identify their out-bounds, and do consecutive divide by 2 until you hit the relevant range-- or just "slide-whistle" through the entire radio spectrum with a signal you can identify while listening on the outbound for the quiet outbound signal (slide-whistle to identify an implant's paired in/out frequencies). Multiply the Lower x2 up the range if looking for "remote listener" frequencies. These folks-- a priority for jamming the inbound. Do this now, and listen (top secret security) if they are hostages.

(That WH drone incident-- off the Radar map-- due to being used for jamming already?)

1) Retake the command (VLF and LF barrage wideband jammers taken to the Pentagon and White House to clear leadership head space).

2) Portable jammers tuned to a specific person's frequencies (in and out)-- can taken on commercial planes (need to pass security-- in laptops?)

3) ITT / Excelis equipment (speculative contractor) can be used for "smart jamming" the inbound, once the criminal element is removed-- can scrub signals for "phone-tap" use too.

4) Levi-cult can be replaced by a "haunted house" radio show put on by military to buy time when Levi-cult are jammed, lose samplers, and are arrested-- at least stop rape and murder potential with "samplers."

An aid in seeing the brain-washed assessments, options, and choices:

Why provide cover for criminals to sell classified information while blocking good people from going to the FBI?

My computer-brain development-- just more classified info at this point-- the above relates to that too.

And again: the implants are already obsolete in the US (as soon as leadership gets their heads out of their asses (or the rape-cults' asses)) and are obsolete globally with any press release (easy: identify, record, track, jam if desired).

CIVILIAN OPTIONS

The proper authority to contact would probably be the DOJ-- but I'd make as many attempts in as many directions as possible.

Self Defence-- there are strong radio signals coming in, week ones coming out-- an "aluminium foil faraday cage" should block -- outbound, but they can simulate your own thinking for awhile, with the inbound, to make you think it failed. Boxes with many layers of aluminum foil-- all seems sealed, no holes, or openings-- also, see:

http://en.wikipedia.org/wiki/Booster_bag

http://en.wikipedia.org/wiki/Faraday_cage

Information can really help-- even a proper diagnosis of the rape-cult (malignant narcissism, sadistic OCD molesting, drug abuse (meth-- long sadistic high, and masochistic crash)). I'd read this entire website.

You can send me an anonymous email (b)(6) -- I'd make up a phone address-- don't identify yourself, identify the situation -- the FBI will probably intercept this.

Post situation, I should be findable via the internet-- and accessible (I'm a marginal artist, interested in marginal art-forms and genres-- my "audience market share" will always be small)-- so go ahead and email me if you'd like-- anonymous or not. I intend to maintain my identity as a recovering schizophrenic artist-- but, as I have invented computer-brain interfacing, there may be other aspects to my life and personal security.

Those with some electronic expertise: Broadband RF Noise Generator (estimated: inbound - 10KHz-19KHz (rectenna powered by Russian NAVAIID band-- "loud" inbound cover); outbound - 160KHz-190KHz ("Lowfer" experimental radio-- sparse competition for weak outbound signal). Might go 10KHz-190KHz, with power adjust for dome of cover.

Abuse coping tactics:

Panic attack coping tactics:

The brain-rape cult might use rapidly oscillating diaphragm muscle spasms if

folks use the information provided on this website. This may seem like having a heart-attack, but is more like having a panic attack. This has been used on (b)(6) a few times, and is not lethal. The perpetrators have to tap buttons rapidly to trigger each spasm sample, so it shouldn't last long. Some coping tactics:

- 1) Try to relax and control your breathing (esp. if hyperventilating)
- 2) Try to breathe from the belly (not the chest)
- 3) Breathe using 5-2-5 timing (five seconds to breathe in; hold for two seconds; breathe out for for 5 seconds)
- 4) Do not breathe into a paper bag... CO2 may be as much an issue as Oxygen
- 5) Take an aspirin to avert any heart attack potential

Recognize brain-washing methods:
<http://www.nwrain.net/~refocus/coerchrt.html>
(Detailed discussion of Biderman's Chart of Coercion)

Isolation:
Deprives victim of all social support (for the) ability to resist. Allows victim to be present at all times to keep home environment stable and non-threatening. Makes victim dependent upon abuser.

Control or Distortion or Perceptions:
Fixes attention upon immediate predicament; fosters introspection.
Eliminates information that is not in agreement with the abuser's message.
Punishes actions or responses that demonstrate independence or resistance.
Abuser manipulates by being charming, seductive, etc. to get what is wanted from victim and becomes hostile when demands are not met.

Humiliation or Degradation:
Weakens mental and physical ability to resist. Heightens feelings of incompetence. Induces mental and physical exhaustion.

Threats:
Creates anxiety and despair. Outlines abuser's expectations and consequences for noncompliance.

Demonstrating Omnipotence or Superiority of Power:
Demonstrates to victim that resistance is futile.

Enforcing Trivial Demands:
Demands are often trivial, contradictory and non-achievable. Reinforces who has power and control.

Exhaustion:
The abuser uses sleep deprivation to keep victim in a state of confusion.

Occasional Indulgences:

Provides positive motivation for conforming to abuser's demands. Victim works to "earn" these indulgences in an effort to increase self-esteem.

Brain energy-wave communication idea:

When measuring the brain energy-"wave" ("pop-corn" actually) spectrum up beyond normal brainwave frequencies, into and beyond the auditory (using an oscilloscope or AM receiver, potentially with a AM transmitter base-line signal from the other ear canal (or, use the inbound signal as a base-line; as reflected via the interior of the skull); or an other sensing method: the inner monologue can be isolated from outer sounds--auditory, tactile, limited motor control, and suggestive visuals can be transferred head-to-head by blasting the signal into another person's brain energy-wave field-- could be just an AM transceiver which amplifies: inbound and outbound measurements-- two channels for each person-- probably very close frequencies, so "sample rate" translations would not be an issue.

US Air Force Space Command (see above re-assessment-- looks like intel contractors using for competitive advantage, and using mafia-style threats-- torture victims to hush hostages used as "eyes and manipulators"-- potentially for charity money).

Potentially, Robert Malech, or his company Dorn & Morgolin, brought this tech to the US government in the early 70s (he has a public patent on a remote radio brain-wave demodulator-- this tech would be up to the ears (and into the skull))-- at a time when one of the originators of the US Air Force Space Command was a R&D planner in Washington DC (Donald J Kutyna)-- it looks like he may have educated himself in electronics after reviewing that tech, worked in the sensor and communication control tech for NORAD-- and then helped start the US Air Force Space Command (NASA grade receivers helping with detecting the low-level rectenna powered signals)-- potentially, a "we plant seeds, they wire themselves, and we have access" strategy was developed-- although it is hard to believe this would be official US use (think rendition, waterboarding, etc. used in the 2000s)-- and, of course, this would require more than one officer to implement.

There may have been seeds planted in the Soviet Union-- and, potentially, a scientist who thought he developed this, was imprisoned by the KGB, and broken out by a gang leader friend-- they may have taken "intellectual property trophies" throughout Europe in the early 80s-- a rejection of the Communist restrictions on the credit and money he thought he deserved (going quite a bit further than Ayn Rand concerns-- and, with the gang leader-- potentially going into "neo-Nazi" survival of the fittest politics (with "Romantic" extremism, and drug use being a factor-- indicated by potential "intellectual property targets": post-punk and neo-romantic music acts, like

PIL ("Rise"), The Cure ("Bananafishbones," & "Lullaby"-- esp. the video; and Wire ("Eardrum Buzz")-- the artists referencing this in their work.

A sleeping person could be sedated, implanted, and never know this, as the transceiver can be implanted with out leaving scar-tissue-- once implanted, the interior monologue can be listened to remotely, and thoughts can be guided to reveal secrets (although folks would be less likely to actually act on suggested thoughts, unless they were part of their prior habits and life trajectories)-- for example-- Edward Snowden could have been wired by Russian intelligence (who may have suspected this technology would be off US intelligence's map for only so much longer)-- In such a case, Mr. Snowden most likely thought he was just gathering data for the privacy invasion whistle-blowing his libertarian ethics demanded-- but "somehow" ended up in Russia with ~100 times more data than that needed to blow the whistle on the "PRISM" phone record collection program.

The evidential probability of the KGB involvement with this device was enhanced when (b)(6) sent US intelligence folks a link to this website in 2013 (b)(6) -- the website was not listed on search engines at that time, so only folks who could hear the signals from JD's or other wired folks' brains, or who could intercept US intelligence emails, would have known to look at the website. The website usually gets zero traffic-- but on Don Levi's birthday (May 20th, 2013-- UO logician Don Levi was the prominent abuser in this situation)-- there were dozens, of hits, with a concentration in Moscow, Russia (web traffic logs are in the data .zip linked to in the left column). Also look globally: when and where were LF and VLF receivers (NASA grade) and transceivers (LOUD) constructed?
University of Oregon independent development of tech

University of Oregon psychology professors (and possibly students) may have "reverse-engineered" the idea in the movie "Brainstorm" in reference to Synapse Software's head-band computer controller. Psychology professor Ray Hyman, may have taken this idea or prototype to his DARPA contacts, who may have already been wired by US government representatives; the US, the neo-Nazi group, or actual KGB agents (or others) may have then posed as US government representatives and wired Ray and his colleagues. They may have been "urged" to commit crimes, so as not to feel like they could approach US authorities... and Ray may have disabled his device ("squashed the bug")-- and shared this mind-reading tech with his friend, UO logician, Don Levi.
Crimes committed by Don Levi's rape-cult:

Don Levi, potentially suffering from a deficient Amygdala, and being a typical family abusive narcissist, may have used his foster children to steal the control equipment from Ray and his colleagues, to use for his fantasy crimes-- developing a "brain-rape-cult" with hostages held both in his home and with the wire.

The crimes began by violating a small group of colleagues and students that Don Levi wanted to rip-off and rape. Similar to the "Stanford Prison Experiment"-- Don brain-raped folks into drug addictions for further control, and forced them into sadistic policing and activity for years. After wiring his colleague, Cheyney Ryan (actor Robert Ryan's son, and a

fellow UO philosophy professor), he operated a "Kevin Bacon game" (six-degrees of separation), with a perfected method of wiring the most prominent public figures in the world (wired by deception, and then: "too late"-- folks could not get out, and Don had access to all their contacts).

These wired public figures, some who may have actually paid for this, were always "targets" and "trophy victims" for the brain-rape cult-- set up to be brain-raped and ripped off: vicarious "lifestyles of the rich & famous." Some of these public figures found out that their "switchboards" for calling into friends' heads, were not "lock-protected" relays, and that their own head-spaces could be violated by the perpetrators at any time.

Potentially: another set of "victims" were those who were wired and then "tempted"-- tempted to use "operator switchboards" that could tune into the wired and targeted folks whose "brain phone number" they had, and could secretly listen in on. Some were offered cocaine-- freely at first, and then later offered for "vicarious crime gambling," where the dice would be rolled as they were required to risk hurting someone (e.g. via a "dizzy fall") for more cocaine-- thus compounding both drug and gambling addictions.

Beginning around 1990, a 24/7 violation of a core set of victims where, eventually, Don Levi, alone and in tandem with others and in shifts, violated (b)(6) along with his friends --some of the public figures were brought in as members of an "audience" to hear the core victims being violated-- to both intimidate them (keep them in line) and for the brain-rape cult to "brag" about their crimes-- round-the-clock abuse of the core victims exploiting every potential use of the wire as torture weapon.

In 2013, (b)(6) got through to official US government investigators, and in 2014 to 1000+ spies with a starting point to help. Due to world leadership being saturated with folks who "wire themselves"-- it looks as if the private KGB element began to try to hold it's ground using all the wired folks.

Again, the transceiver has limited tactile and motor control transmission capabilities-- if pin-pointed, the diaphragm can be made to spasm (as fast as a sewing machine, which requires attentive controlling of one's breathing on the part of the victims); vomiting can be induced by targeting the region beneath the diaphragm; also the sensation of rectal thermometers and metal wires being inserted in the rectum, feedback (slap-back delay amplification), and "white-noise" + "high-pitched ringing" headaches can be induced-- the device can not be used to kill immediately (due to the diffusion of the signal when trying to affect larger areas of the central nervous system)-- but folks have been killed indirectly via near-fainting while driving, and "dizzy falls" in precarious locations (also-- folks can be urged to do life-risking activities, after being urged to drink too much, or to OD on drugs-- potentially: unwitting "drunk-driver assassins").

(b)(6) approach to ending these crimes:

(b)(6) was wired with the device shown in the CT scan above in the summer of 1993 (he awoke to being sedated)-- this was most likely a replacement of (or a deception play for others, or a check on) a prior device implanted at

least going back to ~1990 (prior to the break-up of the Soviet Union--a "truth-out" may have loosened KGB discipline crack-downs, and accelerated the dissolution of the USSR-- not sure, there seems to be many parties involved)-- JD began to suspect his privacy was under surveillance due to his private information being "echoed" back to him by a few UO professors with "double-meaning" communication (as with innuendo and double entendres)-- setting up JD with paranoid "schizophrenic symptoms," as to discredit any approach by him to legal authorities.

In the summer of 1994, when on the verge of suicide, JD began to be psychologically tortured extensively-- while other fellow victims heard over the transceiver signal were threatened and punished if they even thought of trying to escape the abuse of the brain-rape cult-- JD was violated and abused regardless every waking hour. This led to disability and a schizophrenia diagnosis, and 17+ years taking the maximum recommended doses of anti-psychotic medications (Risperdal, Zyprexa, and Abilify)-- tactile rapes, abuses, and molestations-- leading to convulsive fits and self-beatings, were elevated if JD tried to stop taking these medications.

JD, along with the other core victims wired in "tandem," are quite motivated to escape this torture, but have failed to get past the "figurative front desk" at the FBI-- JD requested and received a CT scan of his head in 2005-- this evidence (sent to US legal representatives at the time) failed too, as US legal and intelligence authorities either (1) did not recognize this technology, or (2) were not willing to help out victims of the crimes for their own perceived strategic advantage. Providing the reverse-engineered "key to the CT scan" above, by figuring out the technology required (the transmitting signal remains active even in tunnels) took years of research, research which was often diverted by incessant torture and harassment from the rape cult.

The solution is obvious: get US legal authorities (many who may be wired and manipulated remotely-- better yet, international legal authorities) to: use NASA grade receivers to hear the global LF signals; use NSA grade signal signature recognition systems to identify the relevant signals; and use NAVY maritime radio frequency transmitters to "jam all relevant signals (or ranges) with the most powerful dead-air;" "silence the violence" by over-powering the other signals; de-wire all the victims (disable implants-- e.g. go through the Eustachian tube and use a "pointy pincer" to "squash the bug") and legally pursue the brain-rape cult members as "hostage" abductors-- a scan, triangulate, record, and smart jam system using existing antenna and satellite equipment for pop-ups could keep the coast clear until further measures could be made. (also, the remote device, developed by Malech-- already could be used by private parties-- paired with connectionist decoding-- folks could be heard on speakers-- this could be detected too; consider, two signals on the same frequency, miles apart-- how accurate can triangulation get; or-- can the NSA unbury the signal passed through a head, that would be loud enough for a receiver to de-modulate?-- auto scanning with questionable signals would auto-knock-up to more auto-analysis (recorded, and with more intensive decoding)-- any "brain info signal signature" detected (or an un-decodable signal) would lead to human analysis of the recordings. In-bound frequencies can be found by

holding open the outbound found (and listening), and simply "scan"-transmitting quiet "camouflaged" natural radio sounds through all relevant radio frequencies, that would be auto-detected when the frequency transmitted on provided an echo through the frequency listened to).

This could require robust contact from other wired folks-- short of global jamming, local ham-radio jammers can be made-- tunable transmitters with a silent signal (I'd focus on LF and VLF first)--there could be many folks wired and manipulated throughout governments and the private sector, providing obstacles to disclosure (non-disclosure of any tech relevant to the mind-reading tech would be priority #1 for the private-criminal groups); there are interceptions of all of JD's communications by 3rd, 4th, etc. parties. However, a significant demographic change occurred between April 2013 and April 2014-- a swell of "sharp, fit, professionals, age 50-60) swelled in and out of JD's neighborhood (composed mostly of old retirees, and young poor families)-- and two white utility vehicles with extensive radio equipment and a half dozen people dressed in black were seen outside JD's house, when his Dad died from a "dizzy fall," after JD related that the cult was trying to kill his family (his mom and nephew-- both having had hospital stays, from attempts to kill them too). The CIA's recent focus on pseudonyms indicates an increased awareness of agent abduction value (mind-reading would get more info from abductions)-- the investigators have not tried to be inconspicuous-- quite the contrary.

Those "bolting for the exit": have "read-out-loud" reading material available; work on written statements (you can be de-railed), and be prepared to "meditate" or "take a swim"-- they may hit folks with diaphragm spasms, that require manual breathing, as to get a good CO2/O balance (panic attacks, etc.)-- and they may throw people in front of an "audience" to humiliate: read out loud at that point: even the phone book. It is expected that hostages that could end this sooner (government leadership, press, celebrities in groups, etc.)-- would do this first, as it could take much longer for other folks to get attention-- I'd hope for a domino effect, once one group got some media attention ("I'm as mad as hell, and I'm not going to take this anymore"-- or, a group "press release" etc. (some may like to try the DOJ first (see my contact list at the left)-- but most would already be skeptical of that approach).

The brain-rape cult consists of malignant narcissists:

- #1: Keep it light (ridicule them)
 - #2: Don't argue with someone who can only change YOUR mind
 - #3: Ask THEM questions-- personal (sexual)
 - #4: If "thrown in the zone" -- read out loud or recite a speech
 - #5: Humming, gum chewing, an ear-plug in one ear-- these can help
 - #6: "Sorting" items, or surfing the internet-- hand-mind-eye coordination activities-- harder to derail (write out thoughts)
 - #7: "Wait it out" when the abuse gets severe-- mediation/swimming/controlled breathing may be necessary: slower than you think
- List of 20 Traits of Malignant Narcissism at womensaid.org.uk
(This list will help identify the personality dysfunctions and tactics used by the brain-rape cult)

Don Levi already had narcissistic personality disorder prior to the the listening device used for "mind reading" was stolen, abusing his family with the incessant "look at me" behavior associated with that personality disorder. He and the other principle brain-rape cult leaders, some of their family members (Don Levi had many foster children) and protégés (2nd and 3rd generation brain-rape cult members, groomed to perpetuate these crimes) developed severe malignant narcissistic traits. They are addicted to attention-- not just any attention, but "loud" attention. I'm not sure if this group was used by the private-KGB group for decades as a "mafia-style" warning for others to keep silent.

Narcissism appears to develop from having dysfunctional emotional responses (either via a birth defect, childhood trauma, or when endorphins are depleted through excessive use of cocaine-- note the cocaine addiction techniques mentioned above). Without normal emotional experiences, and looking for a "quick-fix"-- narcissists, who seem to have "emotional ear-muffs" on ("everyone says I'm yelling... they all seem to be whispering")-- emotion is found by basically "strangling" their victims (emotion often being inter-personal)-- trying to induce terror or rage in their victims in order to amplify the attention they are getting to finally "feel emotionally alive." Narcissism may be the "extroverted" way of getting through emotional deadness, and is typically a problem for unfortunate "target-trophy-wives" or for families with an abusive parent-- a "secret" usually not exposed in public-- psychopaths may be the emotionally dead who are "introverted," and who "explode" and "go postal" after many years without proper emotional experience.

The two tactics used by the brain-rape cult are simple (they seek diversions from escape, and psychological turmoil ("rape and get away with it"))

Emotional goading through lies--

There are three basic types of lying used:

- 1) False ethical accusations (or false praise)-- a lie in the head that is personal, and meant to elicit a fight response and elevate emotional attention.
- 2) Denials of their crimes (or exaggerations of the crimes)-- again, the lie is personal and meant to start a fight.
- 3) Orchestrating conflict-- various victims are pitted against each other as their mental spaces are forced into each other-- conflicting values are exaggerated to induce fights, and "soap-opera" scenarios are facilitated by the brain-rape cult.

Tactile violations, molestations, and rapes--

Basically, the tactile and motor violations mentioned above (anal violations, severe headaches, diaphragm spasms, etc.)-- again, elevated attention through inducing terror and rage.

A few other tactics are used (like probing personal secrets, or recounting their "criminal exploits"-- often making mountains out of molehills, and molehills out of mountains, to distort reality and start fights)-- these tactics usually revolve around diverting folks from action (all the victims' fears and doubts being available for use by the cult members)-- with some folks not realizing that, while they have a figurative "knife in their head," the brain-rape cult members are basically just on "push-to-talk" phones, pressing emotional-goading buttons and trying to get their narcissistic attention fixes.
