MEMORANDUM FOR SECRETARY RUMSFELD

FROM:

Chris Williams

SUBJECT:

Up-coming Missile Defense Activities and Operations

Sir, according to news reports, the Department plans to begin putting missile defense interceptor missiles in launch silos as early as June and have a rudimentary missile defense system in operation by October. First and foremost, this is truly a remarkable accomplishment - one in which you, the President, LTG Kadish, and many others can and should take enormous pride. It was barely three years ago that we were discussing how to restructure the BMD program. From decision to limited operational capability in three years! Now that is acquisition reform in carnest!

As we move into this "season of operations", steps should be taken now to develop an overarching programmatic and political "gameplan" regarding BMD activities and operations. What do I mean by this?

- There should be a single "master schedule of events" produced and updated weekly that lays out important activities, responsible parties, and points of contact. That document should be prepared by OSD Policy (together with MDA) and shared with key DOD officials and with Condi at the NSC and, when appropriate, Andy Card and Karl Rove, and should include not only major programmatic activities but also Congressional hearing dates, major speeches planned, etc. It will be a useful tool for you to hold people accountable for delivering this capability on the schedule directed by the President.
- There needs to be a standard taxonomy adopted by all involved (DOD, State, NSC, industry, Hill supporters, etc) to describe what capabilities are being made operational, how effectively they might reasonably be expected to perform against certain threats, the national security value they provide, how they fit into the longer-term BMD and broader strategic capabilities architecture, etc. For example, at what point will you (or the President) assert that the nation possesses a limited capability to shoot down hostile missiles? Will that capability be available 24/7? Do we believe such a limited capability will help deter aggression? Who will have release authority and who will command-andcontrol the defensive interceptors? etc. We need factually accurate and appropriately scrubbed answers to these and other important questions well in advance of any operational deployments. And we need them soon, since testimony on the FY2005 Defense budget has already begun and since June is just a few short months away
- Consideration should be given now to when and how to "roll out" the fact that America is no longer defenseless against in-coming ballistic missiles. Does the President wish to announce this during his nomination acceptance speech at the convention in New York? In a ceremony up in Alaska? Or does the White

- House wish to "low-key" such an event? This will no doubt be a big event for many in the President's political base, including many battle-scarred missile defense proponents on the Hill; should a high-profile event be considered?
- There will also need to be a clear strategy for dealing with our friends, allies, and adversaries. How we talk about this capability will in part help determine how other nations respond to the announcement.

In sum, we are rapidly approaching a major milestone in defense policy and operations. We need to develop a forward-looking strategy and plan for this important set of events. I would be pleased to assist you and your staff in any aspect of this undertaking you deem appropriate.

Best regards.

- Dan Compert asked that you get this - basic principles for the Hinistry of Defende

- he believes this is a start point these principles will evalve.

- these principles will be in the CPA order establishing the Ivagi Hod

- Comput intends to get the Govering Council to endorse.

MOD's mission achieved by upholding accepted values:

- Civilian Control: The Iraqi Armed Forces and all people working in the MOD shall be responsible to civilian authority.
- Professionalism: The culture and character of the Ministry will reflect professionalism, technical
 competence, non-interference in political affairs, merit, national allegiance, respect for individual
 rights, and the rule of law. The MOD shall understand and show respect for Iraqi civil society.
- Unity: The MOD will play its full part in reinforcing national unity, and will neither institutionalize
 nor be used to foster disunity.
- Representative: While based on merit, the MOD shall be broadly representative of the Iraqi society. No part of the MOD should be dominated by any one group.
- Integrity: There will be zero tolerance of corruption. Rules and regulations will be established to eliminate waste, fraud, and abuse, and avoid all employee conflicts of interest.
- Stewardship: The MOD shall earn the respect and confidence of the Iraqi people by accounting
 for resources, being effective, acting in the country's interest, abiding by laws, and telling the truth.
- Transparency: The Iraqi people, or their elected representatives, have the right to know about MOD's policies, organizations, financial matters, and conduct of operations. The MOD shall also be transparent in its international affairs, including active participation in international security institutions and the development of cooperative security relations.
- Affordability: The MOD must ensure that the scale, capabilities, and costs of defense efforts are
 in line with the real needs of the country and must be built and maintained within the means of the
 lraqi budget.

Statul 7

FROM:

Paul Wolfowitz

SUBJECT: Bremer's Situational Awareness

Don.

Thanks for pushing back on Jerry this morning about his repeated insinuations that your "staff had misinformed you."

We do need to get as much ground truth as possible concerning facts. That was precisely the purpose of sending out the Eikenberry team. They probably know more now about the security situation than any of us, including Sanchez and Bremer. (One of their observations is that Bremer's main contact with the division commanders comes when they visit Baghdad. Apparently (I have no personal knowledge on this point), Jerry rarely visits them in the field.)

Jerry seems to be confusing the issue of who does the training in Jordan with the issue of who's been training and managing the police who are in the field already. As you said, virtually all of the training that's been done up north has been done by the military and the equippipg has been done using CERP funds. There was a slow-down in the fall because the CERP funds did dry up.

As for Baghdad, there is more CPA involvement there, mainly thanks to Bernie Kemck's successor, Steve Casteel, his Deputy, a British policeman named Doug Brand, and Jim Steele, Bremer's advisor. They have very few people working for them and even in Baghdad most of the workis still being done by U.S. military police, many of them reservists. For example, when I visited a police station in Baghdad on Sunday, there were 8 or 9 U.S. Army MPs and Civil Affairs personnel working there and no one from CPA. In Mosul, we visited a police station that Dave Petraeus has stood up. It is much better equipped and professional-looking than the still very primitive situation we encountered in Baghdad.

The bottom line for me is that the training, equipping and organizing of the police has to be done by people who put great energy into the job. It's fine if the State Department sets the training standards and provides policy guidance to the trainers, as long as that doesn't lead to still further delays. Once the police are trained and equipped, they can come under the control of the Ministry of Interior that therefore we can wait for the Ministry of Interior, if that's the decision.

Jerry says there is a program, it is underway and "it's working, but more slowly than we'd like." But timing on this is everything. As you know, delays jeopardize success and they put American lives at risk.

SUBJECT:

9/11 Testimony

Here is the testimony. I have been over it, It needs a lot of work.

I have these thoughts:

- 1. I would get Marc Thiessen involved immediately.
- 2. I think we need a section for each of the four main questions that we have been asked. The answers can have some commentary, but basically they should be bullet points.
 - What we did January 20,2001 to September 11,2001.
 - What we did on 9/11.
 - What we have done 9/11 to 3/04.
 - Our recommendations.
- 3. I think more bullet points throughout would be good. It is more powerful and it shows a list, rather than having each thought buried.
- 4. We ought to think about having attachments for example, my 1984 speech, the Guidelines for Going to War, and anything else that we can think of —so it gives them some stuff to chew on.

It is a good start. Thanks.

21st century threats, actions taken on the day of 911 and in its immediate aftermath,

STAFF DRAFT

STAFF DRAFT

and to offer some thoughts on the issues you might as you consider how the nation might improve its capability to anticipate and disrupt or defeat 21st century threats.

An Era of Surprise; Intelligence's Role

Many of you have heard me say in the past that we live in an era of surprise.

I recently reviewed the transcripts of my confirmation testimony, and I thought it United School Grant Grant Serge On Al Capitation was notable that nobody asked a single question about Al Qaeda. The previously reviewed Vice President Cheney's confirmation testimony, as Secretary of Alad Had Defense, and nobody mentioned Kuwait. or A plant Is work by Trag.

During my confirmation hearings, I was asked what concerned me most, and

what might less me and at night.

I answered immediately and unequivocally that it was intelligence. To be clear,

my concerns about intelligence were not related to the dedication and professionalism of the men and women of the intelligence community. Rather, it was born of my conviction that intelligence—its collection, analysis, and translation into appropriate action—is exceedingly difficult in an era of surprise.—

In This 2Ur Century.

This era is a challenge for intelligence due to the dynamism and complexity of the world in which we live—of the growth of an international economy, the

COLL DE DE A DO

of communications that have been forged among public and private individuals and institutions around the world. Moreover, whereas during the Cold War, we could more easily define our intelligence priorities, today we are driven to concentrate on multiple potential adversaries — both state and non-state actors — operating around the globe and in cyber-space.

The ability of the intelligence community to monitor, analyze, report, and warn about impending events, and, specifically, to sort from that wealth of data threats to the U.S. and its interests, is made difficult by the dynamism and complexity of our world. It is compounded by the fact that the capabilities of the intelligence community to steal the secrets of those who would do us harm, and to convey those secrets to policy-makers in confidence, continues to be compromised by leaks, unauthorized disclosures, government démarches, the easy flow of experts and expertise on technical matters, and the rapid spread of technologies and expertise useful to deny and deceive U.S. intelligence efforts.

A summary of the harm done to the United States by the likes of Ames,

Hansen, Pollard, and others, suggests that some features of our national technical means for collecting intelligence are compromised even before

ral

the systems of which they are a part.) Hardly a day goes by when our newspapers

don't carry a story that reveals appropriately classified information. This activity - Included

profits only our adversaries.

As part of that complicated world in which we live, adversaries of the United States and its friends and allies have chosen terrorism as the preferred instrument to force free nations to submit to their agendas by inflicting horror upon their innocent citizens.

Terrorism an Abiding Concern

The reality of terrorism is not new. Back when I was Middle East envoy I began to take sharp notice of it, and I noticed several distinguishing characteristics

The Verder

about it, as I relayed in a talk some years ago. I said, Quo = -

"Terrorism is growing.

"Increasingly, terrorism is not random nor the work of isolated madmen. Rather, it is state-sponsored, by nations using it as a central element of their foreign policy.

CHARREDDAFF

"...Terrorism works. A single attack by a small, weak nation, by influencing public opinion and morale, can alter the behavior of great nations ...

Unchecked, state-sponsored terrorism is adversely changing the balance of power in our world.

"Terrorist attacks can take place at any time, any place, using any technique.

Regrettably, it is not possible to defend every potential target in every place, at all times, against every form of attack. Defense has its limits and its costs.

"Terrorism is a form of warfare, and must be treated as such. As with other forms of conflict, weakness invites aggression. Simply standing in a defensive position, absorbing blows, is not enough. Terrorism must be deterred.

"In my judgment, terrorism, even today, is dangerously underestimated."

I said those words in 1984, 20 years ago.

Changing Threat Posed by Terrorism

CTAPPORATE

What is new today, however, is the potential for terrorists to gain access to weapons of mass destruction. My service on the Ballistic Missile Threat Missil

Equipping for an Era of Surprise — Administration Efforts 20 Jan-10 Sep 2001

organized, trained, and equipped to fight foreign armies, navies, and air forces.

We will need to maintain such a capability as a prudent deterrent. It is likely, however, that even traditionally armed adversaries will seek asymmetric capabilities that hide their weaknesses and exploit our vulnerabilities. In addition to traditional adversaries, and because of the nexus of terrorism and WMD, we will need to have an armed force able to track, engage, and defeat individual terrorists; the networks through which they operate; and, if necessary, the nation-states that harbor them. We will need to track, interdict, and, if necessary, destroy WMD and the means for their development and delivery.

GTAFT DRAFT

DE VALUE DA VALUE

And we will need to do it in the full knowledge that the intelligence used to and will bon here the support such efforts is imperfect.

Planning: In the first year of the Administration, the senior leadership of the Department developed a strategy and plan to transform a capabilities to meet emerging national security needs. In the Quadrennial Defense Review (QDR), the final draft of which had been completed prior to 911, we came to the conclusion that the traditional threat-based approach to planning was no longer appropriate.

We developed, instead, what we call a "capabilities-based" planning approach.

Through that approach, we seek to create a portfolio of capabilities that will provide the speed, agility, and precision needed to meet the 2 1st century threats that

Statutaly requosed

we face.

As part of that defense review, we identified, as our first priority, the defense A of the territory and people of the United States. Many people have associated that priority with missile defense. In fact, we looked at the issue much more broadly. We sought to develop a criterion for sizing the overall force that would give us an indication of the numbers of soldiers, airmen, marines, and sailors, that we needed to develop to what is now called homeland defense.

STAFF DRAFT

In addition to the QDR, we spent a considerable period of time refashioning the nuclear offensive deterrent in pursuit of two objectives. One was to identify the appropriate size, structure, and capabilities for the nuclear force in the new world in which we live. As a result of that effort, we concluded that we could reduce the nuclear deterrent force to 1,700-2,200 operationally deployed weapons by the year 2012. Secondly, we identified the new capabilities that needed to be incorporated into the strategic force to complement the offensive nuclear forces across a wide range of possible scenarios and to provide the kind of capabilities that might dissuade states from undertaking political, military, or technical courses of action that would threaten U.S. and allied security.

Reviews and plans are important for transforming the capabilities of the force, but it was important that we revise our deliberate and contingency planning process, as well, to reflect those capabilities and the new threats we face. When I U.S. came into office, I discovered that nearly all the major plans were more than two pears old and that their assumptions had not been reviewed for three to four—and, in some cases – five years. After a series of reviews of individual plans, I which allows flow the convened a meeting in late May 2001 to review those assumptions. As a result, direction was given and action taken to revise beth our plans and the planning

STATEDRAFT

today. These are plans that would permit the President to use the force with the kind of nuance, speed and agility needed to deter and defeat contemporary threats.

These changes were reflected in the Defense Planning Guidance and the Contingency Planning Guidance.

Personnel. In addition to transforming the capabilities of the armed forces and refashioning of war plans, we also spent considerable time bringing in the people willing and able to undertake the enormous range of tasks that needed to be accomplished.

Deputy Secretary arrived. It was not until 10 May that the Under Secretary for Acquisition was sworn in. And it was not until July 16 that the Under Secretary for Policy, in whose area of responsibility falls many of the tasks I have just outlined—u, took office. It was not until the first of October that the current of the Internal and Vice Chairman took their positions. Nor has the personnel effort that the ima since I have been here, the President has appointed more than 30 service secretaries and chiefs, combatant commanders, and Joint Staff

CHAPPARA

the very on terror while transforming the force. It has been a design of the very one terror while transforming the force. It has been a design of the part of the

Level of Effort. The review process—reviewing the strategy, planning, budget, and personnel—consumed an enormous amount of time and effort in those first seven-and-a-half months. I held more than 250 meetings during that time, on just the subjects I listed. Over 100 of those meetings were devoted to personnel matters? Over 120 meetings were devoted to strategy and policy reviews? Twenty-six were focused on war plans.

So or more dealt with budgets. I met with the CJCS, VCJCS, Combatant Commanders and Service Chiefs and Secretaries more than 40 times. Gulf policy primarily related to ONW and OSW took over 20 meetings. I met with members of Congress – hearings or meetings –

STAFFDRAFT

an hour each, and some, such as the review of the war plans I conducted on May

26, lasted four to five hours. I mention that because—as you know, you're all busy

people—that is a significant investment of time given the kinds of schedules you

That investment, however, was an important one, and it was made with an eye toward getting the Department ready for that era of surprise into which I knew

An Eve Toward the Threat.

Wy Seven Jern Al Scoun I Deden

From the beginning, I made a point to publicly identify the nature of the 5 threat we would face. As far back as February of 2001, I noted that, "because of the proliferation that is taking place (throughout the world) . . . , people look for so-called asymmetric responses to dissuade people from attempting to have them not do what they would like to do in their neighborhoods, to their neighbors.

Obviously, those things [go] across the spectrum, from terrorism through cyberattacks to information warfare to cruise missiles to short-range ballistic missiles to longer-range ballistic missiles and weapons of mass destruction."

Events across the first months of the Administration underscored the many and varied manifestations of the kind of the 21st century threats we faced. In

STAFF DRAFT 11 11-L-0559/OSD/25642

CTAPPDRAFT

October 2000, terrorists captured a group of Americans in Ecuador, one of whom was killed January 30,2001, and dumped off the back of a truck. In the first few months after having taken office, I was delivered a report on the actions being taken to implement the recommendations from the Cole Panel. That was followed shortly thereafter by a long conversation with then-FBI Director Louis Freeh on the issues related to Khobar Towers and the missions that had been and could have been taken to bring those who had perpetrated the attack to justice. [check sequence]

By spring and summer, the concerns of the Followere becoming more insistent. Consistent with those concerns, we, in June, actually sortied some of our Navy warships, which was just one action we undertook as we scruting to force protection conditions. And I met for quite some time with the Hart-Rudman Commission to discuss ways by which to protect our homeland.

Eigeth, In the aftermath of the incident in Ecuador and of the downing of the EP-3 in China in April, we undertook an effort to rearrange our crisis management organization and process and had not quite completed its implementation on the 11th of September.

-STAFF DRAFT

September 11,2001

Members of Congress to discuss, among other business, the budget. In the course of our conversation from Di Rite. The threat posed to the United States by terrorism, and by al Qaeda especially, had been acknowledged within the U.S. Government since the mid-1990s. Al Qaeda was responsible for the attacks in Africa.

The previous administration had directed both its intelligence agencies and the Department of Defense to plan for and, when authorized, take action against al Qaeda [classified annex to cover MON and Positive Plot]. I am told that the Solver Compartment developed what I would call concepts for employing force to support.

Variety of actions against al Qaeda that might have been directed by the President.

These were in no way finished plans. In my discussions with Secretary Cohen during the transition, I do not recall those plans having a preminent role.

I am informed that a briefing on that subject was on my calendar in early February 2001. I must say that I do not recall that specific brief as being distinguishable in any notable way from any of the other planning that I had reviewed prior to 911.

ETAFF DRAFT*
11-L-0559/OSD/25644

(crais)

GTAFF DRAFT

Over the course of the first seven months of the new Administration, it addressed policy initiatives on a range of subjects. With respect to Afghanistan, Pakistan, and al Qaeda, the Government worked its way through the process of developing policy during the course of the Spring and Summer of 2001. A review of the record will show that the first meeting on these subject occurred in April, leading to the penultimate draft of policy on Afghanistan, Pakistan, and al Qaeda that was circulated on 7 September 2001, for decision by principals. YOU will recall that I told you that the individual whose area of responsibility on I've mentub these subjects Bye mentioned, that is, the Under Secretary for Policy, was not sworn is until July. The same was true of the cognizant Assistant Secretary. So, for a period of five months, the Defense Department had a skeleton team working with others throughout the Administration under the auspices of the NSC on the subject of interest to this Commission, that is, Pakistan, Afghanistan, and al Qaeda. Paul Wolfowitz, my deputy, handled these discussions for me. Moderated Associated with the effort was a classified effort to provide a relatively prompt and responsive capability to strike against designated and authorized

STAFF BRAFT

11-L-0559/OSD/25645

terrorist targets. That effort was a follow-on from previous activity. It required

modification of equipment and creation of new command and control

TARREN ATT

arrangements. I am advised that that capability was not sufficiently mature technically, under the conditions prevailing prior to 911, to be deployed in an operational mode.

The Day of 911

Morning: of 911. On the day of 911, when the plane struck the Pentagon at 0939, I had finished breakfast with the Congressional delegation and was in my office I had a carrier with my CIA briefer. I immediately went outside to see what had happened. I was not outside for very long, apparently, because I am told that there are records note; indicating that I was back in the Pentagon, with a crisis action team, by a few here and solve the first and before going to what we can see Def Cables I made a number of calls, one of which was to the President. Upon entering Cables, [ed. note: need to consult with Di Rita/Clarke on DR's first actions upon entering room].

I then went down to the National Military Command Center. I met Gen.

Myers, who had just returned from in Hill. We agreed to recommend a change in

berbrust

threat condition from "Echo" (?)to "Charlie," or from the lowest to the 3rd highest level. We also gave instruction to notify the Russians of the change and to request that they stand down an exercise they were conducting.

(A summary was provided, of the forces we had available in the Persian Gulf/Arabian Gulf. They included the Vinson in the Indian Ocean, the interprise and 4 SSGNs at Oman and 6 SSGNs in the Persian Gulf. The 10 SSGNs bat 200 TLAMs among them. In addition, the Constellation was 4 days out of San Diego in the Pacific Ocean, and the Lincoln was in port at Everett, WA.) I joined the air threal conference call, which was already in progress. [One of] my first conversations during the conference call was with the Vice President, authorized The who informed me that he had passed along the President's authorization to shoot down hostile aircraft [coming toward Washington, D.C.] The desired the Promen has outland that 018-

My thoughts immediately went to the circumstances of the pilots of our that when the collection of the collection military aircraft, I went to work with the then-Vice Chairman, General Dick Myers, to work out appropriate rules of engagement, Throughout the course of the day, I returned at least once and marké twice to refine those ROE, and my reason for paying such close attention to them was an experience that happened many years ago, with the Mayaguez that stuck in my mind.

2/8/04 SecDef MFR re: Goldwater-Nichols for the USG (020804-64)

DHR:dh 030804-22

Please respond by 3/26/04

SUBJECT: Goldwater-Nichols for the USG

The US Government as a whole is now really the way DoD was in the pre-Goldwater-Nichols days.

DoD in those days had the best Army in the world, the best Navy in the world, the best Air Force in the world, the best Marine Corps in the world.

But each one of them did what they did individually and separately.

To get where we are, each of those Services had to give up something—some authorities, some notoriety, some fame—to achieve a greater good.

The US Government is now where DoD was in the pre-Goldwater-Nichols days. The country teams are not really country teams—they are Department of State embassies. DoD is not a competent play in a country team, nor probably are other agencies and departments.

To achieve our goals, we need to have true country teams, and we need to have leadership in those teams—not Department of State career SFOs. We need to have competent people who are the equivalent of our combatant commanders—people like Howard Baker, Bob Strauss, Mike Mansfield, Tom Foley and the like.

India/Pakistan trip thoughts

Importance: Sensitivity:

High Personal

John,

-- Please pass to Secretary Rumsfeld --

Mr. Secretary and Chairman,

You may recall I recently visited India and Pakistan. It was a terrific trip and very fruitful.

Two major issues for me:

One: the disconnect in both countries with how the UCP divides sensible relations with these two nations.

Our dividing lines are impacting them.

India wants to be engaged to the west. They have real national interests in that direction.

We are protective to the west because, in CENTCOM, we protect the feelings of Pakistan. (I'm not casting blame; just addressing perceptions)
* So...India is not as engaged in the Gulf as they would like to be

and they told me they sense a lack of connection with CENTCOM. They feel they have no entrance to deal in that AOR, e.g. exercises, liaisons, etc.

* They don't see themselves as "belonging" to PACOM only.

It is less true for Pakistan looking east. As you know, Pak is keeping score of every move we make with India, but in naval stuff, they played in PACOM's submarine rescue event and liked it.

- Recommendation: We need to figure out how to fuzz the lines between these kinds of boundaries.
- Two: Recovering from sanctions.
- Lots of frustration. This is familiar to you I know.
- We need to figure out how to look proactive in a post sanctions window. We don't.

Example: Pak already has the HARPOON surface-to-surface missile. During the years of sanction their HARPOON missiles became inoperable ...lack of support, parts, test equipment, etc. They are unable to obtain much needed parts and support equipment for legacy systems like this without starting over through our formal, multiagency approval process.

Recommendation: When we lift sanctions, we should consider a fundamental change to our interagency approval process and issue , pre-emptively, a list of items already approved. We should not force the nation to go through the approval process again.

All in all a good trip. I told each of them you had given me, and each of the Chiefs, the direction to get engaged. That message was well received.

Senator Condemns Pentagon Move To Cut Number Of US Troops Based In Europe

By Peter Spiegel

Senator John Warner, the powerful chairman of the armed services committee, yesterday voiced his opposition to any significant reductions in the number of US forces based in Europe, saying such downsizing was inappropriate during operations in Iraq and Afghanistan.

Although the Pentagon has yet to announce specific plans for troop levels in Europe, Nato diplomats have said they are expecting reductions of as much as a third, one of the biggest redeployments of American forces since the second world war.

Donald Rumsfeld, defence secretary, ordered a review of all overseas troop commitments shortly after taking office three years ago.

But speaking at a hearing on the Pentagon's budget, Mr Warner said he opposed even a study of a reduction, although he was more accepting of plans to move troops stationed in Germany into new bases in eastern Europe. There are 120,000 US troops in Europe, two-thirds of them based in Germany.

"Even the thought, at this particular point of time, with the war on terrorism, of making any significant reduction of forces concerns me greatly," Mr Warner told General Jim Jones, US commander in Europe and Nato's military chief. "This is certainly not the time for even any reassessment of that."

Gen Jones said he supported overseas troops in principle but did not address Mr Warner's concerns directly in his oral testimony. In a written statement provided to the committee, however, the general made clear his commitment to reducing troop levels in Europe and creating a series of smaller operating bases in the region.

"The United States' level of interest, commitment, and military capability resident in this theatre should no longer be measured exclusively by the number of troops permanently based in Europe," he said.

Although Mr Warner is one of the most powerful Republicans in Congress on military issues, he is unlikely to prevent the Pentagon from making the changes through legislative means.

His ability to affect defence department policymaking, however, is significant. If he decides to make the stationing of troops in Europe a personal cause, it could severely complicate Mr Rumsfeld's efforts to make US forces abroad smaller and more mobile.

At the same hearing, General John Abizaid, commander of US troops in the Gulf, rejected calls by Shia leaders in Iraq to allow them to set up local militias to protect themselves from terrorist attacks such as the bombings in Karbala and Baghdad this week.

Shia clergy have angrily criticised the US for not providing enough security. The Shias' leading political party, Sciri, has asked that its former armed movement, the Badr Corps, be allowed to operate as a

11-L-0559/OSD/25661

private militia.

U.S. plans Al Qaeda offensive

Publication: Chicago Tribune

Author: 2014 iktine Spolar

Tribune Foreign Correspondent Published January 27, 2004, 10:00 Pm Cst

WASHINGTON -- The Bush administration, deeply concerned about recent assassination attempts against Pakistan President Pervez Musharraf and a resurgence of Taliban forces in neighboring Afghanistan, is preparing a U.S. military offensive that would reach inside Pakistan with the goal of destroying Osama bin Laden's Al Qaeda network, military sources said.

U.S. Central Command is assembling a team of military intelligence officers that would be posted in Pakistan ahead of the operation, according to sources familiar with details of the plan and internal military communications. The sources spoke on the condition they not be identified.

As now envisioned, the offensive would involve Special Operations forces, Army Rangers and Army ground troops, sources said. A Navy aircraft carrier would be deployed in the Arabian Sea.

Referred to in internal Pentagon messages as the "spring offensive," the operation would be driven by certain undisclosed events in Pakistan and across the region, sources said. A source familiar with details of the plan said this is "not like a contingency plan for North Korea, something that sits on a shelf. This planning is like planning for Iraq. They want this plan to be executable, now."

The Defense Department declined to comment on the planned offensive or its details. Such an operation almost certainly would demand the cooperation of Musharraf, who previously has allowed only a small number of U.S. Special Operations forces to work alongside Pakistani troops in the semi-autonomous tribal areas. A military source in Washington said last week, "We are told we're going into Pakistan with Musharraf's help."

Yet a large-scale offensive by U.S. forces within the nuclear-armed Islamic republic could be political dynamite for Musharraf.

The army general, who took power in a bloodless coup in 1999, has come under growing political pressure from Islamic parties, and his cooperation with U.S. anti-terrorism efforts is widely unpopular among average Pakistanis. Nor can Musharraf count on the loyalty of all of Pakistan's armed forces or its intelligence agency, members of which helped set up and maintain the Taliban in Afghanistan and are still suspected of ties to militant Islamic groups.

Speaking on Friday at the World Economic Forum in Davos, Switzerland, Musharraf again rejected the need for U.S. forces to enter Pakistan to search for bin Laden.

"That is not a possibility at all," Musharraf said. "It's a very sensitive issue." The U.S. military is

11-L-0559/OSD/25666

h

operating under the belief that, despite his recent statements, Musharraf's thinking has changed, sources said. Musharraf himself said last week that bin Laden and his followers likely were hiding in the mountains along the Afghan border. He also said "we are reasonably sure that it is Al Qaeda" who was behind the two attempts on his life.

An offensive into Pakistan to pursue AI Qaeda would be in keeping with President Bush's vow to strike wherever and whenever the United States feels threatened and to pursue terrorist elements to the end.

"The best way to defend America ... is to stay on the offensive and find these killers, one by one," Bush said last week. "We're going to stay on the hunt, which requires good intelligence, good cooperation, good participation with friends and allies around the world."

Musharraf's vulnerability is of deep concern to U.S. officials. Were he to be killed, Bush administration officials say, it is unlikely that any successor would be as willing to work toward U.S. goals to eliminate Islamic extremists.

The U.S. military plan is characterized within the Pentagon as "a big effort" in the next year. Military analysts had previously judged that a bold move against Islamic extremists and Osama bin Laden, in particular, was more likely to happen in spring 2005.

eseries of planning orders-referred to in military jargon as warning orders-for the offensive were issued in recent weeks. The deadline for key planning factors to be detailed by the U.S. military was Jan. 21.

Sources said the plan against Al Qaeda would be driven by events in the region rather than set deadlines and that delays could occur. But military sources said the push for this spring appeared to be triggered by the assassination attempts on Musharraf, both of which came in December, and, to some extent, the capture of Saddam Hussein in Iraq.

Hussein was captured after eight months of an intense military and intelligence effort on the ground in Iraq. Pentagon and administration officials, buoyed by that success, believe a similar determined effort could work in Pakistan and lead to the capture or killing of bin Laden, said sources familiar with the planning.

Thousands of U.S. forces would be involved, as well as Pakistani troops, planners said. Some of the 10,600 U.S. troops now in Afghanistan would be shifted to the border region as part of regular troop movements; some would be deployed within Pakistan.

"Before we were constrained by the border. Musharraf did not want that. Now we are told we're going into Pakistan with Musharraf's help," said a well-placed military source.

Internal Pentagon communications indicate that the U.S. offensive would rely on several areas of operation, including Afghanistan, Pakistan and other countries in the region.

The U.S. also is weighing how and if Iran can be persuaded, through direct or indirect channels, to lend help, according to internal Pentagon communications. The U.S. is eager to avoid a repeat of the Afghan war in 2001, when some Al Qaeda fighters were believed to have escaped into Iran.

Military planners said the offensive would not require a significant increase in U.S. troops in South Asia. But Special Operations forces that had shifted from Afghanistan to Iraq in 2003 will return.

"We don't have enough forces but we can rely on proxy forces in that area," said a military source,

h

referring to Pakistani troops. "This is designed to go after the Taliban and everybody connected with it."

U.S. Department of State's news clips are prepared to alertofficers to issues related to their official responsibilities. Further reproduction for private use or gain is subject to original copyright restrictions.

FOR: SECRETARY OF DEFENSE

DSD

FROM: Mr. Michael W. Wynne, Acting Under Secretary of Defeat

MAR 10 ...

SUBJECT: Report on Stryker Tests

- Your March 5, 2004, snowflake requested information on action required regarding the subject report. No action on your part is necessary,
- On March 4,2004, I approved full-rate production for seven Stryker vehicle configurations. Six vehicles were assessed as operationally effective and suitable in the test report. The Engineer Squad Vehicle (ESV) was assessed as not operationally effective or suitable. I requested advice from the Joint Capabilities Board (JCB) on this finding. The JCB determined that continued production is supportable given demonstrated performance, programmed fixes, operational work-arounds, and planned follow-on testing. Based on this determination, I approved full-rate production for the Engineer Squad Vehicle (ESV).

ACQUISITION, TECHNOLOGY AND LOGISTICS

THE UNDER SECRETARY OF DEFENSE

3010 DEFENSE PENTAGON WASHINGTON. OC 20301-3010

0 4 MAR 2004

MEMORANDUM FOR THE SECRETARY OF THE ARMY

SUBJECT: Stryker – Acquisition Decision Memorandum (ADM)

On February 20,2004, I conducted a review of the Stryker program. As a result of that review, I approve Milestone III for continued production of the following Stryker vehicle configurations: Anti-tank Guided Missile (ATGM), Commander's Vehicle (CV), Fire Support Vehicle (FSV), Infantry Carrier Vehicle (ICV), Medical Evacuation Vehicle (MEV), and Reconnaissance Vehicle (RV).

I referred the Engineer Squad Vehicle (ESV) to the Force Application (FA) Functional Capabilities Board (FCB) to determine if operational capabilities provided by the ESV support its continued production. The FA FCB and the subsequent Joint Capabilities Board of February 25,2004, determined that the operational capabilities provided by the ESV do indeed support its continued production in light of programmed fixes, operational work-arounds, and planned follow-on testing. Therefore, I also approve Milestone III of the ESV configuration.

I direct the Army to:

- consider the recommendations identified in the Beyond Low-Rate Initial Production (BLRIP) Report and identify a path forward for corrections, funding, and testing.
- fund the Stryker Research, Development, Test and Evaluation (RDT&E) and Production to the levels identified in the Army Cost Position; and Operations and Maintenance in accordance with approved Operating Tempo levels in the FY06 -FY11 POM.
- submit the Command, Control, Communications, and Computers Information Support Plan (C4ISP) by April 30,2004 for approval.

I delegate to the Army Acquisition Executive (AAE) decisions on Add-on Armor and Mortar Carrier production upon successful assessment in the BLRIP and Live Fire report update. The AAE will notify me of the decisions before taking action to implement them. Regarding the Mobile Gun System (MGS) and the Nuclear, Biological, Chemical Reconnaissance Vehicle (NBCRV) development, within 90 days the Army shall provide proposed changes to the MGS exit criteria, with rationale, and an update to the Technology Readiness Assessment for the NBCR V.

I direct the Army to develop an implementation plan for brigade enhancements to include Secretary of Defense approved enhancements, migration to a net-ready capability, and early application of future force (e.g., Future Combat Systems)

capabilities. The plan shall detail the incremental upgrades of all Stryker brigades and the associated scheduling and funding actions.

I request that PDASD(C3, Space, and IT Programs) oversee, with the Director, Defense Systems and USD(I) **support**, an Army-led Stryker force integration study. The **study** should **address** force interoperability among Stryker-equipped brigades and Command, Control, Communications, Intelligence, Surveillance, and Reconnaissance (C3ISR) systems at the Army, joint, and coalition levels.

The Stryker **OPT** shall meet in **August** 2004 to advise me on the following:

- the Army plan for accommodating BLRIP report recommendations;
- the progress on the development of the NDCRV and MGS configurations and their readiness for production;
- the implementation plan for brigade enhancements;
- * the results of the force integration study.

Point of co	ntact is Dr.	Robert Buhrkuh	, Acquisition	Resources and	Analysis

SG(2004)0226

23 February 2004

Looking ahead to the expanded ISAF mission beyond Kabul and Konduz, I am writing to alert you to the challenge and responsibility we share in providing the additional forces needed to support the new OPLAN currently being developed by SACEUR.

While some important progress on filling critical ISAF shortfalls was made at our recent informal meeting in Munich, particularly for Kabul airport, I must stress that those commitments relate to the current requirement only.

Over the coming weeks, SACEUR will be working closely with nations on sourcing the new ISAF combined joint statement of requirement (CJSOR). In this context I urge you to follow through the political commitment, jointly made by all Allies to enhance NATO's support for the Afghan Transitional Authority, by providing the necessary forces for ISAF's expanded mission. In the true spirit of shared responsibility and solidarity I believe that all nations can make worthwhile contributions, based upon their declared force commitments and capabilities.

As ISAF's expansion is based on the concept of additional ISAF PRTs I also take this opportunity to urge those of you who are considering the deployment of PRTs to accelerate that process. Istanbul is rapidly approaching and with each passing week it becomes increasingly difficult to meet our goal of 5 ISAF PRTs in the field by the end of June.

The Berlin Conference at the end of March and the NATO Foreign Ministers' meeting immediately thereafter will be important stepping stones to mark the progress we have achieved in making good on our promises in Afghanistan. It is therefore essential that we have completed our work on the new ISAF OPLAN and the associated force generation process ahead of these meetings. I count on your support to turn political intent into concrete pledges during the next few critical weeks.

MDA Forward Based Multi-mission Components

DHR:dh 030504-25

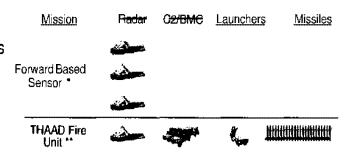

Please respond by 3/26/04

SMARON

Current Plan

- Components Configured For Unique Missions-

- Forward Based Sensors leverage the THAAD Radar Component and add unique HW/SW to execute the new sensor mission
- THAAD Fire Unit is designed specifically to engage ballistic missiles
- Current plan fields three Forward Based Sensors and one THAAD Fire Unit
 - Forward Based Radar(s) deployed to increase sensor for U.S. defense against
 - THAAD Fire Unit capable of rapid, world-wide, deployments defeat ballistic missiles of all

- Unique HW/SW added to execute new sensor mission
- * THAAD specific HW/SW required to engage Ballistic Missiles

Challenges

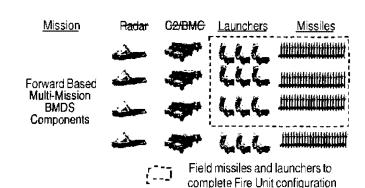

- Single mission THAAD Fire Unit can not be used for the Forward Based Sensor
- Single Mission Forward Based Radars are vulnerable (lack ability to defeat BMs)
- Single Mission Forward Based Radars provide no defense to host nations or regional combatant
- Uniquely configured components require different CONOPS, maintenance, and

		<u>-</u>	Cost (\$	M)		
	FY05	FY06	FY07	FY08	FY09	FY10
Forward Radar #1	•	185	•			
Forward Radar #2		•	185	•		
Forward Radar #3			•	185	•	
THAAD Fire Unit			• 4	70		

Concept Under Evaluation - Components Configured For Multi-Mission Capability -

- Evolve THAAD Radar and C2/BMC components to a multimission forward based configuration
- Exercise option to field additional missiles and launchers to complete 3 additional configured fire units
 - Provides four multi-mission fire units versus one mission THAAD Fire
 - Provides four multi-mission forward radars with protection from ballistic
 - Provides host nation protection for up to countries/regional combatant
 - Maximizes commonality and provides overall reduction life cycle

Challenges

- Multi-Mission configuration for Radar and C2/BMC requires MDA Sys Eng to define and direct requirements and interfaces to avoid stove-pipe design
- MDA Sys Eng must be given authority to disrupt elements current path

Cost (\$M)

	FY05	FY06	FY07	FY08	FY09	FY10
Forward Radar #1		185				
Forward Radar #2			185			
Forward Radar #3			•	185	•	
Launchers and Missiles*				•	400	
THAAD Fire Unit			4	70		

^{\$1425}M

 ⁹ Launchers and 72 Missiles for Forward Based Radars

Summary

MDA forward based multi-mission compone ດts:

- Maximizes BMDS flexibility and compliments BMDS with underlay capability for GMD
- Provides initial underpinning for Global Missile Defense
- Achieves ballistic missile protection to deployed forces, a friends
- Offers "Regional missile defense" for up to 4 host nat
- Maximizes ∃MDS supporto the Combatant Commande
- Allows back Ming of multi-mission Forward Based Senson missiles and aunchers to provide three additional THA Units at less than the cost of one new fire unit
- Maximizes commonalty and provides overall reduction ir costs

SUBJECT:

Civil Affairs

My impression is that civil affairs was put in with Special Operations because it was different and Special Ops was different, which made sense. Probably also it was because the regular Army did not want it.

It continues to be different, but it is also different from Special **Ops**, as well as being different from the regular Army,

My impression is that we ought to give careful thought to moving it over to the regular Army, so that the regular Army interests itself in that subject and so the transitions from combat to post-combat stabilization can be relatively seamless. Furthermore, I don't think there is anything lost by moving it out of Special Ops, and possibly something gained.

Please think about it and get back to me.

Thanks.

THE ASSISTANT SECRETARY OF DEFENSE

WASHINGTON, DC 20301-1300

March 12, 2

MEMORANDUM FOR THE SECRETARY OF DEFENSE

FROM: Powell A. Moore, Assistant Secretary of Defense for Legislative Affairs (b)(6)

SUBJECT: Response to Snowflake# 030404-27 regarding Testimony before Budget Committee

- Your March 4th snowflake (Tab 1) noted that the Vice President commented that Congressman Nussle said he was "unhappy because I did not testify before the Budget Committee,"
- A call came to Legislative Affairs in late January requesting that you testify before the Committee sometime before the markup of the Budget Resolution. We directed the request in a Decision Memo to Deputy Secretary Wolfowitz (Tab 2) because there is no precedent in this Administration for the Secretary of Defense to testify before the Budget Committee. The period between the State of the Union and the mark-up of budget resolutions is usually heavily occupied with your testimony before jurisdictional committees.
- The Deputy declined to testify and requested that Dr. Zakheim he offered to the Committee as the DoD witness. OSD(LA) complied and made the offer.
- Several weeks later, the Committee staff called back to say that the hearing was canceled. At no time did the staff indicate that the lack of testimony was a problem. Nor did I ever receive a phone call from the Chairman or Chief of Staff.
- Deputy Secretary Wolfowitz has previously handled Budget Committee testimony. According to our research, the Secretary of Defense has testified before this committee infrequently. Former Secretaries Cohen, Cheney, and Perry testified once each during the entire length of their tenure.

We have invited Chairman Nussle for breakfast in previous years along with his Budget Committee counterparts, Senator Domenici, Senator Conrad and Congressman Spratt. Each time he has declined. We have not invited this group this year. There has been time for only three breakfasts on your schedule and we have had higher priorities.

We should consider inviting him to breakfast later in the year.

January 23, 2004, 12:30 PM

FOR: DEPUTY SECRETARY OF DEFENSE

FROM: Dov S. Zakheim

SUBJECT: House and Senate Budget Committee Hearings on the Fiscal Year

(FY) 2005 Budget

- The House Budget Committee has invited Secretary Rumsfeld to testify at an upcoming hearing on the FY 2005 Department of Defense (DoD)
 Budget. It is likely that the Senate Budget Committee will also invite the Secretary. Specific hearing dates have not been set.
- While you have testified before the Budget Committees, most recently during the rollout of the FY 2004 DoD Budget, Secretary Rumsfeld has not. Given that there is no precedent for Secretary Rumsfeld testifying before these committees, I would not recommend setting one now. The Secretary will have a full schedule of hearings and meetings in February associated with the rollout of the FY 2005 DoD Budget.

• Do you have a desire to testify at these hearings? If not, I would be happy to fill in for you. After accompanying the Secretary to his round of posture hearings and conducting my own briefings for Congressional staff, I will be in a good position to address the concerns of the members of the Budget Committees.

freed (c)

HENRY E CATTO

Dear Don,

I read The transcript of you remarks at the Webrkunde meeting. as nount, you were abortutely first rate. One matth in particular caught my eye: your suggestion that think tanks might explore certain tracts of the Western relationship. I am Chairman of the attentic Council, which as you likely know is denoted to studying NATO and attentic unity. If we could be of any

lige go will let me know within, I with admiration and appreciation, Sincerely.

THE SECRETARY OF DEFENSE WASHINGTON

Mr. Henry E. Catto Atlantic Council of the United States 910 17th Street, NW Suite 1000 Washington, DC 20006

Dear Henry,

Thanks so much for your note. It was good to hear from you.

I have passed your suggestion along to Doug Feith and Paul Wolfowitz, and they will give some thought as to how that might be helpful.

With my best wishes,

Sincerely,

Presenter: Secretary of Defense Donald H. Rumsfeld

Secretary Rumsfeld Availability at the Munich Conference on Security Policy

Q [Professor Karl Kaiser, visiting professor at Harvard University]: Mr. Secretary, the doctrine of preemption has been greatly criticized all over the world, but you rightly point out that under conditions of weapons of mass destructions and terrorism, our old criteria of defining the legitimacy of defense, of course, is to be reviewed. And it is an absolutely central rule of international law, I'm referring to Article 51, which makes the use of force legitimate. My question to you now is: should we not leave the redefinition of the criteria just to the accidents of the moment? Shouldn't we all sit together and redefine the criteria of when defense is legitimate under these circumstances? And secondly, where should we do it, in your opinion?

Rumsfeld: I think it's a good idea. I'll leave it to experts and diplomats to figure out where it ought to be done. My guess is it needs to be done in multiple locations. It's such a central issue that needs to be addressed, and it should be done in academia, it should be done in the think tanks, it ought to be done inside governments and it ought to be done among and between governments. It is enormously important. We did an exercise, I didn't, but some people in the United States did, I think it was Johns Hopkins on, they called it "Dark Winter," and they looked at smallpox, I believe, and put it in two or three locations in the United States and watched what happened. And the numbers immediately, very rapidly, ran into the hundreds of thousands of dead. You think what we've done for decades, when I was a child, even then we preempted. If someone got smallpox they were quarantined; they had not given that to anybody else yet, but they were stopped and they were not allowed to give it to anybody else and -- why? Because so many people could be killed by smallpox was the reason. The state stepped in and said, we are going to preemptively stop you from hurting somebody else even though you don't want to, you have no intention to, and there is not any certainty you even would -but we're going to stop you. I think you're right, I think it's something that merits our attention, and I suspect when with discussions and debates are completed we'll find that it fits something like I suggested: the more powerful, the greater the risk and the danger, the lower the threshold for action.

UNDER SECRETARY OF DEFENSE

4000 DEFENSE PENTAGON WASHINGTON, D.C. 20301-4000

INFO MEMO

February 2, 2004, 4 PM

FOR: SECRETARY OF DEFENSE

FROM: David S. C. Chu, Under Secretary of Defense (P&R)

XPP: ADY

SUBJ: The President's Management Agenda Q1 FY04

- OMB has released the latest "scores" of progress toward accomplishing the President's Management Agenda. The overall Executive Branch Scorecard is at TAB A.
- OMB's assessment of our progress on the five crosscutting initiatives is at TAB **B**. We are "Green" in all Progress Areas. A summary of our Status follows:

Human Capital

Despite significant advances with the introduction of the National Security Personnel System, and our Workforce Restructuring Plan, Status remains "Yellow."

Competitive Sourcing

The Department exceeded OMB's goal of completing 15 percent of our agreed to 226,000 positions in FY 2003 by a factor of two. Status has advanced to "Yellow."

Financial Management

The Department-wide financial system enterprise architecture has been briefed to OMB. The score remains as rated last year: "Red" for Status,

E-Government

The Department has performed an impressive amount of work in this area. While we believe our efforts merit an elevation to "Yellow" in Status, our score remains "Red."

Budget and Performance Integration

DoD's Planning, Programming, Budgeting and Execution System has served us for over 40 years. We believe it merits a "Green" in Status; the score remains "Yellow."

Human Capital Agency Lead: Dr. David S.C. Chu Gail McGinn Ellen Tunstall Lead RMO Exaniiner: Janiie Price- O'Donnell OPM HC Officer: Jennifer Hopkins	Comprehensive human capital plan #/ developed, etc. on 04/02 #results analyzed & used on 09/03 Organizational structures #current structure analyzed and restructuring begun on 02/02 # structure optimized & process in place to address future challenges on 09/03 Succession strategies # implemented on 06102 (DLAMP) * continuously updated talent pool assured by 07/04 Performance appraisal plans link, differentiate, and provide consequences for # SES & mgrs. on 06/02 # 60%+ of agency on 07/04 Under representation # implemented strategies to address on 06/02 # reduced & established process to sustain diversity on 07/04 Skill gaps # workforce planning system implemented on 07/01 updated annually signif, reduced in mission critical gaps on 07/04 Accountability system # system developed 04/02 used to inake decisions on 07/04	Actions Taken Since September 30, 2003 Provided revised "Proud to Be" document with sufficient supporting data in the correct format Developed Defense Business Fellowship Program Completed development of funding strategy for marketing DoD as a "first choice" employer Published program assistance package to promote a diverse and representative workforce Promoted diversity in providing developmental opportunities to employees Reported on FY 2003 diversity goals (hiring employees with disabilities) Updated annual Workforce Planning Analysis Chart (due 12/03) Updated Restructuring Plan (done every 6 months) Planned Actions for 0 2 FY 2004 Provide report on adequacy of resources to support FY 2006 budget ((ratining and professional development) Provide metric/calculation to iise to develop civilian personnel compensation estimates under NSPS Provide report on review of recruitment programs Provide report on legislation and strategy for staffing mission-critical occupations Provide analysis of data from Components on Time to Fill metric	In order to slay on track to meet Proud to Be Goals, DoD must demonstrate results with qualitative and quantitative evidence of the following: 1. Demonstrate an implemented SES and performance management system for at least 60% of the workforce which links to the agencies strategic goals, differentiates between performance levels, and provides positive and negative consequences based on performance; 2. Demonstrate the fine and success of succession strategies; 3. Demonstrate a diverse workforce and the use of diversity strategies that are successful in reducing under representation in mission critical occupations and its leadership ranks; 4. Identify its mission critical occupations and skill gaps and demonstrate how it has significantly reduced the gaps; and 5. Demonstrate how its accountability system is used to make decisions and drive results. DoD remains GREEN in status because: DoD implemented a Civilian FIR Strategic Plan for FY2002 to FY2008. Each FY, Components meet to discuss the results of past objectives and determine future objectives and determine future objectives and determine future objectives and legislation to authorize a new HR system. OPM will work closely with DoD to implement new regulations. DoD will meet with Components in January/February to determine ebjectives/milestones to accomplish.

		Department of Defense
Competitive Sourcing DoD Leads: Dov Kakheim Rag DuBois Mike Wynne	• Approved competition plan J'yellow" plan on(8/03) ✓ "green" plan will be submitted in FY 2005 Budget • Standard competitions ✓ completed 16 standard cost comparisons during Q4 FY 2004 announced in accordance with "green" plan schedule _NA in the past year completed ≥ 90% in 12 months or less _NA Next ↑ • Standard and streamlined competes	 Actions Taken Since September 30,2003 OMB's DoD Passback requested that the Business Improvement Council (BTC) 226,000 position goal be budgeted for in 05 Budgets and FYDP of the Military Services and Defense Agencies by 2009. Comptroller issued a data call to provide the data requested in the Passback. Only plans using (1) the revised A-76 Circular, (2) OMB-approved Pioneer Projects, and (3) military conversions will he accepted; Since DoD has coiiipleted coinpetitions for 17% of the FAIR inventory, OMH maintains DoD's "Status" ai Yellow. Tlic decline in new announcements has raised questions about DoD attaining the DoD/BIC 226,000 position goal, but the PBD process is reversing that issue. The DoD Leads are ensuring that this decline in starts is replaced with significant increases in planned amnouncements across all components
Lead RMO Examiner: Bill McQuaid x53657 Lead OFPP Analyst: Matt Blum	est. by (12/04) January 2001. DoD has completed 270 competitions since January 2001. None under the revised Circular. Streamlined competitions completed in 90 days or less 75% during the past 2 quarters (date)	Strategic Sourcing and other recognicering projects will not be permitted in meeting the OMB'BIC goals. • Comptroller has signed a Program Rudget Decisions (PRD) to ensure that the Military Scivices and Defense Agencies do budget for the BIC position goal. The Comptroller will use this PBD process to correct any problems with the components' budgets by going to the Deputy Secretary. Planued Actions for O1 FY 2004 • Track and review execution and savings for DoD's existing, ongoing competitive sourcing program. • Continue to track the development of DoD guidance on revised A-76 circular. • Continue to participate closely in the PBD-process for competing the BIC 226,000 position goal through the PBD process. OMB and DoD have agreed that the FY 2005 budget is detailing how the Military Services and Defense Agencies will meet the BIC 226,000 FTE goal in the new PBD. Now that the Military Services and Defense Agencies have aligned their plans and allocated budget and other resources necessary to implement FY 2005-9 targets to meet the BIC's 226,000 FTE goal in the PBD process, OMB has changed the rating to Green o Progress in the FY 2005 Budget. To get to Green on Status, each Military Service and Defense Agencies will meet the BIC goals consistent with the approved PRD.

Financial Performance Agency Lead: Dr. Dov Zakheim	Red	 Audit opinion on annual statements	Green	Actions Taken Since Sept 30, 2003 Progressed toward "proud to be" goals (see right) Improved fimeliness/ reliability of execution reporting for major on-going operations. SUBJECT:

Stress on Equipment

It seems to me that a Supplemental is to replace things that happen in a war. If there is additional stress on the equipment during a war, then that ought to be replaceable. If there is lost equipment, it ought to be replaceable. This memo from Dov Zakheim is worrisome to me.

Please come up with an appropriate approach, and then a draft memo from me to OMB to get this handled in the proper way.

Thanks.

INFO MEMO /

2004 FEB 27 MM 9: 38

February 26, 2004, 3:00 PM

COMPTROLLER

FOR: SECRETARY OF DEFENSE

FROM: Dov S. Zakheim

SUBJECT: Stress on Equipment

- You asked how we plan to deal with stress on our equipment in Iraq in the context of past and future requests for Supplemental funding.
- It is certainly true that when we use equipment at a faster rate for a sustained time, we must budget to replace the equipment earlier than anticipated. It is sometimes difficult to get Supplemental funding for this effort. The Office of Management and Budget (OMB) often considers Supplemental funding to be reserved for immediate operational needs. In OMB's view, replacement of equipment, because of its longer lead time, can be budgeted for in normal appropriations requests.
- Last summer, we examined what equipment was lost in Operations ENDURING FREEDOM and IRAQI FREEDOM, and allocated funding in the Supplemental to facilitate "re-setting the force," to ensure that military forces would be ready for new combat situations. In the fiscal year (FY) 2003 and FY 2004 Supplementals, \$4.3 billion was provided for reconstitution of equipment, and another \$5.2 billion was allocated for depot maintenance.
- Ken Krieg plans to take the lead on the study you suggest on stress on equipment caused by high optempo over sustained time periods. His office is developing the guidelines for the study and plans to involve the Military Departments and the Joint Staff in this effort. I will also participate and provide analysts to assist. This study will prove invaluable in helping the Department make its case for Supplemental funding to support investment needs.

SECRETARY OF DEFENSE

FROM:

David S. C. Cha USD(P&R) Danies. C. Chr. 19 Fax Ol)

SUBJECT: Frequency of Using Reserve Components - SNOWFLAKE

- In your July 9,2003, memo you had indicated a planning factor of not involuntarily calling up Reserve members more than one year out of every six. Our recommendation to you reflected a judgment as to what might be sustainable. As is evident, it implies approximately three years active service in a 20-year service career.
- Though there has been some discussion regarding flexibility in implementing this guidance, it has been widely reported and is generally accepted as approximately right by the Military Departments and Reserve Components.
- What really counts is what Reservists think. Reserve member expectation management is critical.
- We are undertaking an evidentiary process using survey research, empirical data, and modeling to determine the effect of activation on recruiting and retention-some results are expected this year. In our April status of forces surveys we will ask about the frequency of call up, which will give us a better basis for judging the appropriateness of one in six.

INFO MEMO

February 10, 2004, 2:00 PM

FOR: SECRETARY OF DEFENSE

FROM: Dov S. Zakheim

SUBJECT: Funding Status on the Army's New Force Structure Plan

producted

- You asked for the latest funding status on the Army's new force structure plan.
 - FY 2004 Execution Plan: As the 82ABN, 10th ID, and 31D return from deployment next month and begin the reconstitution process, the over strength in these units (i.e., the personnel that exceed their authorized end strength) will be used to stand-up three new Brigade Combat Teams (BCT). The Army will complete one full brigade and begin to stand-up two more in FY 2004. The cost estimate is approximately \$600 million.
 - o We currently have over \$300 million on withhold in the Operation and Maintenance, Army appropriation that is not currently needed for purposes requested in the supplemental. Our plan is to release these funds to help finance the Army's new force structure plan.
 - o During the upcoming OUSD(Comptroller)'s Midyear Execution Review, we will address the remaining shortfall of \$300 million, which will compete with other funding needs identified to date (totaling over \$2.5 billion) related directly to current operations in Iraq and Afghanistan (e.g., higher than expected Operating Tempo, transportation, and Logistics Civil Augmentation Program (LOGCAP) costs).
 - FY 2005 Funding Plan: The cost estimate for the full stand-up of four (completing two from FY 2004 and two new BCTs in FY 2005) and partial standup of one BCT is approximately \$1.6 to \$2.2 billion. DoD supports including these costs in the FY 2005 supplemental request for OEF and OIF.
 - FY 2006 Funding Plan: The cost estimate for FY 2006 is nearly \$3 billion. The funding for FY 2006 and beyond will be addressed during the FY 2006 – 2011 Program and Budget Review.
- A talking point paper (TAB A) is also attached summarizing the funding status on the Army's new force structure plan.

•	 We will continue to work with the Army to address 	the funding issues during the
	upcoming FY 2004 Midyear Execution Review and	the FY 2006 - 2011 Program and
	Budget Review.	

COORDINATION:	See attached.	(TABB)

Prepared By: John M. Evans,

SPL ASSISTANT DI RITA SR MA CRADDOCK MA BUCCI EXECSEC MARRIOT!

Funding Status on the Army's New Force Structure Plan

Overview:

- What follows is a coordinated strategy from USD(C), OMB, and the Department of the Army.
- As the Army returns divisions from Iraq, they will be reorganized to create new Brigade Combat Teams (BCTs) within each division.
- The Army will staff these new brigades with additional personnel that exceed the current authorized level and transfers from other units.

FY 2004 Funding Plan

- The Army will complete one full BCT and begin standing up two more in FY 2004.
- The cost estimate is \$600 million.
 - o The DoD has \$300 million, currently not needed for purposes requested in the supplemental, that could be used for this requirement.
 - USD(C) will address the remaining \$300 million at the midyear execution review.
 However, this will have to compete with other critical funding needs that have been identified (totaling over \$2.5 billion).

FY 2005 Funding Plan

- The Army will stand-up three more BCTs in FY 2005.
- The cost is approximately \$1.6 to \$2.2 billion.
- DoD supports including these costs in an FY 2005 supplemental request.

FY 2006 Funding Plan

 The cost for FY 2006 is nearly \$3 billion and will be addressed during the FY 2006 – FY 2011 Program and Budget Review.

FROM: DAVID S. C. CHU, UNDER SECRETARY OF DEFENSE (PERSONNEL & READINESS) (signed by Dr. Chu, see attached)

SUBJECT: State Solutions for Educational Issues of Military Children - Snowflake

- I met with Senator Alexander, and we testified at his field hearing on this issue. The
 most common concern of military parents is the lack of a recognized state history
 course for graduation from the receiving school.
- The DoD has several programs in place to promote state reciprocity and legislation:
 - 1. DoD representatives are personally contacting each state department of education.
 - 2. The DoD Promising Practices Program identifies state & local outstanding programs that solve education issues for the military child.
 - 3. The DoD Consortium of Highly-Impacted States will meet Fall of 2004 to address educational issues of the military child in transition and deployment. Georgia House Bill 1190 Section 2 will be highlighted for replication: "The State Board of Education is authorized to provide for exemptions to the required course of study in the history of Georgia and the Georgia Constitution for transfer students, including students whose parents serve in the Armed Forces of the US."
 - 4. Five DoD Regional Quality of Life Coordinators are being sent to heavily-impacted states to work full-time with governors, legislators, State Departments of Education and school districts to address education concerns of military families.
 - Their mission is to facilitate legislation and reciprocity and improve educational opportunities and quality education for military children. They will also address other military quality of life issues.
 - Selectees are highly-skilled educational leaders familiar with the needs of the military child.

Donald H. Rumsfeld Secretary of Defense 1000 Defense Pentagon Washington, DC 20301-1000

Dear Don,

Last week I was invited by a group of your finest (Marine officers) to a seminar at Camp Pendicton, which is only a few miles north of where I live. These guys are great and have been assigned to a variety of tasks involved in the transition of Iraq from an occupied, economically dependent territory to a self-governing economically independent country. They have their work cut out for them under the best of circumstances. Why I'm writing to you, however, is because I was led to believe both from written material and during the course of our conversations that these tasks are facing additional potentially insurmountable obstacles placed in their way by the Coalition Provisional Authority and other directives coming from the U.S.

Because of my experience with the domestic economy of Vietnam in the 1970-1974 period under George Schultz and my work on a post-Castro transition plan for Cuba with the Cuban American National Foundation, when it was ably led by Jorge Mas Canosa (who passed away five years ago), i thought you might be interested in my two-cents worth (which has been discounted even below two cents). Rather than criticizing what I may not have fully understood of the Bremer and CPA plans, I've limited myself to what I consider essential do's and don'ts for creating an economically viable society out of a war-rayaged former totalitarian state.

A. Perhaps the most significant obstacle to reestablishing markets is the absence of a viable stable-valued means of payment and store of value (currency). To foster economic interchange, merchants, workers, savers and investors need a currency they can count on both over time and across space. This currency has to be stable in value over time to satisfy the needs of small savers, and to provide a basis for contracts and it has to be readily acceptable everywhere both inside and outside the region to facilitate trade and investment flows.

I can't begin to tell you how depressing it was to the local economy of Mexico in 1976 when the peso started to collapse after having been stable for years and years. Likewise, Argentina's recent abandonment of the currency peg (under de la Rus) and the subsequent financial collapse is a tragedy of immense proportions. Our own return to dollar credulity in the late 1970s and early 1980s under Paul Volcker and Ronald Reagan was the sine qua non of America's renaissance. Time and again countries are forced to relearn the powerful dictum of a sound money.

traq does not have the ability nor does it have powerful enough political institutions to pursue, maintain and monitor its own currency de novo. Iraq, if it is to have its own currency at all, must have that currency immutably linked to the dollar or euro. My personal suggestion would be to use either euros or dollars as the domestic currency of

Iraq and don't even pretend to introduce a new Iraqi currency. Penema is dollarized literally, and lots of other countries are dollarized de facto, and the system works extremely well.

(b)(6)

Attempting to set up a new currency puts at risk the entire traqi rehabilitation effort and could, if bad enough, force the lower echelons of the traqi economy into barter. Barter is inefficient, inconvenient and costly, and will materially impede the type of economic progress we all hope for. The upper levels will always be able to take advantage of foreign currencies.

B. Also of exceptional importance for a new Iraqi government is the structure of fiscal policy (taxation, spending and the Issuance of debt) at the national and provincial levels.

in countries like iraq where financial markets are years and years away from sophistication, there is a virtual certainty that budget deficits will lead to overuse of the printing press and hyperinflation. Budget deficits also can lead to excessively high tax rates and widespread disregard and flouting of the laws. Therefore, clear and concise tax policy explicitly segregated between federal and provincial prerogatives is of the essence.

trag is extraordinarily fortunate to be blessed with oil. As such severance taxes on oil should be a mainstay for government revenues — severance taxes are about as efficient as taxes get. If set up correctly, a good system of oil severance taxes is effectively a tax on foreigners and should do the least damage to the domestic economy of any tax system I know. We have two states that use them extensively, Alaska and Wyoming. It also makes lots of sense to collect revenues on a comprehensive flat rate basis on imports. Any type of sin tax is also a good option because the economic damage the tax does is on the disfavored products. Also property taxes should be used at the provincial level — property and real estate are about the only items that can't ascape local taxes by leaving. Any additional revenue supplements should be on a flat rate, broad-based, value added like tax.

Taxes that should be avoided are income taxes (especially progressivo) and small taxes where the costs of collection approach or exceed the revenue actually collected. The keys to good tax policy are:

- i.) Tax those items most that can escape the least, and conversely tax those least that can easily escape. It makes no sense to tax something that then flees the jurisdiction, goes underground or stops working. You not only don't get the rovenuo, but you also lose the benefits of the productive services.
- ii.) Tax those things most that you teast like (sin taxes). An additional benefit of sin taxes is that they do reduce the activity being taxed.
- iii.) Tax those things least where the collection costs are highest
- iv.) Broad based low rate taxes provide people with the least incentives to evade, avoid and otherwise not report taxable income and the least number of places where they can escape taxation.
- v.) Tax people fairty. People in like circumstances should have similar tax burdens. The perception of fairness is key to voluntary compliance.
- vi.) Make sure that taxation is not arbitrary or easily subject to discretionary changes. The power to tax in the wrong hands is an ugly weapon for exploitation.

(b)(6)

vii.) Lastly, collect only as much as you really need. Wasteful spending will always rise to the level of revenues.

These rules should help your efforts, if meticulously adhered to. Next to a bad money I know of nothing that will bring an economy to its knees faster than an unjust, inefficient, anti-growth, excessive system of taxation. This principal is universal.

On the spending side, priorities need to be set really quickly. In my view infrastructure is the first among equals such as: security (police), judiciary, water, electricity, telecommunications, roads, airports, hospitals and government itself. In the near term at least, school programs, women's issues, social redistribution and humanitarian projects are further down on the list. Once the economy is back on its feet there will be plenty of time to redress these wrongs. At the outset, government spending should be focused almost exclusively on getting the economy back on it's feet as quickly as possible. Without production there's nothing to redistribute. Feigning a big heart is often the quickest path to disaster. Iraq needs endemic production and government can be instrumental in achieving its goal,

- C. Forgiveness of debt owed by Iraq to foreign creditors can be enormously beneficial to Iraq if and only if Iraq has the infrastructure to take advantage of the additional resources financed by additional debt. If Iraq's incentive structure and system of self governance isn't well ranged, new debt to replace old debt is money down a rat hole. You really don't want to replace old bad loans with new bad loans. No one wins. Allowing Iraq to incur additional foreign debt obligations should only occur after Iraq's economy and government have been established. You're going to make lots of mistakes and will loam a lot from those mistakes. The smaller the scale of the Initial operations, the less Iraq will have to pay for lessons learned. The less costly the mistakes from which you team, the better off Iraq will be.
- D. Regulatory policy should be simple, small and fair. Laws should be basic and enforceable with quick and decisive action for violation. Having laws on the books that are not observed or actively disobeyed undermines the moral authority of all government. Keep regulations to a minimum, keep them simple and enforce them.
- E. Trade policy should be as open and as free as possible, restricting only those products which really cause harm (drugs, weapons, etc.). For revenue purposes you may want a low rate, broad-based tax on imports. It's interesting to note that for most of our country's history, tariffs provided the lion's share of our tax revenues. Tariffs plus an oil severance tax could well be the lion's share of future traqi tax revenues.

Trade is often an area where privilege and corruption take root. Here more than anywhere is where Iraq needs transparency, simplicity and fairness.

- F. A lot of attention is being placed on the need to provide an adequate number of jobs for Iraq. And while jobs per se clearly are important, increasing employment and creating jobs is often a catch phrase standing in for increasing output. In truth Iraq needs additional output far more than it needs more jobs. Now in some cases these two phrases are synonymous, but they may not be interchangeable in Iraq. Make work projects and avoiding reform for fear of losing jobs are sure fire losers. At no time and nowhere is it more important to recognize the primacy of efficiency, output and productivity than it is now in Iraq.
- G. Special industries like banking, glass factories, construction companies, etc. should be left to the marketplace. I know they are important, but so does every business person in Iraq. Those businesses will grow on their own if they are profitable.

(b)(6)

- H. Dismantling the former government and former military can be carried too far. Under Saddam Hussein there were no alternatives and therefore there are no substitutes waiting in the wings to take over the general functions of government and security. You do need an Iraqi presence to deal with, to support, and to nurture, in order for us to get out.
- Be very careful of U.S. quasi-governmental lobbying groups who see visions of sugerplums with each new contract with Iraq. These people rarely focus on what's good for the Iraqi people (or Americans for that matter) and yet they can wrap their desires in the full clothe of altruistic public interest.
- J. Don't expect Iraq or Iraqis to tove us right away. Evon though we have done an enormous amount for them, they still feel the intense pain of Saddam's victous dictatorship and the ensuing war and will lash out at anyone near them. In due course, if we continue to behave honorably, they will come to appreciate all that we have done for them and they will respect us for all that we have sacrificed on their behalf.
- K. Our purpose for being in Iraq has absolutely nothing to do with our desire to develop a free-enterprise, pro-growth, democratic, capitalist nation. Under Saddam Hussein, Iraq was a threat to our way of life and as such we terminated that threat. Anything additional we do for the Iraql people is truly out of the goodness of our hearts, not out of guilt. No matter what anyone may say, you were 100% correct in the actions you took. You make me very proud to be an American.

Hope these points are of some value. You have done and are doing the best job ever. I dream and hope for you continued success.

Your Buddy,

Arthur B. Laffer

MEMORANDUM FOR UNDER SECRETARY OF STATE FOR POLITICAL AFFAIRS (MARC GROSSMAN)

FROM: Douglas J. Feith, Under Secretary of Defense for Policy

SUBJECT: Peace Corps in Afghanistan

The situation in Afghanistan has improved markedly over the last two years. Non-governmental organizations operate nationwide, and much of the country is secure.

One key program missing from Afghanistan is the Peace Corps. In the past, the Peace Corps played an important role in the development of Afghanistan. In addition, the Peace Corps is seen as a measure of stability by investors and many in the international community.

I think it would be a good idea to stand up a Peace Corps office in Afghanistan immediately. I would be interested in your thoughts.

Thanks.

"Wisky" Aground: Inter-Service Can-Do Saves the Day!

by David F. Winkler, PhD

ne of the US Navy's most embarrassing episodes, the grounding of USS Missouri (BB-63) at Hampton Roads, Virginia, on 17January 1950, led to the relief of the commander. In the mud off the Army Officers Club at Fortress Monroe, efforts over two weeks to free the historic battlewag on drew national attention. Having to live down this incident, the Navy could have faced even greater ridicule with the grounding of Missouri's sister, USS Wisconsin (BB-64). This happened on the morning of 22 August 1951 in the Hudson River, overlooked by midtown New York-but actions taken by members of the Navy's sister sea services saved Wisconsin from infamy.

Wisconsin had been decommissioned and placed in mothballs on 1 July 1948, then recommissioned on 3 March 1951 in response to the Korean War. "Wisky," as she was affectionately known, had picked up 800 midshipmen at Norfolk, Virginia, for a trip to Halifax, Nova Scotia. Returning from Halifax on 21 August, Wisconsin passed through the Verrazano Narrows to moor in the Hudson River to give the crew some liberty before returning to Virginia.

The commanding officer was Captain Thomas Burrowes, USN. Joining Burrowes for the reactivation was Commander Charles H. Becker, who served as the executive officer. The navigator, Lieutenant Commander Elmo R. Zumwalt, Jr., was a more recent addition to the crew, having relieved the first navigator.

Burrowes, Becker and Zumwalt had hoped to have Wisconsin pierside for the New York stay. However, the only space that could accommodate the 860-foot-long warship was occupied by the liner Oneen Mary. The Port Authority did provide an option: a buoy moor in the Hudson River. This was acceptable to Burrowes's immediate superior, Rear Admiral Clarence E. Olsen, Commander Battleship Cruiser Division Two (ComBatCruDiv Two). RADM Olsen wanted the "middies" to have some good liberty and the proximity to Times Square and the attractions of mid-Manhattan assured increased time on the beach, He directed Burrowes to accept the Port Authority's proposal.

LCMs and tugs team up to keep the ship's stern from swinging into the New Jersey shore. (Photoscountesy Naval Historical Center)

Zurnwalt and Burrowes, however, were not convinced that the buoys could hold the pull of themassive battleship. Zumwalt sent an advance party out, and they confirmed the buoys were properly anchored to the bottom. Still Zumwalt felt uncomfortable. Burrowes agreed, and again requested an anchorage assignment. ComBatCruDivTwo responded: "Suggestyou carry out previously directed orders."

Accordingly, with the help of eight tugboats, Wisconsin latched herself to two buoys, one forward, one aft, headed downstream. At 1030, Captain Burrowes assumed duties as Senior Officer Present Afloat

Captain Francis E. Blake, USMC, commander of the Marine Detachment, returning to the battleship from a stint at legal school, reported aboard at 1040. He spoke with several more experienced deck officers during the evening meal about the possible hazards of the current moor. In the meantime, Captain Burrowes departed to overnight ashore with friends and family.

After a hectic first day, all was quiet on the battleship on the evening of the 21st. When Capt. Blake assumed the watch as in-port Officer of the Deck on the aft quarterdeck, only boiler 6 remained on line to provide auxiliary steam. As dawn broke over Manhattan on the 22nd, the Junior Officer of the Deck (JOOD) told Blake that the anchor watch had reported the port chain securing the ship to Buoy A, the upstream buoy, to be under heavy strain. Blake directed the JOOD to have the duty boatswain inspect the forward, downstream moor, and within minutes,

received a report that the wires were taut. He sent his messenger to contact the duty commander and then called the XO's state-room to inform Becker. While talking to Becker, Blake received a report that the stern was swinging to starboard; a glance out the porthole confirmed the bad news. The upstream mooring was dragging!

Back on the aft quarterdeck, Blake ordered LCMs (landing craft) assigned to Wisconsinto take position on the starboard quarterand start pushing. Meanwhile, word spread through the messdecks that the ship was adrift. Many of the middies, blearycycdafter liberty in the big city, treated the scuttlebutt with skepticism, until the squawk boxes announced "station the special sea detail" and called all hands topside to quarters. As the crew and middles streamed out to their mustering stations, the watch was shifted to the bridge. Blake remained on the aft quarterdeck while Zumwalt and Becker assessed the situation from above. At 0656, Zumwalt informed Becker that the stern was approaching shoal water. As the stern swungthirty degrees off center, the bridge team took every action they could conceive of. Wisconsin's remaining boats were called away. Passing tugs and additional LCMs from the landing ship dock Lindenwafdrespondedto signals for assistance. Down below, the engineers lit off boilers 1,2 and 5, At 0705, with the forward moor, downstream, beginning to drag, the signalman sent up the international distress signal. Becker ordered the starboard anchor dropped. That helped to hold the bow, but at 0710, Zumwalt received sounding reports indicating that the

11-L-0559/OSD/25745

Wisconsin's skipper, Captain Burrowes, delivers his accolade to Marine Corps Captain Blake—whoseprompt action saved the ship from damage, and her officers from humiliation.

stern had come into contact with the Hudson's muddy bottom. On a positive note, the grounding eased pressure on the forward, downstream moor.

The tide was low, with high tide scheduled at 1349. These tidal conditions bode well for refloating. Unfortunately, the engineers reported a slow loss of vacuum on turbo generators 5 and 6. Lacking circulating water due to the intakes resting on the mudflats, the engineers shut down the power plants at 0715. Power was lost throughout the ship.

By this time six tughouts had joined the gaggle of LCMs on the starhoard quarter in a seemingly futile attempt to move 45,000 tons of steel. But these efforts kept the battleship from moving farther toward the New Jersey shore. Over on the New York shore, Wisconsin's gig headed toward the 79th Street pier to pick up Captain Burrowes and the chief engineer, Lieutenant Commander G. Gardner.

At 0727 a message was dispatched to the commander of Naval Base New York to "expedite" sending additional tugs and a pilot. With the afteremergency diesel generator coming to life, lights throughout the ship began to flicker. However, attempts to restart generators 5 and δ using circulating water cut in from the firemain tailed and the lights again went out at 0755 when the afteremergency diesel had to be shut down due to overheating.

By this time both Burrowesand Gardner had returned. Heading down into the darkening engineering spaces, the Chief Engineer found out that the feed water supply in fireroom three was running critically low. He approved the transfer of reserve feedwaterfrom fireroom four so that boiler 6 could continue steaming. With electrical ventilation systems shut down, the heat below became nearly unbearable as the boilermen rotated in on five-minute shifts. Four men suffered heat exhaustion.

Up above, more tugs responded to *Wisconsin's* pleas for aid. And at 0844, the Coast Guard icebreaker W-91 took position on the starboard quarter and began pushing. The icebreaker's powerful thrust proved decisive. At 0855 the sounding of the depth of water aft, which had been reading 23 feet four inches, deepened to

25 feet. Wisconsin's stern began to swing back into the main channel of the Hudson. A few minutes later, lights and ventilation came on as the forward emergency diesel generated power to the main switchboard. Along the New Jersey Palisades, thousands watched the drama unfold.

Still, "Wisky" faced the predicament of being latched to two buoys, and there were concerns of fouling one of the battleship's four-screws in the wires. Burrowes cut loose the wires from Buoy B, aft, and the portanchor chain latched to Buoy A and raised the starboardanchor to get underway. With a pilot aboard and tugs alongside to guide the way, Wisconsin tested her engines. At 1057 she was under her own power, making her way down to an anchorage at Gravesend Bay near Concy Island.

Aware of the calamity of the Missouri grounding and the subsequent investigations and hearings. Zumwalt began drafting a chronology of events leading to the grounding. He never got to send it. As he readied the message for transmission, a message arrivedfromComBatCruDivTwo. Zumwalt recalled that Olsen wrote: "Regret the report of your incident but I am delighted to note there was no command error involved."

After four days of liberty, the mighty Wisconsinonce again raised her anchorand headed out to conduct gunnery practice and further training at Guantanamo, prior to her return to the Pacific for action off Korea. Eventually on 15 January 1952, while on the gun line off the Kosong area of Korea, Captain Burrowes recognized Marine Corps Captain Blake with a letter of commendation, crediting him with actions that were "measurably responsible for the prompt return of this vessel to safe waters."

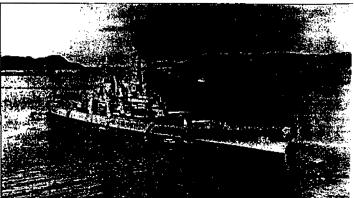

Unlike the *Missouri* grounding, there were no courts-martial, boards, hearings—not even a standard JAGMAN investigation. RADM Olsen, by accepting immediate responsibility for his error, shielded the battleship from unnecessary scrutiny and protected the careers of her officers.

RADM Olsen was relieved as Com-BatDivTwo shortly after the incident, but went on to serve the Navy for several more years with a final posting in Norway. Both Burrowes and Zumwalt attained Flag Rank. The recently deceased Zumwalt served as Chief of Naval Operations, 1970–74.

As for the cause of the grounding, the weatherwasblamed. Heavy summer downpours in upstate New York had flooded the Hudson's tributaries, leading to an unusually strong downstream current rushing up against Wisconsin's stern. The battleship's sailors clearly learned a lesson that remains valid today—that the true danger may arise from well beyond the horizon.

Dr. Winkler is an historian with the Nava. Historical Foundation and author of Cold War at Sea: High Seas Confrontation betweenthe United States and the Soviet United May 2000 from the Naval Institute Press

The lithe Formand powerful armament of USS Wisconsin, here off Japan is 1353, were & little avail when failed moorings let her drift into danger.

OSD 10942-04

the weapons-system area so it can continue to produce attractive weapons systems.

That said, the officials told the security cabinet that they have now revised this coming year's expected \$2.5b. in arms sales to \$4b., which would match the record for 2002, if not surpass it.

New York Post February 27, 2004 38. Comanche: A Good Kill

By Ralph Peters

Earlier this week, the U.S. Army scored a victory for our national security and the American taxpayer: It killed the Comanche attack-helicopter program, a \$40 billion legacy of the Cold War.

It was a tough decision. Over two decades, billions have been spent developing the Comanche. Had it gone into production, it would have been the finest attack helicopter in the world. And the Army had a deep emotional investment in the system.

The Army's chief of staff did the right thing. The funding was already in the pipeline. The Army could have grabbed the Comanche, then gone back to the Hill to beg for more money to pay for the gear our soldiers really need. Instead, the Army faced up to its budgetary - and moral - responsibilities.

Sexy though it was, the Comanche didn't offer a decisive advantage over systems already fielded. And the battlefield equation is changing. Drones handle more missions at less expense, from reconnaissance to precision the strikes. And service couldn't afford the luxury of buying the Comanche: Our soldiers have practical needs, from more personnel to a new generation of combat vehicles to replace an aging fleet.

To the Army's credit, its leadership faced the facts - not a routine practice in the Pentagon. Revelations of

military waste - real or imagined - always make headlines. But you don't see much on 24/7 when the Army declares that a weapon costs too much.

That same Army has been criticized as hidebound by civilian theorists who never ate a field ration. But the Army's deliberate approach paid solid dividends. Instead of gutting its combat power to conform to abstract theories, the Army is undertaking its most ambitious reorganization in half a century based upon battlefield experience.

Breaking down its divisions into ready-to-go-anywhere brigades, the Army's using lessons learned in Iraq and elsewhere to increase effectiveness while seeking new efficiencies. (And the Army was pretty damned good the way it was. Just ask Saddam.)

Today's chief of staff, Gen. Peter I Schoomaker, is building on the legacy of his proceessor, Gen. Enc. Shinseki, who was mocked by defense "intellectuals" for predicting that the occupation of Iraq would require more than 100,000 troops.

Shinseki was also attacked buying an innovative, cost-effective, wheeled combat vehicle, the Stryker. Disingenuously calling the Stryker a deathtrap, greedy contractors deployed their lawyers to force the Army to buy outdated junk. The Army beat them off. But self-interested critics continued to insist that the Stryker was bound to fail.

In Iraq, where it counts, the Stryker has been a noteworthy success. Even before planned upgrades, it's proven highly effective. The troops like it and trust it. And no matter what the armchair generals tell you, that's what matters.

TRADITIONALLY, only the Marine Corps and our chronically under- funded Coast Guard have been

responsible stewards of our tax dollars. Now the Army has turned a corner, demanding value and real utility, instead of gold-plating the McClellan saddle again.

The other services? A victim of its own success at dominating the seas, the Navy struggles forward in the absence of blue-water enemies. While shifting to deliver firepower deep inside enemy territory, the Navy remains a prisoner of traditions that undervalue cost-effective killing. We have the finest navy that ever sailed, but it doesn't deliver much bang for the buck.

The Navy's best friends are also its worst enemies - the senators from the shipbuilding states determined to see new hulls go down the slips, whether the Navy needs those hulls or not.

But the real problem is the Air Force. Despite endless hype about transformation, it refuses to cancel a single major program inherited from the Cold War.

The ultimate test of defense reform is the fate of the F-22 fighter. Conceived to dogfight Soviet planes that never got off the drawing board, it has no mission. No other air force is coming up to challenge us - and if they did, we already have the finest fighter aircraft in the world.

Factor in all the upstream and downstream costs, and F-22s will run at least \$180 million each. (Note to pilot: No parachute for you, pal - bring that baby home.)

is wildly The F-22 overpriced, conceptually outdated and nearly useless. And the contractors know it. As do Congress and the Air So Force. the aircraft's partisans cooked Rube-Goldberg redesign to world's give the expensive air-to-air fighter a ground-attack role. No matter that carrying bombs degrades its stealth capabilities or that it can't haul much ordnance, Presto, it's the answer to all our

needs.

Using the F-22 for ground attack is like using a Maserati as a pick-up truck.

It's not a question of cutting the Air Force budget. The service needs every penny it can get - for new and affordable ground-attack aircraft, tankers, bombers and transports. But the generals in blue suits need to face reality. We can't afford the planes we need if we buy the F-22 - which is nothing more than welfare for Lockheed Martin.

Our troops must be supplied with all they need, no matter the cost. But our military leadership has a responsibility to separate needs from wishes. At a time of exploding deficits and global warfare, we can't afford extravagant buys that offer no utility.

Defense Secretary Donald Rumsfeld loves to preach "transformation." So far, that's meant starving our troops while shoveling money into contractors' pockets. The only weapons system Rumsfeld killed was the Army's Crusader howitzer - a program that deserved to die, but peanuts compared to the F-22's cost.

If Rumsfeld's serious about improving our national defense, he needs to kill the F-22 immediately.

Meanwhile, here's a well-deserved salute to the U.S. Army. It did its duty and shot the horse it loved.

Ralph Peters is the author of "Beyond Baghdad; Postmodern War and Peace."

Sh JIS

INFO MEMO

June 28, 2004, 4:45 PM

FOR:

SECRETARY OF DEFENSE

FROM:

William J. Haynes II, General Counsel

SUBJECT: International Military Education and Training (IMET) and Foreign

Military Financing (FMF)

- You noted: "I think we've got to go to Congress and ask for changes in legislation on their decision to cancel IMET and FMF. Seems to me the one thing they ought never to cancel except in the most egregious circumstances is the educational exchange programs."
- For certain countries, the law provides that IMET and FMF funds are only available if the Secretary of State makes certain determinations related to protection of human rights. Some statutes provide for a waiver if determined and reported to Congress that waiver is in the U.S. national security interest.
- An example is the statute (Consolidated Appropriations Act, 2004) pertaining to Kazakhstan and Uzbekistan, which includes "national security interest" waiver authority for Kazakhstan but not for Uzbekistan.
- Options for dealing with such provisions include (1) working with the State Department to find ways to provide assistance through certifications and/or waivers; and (2) legislative initiatives.
- DoD's work with the State Department resulted in the Secretary of State's recent certification of Kazakhstan. IMET money and FMF is now being allocated.
- DoD is continuing to work with State Department on certifying Uzbekistan, emphasizing that denying Uzbekistan IMET funds is counterproductive to fostering improvement in protection of human rights.
- DoD is exploring legislative relief options by (1) obtaining at least a waiver provision for Uzbekistan in the FY 2005 appropriations bill; and (2) making the case generally to Congress that IMET should be excluded from such provisions since IMET programs directly support the objectives that are at the root of the legislation.

INFO MEMO

CM-1946-04 20 July 2004

FOR: SECRETARY OF DEFENSE

FROM: General Richard D. Mycrs, CJCS 1984 1/20

SUBJECT: Information

- Question. "What should we do about getting that person who said he knew information about abuses? He is in Roscoe Barlett's Congressional district and briefed Murtha and someone else." (TAB)
- Answer. The Army Criminal Investigation Division (CID) interviewed SGT Davis and there is no action required.
- Analysis
 - SGT Davis is currently assigned to Headquarters and Headquarters Company, Fort Lee, Virginia. While assigned in Iraq with 372nd MP Company, his duties included escorting detainees in and out of Abu Ghraib (Oct 2003-Nov 2003).
 - SGT Davis provided a statement to Army CID dated 27 May 04 in which he claims to have witnessed certain treatment of detainees at Abu Ghraib to include: 1) Naked detainees handcuffed together and to the bars of the cell being yelled at by interrogators; 2) Naked detainees being ordered to low-crawl on the floor, and; 3) PFC England taking photos of detainces.
 - SGT Davis reported what he saw to his chain of command while in Iraq. His platoon commander gave a written reprimand to a CPL involved in the events witnessed by SGT Davis. In addition, when it was brought to the attention of the Commanding Officer of Fort Lee that SGT Davis had information about possible detained abuse, the Commanding Officer reported this to CID, resulting in CID interviewing SGT Davis. The information provided by SGT Davis is still part of a current investigation. This information was provided by CID Agent Worth of the Detainee Task Force and the agent that interviewed SGT Davis.

11-L-0559/OSD/25763

The Honorable John Warner Chairman Committee on Armed Services United States Senate Washington, D.C. 20510-4601

MAR 3 1 2004

Dear Mr. Chairman:

As you know, Section 3204 of the Military Construction Appropriations Act, 2001 (P.L. 106-246) as amended restricts funding for U.S. personnel deployed in support of Plan Colombia to 400 military personnel and 400 civilian contractors. Current SOUTHCOM requirements to support Colombia are pushing the limits of this cap. We seek relief from this restriction.

The Administration proposes to increase the cap to 800 U.S. military personnel and 600 U.S. civilian contractors. This would improve SOUTHCOM's capabilities to help President Uribe in the fight against narcoterrorism.

Although the Administration opposes the cap and would prefer to have the restrictions lifted altogether, amending Section 3204 to support up to 800 U.S. military personnel and 600 U.S. civilian contractors would help greatly.

The Office of Management and Budget advises that this proposal is in accordance with the President's program.

Thank you for your support of the Department's counter-narcoterrorism efforts.

With best wishes, I remain

Yours truly,

Douglas J. Feith

OFFICE OF THE SECRETARY OF DEFENSE 1950 DEFENSE PENTAGON WASHINGTON, DC 20301-1950

INFO MEMO

JUL 2 1 2004

FOR: SECRETARY OF DEFENSE DEPUTY SECRETARY OF DEFENSE

FROM: Raymond F. DuBois, Director, Administration and Management

SUBJECT: Office of the Secretary of Defense (OSD) Military Detailees

- At a senior staff meeting, you raised a concern regarding the number of military detailees to the OSD staff. You asked all of your Principal Staff Assistants to review detailees working for them and revalidate their assignments or return them to their parent units. Currently, there are 55 military detailees assigned as outlined on the attached.
- The assigned detailees are concentrated primarily in OUSD(AT&L) (15), OUSD(P) (16), OUSD(P&R) (11) and OUSD(I) (4). The OUSD(C) currently does not have any military detailees assigned. Additionally, the OGC has 7 military detailees and both ASD(NII) and WHS have 1 assigned. The assigned numbers are in rough proportion to the size of the components' permanently assigned staff.
- Military detailees are typically detailed to the OSD staff for one year or less and remain permanently assigned to their parent organization's roles. Temporary details are authorized to support unforeseen temporary requirements, workload surges, or as a short term measure where the knowledge and skills are not otherwise available from within the organization. Many are detailed to provide temporary, but specific, military expertise required for the Global War on Terrorism and some are detailed for an educational/training experience. Additionally, roughly 10 percent of existing detailees are performing a liaison function between OSD and their parent unit.

ADMINISTRATION AND

OFFICE OF THE SECRETARY OF DEFENSE

1950 DEFENSE PENTAGON WASHINGTON, DC 20301-1950

INFO MEMO

FOR: SECRETARY OF DEFENSE

FROM: Raymond E. DuBois, Director, Administration and Management

SUBJECT: Office of the Secretary of Defense (OSD) Military Detailees

- In the attached snowflake, you asked the senior OSD staff to review the number of military detailees in their offices, determine if the number has crept up over the years, and if they could reduce the number. My staff consolidated the senior staff responses for your information (Tab A).
- In total, there are 51 military detailees. This represents a reduction of 24% from 2003.
 The OUSD(Policy), OUSD(Acquisition, Technology and Logistics), OUSD(Personnel and Readiness), and the DoD General Counsel account for the majority, with the remainder assigned to OUSD(Intelligence), OASD(Networks and Information Integration), Net Assessment, and Program Analysis and Evaluation.
- For the most part, they are being used in accordance with current guidance which authorizes their use to support unforeseen temporary requirements and workload surges, fill knowledge and skills gaps when not otherwise available from within the organization, and provide developmental training or act as a liaison between their parent unit and OSD. In a more limited number of instances, it appears that, based on some of the comments provided, a number do not conform to the definition of a detailed because they are supporting permanent workload requirements.
- While the reduction reflects progress in limiting military serving on the OSD staff, further scrutiny may present continuing opportunities to discipline our practices to refocus the OSD detail program to limited, temporary assignment of personnel as defined above. An important first step is the update of the applicable guidance to provide more clear-cut rules of engagement for application across the OSD staff. My staff is currently developing the updated guidance. In the interim, I will forward a memorandum to the senior staff outlining the salient program requirements.

OFFICE OF THE SECRETARY OF DEFENSE MILITARY DETAILEES

Military

	Military	
Component	<u>Detailees</u>	<u>Comments</u>
USD (AT&L)	13	Detailees to OUSD(AT&L) provide expertise in chemical and biological defense, chemical demilitarization and threat reduction, nuclear weapons, executive support, business transformation, treaty compliance oversight and other areas. Detailees provide field and headquarters level experience as well as unique sets of skills not readily available within existing staff.
USD (Policy)	16	OUSD(P) reduced military detailees from 24 in 2003 to 16 in 2004. Total in 2002 was 18,2001 was 21 and 2000 was 17.
USD (C)	0	None assigned.
USD (I)	4	Two of the four expired 31 Aug 04; no plans to replace. One is a Navy intern on a rotation program, the other has key knowledge of operational CI and will be continued. USD(I) is composed of 117 permanent billets. The broad role of this organization requires occasional assignment of detailees who are experts in various fields to augment specific tasks.
USD(P&R)	9	OUSD(P&R) has 9 authorized detailees but found 2 additional military working on the staff and has expedited their return to their services. USD(P&R) believes the 9 are being used appropriately, but will continue to closely monitor this programs.
ASD(NII)	1	Navy detailee provides unique expertise required for oversight of space-based environmental monitoring programs such as National Polar-orbiting Operational Satellite System program. OASD(NII) does not have the expertise on staff otherwise to perform this oversight.
ASD(LA)	0	None assigned.
ASD(PA)	0	None assigned.
DoD GC	6	GC will continue to scrutinize on-going requirements and reduce the number as soon as possible.
Dir, PA&E	1	Current detailee is here on part of Navy Medical Corps educational program. PA&E has had three or fewer detailees serving simultaneously and PA&E does not solicit the services for military detailees.
Dir, OT&E	0	None assigned.
ATSD(IO)	0	None currently assigned and do not envision the requirement for any in the future.
ODA&M	0	None assigned to ODA&M within the last three years.
Dir Net Asmt	1	Per request of Commandant, US Coast Guard, one USCG officer is detailed to NA. Detail enhances USCG long-term planning process by participating in net assessment analyses.
Dir Force Trans	0	None assigned.

LAW OF ADMINISTRATION FOR THE STATE OF IRAQ FOR THE TRANSITIONAL PERIOD (03/02/2004, 9:40pm)

PREAMBLE

The people of Iraq, striving to reclaim their freedom, which was usurped by the previous tyrannical regime; rejecting violence and coercion in all their forms, and especially when used as instruments of governance; determined that they shall hereafter remain a free people governed under the rule of law; affirming today their respect for international law, especially having been amongst the founders of the United Nations; working to reclaim their legitimate place among nations; and endeavouring at the same time to preserve the unity of their homeland in a spirit of fraternity and solidarity; in order to draw the features of the future new Iraq, and to establish the mechanisms aiming, amongst other aims, to erase the effects of racist and sectarian policies and practices; do now establish this Law to govern themselves during the transitional period until a duly elected government operating under a permanent and legitimate constitution achieving full democracy shall come into being.

CHAPTER ONE – FUNDAMENTAL PRINCIPLES

Article 1.

- (A) This Law shall be called the "Law of Administration for the State of Iraq for the Transitional Period," and the phrase "this Law" wherever it appears in this legislation shall mean the "Law of Administration for the State of Iraq for the Transitional Period."
- (B) Gender-specific language shall apply equally to male and female.
- (C) The Preamble to this Law is an integral part of this Law.

Article 2.

- (A) The term "transitional period" shall refer to the period beginning on 30 June 2004 and lasting until the formation of an elected Iraqi government pursuant to a permanent constitution as set forth in this Law, which in any case shall be no later than 31 December 2005, unless the provisions of Article 61 are applied.
- (B) The transitional period shall consist of two phases.
 - (1) The first phase shall begin with the formation of a fully sovereign Iraqi

Interim Government that takes power on 30 June 2004. This government shall be constituted in accordance with a process of extensive deliberations and consultations with cross-sections of the Iraqi people conducted by the Governing Council and the Coalition Provisional Authority and possibly in consultation with the United Nations. This government shall exercise authority in accordance with this Law, including the basic principles and rights specified herein, and with an annex that shall be agreed upon and issued before the beginning of the transitional period and that shall be an integral part of this Law.

(2) The second phase shall begin after the formation of the Iraqi Transitional Government, which will take place after elections for the National Assembly have been held as stipulated in this Law, provided that, if possible, these elections are not delayed beyond 31 December 2004, and, in any event, beyond 31 January 2005. This second phase shall end upon the formation of an Iraqi government pursuant to a permanent constitution. The provisions of this Law shall apply to this second phase of the transitional period.

Article 3.

- (A) This Law is the supreme law of the land and shall be binding in all parts of Iraq without exception. No amendment to this Law may be made except by a three-fourths majority of the members of the National Assembly and the unanimous approval of the Presidency Council. Likewise, no amendment may be made that could abridge in any way the rights of the Iraqi people cited in Chapter Two, extend the transitional period beyond the timeframe cited in this Law, delay the holding of elections to a new assembly, reduce the powers of the regions or governorates, or affect Islam or any other religions or sects and their rites.
- (B) Any legal provision that conflicts with this Law is null and void.
- (C) This Law shall cease to have effect upon the formation of an elected government pursuant to a permanent constitution.

Article 4.

The system of government in Iraq shall be republican, federal, democratic, and pluralistic, and powers shall be shared between the federal government and the regional governments, governorates, municipalities, and local administrations. The federal system shall be based upon geographic and historical realities and the separation of powers, and not upon origin, race, ethnicity, nationality, or confession.

Article 5.

The Iraqi Armed Forces shall be subject to the civilian control of the Iraqi Transitional Government, in accordance with the contents of Chapters Three and Five of this Law.

<u>Article 6.</u>

The Iraqi Transitional Government shall take effective steps to end the vestiges of the oppressive acts of the previous regime arising from forced displacement, deprivation of citizenship, expropriation of financial assets and property, and dismissal from government employment for political, racial, or sectarian reasons.

Article 7.

- (A) Islam is the official religion of the State and is to be considered a source of legislation. No law that contradicts the universally agreed tenets of Islam, the principles of democracy, or the rights cited in Chapter Two of this Law may be enacted during the transitional period. This Law respects the Islamic identity of the majority of the Iraqi people and guarantees the full religious rights of all individuals to freedom of religious belief and practice
- (B) Iraq is a country of many nationalities, and the Arab people in Iraq are an inseparable part of the Arab nation.

Article 8.

The flag, anthem, and emblem of the State shall be fixed by law.

Article 9.

The Arabic language and the Kurdish language are the two official languages of Iraq. The right of Iraqis to educate their children in their mother tongue, such as Turcoman, Syriac, or Armenian, in government educational institutions in accordance with educational guidelines, or in any other language in private educational institutions, shall be guaranteed. The scope of the term "official language" and the means of applying the provisions of this Article shall be defined by law and shall include:

- (1) Publication of the official gazette, in the two languages;
- (2) Speech and expression in official settings, such as the National Assembly, the Council of Ministers, courts, and official conferences, in either of the two languages;
- (3) Recognition and publication of official documents and correspondence in the

two languages;

- (4) Opening schools that teach in the two languages, in accordance with educational guidelines;
- (5) Use of both languages in any other settings enjoined by the principle of equality (such as bank notes, passports, and stamps);
- (6) Use of both languages in the federal institutions and agencies in the Kurdistan region.

CHAPTER TWO – FUNDAMENTAL RIGHTS

Article 10.

As an expression of the free will and sovereignty of the Iraqi people, their representatives shall form the governmental structures of the State of Iraq. The Iraqi Transitional Government and the governments of the regions, governorates, municipalities, and local administrations shall respect the rights of the Iraqi people, including those rights cited in this Chapter.

Article 11.

- (A) Anyone who carries Iraqi nationality shall be deemed a citizen. His citizenship shall grant him all the rights and duties stipulated in this Law and shall be the basis of his relation to the homeland and the State.
- (B) No Iraqi may have his citizenship withdrawn or be exiled unless he is a naturalized citizen who, as established in a court of law, made material falsifications on the basis of which citizenship was granted in his application for citizenship.
- (C) Each Iraqi shall have the right to carry more than one citizenship. Any Iraqi whose citizenship was withdrawn because he acquired another citizenship shall be deemed an Iraqi.
- (D) Any Iraqi whose Iraqi citizenship was withdrawn for political, religious, racial, or sectarian reasons has the right to reclaim his Iraqi citizenship.
- (E) Decision Number 666 (1980) of the dissolved Revolutionary Command Council is annuled, and anyone whose citizenship was withdrawn on the basis of this decree shall be deemed an Iraqi.

- (F) The National Assembly must issue laws pertaining to citizenship and naturalization consistent with the provisions of this Law
- (G) The Courts shall examine all disputes airising from the application of the provisions relating to citizenship.

Article 12.

All Iraqis are equal in their rights without regard to gender, sect, opinion, belief, nationality, religion, or origin, and they are equal before the law. Discrimination against an Iraqi citizen on the basis of his gender, nationality, religion, or origin is prohibited. Everyone has the right to life, liberty, and the security of his person. No one may be deprived of his life or liberty, except in accordance with legal procedures. All are equal before the courts.

Article 13.

- (A) Public and private freedoms shall be protected.
- (B) The right of free expression shall be protected.
- (C) The right of free peaceable assembly and the right to organize freely into associations and political parties, as well as the right to form and join unions freely, in accordance with the law, shall be guaranteed.
- (D) Each Iraqi has the right of free movement in all parts of Iraq and the right to travel abroad and return freely.
- (E) Each Iraqi has the right to demonstrate and strike peaceably in accordance with the law.
- (F) Each Iraqi has the right to freedom of thought, conscience, and religious belief and practice. Coercion in such matters shall be prohibited.
- (G) Slavery, the slave trade, forced labor, and involuntary servitude [CHECK TO ENSURE SAMIR SUMAIDY ADDITION IS IN] shall be forbidden.
- (H) Each Iraqi has the right to privacy.

Article 14.

The individual has the right to security, education, health care, and social security. The Iraqi State and its governmental units, including the regions, governorates, municipalities, and local

administrations, shall strive, within the limits of their resources and with due regard to other vital needs, to provide prosperity and employment opportunities to the people.

Article 15.

- (A) No civil law shall have retroactive effect unless the law so stipulates. There shall be neither a crime, nor punishment, except by law in effect at the time the crime is committed.
- (B) Police, investigators, or other governmental authorities may not violate the sanctity of private residences, whether these authorities belong to the federal or regional governments, governorates, municipalities, or local administrations, unless a judge or investigating magistrate has issued a search warrant in accordance with applicable law on the basis of information provided by a sworn individual who knew that bearing false witness would render him liable to punishment. Extreme exigent circumstances, as determined by a court of competent jurisdiction, may justify a warrantless search, but such exigencies shall be narrowly construed. In the event that a warrantless search is carried out in the absence of an extreme exigent circumstance, the evidence so seized, and any other evidence found derivatively from such search, shall be inadmissible in connection with a criminal charge, unless the court determines that the person who carried out the warrantless search believed reasonably and in good faith that the search was in accordance with the law.
- (C) No one may be unlawfully arrested or detained, and no one may be detained by reason of political or religious beliefs.
- (D) All persons shall be guaranteed the right to a fair and public hearing by an independent and impartial tribunal, regardless of whether the proceeding is civil or criminal. Notice of the proceeding and its legal basis must be provided to the accused without delay.
- (E) The accused is innocent until proven guilty pursuant to law, and he likewise has the right to engage independent and competent counsel, to remain silent in response to questions addressed to him with no compulsion to testify for any reason, to participate in preparing his defense, and to summon and examine witnesses or to ask the judge to do so. At the time a person is arrested, he must be notified of these rights.
- (F) The right to a fair, speedy, and open trial shall be guaranteed.
- (G) Every person deprived of his liberty by arrest or detention shall have the right of recourse to a court to determine the legality of his arrest or detention without delay and to order his release if this occurred in an illegal manner.

- (H) After being found innocent of a charge, an accused may not be tried once again on the same charge.
- (I) Civilians may not be tried before a military tribunal. Special or exceptional courts may not be established.
- (J) Torture in all its forms, physical or mental, shall be prohibited under all circumstances, as shall be cruel, inhuman, or degrading treatment. No confession made under compulsion, torture, or threat thereof shall be relied upon or admitted into evidence for any reason in any proceeding, whether criminal or otherwise.

Article 16.

- (A) Public property is sacrosanct, and its protection is the duty of every citizen.
- (B) The right to private property shall be protected, and no one may be prevented from disposing of his property except within the limits of law. No one shall be deprived of his property except by eminent domain, in circumstances and in the manner set forth in law, and on condition that he is paid just compensation.
- (C) Each Iraqi citizen shall have the full and unfettered right to own real property in all parts of Iraq without restriction.

Article 17.

It shall not be permitted to possess, bear, buy, or sell arms except on licensure issued in accordance with the law.

Article 18.

There shall be no taxation or fee except by law.

Article 19.

No political refugee who has been granted asylum pursuant to applicable law may be surrendered or returned to the country from which he fled.

Article 20.

(A) Every Iraqi who fulfills the conditions stipulated in the electoral law has the right to stand for election and cast his ballot secretly in free, open, fair, competitive, and periodic elections.

(B) No Iraqi may be discriminated against for purposes of voting in elections on the basis of gender, religion, race, belief, sect, ethnic origin, language, wealth, or literacy.

Article 21.

Neither the Iraqi Transitional Government nor the governments and administrations of the regions, governorates, and municipalities, nor local administrations may interfere with the right of the Iraqi people to develop the institutions of civil society, whether in cooperation with international civil society organizations or otherwise.

Article 22.

If, in the course of his work, an official of any government office, whether in the federal government, the regional governments, the governorate and municipal administrations, or the local administrations, deprives an individual or a group of the rights guaranteed by this Law or any other Iraqi laws in force, this individual or group shall have the right to maintain a cause of action against that employee to seek compensation for the damages caused by such deprivation, to vindicate his rights, and to seek any other legal measure. If the court decides that the official had acted with a sufficient degree of good faith and in the belief that his actions were consistent with the law, then he is not required to pay compensation.

Article 23.

The enumeration of the foregoing rights must not be interpreted to mean that they are the only rights enjoyed by the Iraqi people. They enjoy all the rights that befit a free people possessed of their human dignity, including the rights stipulated in international treaties and agreements, other instruments of international law that Iraq has signed and to which it has acceded, and others that are deemed binding upon it, and in the law of nations. Non-Iraqis within Iraq shall enjoy all human rights not inconsistent with their status as non-citizens.

CHAPTER THREE - THE IRAQI TRANSITIONAL GOVERNMENT

Article 24.

- (A) The Iraqi Transitional Government, which is also referred to in this Law as the federal government, shall consist of the National Assembly; the Presidency Council; the Council of Ministers, including the Prime Minister; and the judicial authority.
- (B) The three authorities, legislative, executive, and judicial, shall be separate and independent of one another.

(C) No official or employee of the Iraqi Transitional Government shall enjoy immunity for criminal acts committed while in office.

Article 25.

The Iraqi Transitional Government shall have exclusive competence in the following matters:

- (A) Formulating foreign policy and diplomatic representation; negotiating, signing, and ratifying international treaties and agreements; formulating foreign economic and trade policy and sovereign debt policies;
- (B) Formulating and executing national security policy, including creating and maintaining armed forces to secure, protect, and guarantee the security of the country's borders and to defend Iraq;
- (C) Formulating fiscal policy, issuing currency, regulating customs, regulating commercial policy across regional and governorate boundaries in Iraq, drawing up the national budget of the State, formulating monetary policy, and establishing and administering a central bank;
- (D) Regulating weights and measures and formulating a general policy on wages;
- (E) Managing, in consultation with the regions and governorates, the natural resources of Iraq, which belong to all the people of all the regions and governorates of Iraq; and distributing the revenues resulting from their sale through the national budgeting process in an equitable manner proportional to the distribution of population throughout the country, and with due regard for areas that were unjustly deprived of these revenues by the previous regime, for dealing with their situations in a positive way, for their needs, and for the degree of development of the different areas of the country;
- (F) Regulating Iraqi citizenship, immigration, and asylum;
- (G) Regulating telecommunications policy.

Article 26.

(A) Except as otherwise provided in this Law, the laws in force in Iraq on 30 June 2004 shall remain in effect unless and until rescinded or amended by the Iraqi Transitional Government in accordance with this Law.

- (B) Legislation issued by the federal legislative authority shall supersede any other legislation issued by any other legislative authority in the event that they contradict each other, except as provided in Article 54(B).
- (C) The laws, regulations, orders, and directives issued by the Coalition Provisional Authority pursuant to its authority under international law shall remain in force until rescinded or amended by legislation duly enacted and having the force of law.

Article 27.

- (A) The Iraqi Armed Forces shall consist of the active and reserve units, and elements thereof. The purpose of these forces is the defense of Iraq.
- (B) Armed forces and militias not under the command structure of the Iraqi Transitional Government are prohibited, except as provided by federal law.
- (C) The Iraqi Armed Forces and its personnel, including military personnel working in the Ministry of Defense or any offices or organizations subordinate to it, may not stand for election to political office, campaign for candidates, or participate in other activities forbidden by Ministry of Defense regulations. This ban encompasses the activities of the personnel mentioned above acting in their personal or official capacities. Nothing in this Article shall infringe upon the right of these personnel to vote in elections.
- (D) The Iraqi Intelligence Service shall collect information, assess threats to national security, and advise the Iraqi government. This Service shall be under civilian control, shall be subject to legislative oversight, and shall operate pursuant to law and in accordance with recognized principles of human rights.
- (E) The Iraqi Transitional Government shall respect and implement Iraq's international obligations regarding the non-proliferation, non-development, non-production, and non-use of nuclear, chemical, and biological weapons, and associated equipment, materiel, technologies, and delivery systems for use in the development, manufacture, production, and use of such weapons.

Article 28.

(A) Members of the National Assembly; the Presidency Council; the Council of Ministers, including the Prime Minister; and judges and justices of the courts may not be appointed to any other position in or out of government. Any member of the National Assembly who becomes a member of the Presidency Council or Council of Ministers shall be deemed to have resigned his membership in the National Assembly. (B) In no event may a member of the armed forces be a member of the National Assembly, minister, Prime Minister, or member of the Presidency Council unless the individual has resigned his commission or rank, or retired from duty at least eighteen months prior to serving.

Article 29.

Upon the assumption of full authority by the Iraqi Interim Government in accordance with Article 2(B)(1), above, the Coalition Provisional Authority shall be dissolved and the work of the Governing Council shall come to an end.

CHAPTER FOUR - THE TRANSITIONAL LEGISLATIVE AUTHORITY

Article 30.

- (A) During the transitional period, the State of Iraq shall have a legislative authority known as the National Assembly. Its principal mission shall be to legislate and exercise oversight over the work of the executive authority.
- (B) Laws shall be issued in the name of the people of Iraq. Laws, regulations, and directives related to them shall be published in the official gazette and shall take effect as of the date of their publication, unless they stipulate otherwise.
- (C) The National Assembly shall be elected in accordance with an electoral law and a political parties law. The electoral law shall be designed to achieve the goal of having women constitute no less than one-quarter of the members of the National Assembly and of having fair representation for all communities in Iraq, including the Turcomans, Chaldo Assyrians, and others.
- (D) Elections for the National Assembly shall take place by 31 December 2004 if possible, and in any case no later than by 31 January 2005.

Article 31.

- (A) The National Assembly shall consist of 275 members. It shall enact a law dealing with the replacement of its members in the event of resignation, removal, or death.
- (B) A nominee to the National Assembly must fulfill the following conditions:
 - (1) He shall be an Iraqi no less than 30 years of age.

- (2) He shall not have been a member of the dissolved Ba'ath Party with the rank of Division Member or higher, unless exempted pursuant to the applicable legal rules.
- (3) If he was once a member of the dissolved Ba'ath Party with the rank of Full Member, he shall be required to sign a document renouncing the Ba'ath Party and disavowing all of his past links with it before becoming eligible to be a candidate, as well as to swear that he no longer has any dealings or connection with Ba'ath Party organizations. If it is established in court that he lied or fabricated on this score, he shall lose his seat in the National Assembly.
- (4) He shall not have been a member of the former agencies of repression and shall not have contributed to or participated in the persecution of citizens.
- (5) He shall not have enriched himself in an illegitimate manner at the expense of the homeland and public finance.
- (6) He shall not have been convicted of a crime involving moral turpitude and shall have a good reputation.
- (7) He shall have at least a secondary school diploma, or equivalent
- (8) He shall not be a member of the armed forces at the time of his nomination.

Article 32.

- (A) The National Assembly shall draw up its own internal procedures, and it shall sit in public session unless circumstances require otherwise, consistent with its internal procedures. The first session of the Assembly shall be chaired by its oldest member.
- (B) The National Assembly shall elect, from its own members, a president and two deputy presidents of the National Assembly. The president of the National Assembly shall be the individual who receives the greatest number of votes for that office; the first deputy president the next highest; and the second deputy president the next. The president may vote on an issue, but may not participate in the debates, unless he temporarily steps out of the chair immediately prior to addressing the issue.
- (C) A bill shall not be voted upon by the National Assembly unless it has been read twice at a regular session of the Assembly, on condition that at least two days intervene between the two readings, and after the bill has been placed on the agenda of the session at least four days prior to the vote.

Article 33.

- (A) Meetings of the National Assembly shall be public, and transcripts of its meetings shall be recorded and published. The vote of every member of the National Assembly shall be recorded and made public. Decisions in the National Assembly shall be taken by simple majority unless this Law stipulates otherwise.
- (B) The National Assembly must examine bills proposed by the Council of Ministers, including budget bills.
- (C) Only the Council of Ministers shall have the right to present a proposed national budget. The National Assembly has the right to reallocate proposed spending and to reduce the total amounts in the general budget. It also has the right to propose an increase in the overall amount of expenditures to the Council of Ministers if necessary.
- (D) Members of the National Assembly shall have the right to propose bills, consistent with the internal procedures that drawn up by the Assembly.
- (E) The Iraqi Armed Forces may not be dispatched outside Iraq even for the purpose of defending against foreign aggression except with the approval of the National Assembly and upon the request of the Presidency Council.
- (F) Only the National Assembly shall have the power to ratify international treaties and agreements.
- (G) The oversight function performed by the National Assembly and its committees shall include the right of interpellation of executive officials, including members of the Presidency Council, the Council of Ministers, including the Prime Minister, and any less senior official of the executive authority. This shall encompass the right to investigate, request information, and issue subpoenas for persons to appear before them.

Article 34.

Each member of the National Assembly shall enjoy immunity for statements made while the Assembly is in session, and the member may not be sued before the courts for such. A member may not be placed under arrest during a session of the National Assembly, unless the member is accused of a crime and the National Assembly agrees to lift his immunity or if he is caught *in flagrante delicto*.

CHAPTER FIVE – THE TRANSITIONAL EXECUTIVE AUTHORITY

Article 35.

The executive authority during the transitional period shall consist of the Presidency Council, the Council of Ministers, and its presiding Prime Minister.

Article 36.

- (A) The National Assembly shall elect a President of the State and two Deputies. They shall form the Presidency Council, the function of which will be to represent the sovereignty of Iraq and oversee the higher affairs of the country. The election of the Presidency Council shall take place on the basis of a single list and by a two-thirds majority of the members' votes. The National Assembly has the power to remove any member of the Presidency Council of the State for incompetence or lack of integrity by a three-fourths majority of its members' votes. In the event of a vacancy in the Presidency Council, the National Assembly shall, by a vote of two-thirds of its members, elect a replacement to fill the vacancy.
- (B) It is a prerequisite for a member of the Presidency Council to fulfill the same conditions as the members of the National Assembly, with the following observations:
 - (1) He must be at least forty years of age.
 - (2) He must possess a good reputation, integrity, and rectitude.
 - (3) If he was a member of the dissolved Ba'ath Party, he must have left the dissolved Party at least ten years before its fall.
 - (4) He must not have participated in repressing the *intifada* of 1991 or the Anfal campaign and must not have committed a crime against the Iraqi people.
- (C) The Presidency Council shall take its decisions unanimously, and its members may not deputize others as proxies.

Article 37.

The Presidency Council may veto any legislation passed by the National Assembly, on condition that this be done within fifteen days after the Presidency Council is notified by the President of the National Assembly of the passage of such legislation. In the event of veto, the legislation shall be returned to the National Assembly, which has the right to pass the legislation again by a two-thirds majority not subject to veto within a period not to exceed thirty days.

Article 38.

- (A) The Presidency Council shall name a Prime Minister unanimously, as well as the Council of Ministers upon the recommendation of the Prime Minister. The Prime Minister and Council of Ministers shall then seek to obtain a vote of confidence by simple majority from the National Assembly prior to commencing their work as a government. The Presidency Council must agree on a candidate for the post of Prime Minister within two weeks. In the event that it fails to do so, the responsibility of naming the Prime Minister reverts to the National Assembly. In that event, the National Assembly must confirm the nomination by a two-thirds majority. If the Prime Minister is unable to nominate his Council of Ministers within one month, the Presidency Council shall name another Prime Minister.
- (B) The qualifications for Prime Minister must be the same as for the members of the Presidency Council except that his age must not be less than 35 years upon his taking office.

Article 39.

- (A) The Council of Ministers shall, with the approval of the Presidency Council, appoint representatives to negotiate the conclusion of international treaties and agreements.

 The Presidency Council shall recommend passage of a law by the National Assembly to ratify such treaties and agreements.
- (B) The Presidency Council shall carry out the function of commander-in-chief of the Iraqi Armed Forces only for ceremonial and protocol purposes. It shall have no command authority. It shall have the right to be briefed, to inquire, and to advise. Operationally, national command authority on military matters shall flow from the Prime Minister to the Minister of Defense to the military chain of command of the Iraqi Armed Forces.
- (C) The Presidency Council shall, as more fully set forth in Chapter Six and Seven, below, appoint, upon recommendation of the Higher Juridical Council, the Presiding Judge and members of the Federal Supreme Court, as well as the members of the national commissions, in accordance with the conditions appearing in the relevant Articles below. [CHECK TO CONFIRM]
- (D) The Council of Ministers shall appoint the Director-General of the Iraqi National Intelligence Service, as well as general officers of the Iraqi Armed Forces. Such appointments shall be subject to confirmation by the National Assembly by simple majority of those of its members present.

Article 40.

- (A) The Prime Minister and the ministers shall be responsible before the National Assembly, and this Assembly shall have the right to withdraw its confidence either in the Prime Minister or in the ministers collectively or individually. In the event that confidence in the Prime Minister is withdrawn, the entire Council of Ministers shall be dissolved, and Article 40(B), below, shall become operative.
- (B) In the event of a vote of no confidence with respect to the entire Council of Ministers, the Prime Minister and Council of Ministers shall remain in office to carry out their functions for a period not to exceed thirty days, until the Presidency Council appoints a new Prime Minister, consistent with Article 38, above.

Article 41.

The Prime Minister shall have day-to-day responsibility for the management of the government, and he may dismiss ministers with the approval of an simple majority of the National Assembly. The Presidency Council may, upon the recommendation of the Commission on Public Integrity after the exercise of due process, dismiss the Prime Minister or the ministers.

Article 42.

The Council of Ministers shall draw up rules of procedure for its work and issue the regulations and directives necessary to enforce the laws. It also has the right to propose bills to the National Assembly. Each ministry has the right, within its competence, to nominate the employees of special grades, deputy ministers, and ambassadors. After the Council of Ministers approves these nominations, they shall be submitted to the Presidency Council for ratification. All decisions of the Council of Ministers shall be taken by simple majority of those of its members present.

CHAPTER SIX – THE FEDERAL JUDICIAL AUTHORITY

Article 43.

- (A) The judiciary is independent, and it shall in no way be administered by the executive authority, including the Ministry of Justice. The judiciary shall enjoy exclusive competence to determine the innocence or guilt of an accused pursuant to law, without interference from the legislative or executive authorities.
- (B) All judges sitting in their respective courts as of 1 July 2004 will continue in office thereafter, unless removed from office pursuant to this Law.
- (C) The National Assembly shall establish an independent and adequate budget for the judiciary.

(D) Federal courts shall adjudicate matters that arise from the application of federal laws. The establishment of these courts shall be within the exclusive competence of the federal government. The establishment of these courts in the regions shall be in consultation with the presidents of the judicial councils in the regions, and priority in appointing or transferring judges to these courts shall be given to judges resident in the region.

Article 44.

A Higher Juridical Council shall be established and assume the role of the Council of Judges. The Higher Juridical Council shall supervise the federal judiciary and shall administer its budget. This Council shall be composed of the Presiding Judge of the Federal Supreme Court, the presiding judge and deputy presiding judges of the federal Court of Cassation, the presiding judges of the federal Courts of Appeal, and the presiding judge and two deputy presiding judges of each regional court of cassation. The Presiding Judge of the Federal Supreme Court shall preside over the Higher Juridical Council. In his absence, the presiding judge of the federal Court of Cassation shall preside over the Council.

Article 45.

- (A) The federal judicial branch shall include existing courts outside the Kurdistan region, including courts of first instance; the Central Criminal Court of Iraq; Courts of Appeal; and the Court of Cassation, which shall be the court of last resort except as provided in Article 46 of this Law. Additional federal courts may be established by law. The appointment of judges for these courts shall be made by the Higher Juridical Council. This Law preserves the qualifications necessary for the appointment of judges, as defined by law.
- (B) The decisions of regional and local courts, including the courts of the Kurdistan region, shall be final, but shall be subject to review by the federal judiciary if they conflict with this Law or any federal law. Procedures for such review shall be defined by law.

Article 46.

- (A) A court called the Federal Supreme Court shall be constituted by law in Iraq.
- (B) The jurisdiction of the Federal Supreme Court shall be as follows:
 - (1) Original and exclusive jurisdiction in legal proceedings between the Iraqi Transitional Government and the regional governments, governorate and municipal administrations, and local administrations.

- Original and exclusive jurisdiction, on the basis of a complaint from a claimant or a referral from another court, to review claims that a law, regulation, or directive issued by the federal or regional governments, the governorate or municipal administrations, or local administrations is inconsistent with this Law.
- (3) Ordinary appellate jurisdiction of the Federal Supreme Court shall be defined by federal law.
- (C) Should the Federal Supreme Court rule that a challenged law, regulation, directive, or measure is inconsistent with this Law, it shall be deemed null and void.
- (D) The Federal Supreme Court shall create and publish regulations regarding the procedures required to bring claims and to permit attorneys to practice before it. It shall take its decisions by simple majority, except decisions with regard to the proceedings stipulated in Article 46(B)(1), which must be by a two-thirds majority. Decisions shall be binding. The Court shall have full powers to enforce its decisions, including the power to issue citations for contempt of court and the measures that flow from this.
- (E) The Federal Supreme Court shall consist of nine members. The Higher Juridical Council shall, in consultation with the regional judicial councils, initially nominate no less than eighteen and up to twenty-seven individuals to fill the initial vacancies in the aforementioned Court. It will follow the same procedure thereafter, nominating three members for each subsequent vacancy that occurs by reason of death, resignation, or removal. The Presidency Council shall appoint the members of this Court and name one of them as its Presiding Judge. In the event an appointment is rejected, the Higher Juridical Council shall nominate a new group of three candidates.

Article 47.

No judge or member of the Higher Juridical Council may be removed unless he is convicted of a crime involving moral turpitude or corruption or suffers permanent incapacity. Removal shall be on the recommendation of the Higher Juridical Council, by a decision of the Council of Ministers, and with the approval of the Presidency Council. Removal shall be executed immediately after issuance of this approval. A judge who has been accused of such a crime as cited above shall be suspended from his work in the judiciary until such time as the case arising from what is cited in this Article is adjudicated. No judge may have his salary reduced or suspended for any reason during his period of service.

CHAPTER SEVEN - THE SPECIAL TRIBUNAL AND NATIONAL COMMISSIONS

Article 48.

- (A) The statute establishing the Iraqi Special Tribunal issued on 10 December 2003 is confirmed. That statute exclusively defines its jurisdiction and procedures, notwithstanding the provisions of this Law.
- (B) No other court shall have jurisdiction to examine cases within the competence of the Iraqi Special Tribunal, except to the extent provided by its statute.
- (C) The judges of the Iraqi Special Tribunal shall be appointed in accordance with the provisions of its founding Statute.

Article 49.

- (A) The establishment of national commissions such as the Commission on Public Integrity, the Iraqi Property Claims Commission, and the Higher National De-Ba'athification Commission is confirmed, as is the establishment of commissions formed after this Law has gone into effect. The members of these national commissions shall continue to serve after this Law has gone into effect, taking into account the contents of Article 51, below.
- (B) The method of appointment to the aforementioned national commissions or any other commission that the National Assembly may create in the future shall be the same as that for the Presiding Judge and judges of the Federal Supreme Court, as contained in Article 46(E), above.

Article 50.

The Iraqi Transitional Government shall establish a National Commission for Human Rights for the purpose of executing the commitments relative to the rights set forth in this Law and to examine complaints pertaining to violations of human rights. The Commission shall be established in accordance with the Paris Principles issued by the United Nations on the responsibilities of national institutions. This Commission shall include an Office of the Ombudsman to inquire into complaints. This office shall have the power to investigate, on its own initiative or on the basis of a complaint submitted to it, any allegation that the conduct of the governmental authorities is arbitrary or contrary to law.

Article 51.

No member of the Iraqi Special Tribunal or of any commission established by the federal government may be employed in any other capacity in or out of government. This prohibition is

valid without limitation, whether it be within the executive, legislative, or judicial authority of the Iraqi Transitional Government. Members of the Special Tribunal may, however, suspend their employment in other agencies while they serve on the aforementioned Tribunal.

CHAPTER EIGHT – REGIONS, GOVERNORATES, AND MUNICIPALITIES

Article 52.

The design of the federal system in Iraq shall be established in such a way as to prevent the concentration of power in the federal government that allowed the continuation of decades of tyranny and oppression under the previous regime. This system shall encourage the exercise of local authority by local officials in every region and governorate, thereby creating a united Iraq in which every citizen actively participates in governmental affairs, secure in his rights and free of domination.

Article 53.

- (A) The Kurdistan Regional Government is recognized as the official government of the territories that were administered by the that government on 19 March 2003 in the governorates of Dohuk, Arbil, Sulaimaniya, Kirkuk, Diyala and Neneveh. The term "Kurdistan Regional Government" shall refer to the Kurdistan National Assembly, the Kurdistan Council of Ministers, and the regional judicial authority in the Kurdistan region.
- (B) The boundaries of the eighteen governorates shall remain without change during the transitional period.
- (C) Governorates outside the Kurdistan region, with the exception of Baghdad and Kirkuk, shall have the right to form regions from amongst themselves. The mechanisms for forming such regions may be [EITHER "PROPOSED" OR "PREPARED"] by the Iraqi Interim Government, and shall be presented and considered by the elected National Assembly for enactment into law. In addition to being approved by the National Assembly, any legislation proposing the formation of a particular region must be approved in a referendum of the people of the relevant governorates. [THIS IS OUR BEST EFFORT TO CAPTURE THE ESSENCE OF THE AGREEMENT; PLEASE REVIEW.]
- (D) This Law shall guarantee the administrative, cultural, and political rights of the Turcomans, ChaldoAssyrians, and all other citizens.

Article 54.

- (A) The Kurdistan Regional Government shall continue to perform its current functions throughout the transitional period, except with regard to those issues which fall within the exclusive competence of the federal government as specified in this Law. Financing for these functions shall come from the federal government, consistent with current practice and in accordance with Article 25(E) of this Law. The Kurdistan Regional Government shall retain regional control over police forces and internal security, and it will have the right to impose taxes and fees within the Kurdistan region.
- (B) With regard to the application of federal laws in the Kurdistan region, the Kurdistan National Assembly shall be permitted to amend the application of any such law within the Kurdistan region, but only to the extent that this relates to matters that are not within the provisions of Articles 25 and 43(D) of this Law pertaining to the exclusive competence of the federal government.

Article 55.

- (A) Each governorate shall have the right to form a Governorate Council, name a Governor, and form municipal and local councils. No member of any regional government, governor, or member of any governorate, municipal, or local council may be dismissed by the federal government or any official thereof, except upon conviction of a crime by a court of competent jurisdiction as provided by law. No regional government may dismiss a Governor or member or members of any governorate, municipal, or local council. No Governor or member of any Governorate, municipal, or local council shall be subject to the control of the federal government except to the extent that the matter relates to the competences set forth in Article 25 and 43(D), above.
- (B) Each Governor and member of each Governorate Council who holds office as of 1 July 2004, taking into account the law on local government that shall be issued, shall remain in place until such time as free, direct, and full elections, conducted pursuant to law, are held, or, unless, prior to that time, he voluntarily gives up his position, is removed upon his conviction for a crime involving moral turpitude or related to corruption, or upon being stricken with permanent incapacity, or is dismissed in accordance with the law cited above. When a governor, mayor, or member of a council is dismissed, the relevant council may receive applications from any eligible resident of the governorate to fill the position. Eligibility requirements shall be the same as those set forth in Article 31 for membership in the National Assembly. The new candidate must receive a majority vote of the council to assume the vacant seat.

Article 56.

- (A) The Governorate Councils shall assist the federal government in the coordination of federal ministry operations within the governorate, including the review of annual ministry plans and budgets with regard to activities in the governorate. Governorate Councils shall be funded from the general budget of the State, and these Councils shall also have the authority to increase their revenues independently by imposing taxes and fees; to organize the operations of the Governorate administration; to initiate and implement province-level projects alone or in partnership with international, and non-governmental organizations; and to conduct other activities insofar as is consistent with federal laws.
- (B) The Qada' and Nahiya councils and other relevant councils shall assist in the performance of federal responsibilities and the delivery of public services by reviewing local ministry plans in the afore-mentioned places; ensuring that they respond properly to local needs and interests; identifying local budgetary requirements through the national budgeting procedures; and collecting and retaining local revenues, taxes, and fees; organizing the operations of the local administration; initiating and implementing local projects alone or in conjunction with international, and non-governmental organizations; and conducting other activities consistent with applicable law.
- (C) Where practicable, the federal government shall take measures to devolve additional functions to local, governorate, and regional administrations, in a methodical way. Regional units and governorate administrations, including the Kurdistan Regional Government, shall be organized on the basis of the principle of de-centralization and the devolution of authorities to municipal and local governments.

Article 57.

- (A) All authorities not exclusively reserved to the Iraqi Transitional Government may be exercised by the regional governments and governorates as soon as possible following the establishment of appropriate governmental institutions.
- (B) Elections for governorate councils throughout Iraq and for the Kurdistan National Assembly shall be held at the same time as the elections for the National Assembly, no later than 31 January 2005.

Article 58.

(A) The Iraqi Transitional Government, and especially the Iraqi Property Claims Commission and other relevant bodies, shall act expeditiously to take measures to remedy the injustice caused by the previous regime's practices in altering the demographic character of certain regions, including Kirkuk, by deporting and expelling individuals from their places of residence, forcing migration in and out of

the region, settling individuals alien to the region, depriving the inhabitants of work, and correcting nationality. To remedy this injustice, the Iraqi Transitional Government shall take the following steps:

- (1) With regard to deported and expelled residents, it shall, in accordance with the statute of the Iraqi Property Claims Commission and other measures within the law, within a reasonable period of time, restore the residents to their homes and property, or, where this is unfeasible, shall provide just compensation.
- (2) With regard to the individuals newly introduced to specific regions and territories, it shall act in accordance with Article 10 of the Iraqi Property Claims Commission statute to ensure that such individuals may be resettled, may receive compensation from the state, may receive new land from the state near their residence in the governorate from which they came, or may receive compensation for the cost of moving to such areas.
- (3) With regard to persons deprived of employment or other means of support in order to force migration out of their regions and territories, it shall promote new employment opportunities in the regions and territories.
- (4) With regard to nationality correction, it shall repeal all relevant decrees and shall permit affected persons the right to determine their own national identity and ethnic affiliation free from coercion and duress.
- (B) The previous regime also manipulated and changed administrative boundaries for political ends. The Presidency Council of the Iraqi Transitional Government shall make recommendations to the National Assembly on remedying these unjust changes in the permanent constitution. In the event the Presidency Council is unable to agree unanimously on a set of recommendations, it shall unanimously appoint a neutral arbitrator to examine the issue and make recommendations. In the event the Presidency Council is unable to agree on an arbitrator, it shall request the Secretary General of the United Nations to appoint a distinguished international person to be the arbitrator.
- (C) The permanent resolution of disputed territories, including Kirkuk, shall be deferred until after these measures are completed, a fair and transparent census has been conducted and the permanent constitution has been ratified. This resolution shall be consistent with the principle of justice, taking into account the will of the people of those territories.

CHAPTER NINE - THE TRANSITIONAL PERIOD

Article 59.

- (A) The permanent constitution shall contain guarantees to ensure that the Iraqi Armed Forces are never again used to terrorize or oppress the people of Iraq.
- (B) Consistent with Iraq's status as a sovereign state, and with its desire to join other nations in helping to maintain peace and security during the transitional period of ongoing terrorism, the Iraqi Armed Forces will be a principal partner in the multinational force operating in Iraq under unified command pursuant to the provisions of United Nations Security Council Resolution 1511 (2003) and any subsequent relevant resolutions. This arrangement shall last until the ratification of a permanent constitution and the election of a new government pursuant to that new constitution.
- (C) Upon its assumption of authority, and consistent with Iraq's status as a sovereign state, the Iraqi Transitional Government shall have the authority to conclude binding international agreements regarding the activities of the multi-national force operating in Iraq under unified command pursuant to the terms of United Nations Security Council Resolution 1511 (2003), and any subsequent relevant United Nations Security Council resolutions. Nothing in this Law shall affect rights and obligations under these agreements, or under United Nations Security Council Resolution 1511 (2003), and any subsequent relevant United Nations Security Council resolutions, which will govern the multi-national force's activities pending the entry into force of these agreements.

Article 60.

The National Assembly shall write a draft of the permanent constitution of Iraq. This Assembly shall carry out this responsibility in part by encouraging debate on the constitution through regular general public meetings in all parts of Iraq and through the media, and receiving proposals from the citizens of Iraq as it writes the constitution.

Article 61.

- (A) The National Assembly shall write the draft of the permanent constitution by no later than 15 August 2005.
- (B) The draft permanent constitution shall be presented to the Iraqi people for approval in a general referendum to be held no later than 15 October 2005. In the period leading up to the referendum, the draft constitution shall be published and widely distributed to encourage a public debate about it among the people.

- (C) The general referendum will be successful and the draft constitution ratified if a majority of the voters in Iraq approve and if two-thirds of the voters in three or more governorates do not reject it.
- (D) If the permanent constitution is approved in the referendum, elections for a permanent government shall be held no later than 15 December 2005 and the new government shall assume office no later than 31 December 2005.
- (E) If the referendum rejects the draft permanent constitution, the National Assembly shall be dissolved. Elections for a new National Assembly shall be held no later than 15 December 2005. The new National Assembly and new Iraqi Transitional Government shall then assume office no later than 31 December 2005, and shall continue to operate under this Law, except that the final deadlines for preparing a new draft may be changed to make it possible to draft a permanent constitution within a period not to exceed one year. The new National Assembly shall be entrusted with writing another draft permanent constitution.
- (F) If necessary, the president of the National Assembly, with the agreement of a majority of the members' votes, may certify to the Presidency Council no later than 1 August 2005 that there is a need for additional time to complete the writing of the draft constitution. The Presidency Council shall then extend the deadline for writing the draft constitution for only six months. This deadline may not be extended again.
- (G) If the National Assembly does not complete writing the draft permanent constitution by 15 August 2005 and does not request extension of the deadline in Article 61(D) above, the provisions of Article 60(E), above, shall be applied.

Article 62.

This law shall remain in effect until the permanent constitution is issued and the new Iraqi government is formed in accordance with it.

APR 0 7 2004

TO:

Gen. Dick Myers Paul Wolfowitz Doug Feith

SUBJECT: Afghan Security Responsibility

I think we ought to propose that CENTCOM take over all Afghan security and be responsible for seeing that the Germans get the police done and all of that other stuff. It just isn't happening fast enough there.

Any thoughts on this?

Thanks.

How Saddam Failed the Yeltsin Test

By Stephen Sestanovich

ost anyone who's worked in government has a story — probably re-told often these days, given the Iraq debate — about facing a big decision on the basis of information that then turned out to be wrong. My favorite is from August 1998 when, with Bill Clinton just three days away from a trip to Moscow, the Central Intelligence Agency reported that President Boris Yeltsin of Russia was dead.

In 1998 the news that Mr. Yeltsin had died was, of course, no more surprising than the news, in 2003, that Iraq had weapons of mass destruction. It matched what we knew of his health and habits, and the secretive handling of his earlier illnesses. Nor was anyone puzzied by the lack of an announcement. Russia's financial crash 10 days earlier had set off a political crisis, and we assumed a fierce Kremlin succession struggle was raging behind the scenes.

In the agonizing conference calls that ensued, all government agencies

Stephen Sestanovich is a senior fellow at the Council on Foreign Relations and a professor of international diplomacy at Columbia University. From 1997 to 2001 he was United States ambassador at large for the former Soviet Union. played their usual parts. The C.I.A. stood by its sources but was uncomfortable making any recommendation. National Security Council officials, knowing Mr. Clinton wasn't eager for the trip, wanted to pull the plug immediately. The State Department (in this case, me) insisted we'd look, pretty ridiculous canceling the meeting because Mr. Yeltsin was dead—only to discover that he wasn't.

Eventually we decided that the Russians had to let the deputy secretary of state, Strobe Talbott, who was in Moscow for pre-summit meetings, see Mr. Yeltsin within 24 hours or the trip was off. Nothing else would convince us: no phone call, no television ap-

Bush was right to put the onus on Iraq to avoid war.

pearance, no doctor's testimony. The next day Mr. Yeltsin, hale and hearty, greeted Mr. Talbott in his office, and two days later Bill Clinton got on the plane to Moscow.

When the trip was over, I phoned the C.I.A. analyst who had relayed the false report. He was apologetic — sort of. "You have to understand," he said. "We missed the Indian and Pakistani nuclear tests last spring. We're under

a lot of pressure not to miss anything else."

Some of the lessons of this episode are the same as those emerging from the Iraq debate: sensitive intelligence is often too weak to guide important decisions; if the information fits what we already believe, or what we want to do, it gets too little scrutiny.

Yet Mr. Yeltsin's "near-death experience" of 1998 carries another lesson that unfortunately hasn't been part of the current controversy. When policymakers have imperfect information about a serious problem (which is almost always), what should they do? The answer, then as now, is to shift the burden of proof to the other guy. If we had been denied that meeting with Mr. Yeltsin, it would hardly have proved that he was dead. But we would have canceled the trip all the same. Russian uncooperativeness - not our poor intelligence - would have left us no choice.

Going to war and canceling a trip are vastly different matters, but what the Bush administration did with Saddam Hussein in the run-up to war followed the same rule: it challenged him to prove that American intelligence was wrong, so that the responsibility for war was his, not ours.

Clearly, President Bush and his advisers did not expect Saddam Hussein to cooperate in this test, and might still have wanted war if he had. But even if the administration had bandled other aspects of the issue differently, it would still have been neces-

sary to subject Iraq to a test. In our debate about the war, we need to acknowledge that the administration set the right test for Saddam Hussein—and that he did not pass it.

When America demanded that Iraq follow the example of countries like Ukraine and South Africa, which sought international help in dismanting their weapons of mass destruction, it set the bar extremely high, but not unreasonably so. The right test had to reflect Saddam Hussein's long record of acquiring, using and concealing such weapons. Just as important, it had to yield a clear enough result to satisfy doubters on both sides, either breaking the momentum for war or showing that it was justified.

Some may object that this approach treated Saddam Hussein as guilty until proved innocent. They're right. But the Bush administration did not invent this logic. When Saddam Hussein forced out United Nations inspectors in 1998, President Clinton responded with days of bombings — not because he knew what weapons Iraq had, but because Iraq's actions kept us from finding out.

A decision on war is almost never based simply on what we know, or think we know. Intelligence is always disputed. Instead, we respond to what the other guy does. This is how we went to war in Iraq. The next time we face such a choice, whether our intelligence has improved or not, we'll almost surely decide in the very same way.

BCC: GENDICK MYERS PAUL WOLFOWITZ DOUG FEATH GEN CASEY

JUL 2 6 2004

TO:

Ambassador John Negroponte

FROM:

Donald Rumsfeld

SUBJECT: Property Disputes

One of the issues still pending is the problem of the properties that Saddam Hussein took from people in the north and gave to people from the south.

Since that happened, the properties have been sold, and the current occupants of those properties in many cases are legitimate owners, even though the people who originally owned the houses were dispossessed unfairly.

A process to solve that is critically important. It seems to me that that is a project that you might want to consider working on with the Iraqi Interim Government.

Thanks.

I am writing to request a presidential Proclamation for Family Day: A Day to Eat Dinner With Your Children, an initiative of The Nacional Center on Addiction and Substance Abuse (CASA) at Columbia University. Each year since 1.ts inception in 2001, you have issued a Presidential Proclamation proclaiming Family Day. A copy of each proclamation is attached.

Since 1996, CASA research has consistently shown that the more often children eat dinner with their families, the less likely they are to smoke, drink or use illegal drugs. Family Day - A Day to Eat Dinner With Your Children is a national effort to promote parental engagement as a simple, effective way to reduce substance abuse by children and teens and raise! healthier children. Family Day emphasizes the importance of regular family activities in parent-child communications and encourages Americans to make family dinners a regular feature of their lives. In addition to your proclamation, the governors of 35 states and more than 200 cities and counties have issued Family Day proclamations each year. Last year your mother, former first Lady Barbara Bush, appeared in television spots to publicize Family Day and Jamie Lee Curtis did the same on the radio.

Also attached are background information on Family Day, CASA, a copy of the letter from Joseph A. Califano, Jr, President of CASA, to Mr. Andy Card, and the response from Melissa Bennett. We would like the proclamation by June 15, 2004 because of our request in The Office of Scheduling for a June presidential ceremony to publicize Family Day.

need further infarmation, please Contact me at and kgerard@casacolumbia.org. Thank you.

FAMILY DAY, 2003

By the Presided of the United States of America

A Proclamation

Children thrive in loving families where they are taught, nurtured, and comforted. By spending time with our children and stressing the importance of making the right choices, parents and other family members help them develop into confident, successful individuals.

Families can belp secure a healthy tomorrow for their children by providing guidance, staying involved, and serving as role models. I am committed to supporting strong families and strong matchages to help ensure that every child grows up in scale, loving family. Statistics show that children from two-parent families are less likely to end up in poverty, drop out of school, become addicted to drugs, have a child out of wellock, suffer abuse, or become a violent criminal. Because stable families should be the central goal of American welfare policy, I have proposed spending up to \$300 million a year to find the most effective programs to strengthen marriage.

Parents play a critical role in discouraging harmful behavior such as experimenting with alcohol, drug, and tobacco. Research shows that teems often listen to their parents when it comes to decisions about harmful substances and risky behaviors. Regular family activities provide opportunities. Corparents to communicate important messages and substance their relationships with their children. Recent studies from the National Center on Addiction and Substance Abuse at Columbia University found that teem from families who cat dinner together were less likely to use fliegal drugs, alcohol, and elgarettes, while teensgers who rarely rat dinner with their patents were mow likely to engage in these unhealthy activities.

Families and all Americans can act together to educate our youth about the dangers of drugs and alcohol and help them grow into healthy, responsible, compassionate chizens. In order to ensure a brighter future for our Nation, and safe, healthy, and happy lives for our children, our children must learn that avoiding harmful substances is an ongoing responsibility. As we work to educate our next generation about making healthy choices, we renew our commitment to the American family.

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim September 22,2003, as Family Day, I call upon the people of the United States to observe this day by engaging in activities to strengthen the relationships between parents and children and help hight against substance abuse and risky behaviors.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of August, in the year of our Lord two thousand three, and of the Independence of the United States of America the two hundred and eventy-eighth.

Dear Don,

Thanks so much for your help last year obtaining a Presidential Proclamation for *Family Day* in advance of the day. This year we are again having trouble getting a proclamation in a timely manner. May I ask you to please intervene again?

Family Bay: A Day to Ear Dinner with Your Children will be held on September 27, 2004 and we would like to have the Proclamation as soon as possible in order to publicize it widely. The President will get much credit for this around the country and this year we have many more sponsors — corporate, non-profit, community and government. We plan to have radio and TV spots featuring board member Jamie Lee Catis and Barbara Bush as well as bus and subway posters, slides in movie theaters, and much local involvement.

I sent a letter to Andy Card in February asking for a Presidential Proclamation and Family Day coremony. Scheduling did not permit the coremony. Following are copies of a staff letter sent in May to the Office of Presidential Proclamations and the Family Day 2003 Proclamation. We have been told by the office that the request is under consideration and we will not be apprised of their decision until closer to the event.

I'm sorry to bother you with this and thanks for any and all help you cap give us.

Besr regards.

Simperely,

Joseph A. Califano, Jr.

INFO MEMO

FOR: SECRETARY OF DEFENSE

FROM: Raymond F, DuBois, Director, Administration and Management

SUBJECT: Policy on Document Retention

- In the attached July 27,2004 snowflake you asked what our policy was on the retention of documents and other old materials, and that I brief you on the current rules and what I **think** they should be.
- The standards for records management are established by statute, and we implement these standards in coordination with the National Archives and Records Administration (NARA).
- In brief, official documents are used to conduct DoD business while personal documents may relate to political activities, personal or family matters, social or civic activities, or may be personal copies of official documents (not original copies).
- Official documents are organized into series based on office of origin and are categorized by NARA as either temporary (with destruction date) or permanent (retained forever for their historical or research value). Only 5% of official documents are categorized as permanent.
- For instance, SecDef letters, memos, and other official documentary materials (official photographs, graphics, audio and video recordings, etc) are in Series 2 12 (Office of the SecDef), are considered permanent, and will be preserved in the National Archives.
- SecDef permanent records are maintained under our control for 30 years and are stored at the Washington National Records Center, Suitland, MD, prior to their transfer to the National Archives.
- The current rules are in full compliance with Federal laws and regulations, and no changes are deemed necessary or are recommended.

INFO MEMO

CM-1954704 27 July 2004

FOR SECRETARY OF DEFENSE

FROM: General Richard B. Myers, CJCS 1211/27

SUBJECT: Personnel Out of UN Missions

- Question. "How long before we are going to finish up on getting those people out of those UN missions? I would like to be posted on where it stands and when it is finished."
 (TAB A)
- Answer. US personnel have been withdrawn from the UN Mission in Kosovo (UNMIK).
 The three officers and four military observers (MilObs) previously assigned to the UN Mission in Ethiopia and Eritrea (UNMEE) have returned to CONUS. After the 8 July signature of an Article 98 agreement by Eritrea, the United States has resumed its commitment to UNMEE and reassigned six officers to this mission. Five are currently in place.

Analysis

- UNMIK Personnel. Lieutenant Colonel Bilandzich, USAR, has returned to CONUS.
 Colonel Bagley was home on leave when the issue arose. He was reassigned
 temporarily to the Kosovo Peacekeeping Force (KFOR) and returned to Kosovo on
 7 July to out-process from UNMIK and collect his personal effects. Colonel Bagley is
 now in CONUS awaiting reassignment.
- UNMEE Personnel
 - MilObs Lieutenant Commander Stewart, Major Bascom, Captain Schell and Lieutenant Dyer have departed the mission entirely. Captains Knepper and Wilson returned to CONUS on 30 June and Lieutenant Colonel Parker followed on 5 July.
 - Eritrea has signed and entered into force an Article 98 agreement securing sufficient bilateral protection from the International Criminal Court for US personnel operating in Eritrea with the UNMEE mission. An administrative and technical status of forces agreement in Ethiopia provides sufficient protection in that country. Five officers are currently in place, with one more due to arrive in country by 4 August.

OSD 11296-04

TO:

President George W. Bush

FROM:

Donald Rumsfeld

SUBJECT:

Pearl Harbor

I may have previously sent you Dr. Thomas Schelling's foreword to Roberta Wohlstetter's book, *Pearl Harbor*.

But I just re-read it and, even though you may have read it at an earlier time, I think you will find it interesting to re-read it. I say this because of the intelligence we have been reading every day in recent months.

Respectfully,

Attach.

Thomas Schelling's foreword to Pearl Harbor, by Roberta Wohlstetter

DHR:dh 072704-10

CC: VICE PRESIDENT

2840104

OSD 11298-04

FOREWORD

It would be reassuring to believe that Pearl Harbor was just a colossal and extraordinary blunder. What is disquieting is that it was a supremely ordinary blunder. In €act, "blunder" is too specific; our stupendous unreadiness at Pearl Harbor was neither a Sunday-morning, nor a Hawaiian, phenomenon. It was just a dramatic failure of a remarkably well-informed government to call the next enemy move in a cold-war crisis.

If we think of the entire U.S. government and its far-flung military and diplomatic establishment, it is not true that we were caught napping at the time of Pearl Harbor. Rarely has a government been more expectant. We just expected wrong. And it was not our warning that was most at fault, but our strategic analysis. We were so busy thinking through some "obvious" Japanese moves that we neglected to hedge against the choice that they actually made.

And it was an "improbable" choice; had we escaped surprise, we might still have been mildly astonished. (Had we not provided the target, though, the attack would have been called off.) But it was not all that improbable. If Pearl Harbor was a long shot €or the Japanese, so was war with the United States; assuming the decision on war, the attack hardly appears reckless. There is a tendency in our planning to confuse the unfamiliar with the improbable. The contingency we have not considered seriously looks strange; what looks strange is thought improbable; what is improbable need not be considered seriously.

Furthermore, we made the terrible mistake-one we may have come

close to repeating in the 1950's—of forgetting that **a** fine deterrent can make a superb target.

Surprise, when it happens to a government, is likely to be a complicated, diffuse, bureaucratic thing. It includes neglect of responsibility, but also responsibility so poorly defined or so ambiguously delegated that action gets lost. It includes gaps in intelligence, but also intelligence that, like a string of pearls too precious to wear, is too sensitive to give to those who need it. It includes the alarm that fails to work, but also the alarm that has gone of so often it has been disconnected. It includes the unafert watchman, but also the one who knows he'll be chewed out by his superior if he gets higher authority out of bed. It includes the contingencies that occur to no one, but also those that everyone assumes somebody else is taking care of. It includes straightforward procrastination, but also decisions protracted by internal disagreement. It includes, in addition, the inability of individual human beings to rise to the occasion until they are sure it is the occasion—which is usually too late. (Unlike movies, real life provides no musical background to tip us off to the climax.) Finally, as at Pearl Harbor, surprise may include some measure of genuine novelty introduced by the enemy, and possibly some sheer bad luck.

The results, at Pearl Harbor, were sudden, concentrated, and dramatic. The failure, however, was cumulative, widespread, and rather drearily familiar. This is why surprise, when it happens to a government, cannot be described just in terms of startled people. Whether at Pearl Harbor or at the Berlin Wall, surprise is everything involved in a government's (or in an alliance's) failure to anticipate effectively.

Mrs. Wohlstetter's book is a unique physiology of a great national failure to anticipate. If she is at pains to show how easy it was to slip into the rut in which the Japanese found us, it can only remind us how likely it is that we are in the same kind of rut right now. The danger is not that we shall read the signals and indicators with too little skill; the danger is in a poverty of expectations—a routine obsession with a few dangers that may be familiar rather than likely. Alliance diplomacy, interservice bargaining, appropriations hearings, and public discussion all seem to need to focus on a few vivid and oversimplified dangers. The planner should think in subtler and more variegated terms and allow for

a wider range of contingencies. But, as Mrs. Wohlstetter shows, the "planners" who count are also responsible for alliance diplomacy, interservice bargaining, appropriations hearings, and public discussion; they are also very busy. This is **a** genuine dilemma of government. Some of its consequences are mercilessly displayed in this superb book.

SUBJECT: Preserving Antiquities in Babylon

- Issue. Following a recent meeting with the Polish Ministry of Defense, we agreed that an assessment team be assembled to review what could be done to relocate the Polish headquarters and preserve antiquities in Babylon (TAB A).
- Conclusion. Multinational Force-Iraq (MNF-I) will lead the assessment team.
- **Discussion.** The team will focus primarily on where headquarters can be relocated in order to protect Babylonian antiquities while preserving the headquarters' effectiveness. The MNF-I-led assessment team will invite participation of the Polish headquarters and the Iraqi Ministry of Culture, attempt to incorporate expertise from Middle East antiquities authorities and coordinate its findings with USCENTCOM and US Mission, Baghdad.
- The assessment team will report its findings by 22 August 2004.

SUBJECT:

Europe Over the Decades

Mr. President---

Attached is an illustrative list of issues that were major points of contention either between or among the United States and some countries in Europe. I send it because of the frequent references in the press that the differences between the U.S. and Europe are unusual or at an all-time high.

The fact of the matter is that what is occurring between the U.S. and Europe today is probably less contentious than has been the case in many periods over the past several decades. You may find it interesting to review this list.

Respectfully,

Attach,

Paper

OSD 11312-04

MAJOR STRAINS IN THE NORTH ATLANTIC ALLIANCE

- 1950 Truman North Korea invades South Korea. Issue of allowing Germany to have troops for NATO use. France was alone in opposition.
- 1955-1956 Eisenhower Suez Crisis pits Britain and France against U.S. over strike on Egypt.
- 1957 -- Eisenhower -- Soviets launch Sputnik, raising fears about the Soviet Union's growing ICBM capabilities. Europe questions U.S. ability to help protect it amid expanding Soviet capabilities.
- 1960-1962 Eisenhower/Kennedy European governments (led by the British) were unhappy with U.S. refusal to share nuclear information. U.S. offers to sell Britain Skybolt air-to-ground missile technology. When Skybolt technology failed, a large argument flared between NATO countries about Americans providing Britain with Polaris missiles. The British thought they were entitled to technology, but the U.S. did not agree. Eventually, they came to a compromise and Polaris was given to Brits.
- 1962 Kennedy Cuban Missile Crisis antagonized Europeans over America's lack of consultation with them.
- 1966 Johnson de Gaulle announces France's intention to withdraw from NATO's military command structure in protest of the dominance of U.S. commanders, and threw NATO Headquarters out of France.
- 1969 Nixon Many Western European countries questioned U.S. policies in Vietnam.
- 1971-1975 Nixon/Ford The Mansfield Amendment, proposing a 50 percent reduction in the U.S. combat troops in Europe (then numbering about 300,000) was defeated in the U.S. Senate by a vote of 61-36, and was the source of friction among NATO allies and the transatlantic relationship.
- 1973 Nixon Kissinger's "Year of Europe" effort to bolster the NATO alliance included a call for increases in military spending by European nations. The Europeans would not agree to more military spending while the alliance leader was still engaged in Vietnam. More broadly, they saw the move toward a more integrated Atlantic partnership as a challenge to their own integration and identity. Opposition to it was led by France.

- 1977-1978 Carter German-led opposition to U.S. development of a neutron bomb that could destroy troops, but not property. After Carter pushed allies to accept plans to develop the weapon, he dropped the project due to domestic political concerns, angering Germany.
- 1979 Carter The Soviet invasion of Afghanistan. NATO views on the Soviet threat grew further apart, as the U.S. was ready for a more confrontational policy, while Europeans were anxious to save what was left of detente.
- 1981 Reagan Reagan Administration's decision to proceed with full production of the neutron bomb led to strong debate among NATO allies.
- 1981-1983 Reagan Europeans campaign against U.S. deployment of Pershing II missiles in Europe.
- 1982 Reagan The Soviets tried to take advantage of tensions in the NATO alliance by offering large contracts to Western European nations for cooperating with the construction of a large natural gas pipeline. The Reagan Administration used import controls and economic sanctions to deter European countries that might wish to help build the pipeline.
- 1984 Reagan Americans become frustrated at the failure of NATO allies in Western Europe to provide more in military forces and economic support for their own defense.
- 1990 George Herbert Walker Bush Major post-Cold War debate between European countries about strengthening Western Europe's defenses and reducing its dependence on the U.S.
- 1992 George Herbert Walker Bush The argument of whether or not NATO should extend membership to newly freed countries of Eastern and Central Europe caused sharp divides. Some member countries saw the alliance as a passive hedge against the return of a Soviet threat, while others wanted the Alliance to play a more active role in reaching out to former adversaries.
- 1994 Clinton The wars of Yugoslav dissolution create strains in the alliance. As the wars dragged on, some members saw NATO's minimalist role as increasingly unsustainable. Frictions grew, particularly between the U.S. and other Allies, over what constituted a proper course of action.
- 1999 Clinton Criticism of how the Kosovo campaign was conducted too great a U.S. and too small a European contribution dominated debate.

2004 – George W. Bush - Disagreements over deployment of NATO forces to train Iraqi troops. France opposed.

2004 – George W. Bush - Disagreements over providing NATO troops to oversee Afghan elections. France opposed.

Current – George W. Bush - The NATO role in combating terrorism has caused frequent differences between France (with Luxembourg and Belgium) versus the rest of the Alliance.

(b)(6)

EXECUTIVE SUMMARY

Key Findings

- The mood is positive in most of the country, with almost two-thirds of respondents saying that the country is headed in the right direction.
- Afghans identified the major problems facing their country as its weak economy, the security situation, a poor educational system, and shattered infrastructure.
- Nonetheless, a large majority is pleased with the Transitional Government and President Hamid Karzai's job performance.
- Afghans feel somewhat more secure and much freer than they did under the Taliban.
 However, more say they have lost than gained economically since then.
- There are regional differences in mood, and region plays as great a role as ethnicity in shaping political outlooks. In particular, interviewees the South and Northwest were more negative than respondents in other regions about the direction of the country, job ratings for the government and president, and security and freedom of political expression.
- Most Afghans interviewed view the Taliban unfavorably, with majorities unfavorable to them in every region and even among those dissatisfied with the Transitional Government.
- The UN and foreign aid workers are generally popular with Afghans. The US and American troops are also regarded favorably by the majority, but the South and Northwest again remain exceptions.
- Most Afghan citizens surveyed know of the election and registration requirements and intend to vote as they are hopeful that the election will make a difference.
- However, there is substantial doubt as to whether the election will be free and fair, with
 potential vote buying and cheating in the count primary among the concerns. Doubts
 about the fairness of elections are closely related to a lack of kπowledge of the process:
 most voters do not know that the ballot will be secret or that there will be election
 monitors.
- The problems facing Afghan women are widely recognized by both men and women, chief among them are lack of power and lack of education.

- Most Afghans believe that women will need the permission of husbands or fathers to
 vote in the coming elections. Between one in five and one in three women may not be
 allowed to vote.
- Two-thirds of Afghans interviewed can offer a meaning for democracy. The principal meanings they ascribe include freedom, rights and law, elections, and women's rights.
- Political tolerance, regarding parties or between persons, is low among the Afghans interviewed.
- Radio, especially foreign radio (Azadi/Radio Free Asia, VOA, BBC) reaches a majority
 of Afghans and is the preferred medium for voter education. Among those who do not
 listen to the radio, the preferred sources are village chefs and religious leaders.
- Only one woman in five, at most, is completely housebound.' Visiting neighbors and
 doing household chores were the two most frequent answers from women about why
 they leave the house.

² A "housebound" woman does not leave the house at least once a month for any of the following activities: visiting neighbors, doing household chores, visiting family and friends, visiting a health clinic, shopping, taking children to school, or taking children to a health clinic.

THE SECRETARY OF DEFENSE 1000 DEFENSE PENTAGON WASHINGTON, DC 20301-1000

JUL 29 2004

MEMORANDUM FOR THE SECRETARY OF STATE OF ASSISTANT TO THE PRESIDENT FOR NATIONAL SECURITY AFFAIRS ACTING DIRECTOR OF CENTRAL INTELLIGENCE

SUBJECT: Asia Foundation Survey

When I met with President Karzai on June 14,2004, he mentioned the findings of an Asia Foundation survey on Afghanistan. The results are worth reviewing (see attached).

Highlights include:

- 62% of Afghans were pleased with Karzai's performance;
- 67% expressed a positive sentiment on the presence of US military forces;
- 64% responded unfavorably toward the Jihadi leaders:
- Only 9% considered democracy and Islam to be incompatible;
- 64% were able to identify at least one characteristic of a democratic country; and
- Only 24% of those who expressed dissatisfaction with the Transitional Government responded favorably towards the Taliban.

With the exception of responses in the Northwest and the South, the results suggest a sense of cautious optimism among the Afghans.

FROM: Tina W. Jonas

SUBJECT: DoD Airline Ticket Abuse

• You asked that I tell you how we are going to fix the Government Accountability Office (GAO) identified deficiencies on airline tickets reported in a news article.

What we have done to date.

- Notified personnel, via remarks on their Leave and Earnings Statements, to return unused airline tickets to their travel offices.
- Directed the Military Services to instruct military and civilian personnel to not claim as reimbursable expenses the tickets purchased through their organizations charge account and to return all unused tickets.
- Approved a pilot program between the Defense Finance and Accounting Service and the Bank of America to compare electronic files of travel charge card transactions for potential fraud and misuse.
- Requested assistance from the General Services Administration to address automatic cancellation and refund of tickets as part of the City-Pairs contract with the airlines.
- Issued policy requiring all commercial travel offices contracts be reviewed and modified, as necessary, to ensure systematic identification of unused tickets and refund of tickets not used 30 days after the date of the last leg of scheduled travel.
- Recovered overpayments on 99 of 123 cases the GAO identified.
- What we are currently doing: Military Services are researching 400 of the highest dollar value tickets to determine the status of the tickets, and determine possible resolution. Estimated completion date is first quarter FY 2005.
 - Researching additional 27,000 potential erroneous payments.

- Fielding the Defense Travel System (DTS); full deployment scheduled by the end of FY 06. DTS will provide greater oversight and controls to prevent both unused tickets and improper reimbursements to travelers.
- The Under Secretary of Defense (Personnel and Readiness) has agreed to accept responsibility for travel policy and to oversee the consolidation of travel management activities.

Pentagon Wasted Millions On Airline Tickets, GAO Says

By Larry Margasak, Associated Press

The Defense Department spent an estimated \$100 million for airline tickets that were not used over six years and failed to seek refunds even though the tickets were reimbursable, congressional investigators say.

The department compounded the problem by reimbursing employee claims for tickets the Pentagon bought, the investigators said.

To demonstrate how easy it was to have the Pentagon pay for airline travel, the investigators posed as defense employees, had the department generate a ticket and showed up at the ticket counter to pick up a boarding pass.

The General Accounting Office of Congress issued the findings in two reports on the Pentagon's lack of control over airline travel, copies of which the Associated Press obtained yesterday. A prior report, issued last November, found that the Pentagon bought 68,000 first-class or business-class airline seats for employees who should have flown coach.

"At a time when our soldiers are patrolling the streets of Iraq in unarmored Humvees, and when the Bush administration is asking for record defense spending, Secretary [Donald H.] Rumsfeld is letting hundreds of millions of dollars that could be used to protect our troops and our country go to waste," said Rep. Janice D. Schakowsky (D-III.), one of three lawmakers -- along with Republican Sens. Charles E. Grassley (Iowa) and Susan Collins (Maine) -- who ordered the studies.

The GAO estimated that between 1997 and 2003, the Defense Department bought at least \$100 million in tickets that were not used or used only partially by a passenger who did not complete all legs of a flight. The waste went undetected because the department relied on individuals to report the unused tickets. They did not.

The Pentagon said in a written statement that it is working to ensure it receives credit in the future for each unused ticket.

"We take this deficiency in our procedures very seriously and are moving swiftly to establish proper management controls. The long-term answer will be the automated Defense Travel System [DTS] that controls the travel order and payment process from beginning to end," the statement said. "DOD is researching the data presented in the GAO report and will continue to pursue the amounts we determine are recoupable."

The reimbursable tickets had no advanced purchase requirements, minimum or maximum stays or penalties for changes or cancellations under department agreements with the airlines.

While one GAO report focused on the unused tickets, the second investigation found potential fraud. It said the department paid travelers for tickets the department bought and reimbursed employees for tickets that had not been authorized.

A limited review of records for 2001 and 2002 identified 27,000 transactions totaling more than \$8 million in reimbursements to employees for tickets bought by the government. These figures represent only a small portion of the potential fraud, the GAO said.

It is a crime for a government employee knowingly to request reimbursement for goods and services he or she did not buy.

Not strip-searched: Fernandes

NEW DELHI, JULY 14. As controversy raged over his "frisking" at a U.S. airport last year, the former Defence Minister, George Femandes, today denied he underwent a "strip-search."

"Nothing like a strip-search happened there," he told reporters here referring to the book authored by a former United States Deputy Secretary of State, Strobe Talbott, which says that the then Defence Minister, Mr. Fernandes, was "strip-searched" twice. Mr. Fernandes said he was asked to remove his coat, shoes and socks, which he did. "Then I was asked to spread my arms and raise them," he said, adding after that *khel khatam ho gaya* (the drama ended).

The former Prime Minister, Atal Bihari Vajpayee, today said he was not aware of the controversial searching of Mr. Femandes by airport security in the United States. "I don't know about it," he told Zee News.

Asked whether he had not been informed about the incident, he said: "No." Appreciating the United States Embassy for expressing regret and apology over the "strip-searching" of Mr. Fernandes during his visit to the United States two years ago as Defence Minister, the Congress said the silence on the part of Mr. Vajpayee and his External Affairs Minister was "intriguing..."

"They (Vajpayce and his External Affairs Minister) should break their silence on the issue," the party's spokesman, Anand Sharma, told reporters here. — PTI

Strip-search incident: Armitage apologises

July 14,200413:03 IST

Last Updated: July 14,200415:24 IST

US Deputy Secretary of State Richard Armitage on Wednesday said he was "horrified" by the the incident of strip-searching involving former defence minister George Fernandes during an official visit to the US.

"On the way in the car here, I had the opportunity to telephone my old friend George Fernandes and told him I had heard about the problem he had. E was horrified about it and I personally apologised to him," Armitage told reporters after he met Leader of the Opposition Lal Kishenchand Advani.

Former Deputy Secretary of State Strobe Talbott in his just published book has said Femandes was strip-searched twice at Dulles airport when he was defence minister -- once on an official visit to Washington in early **2002** and another time while enroute to Brazil in mid 2003.

The US Embassy in Delhi said Fernandes was not strip-searched but a security wand was waved over him when a key in his pocket set off the metal detector.

"Fernandes played an important role in the burgeoning US-India relationship and we consider him the cherished friend of the US," an embassy spokesman said.

Fernandes, who confirmed reports that he was searched, has said he will never visit the US again.

Never strip-searched in US airports, says Advani

Press Trust of India Bangalore, July 11

Former Deputy Prime Minister LK Advani on Sunday said he had never been strip-searched in US airports and he would talk to NDA convenor George Fernandes, who as Defence Minister had reportedly undergone such an exercise twice.

"I did not face it during my visits," Advani replied to questions on reports from Washington quoting former Deputy Secretary of State Strobe Talbott that Fernandes was strip-searched twice in Dulles Airport when he was Defence Minister.

The BJP leader maintained that shedding of shoes and socks was a normal security check and officials who accompanied them had to undergo that but wondered whether that can be called strip-search.

If such incidents had implications, Advani said he believed Fernandes would have brought up the subject which was not the case.

Advani also expressed the view that it would not be correct for the Indian Government to protest this (shedding of shoes and socks for security check) as all passengers are subjected to such a procedure.

But he said he would certainly talk to Fernandes to find out the facts. Though he found it strange to liken shedding of shoes and socks to strip-check.

Printed From

Fernandes confirms strip-search, says he won't visit US again

HT Correspondent New Delhi, July 11

George Fernandes has confirmed he was strip-searched twice at Washington's Dulles airport when he visited the US as defence minister in 2002 and 2003. He has described the experience as an "ordeal", and said he will never visit the US again.

The story of Fernandes's humiliation has appeared in former **US** deputy secretary of state Strobe Talbott's book Engaging India: Diplomacy, Democracy and the Bomb.

"I cannot forget the ordeal which I underwent in the US and have decided not to go there in future," PTI quoted Fernandes as saying in Muzaffarpur on Sunday.

According to the report, the Americans went ahead with the search despite repeated pleas by the Indian ambassador to spare the minister the embarrassment. Fernandes said he had informed PM A.B. Vajpayee about the incidents.

Meanwhile, PTI Bangalore quoted former home minister L.K. Advani as saying he had never had such an experience in the US, and would "talk" to Fernandes about it.

Printed From HindustanTimes.com

Fernandes strip-searched twice during visit to US: Talbott

Press Trust of India Washington, July 10

George Fernandes was strip-searched twice in Dulles Airport in the US capital area when he was Defence Minister, once while on an official visit to Washington and another time while en route to Brazil, according to former Deputy Secretary of State Strobe Talbott.

In his new book *Engaging India - Diplomacy, Democracy and the Bomb,* Talbott says he was told this angrily by Fernandes himself when he had visited India in February this year as part of a delegation assembled by the Asoen Institute and the Confederation of Indian Industry.

"Our group held a series of meetings with senior officials--Brajesh Mishra, Yashwant Sinha and George Fernandes--who all voiced some unease that the American government was treating Musharraf with kid gloves. But they also expressed general satisfaction with the way things were going between the US and India," writes the former Deputy Secretary of State.

Talbott says, "Fernandes, as Defence Minister, made much of how American-Indian military cooperation was thriving. India, in short, had weathered the storm of American sanctions and was now well on its way to establishing itself as a military partner.

"Just as we were saying good-bye to Fernandes, a member of our delegation innocently asked him when he would next be coming to Washington. His demeanour abruptly changed. It was as though he was glad to have an excuse to tell us how he really felt about our country.

"Ignoring an Ethiopian delegation that was already filing into his office and taking its seats, Fernandes regaled us with the story of how he had been strip-searched by officers of the US Immigration and Naturalization Service at Dulles Airport when he arrived for an official visit in early 2002, and again, in mid-2003, when he was passing through the US on his way to Brazil.

"He seemed to enjoy our stupefaction at this tale. He and other Indians who later referred to the incident clearly regarded it **as** more than merely a lapse of protocol or just an another example of the post-9/11 excesses and indignities that air travellers had to endure for the sake of security. The Indians saw it as a symptom of a deep-rooted widespread condescension—or worse—on the part of the West toward the East."

SUBJECT:

Forces in Iraq and Kuwait

I would like to see a plan as to how we would begin to phase down forces from Kuwait and Iraq at the point when it is decided that it is appropriate to do so. It would be useful to begin thinking about that, so that we are ahead of the curve.

The same exercise should be undertaken with respect to Afghanistan.

I also noted that we have gone from 112,000 up to 143,000 troops in Iraq, and it seems to keep climbing. My recollection is that we were at 112,000 when General Abizaid said he wanted to go up by 19,0000.

Also, I would be curious to know what skill sets are included in the increase of the 31,000 troops in Iraq.

Please get back to me.

Thanks.

2007 1123 -11 期 6: 1/5

INFO MEMO

AUG 0 2 2004

FOR: SECRETARY OF DEFENSE

FROM: Raymond F. DuBois, Director, Administration and Management

SUBJECT: Corridors

SUBJECT: Corridors

- In the attached July 22 snowflake you asked for information about corridors here
 in the Pentagon and whether or not any were dedicated to WWI, WWII, Korea,
 Vietnam and the Global War on Terrorism.
- Also attached is an unofficial pamphlet that describes all the dedicated corridors as well as the major exhibits and displays here in the Pentagon.
- There are no corridors dedicated to a specific conflict; however, there are
 references, images, and memorabilia from/about them contained in various
 corridor displays and exhibits. An exhibit that featured artifacts and photographs
 fi-om the Korean war was removed due to renovation and all items were returned
 to the Center of Military History.
- With the Global War on Terrorism (GWOT) ongoing, it may be premature to
 dedicate one at the current time. As has been done for the other conflicts, a
 consideration may be to incorporate appropriate items and material related to the
 GWOT when our existing corridor displays and exhibits are refurbished and
 updated.
- As an aside, in the history of our military, there have been nine 5-star General/Flag officers four Army (Marshall, MacArthur, Eisenhower and Bradley), four Navy (Leahy, King, Nimitz, and Halsey) and one Air Force (Arnold). There is a Pentagon corridor dedicated to each of the Army 5-stars and to the Air Force 5-star, but none to the Navy. However, in the Bradley Corridor, there is a panel that is dedicated to and lists all nine.

MEMORANDUM FOR USDP

Info: ASD/ISA PDASD/ISA

Subject: SD Snowflake: Relationships in Asia

Doug,

I've had the **AP** team consider the SD's question: "...what should we be fashioning by way of relationships in Asia that in five years we would not be able to fashion?" We are building the answer, but it is not a short one. We are at an historic moment in Asia regarding the GWOT, our global force posture movements, the denuclearization of the Korean Peninsula, in PRC/TW relations, the rise of China, dealing with Islam, etc. As we craft this response to SD, we will generally address those treaty, bi-lateral, and multilateral relationships which will preserve/create peace and stability in Asia in order to pursue US interests. Among other things this will include movement toward democratization and fostering economic development within the region. We have some ideas.

The other principal issue we will address in this response will be managing our relationship with China, both within the region and elsewhere. "China rising" is not necessarily bad for the US and our interests, but we should play an active, not reactive role in managing China's development. We have ideas here too.

The suspense date is 30 July. We're asking for a bit more time, 13 Aug."

Richard LAWless

かんしょう

FOREWORD

It would be reassuring to believe that Pearl Harbor was just a colossal and extraordinary blunder. What is disquieting is that it was a supremely ordinary blunder. In fact, "blunder" is too specific; our stupendous unreadiness at Pearl Harbor was neither a Sunday-morning, nor a Hawaiian, phenomenon. It was just a dramatic failure of a remarkably well-informed government to call the next enemy move in a cold-war crisis.

IC we think of the entire **U.S.** government and its far-flung military and diplomatic establishment, it is not true that we were caught napping at the time of Pearl Harbor. Rarely has a government been more expectant. We just expected wrong. And it was not our warning that was most at fault, but our strategic analysis. We were so busy thinking through some "obvious" Japanese moves that we neglected to hedge against the choice that they actually made.

And it was an "improbable" choice; had we escaped surprise, we might still have been mildly astonished. (Had we not provided the target, though, the attack would have been called **cff..**) But it was not all *that* improbable. If Pearl Harbor was a long shot for the Japanese, so was war with the United States; assuming the decision on war, the attack hardly appears reckless. There is a tendency in our planning to confuse the unfamiliar with the improbable. The contingency we have not considered sectionsly looks strange; what looks strange is thought improbable; what is improbable need not be considered seriously.

Furthermore, we made the terrible mistake-one we may have come

close to repeating in the 1950's—of forgetting that a fine deterrent can make a superb target.

Surprise, when it happens to a government, is likely to be a complicated, diffuse, bureaucratic thing. It includes neglect of responsibility, but also responsibility so poorly defined or so ambiguously delegated that action gets lost. It includes gaps in intelligence, but also intelligence that, like a string of pearls too precious to wear, is too sensitive to give to those who need it. It includes the alarm that fails to work, but also the alarm that has gone of € so often it has been disconnected. It includes the unalert watchman, but also the one who knows he'll be chewed out by his superior if he gets higher authority out of bed. It includes the contingencies that occur to no one, but also those that everyone assumes somebody else is taking care of. It includes straightforward procrastination, but also decisions protracted by internal disagreement. It includes, in addition, the inability of individual human beings to rise to the occasion until they are sure it is the occasion—which is usually too late. (Unlike movies, real life provides no musical background to tip us off to the climax.) Finally, as at Pearl Harbor, surprise may include some measure of genuine novelty introduced by the enemy, and possibly some sheer bad luck.

The results, at Pearl Harbor, were sudden, concentrated, and dramatic. The failure, however, was cumulative, widespread, and rather drearily familiar. This is why surprise, when it happens to a government, cannot be described just in terms of startled people. Whether at Pearl Harbor or at the Berlin Wall, surprise is everything involved in a government's (or in an alliance's) failure to anticipate effectively.

Mrs. Wohlstetter's book is a unique physiology of a great national failure to anticipate, If she is at pains to show how **m** y it was to slip into the rut in which the Japanese found us, it can only remind us how likely it is that we are in the same kind of rut right now. The danger is not that we shall read the signals and indicators with too little skill; the danger is in a poverty of expectations—a routine obsession with a €ew dangers that may be familiar rather than likely, Alliance diplomacy, interservice bargaining, appropriations hearings, and public discussion all seem to need to focus on a few vivid and oversimplified dangers. The planner should think in subtler and more variegated terms and allow for

a wider range of contingencies. But, as Mrs. Wohlstetter shows, the "planners" who count are also responsible for alliance diplomacy, interservice bargaining, appropriations hearings, and public discussion; they are also very busy. This is a genuine dilemma of government. Some of its consequences are mercilessly displayed in this superb book.

(Unlike movies, real life provides no musical background to tip us off to the climax.) Finally, as at Pearl Harbor, surprise may include some measure of genuine novelty introduced by the enemy, and possibly some sheer bad luck.

The results, at Pearl Harbor, were sudden, concentrated, **and** dramatic. The failure, however, was cumulative, widespread, and rather drearily familiar. This is **why** surprise, when it happens to a government, cannot be described just in terms of startled people. Whether at Pearl Harbor or at the Berlin Wall, surprise is everything involved in a government's (or in an alliance's) failure to anticipate effectively.

Mrs. Wohlstetter's Look is a unique physiology of a great national failure to anticipate. If she is at pains to show how easy it was to slip into the rut in which the Japanese found us, it can only remind us how likely it is that we are in the same kind of rut right now. The danger is not that we shall read the signals and indicators with too little skill; the danger is in a poverty of expectations—a routine obsession with a few dangers that may be familiar rather than likely. Alliance diplomacy, interservice bargaining, appropriations hearings, and public discussion all seem to need to focus on a few vivid and oversimplified dangers. The planner should think in subtler and more variegated terms and allow for

a wider range of contingencies. But, as Mrs. Wohlstetter shows, the "planners" who count are also responsible for alliance diplomacy, interservice bargaining, appropriations hearings, and public discussion; they are also very busy. This is a genuine dilemma of government. Some of its consequences are mercilessly displayed in this superb book.

FOREWORD

It would be reassuring to believe that Pearl Harbor was just a colossal and extraordinary blunder. What is disquieting is that it was a supremely ordinary blunder. In fact, "blunder" is too specific; our stupendous unreadiness at Pearl Harbor was neither a Sunday-morning, nor a Hawaiian, phenomenon. It was just a dramatic failure of a remarkably well-informed government to call the next enemy move in a cold-war crisis,

If we think of the entire U.S. government and its far-flung military and diplomatic establishment, it is not true that we were caught napping at the time of Pearl Harbor. Rarely has a government been more expectant. We just expected wrong. And it was not our warning that was most at fault, but our strategic analysis. We were so busy thinking through some "obvious" Japanese moves that we neglected to hedge against the choice that they actually made.

And it was an "improbable" choice; had we escaped surprise, we might still have been mildly astonished. (Had we not provided the target, though, the attack would have been called off.) But it was not all that improbable. If Pearl Harbor was a long shot for the Japanese, so was war with the United States; assuming the decision on war, the attack hardly appears reckless. There is a tendency in our planning to confuse the unfamiliar with the improbable. The contingency we have not considered seriously looks strange; what looks strange is thought improbable; what is improbable need not be considered seriously.

Furthermore, we made the terrible mistake—one we may have come

close to repeating in the 1950's—of forgetting that \boldsymbol{s} fine deterrent can make a superb target.

Surprise, when it happens to a government, is likely to be a complicated, diffuse, bureaucratic thing. It includes neglect of responsibility. but also responsibility so poorly defined or so ambiguously delegated that action gets lost. It includes gaps in intelligence, but also intelligence that, like a string of pearls too precious to wear, is too sensitive to give to those who need it. It includes the alarm that fails to work, but also the alarm that has gone off so often it has been disconnected. It includes the unalert watchman, but also the one who knows he'll be chewed out by his superior if he gets higher authority out of bed. It includes the contingencies that occur to no one, but also those that everyone assumes somebody else is taking care of. It includes straightforward prograstination, but also decisions protracted by internal disagreement. It includes, in addition, the inability of individual human beings to rise to the occasion until they are sure it is the occasion—which is usually too late. (Unlike movies, real life provides no musical background to tip us off to the climax.) Finally, as at Pearl Harbor, surprise may include some measure of genuine novelty introduced by the enemy, and possibly some sheer bad luck.

The results, at Pearl Harbor, were sudden, concentrated, and dramatic. The failure, however, was cumulative, widespread, and rather drearily familiar. This is why surprise, when it happens to a government, cannot be described just in terms of startled people. Whether at Pearl Harbor or at the Berlin Wall, surprise is everything involved in a government's (or in an alliance's) failure to anticipate effectively.

Mes. Wohlstetter's book is a unique physiology of a great national failure to anticipate. viii

close to repeating in the 1950's—of forgetting that a fine deterrent can make a superb target.

Surprise, when it happens to a government, is likely to be a complicated, diffuse, bureaucratic thing. It includes neglect of responsibility, but also responsibility so poorly defined or so ambiguously delegated that action gets lost. It includes gaps in intelligence, but also intelligence that, like a string of pearls too precious to wear, is too sensitive to give to those who need it. It includes the alarm that fails to work, but also the alarm that has gone off so often it has been disconnected. It includes the unalert watchman, but also the one who knows he'll be chewed out by his superior if he gets higher authority out of bed. It includes the contingencies that occur to no one, but also those that everyone assumes somebody else is taking care of. It includes straightforward procrastination, but also decisions protracted by internal disagreement. It includes, in addition, the inability of individual human beings to rise to the occasion until they are sure it is the occasion—which is usually too late. (Unlike movies, real life provides no musical background to tip us off to the climax.) Finally, as at Pearl Harbor, surprise may include some measare of genuine novelty introduced by the enemy, and possibly some sheer bad luck.

The results, at Pearl Harbor, were sudden, concentrated, and dramatic. The failure, however, was cumulative, widespread, and rather drearily familiar. This is why surprise, when it happens to a government, cannot be described just in terms of startled people. Whether at Pearl Harbor or at the Berlin Wall, surprise is everything involved in a government's (or in an alliance's) failure to anticipate effectively.

Mcs. Wohlstetter's book is a unique physiology of a great national failure to anticipate. If she is at pams to show how easy it was to slip into the rut in which the Japanese found us, it can only remind us how likely it is that we are in the same kind of rut right now. The danger is not that we shall read the signals and indicators with too little skill: the danger is in a poverty of expectations—a routine obsession with a few dangers that may be familiar rather than likely. Alliance diplomacy, interservice bargaining, appropriations hearings, and public discussion all seem to need to focus on a Eew vivid and oversimplified dangers. The planner should think in subtler and more variegated terms and allow for

a wider range of contingencies. But, as Mrs. Wohlstetter shows, the "planners" who count are also responsible for alliance diplomacy, interservice bargaining, appropriations hearings, and public discussion; they are also very busy. This is a genuine dilemma of government. Some of its consequences are mercilessly displayed in this superb book.

"Wreaking Havoc" (anonymous, undated)

DHR:dh 041904-10

Please respond by _____

Wreaking Havoc

It takes extraordinarily few people to do the kind of damage that we're witnessing in Iraq today or that other countries, including the United States, have witnessed in the past:

- It took only Timothy McVeigh and Terry Nichols (some might say there was a third accomplice) to kill 168 people in Oklahoma City;
- It took, I believe, less than 10 people to put a bomb in the basement of the World Trade Center in 1993 that killed 6 people and injured more than 1000. It was the largest improvised explosive device in the history of forensic science and was intended to topple one tower on top of the other in which case it would have been far worse than September 11;
- It just took two snipers, one a teenager, to terrorize the Washington metropolitan area for the better part of a month;
- There were probably fewer than 10 people involved in the Bali bombing that killed approximately 200 people;
- It probably didn't take more than 10 people to do the bombing in Najaf that killed 150 people, including one of the most important Shia leaders in the country and which led to several weeks of reporting on alleged instability in southern Iraq;
- Of course, it took only 19 hijackers on September 11,2001 to kill more than 3,000 people in this country;
- Perhaps most illuminating for the Iraq situation, a couple of hundred Provisional IRA terrorized the UK for a period of many years, killing an average of 300 people per year and 700 people in the peak year;
- The Baader-Meinhof Gang, I believe, was only a few dozen people at its height, and it terrorized Germany for a considerable number of years; and
- The same is true of the Red Brigades in Italy, who have actually enjoyed a recent minor comeback.

What is the point of all this?

Two things:

- 1. The leverage that terrorists can enjoy is simply enormous. It takes a whole society to effectively eliminate a few dozen or a few score who can do enormous damage in the meantime;
- 2. Most important, with respect to Iraq, it does not take a popularly based resistance to do this kind of damage. We might at some point end up facing a popularly-based resistance in Iraq, but what we are facing today is predominantly a rear-guard action by the murderers and sadists who abused Iraq for 35 years.

The frequency of suicide bombings in Baghdad and around the country certainly is not evidence of popular opposition. In fact, on the hopeful side, this terrorism might inspire more popular hostility to the terrorists and their allies.

However, to convert popular hostility into effective action, Iraqis need to be convinced that we (and they) will win. This is a crucial moment when many Iraqis are sitting on the fence, weighing the risks involved in supporting us. We need to do everything we can to encourage the many brave ones who are ready to fight for their future. Capturing Saddam has given these people a big shot in the arm. Trying him would be even better.

As of February 7,2006 4:00 PM

RESPONSE TO SNOWFLAKE FOR THE SECRETARY OF DEFENSE ON DESALINIZATION

Robert Ranger

From: Mr. John J. Young, Jr., Director of Defense Research and Engineering, [b)(6)

- Desalination research is coordinated through the Expeditionary Unit Water Purification Program, executed by the Office of Naval Research.
- The White Paper provided by former Secretary Schultz is similar to past proposals Aqua Via has submitted to DoD, but contains less technical detail.
- The last water purification proposal Agua Via submitted was in response to a Broad Area Announcement (BAA) in January 2005. The Agua Via proposal was one of forty requested by the Office of Naval Research. 18 proposals were selected to be funded; the Agua Via proposal was not. (Tab C provides greater details)
- The Aqua Via proposal was focused largely on computer modeling. The
 proposal did not provide sufficient scientific and technical detail or an
 experimental proof-of-principle plan.
- A DDR&E technical staff expert examined the technical comments of that review and concluded that the proposal was fairly assessed. I can provide more details if you desire.
- More promising research based on artificial biological structures was recommended and is now underway.
- The Office of the Deputy Under Secretary of Defense for Science and Technology (Dr. Sloter) has contacted Aqua Via (Ms. Pergamit) and will assist Agua Via in interfacing with DoD programs relevant to their technology interests.

AGUA: Water

VIA: way, path

SUMMARY: Based on nanotechnology resperch work begun in 1997, a novel filtration technology has been developed which has the promise of broadly revolutionizing water purification, water remediation and dessination costs, purity and delivery systems. This technology was designed from its inception to deat with the challenging environmental, performance and financial considerations of this field.

Desalination and water putification based on this Smart Membrane^m technology is anticipated to:

- Deliver "full spectrum" Titration: filtering against the full spectrum of contaminants and delivering only pure water."
- Operate under a virtually complete range of anvironmental conditions and handle a virtually complete range of feedstock water

"Weler, like energy in the late 1970s, will probably become the most critical natural resource issue facing most parts of the world by the start of this century."

- The Financial Times of London

- Operate at the lowest energy thermodynamically possible for purification = 1
 pel. Systems can be gravity-driven.
- Drop desalination costs by over 2/3rds by operating at the inwest energy thermodynamically possible for desalination of brackish or seawater — 1 psi plue 10 degrees of temperature change
- Present the smallest footprint theoretically possible. A Smart Membrane filtration cube measuring 185mm (8.5 Inches) per side could produce 100,000 gallons of purified water per day at 1 psi
- Be completely scalable from municipal systems to individual use in the field, individual use for full spectrum filtration could be as simple as a 27" long tube over a filter certridge, allowing gravity to do the work.
- Drop maintenance costs and requirements by the simplest maintenance and operation modes of "filter and forget." ¹⁰⁴ No cleaning, recharging, backfushing, etc.
- Provide reliability and robustness; purification with no moving parts (except at atomic scale.)
- Introduce potential non-fouling and non-scaling ability by using biological techniques that provide non-fouling filtration in nature
- Deliver commercially-competitive performance lifetimes
- Reduce the cost of description to approximately that of water purification
- Réplace partial water purification with complete purification at no increased cost.

3

SMART MEMBRANE IMPACTS

This technology is anticipated to make a significant impact on world water crisis, and issues facing the U.S. at home and abroad including hortile contamination of water supplies.

Calculations indicate that these membranes could produce 205 gallons per square foot per day (gfd) operating at <1 pel, and utilizing techniques other than high pressure to accommodate the carrotic gradient during description. At this filtration rate, high volume, high quality water purification and description could be provided within a small footprint: a Smart Membrane cube measuring 165mm (8.5 inches) per side could produce 100,000 gallons of purified water per day at 1 pel. For description, the cube would double in size and require 1 psi plus 10 degrees of temperature change.

The performance implications are:

- reduction in plant size and cost for both purification and desalination
- · provide highest quality water purification at low cost
- eliminate the need for advance testing to identify contaminants.
- useful in a wide range of applications where size and energy are critical such as for peri-urban, rural or remote use off the power grid, emergency and military applications
- useful in a wide range of volume scales: from point of use solutions to small group or individual use in the field, mobile systems and municipal sizes systems in industrial, recreational, commercial, medical, agricultural, municipal, emergency and military settings
- can be packaged as low cost, reliable, low maintenance, easy to use systems which
 should even be applicable even in extreme rural environments.
- sufficiently low cost that it can be used for waste water remediation, elimination of endemic biologics (e.g., Glardis), toxic solutes (e.g., arsenic) or other pollutants in rural communities worldwide.
- With the complexity built in at the atomic level, the user deals only with simple processes require minimal training and maintenance
- simple and safe (echnology appropriate for critical environments such as submarines, space applications

It is estimated that purification applications using membranes will be demonstrable in 18 months, and described applications ready in approximately three years.

THE NATURE OF THE PROBLEM

W r quality and water q re n if all the 1.5., the nest of the Gill plus the developing world. In a dissetters a opera in eadrern environment such as allitary if these dual problems a

An abundant supply of his all fresh water is essential as the basis for individual and community health, gird it as it dustrial products ity as it is it is the problems of water use and quantity were considered is of the in it.

Agus Viz, LLC 330 Beach I, ign is, Californis 94010 650 227 7777.

Use or disclosure of data committed on this sheet is subject to the metriction on the title page of this proposal.

Now, however, the definition of "the world water crists" encompasses G8 countries. The global-wide scientific understanding is that we have reached the end of the era of abundant, cheap, clean groundwater. According to the World Bank, the health and economies of more than 80 countries are threatened by current water shortages. Within the heat 15-20 years, that problem will extend worldwide, including the U.S.

Except for a few locales which receive their weter exclusively from annual anow pack ninoff or figure year-ound main, most of the works fresh water supply is stored underground in aquifers — areas of porous rock which hold water like a sponge. These researches may take on the order of 100,000 to 300,000 years to fill. Higher populations, and growth of industry during the 20% and 21% centuries have meent increasing water withdrawals from aquifers. These withdrawals exceed the natural recharge provided by rainfall. The wefs and pumps used to tap aquifers are drilled ever deepar to chase the falling water levels. This organity water debt is independent of reduction in rainfall due to climate change, or cyclical fluctuations in rainfall due to climate change, or cyclical fluctuations in rainfall due to climate change, or cyclical fluctuations in rainfall due to climate change, or cyclical fluctuations in rainfall due to climate change, or cyclical fluctuations in rainfall due to climate change, or cyclical fluctuations in rainfall due to climate change.

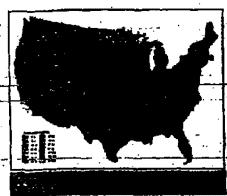

Some examples:

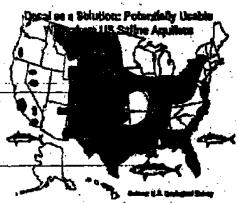

- The U.S. Bureau of Reclamation predicts the exhaustion of the equitien underlying the wastern and mid-western United States by 2025. These aquities required an estimated 100,000 years of relinfall to fill:
- In India, water tables are dropping by 30 metres per year.
- The squifer which provides Australia's fresh water is predicted for exhaustion within 10 years. It is estimated that this squifer had taken 300,000 years to fill with water. Throughout the continent, rivers are turning saline. The city of Perth (population 4M) is building a 45pigalither desalhetion plant to come online in Aug 2006.
- Chine has officially recognized that approximately.
 400 out of 500 cities are whent of water.
- Wars driven by water shortages are predicted to escalate over the next decades. More than a dozen nations receive >50% of their fresh water from rivers that cross borders of hostile neighbors. Currently, water stress contributes to areas of conflict in the Middle East. The wars of this century are predicted to be over

Ogellele Aquiller

Nhety-five percard of the United States' fresh water is underground. As furners to the Texan High Plains pump groundwater feeter than rein replanatives a dropping. North America's largest equifier, the verter tobles are dropping. North a rate of 13 billion cubb metres (Dong a being depleted at a rate of 13 billion cubb metres (Dong a year. Total depleten to the ennual flow of 8 Colorado Rivert. The Opalists stretches from Texas to South Delcois and weiters one fifth of US infigated land.

The BBC

Fresh water could be acquired by "desalinating" high solute wastewater, or by desalinating seawater or the brackish water which underlies most continents. However, today this process is done using reverse carnosis technology whose high energy demands produce fresh water at a price which is 8 to 10 times that of purifying tresh water (not assuming any increase in energy prices from 2004). The impact of such cost increase on industry, which uses 20% of all water, and agriculture—which uses 70+% often at artificially low prices—would be significant.

In contrast, Smart Membrane technology is anticipated to provide desalination of wasta water, brackish or seawater at a cost roughly equivalent to that of current fresh water purification.

WATER QUALITY ISSUES

Worldwide, 24% of all fresh water is now polluted and in countries such as Chine as much of 75% of all water is contaminated. New U.S. rules will require purification of these contaminants, at the cost of billions. Water quality issues derive in part from natural contamination from substances such as boron, bacterial and viral infestations, and from man-made contaminants. For example:

- man-made poliutants, such as chemicals from manufacturing operations, or product residue such as the MBTE which contaminates the Los Angeles water supply. Contamination may be accidental or deliberate, as in terrorist threat.
- bacteria and viruses. Bacteria or viral contamination is often discovered only after lifness or istalifies are traced back to the water supply. To date, the largest U.S. problem resulting in disease and death involved 400,000 people in Michigan. Some bacteria and viruses have been further apread by human activity, such as the glandle and cryptosporidium contamination from livestock waste throughout rural US communities with farming operations. According to the EPA, approximately 95% of all U.S. municipalities are small systems serving populations of less than 5,000 and lacking resources to build improved their water purity. Terrorist scenarios envision deliberate contamination.

Agus Vis, LLC 330 Beach Road, Burlingame, California 94010 650-227-7777
Use or disclosure of data complised on this sheet is subject to the restriction on the 100 page of this proposal.

- novel bacteria and viruses. Microbiologists are now concerned about the threat from imported species.
 Preparation to test for, identity and treat to eliminate a multitude of potential new threats is not present.
- arcenic, boron, other tools minerals. Many countries, including the US, are now acquiring data which indicates that their ground water contains unacceptable levels of arcenic or borates which cause disease over the long-term. Although not at high snough levels to produce the immediate diseases and disfigurement seen in Bangladeen, the arcenic will cause cancer and other diseases over finis. Within the U.S. scientific continuity, debate is now underway about the amount of arcenic contamination which will be accepted. Using current technology to clean water to the known safe levels is estimated to cost billions over acceptable budget levels.

Number of People at Risk From Arsenic Poisoning

US - unknown
Headco - 400,000
Chile - 437,000
Belivie - 5,000
Arganitis - 2,000,000
Arganitis - 35,000
India - 1,000,000
Romanis - 35,000
India - 1,000,000
Thalland - 1,000
Vietnam - millone
Talwan - 200,000
Chine - 720,000

The processes for removing large large large confaminants from water ere well established; efficient and low cost. But as the contaminants to be removed become smaller – as in CBW agents or salts – the cost rises, achieving levels which are not financially sustainable. At present, some levels of desired cleanliness are not attainable because the technology does not exist to do sufficiently precise filtering. One reducing endotoxins in

by Doll and emergency services for hydrating a sports drink or meal package; in order to let the water through, the filter also lets through a very small todin, urea. example of this lack of precision is the presence of inflammation-causing endotatins in ultra pure" medical water for dialysatis. Another example is the filtration technology used

Affinough people will pay handsomely for bottled water, general water purification is an extremely price sensitive business. Traditionally, a disease outbreak signals that a

A guis Vis., LLC 339 Beach Road, Burlingame, California 94010 — 659-227-7777 Upo or disclosure of data contained on this about is authent to the restriction on the time page of this proposes

problem exists. Municipal water systems usually have tremendous difficulty providing any improvement which increases costs.

Smart Membrane purification, providing full spectrum filtration, does not require identification of a new threat or higher cost to provide superior protection, it does not require the traditional higher energy used for filtration at the smallest and of the pollutant range. Yet it will provide water purer than that found in medical treatment centers. The definition of the desired potable water and product (water plus earth satis) means that other charrical or biological species are not allowed to pass the membrane. No testing is required to determine which chamical, biological or other species of threat is present in this way, the highest purity water could be consistently provided in the "filter and forget" mode, and at no additional cost for the increased purity.

Agua Via products are anticipated to provide such full spectrum filtration to create good, potable weter, eliminating all bacteria, viruses, parasites, cysts, amoebas, chemical and blologic werfers agents, potaons, toxins, areanic, boron, spores of pathogens, nitrogenous waste from commercial fertilizer or excrement, heavy metals, etc. This includes the common problems of dysantary, typhoid, cholers, pollo virus, or minerals such as arsenic and fluoride; Good water becomes available at low cost for all needs: drinking, sanitation, hygiens and waste water redemption. Adding Agus Via filtration to municipal systems would eliminate many contamination issues including the pervasive arsenic problem and the threat of contamination posed by terrorists.

OTHER TECHNOLOGIES PROVIDE INCREMENTAL IMPROVEMENTS

Conventional technologies date from the 1800's (water purification) through the 1950's (reverse camosis). Over the decades, conventional technologies have continued to make incremental gains as inventive engineers have found ways to extract bits of efficiency in creative ways. In some cases, such as multi-stage fisch for desalination, take advantage of special circumstances, such as building a power plant and a water filtration plant together in order to use the abundant wasts heat from the power plant. In general, however, these technologies have been out competed by membrane desalination technologies or conventional water purification techniques.

Water purification, and desalination are demanding applications in demanding environments. Experimental technologies which took good in limited performance environments in the lab commonly fall when tested in the field because of inability to deal with feedstock complexity, or other demands of the in-field environment. Adding the demanding financial requirements for water filtration or desalination can also eliminate a prospective technology or limits its use to a highly confined areas. Currently, carbon nanotubes are enjoying promotion as a water handling technology; they will have to face their limited adsorption capacity – after which small pollutants would just flow through, high manufacturing costs, tack of anti-fouling properties and attendant high maintanance costs to find any broad market acceptance.

In order to provide the necessary order of magnitude improvements to both costs and quality of filtration, truly new technology is needed that is capable of functioning in the

DEFINITION OF AN IDEAL PURIFICATION SOLUTION

- Able to clean up the full spectrum of possible contaminants with a single technology
- Lowest energy thermodynamically possible for water purification, waste water remediation and desalination. In the field, no external power source required.
- Technically simple and robust
- Greatest non-fouling and non-scaling capability ever applied to water purification or descripation.
- No ongoing maintenance requirements: eliminating chemicals, backflushing, plant downtime
- . Low cost to manufacture.
- Scalable from small point-of-use solutions (in the home or field) to handling large volume applications for urban water supplies.
- Long performance lifetime.
- Rapid purification of large volumes of water

SMART MEMBRANETECHNOLOGY

The Smart Membrane core technology was designed from inception to provide ultraspecific filtration in rigorous real-world environments at the lowest energy and lowest
total cost (Infrastructure, maintenance, training, etc.) possible. Developing a technology
capable of dealing with the highly complex set of issues involved in water purification
and description was a key consideration in the basic dealign of Smart Membranes. The
implication of working to the rigorous nanotechnology definition of complete control at
the stomic scales provides unprecedented benefits in such sreas as exqualite filtration
specificity, high filtration performance, low energy requirements, non-fouring in the face
of multiple complex feedstocks and the other criteria need to be an ideal solution to
water purification and description needs.

Although a Smart Membrane is only a few atomic layers thick (.05-.22 nm), it consists of three distinct parts:

- 1. A protective top layer is designed to amplify non-fouling characteristics, amplify water ordering to further reduce energy costs, and extend the working life of the Smart Membrane. This protective layer can be custom engineered on an atom-by-atom level of design to provide a specificity previously found only in fiving systems. As a result, many of nature's successful and-fouling strategies can be applied for the first time.
- 2. A one-atomic layer thick nanomembrane is directly under the protective top coating. This is where the work of filtration and separation is carried out. The nanomembrane is designed and built to provide only the desired and product usually either potable water (water plus earth salts), or water that is completely salt free. This membrane eliminates anything other than the specific class of water that the customer wants. At one stornic layer thick, this membrane offers no impedance to flow.

The one-stom-thick nanomembrane is the key to the benefits which a Smart Membrane can deliver. Unlike the way conventional membranes are constructed through bulk

Agua Vis, LLC 330 Beach Road, Burlingame, California 94010 650-227-7777

Use of diaclosure of data contained on this sheet is subject to the restriction on the title page of this propusal.

processes, each nanomembrane self-assembles from a collection of custom designed, pharmacologically-built porte.

Smart Membranes result from the creation of a new class of extremely selective, biomirnetic Smart Pores which essemble into thin (0.5nanometer-.22nanometer) porous nanomembranes. These porous monoleyer membranes have specific structures that provide a low energy barrier to the passage of water or specific solutes, while providing a high barrier to other solutes. This technology shows highly specific molecular distriction at the stomic scale and profound transport properties such as exquisite ion selectivity characteristics.

Each pore has been designed and built with complete atomic precision in exactly the same way that a pharmaceutical is designed and built. Often the design of the pore's interior may minds the ective litration portion in call membrane proteins, such as aqueporin, naturals water charmed. By eliminating the voluminous support structures in the natural equaporin and building only the "business part" of the molecule, a Smart Pore can move water even feater than its natural counterpart.

Because of this light stornic design control, a pore need not be built to merely exclude contaminants based on their size, but can also be built to eliminate classes of contaminants based on their complete chemical identity including alorsic shape, electrical charge, hydrophoblicity, hydrophilicity, etc. This demonstrated ability means, for example, that a complex, mixed wasts stream including a wide range of 400,000 different contaminants, earth salts, uses and water can deliver just potable water (water and earth salts). The major technical achievement demonstrated here is that even though the uses (a known toxin) is smaller than the earth salts; uses is rejected based on its electronic characteristics rather than size.

The exterior of each pore has a distinct top, bottom and sides. Think of a Leggo block with a hole in the center. The hole does the filtering work, but the top, bottom and side attachment sites on the Leggo let it snap together with other Leggo blocks. The sides of the pores attach to each other to form the nanomembrane the way the sides of Leggo blocks snap together to form a plane.

On the top surface, this snap-on ability allows the precision building of the protective toplayer (discussed above) which can be specifically designed to prevent bacterial fouling, scaling and other forms of fouling while also enhancing water ordering to further reduce energy demands.

On the bottom surface, the snap-on ability slows the pores in the nano-membrane to attach to a thicker, porous substrate,

3. The porous substrate, The porous substrate answers the question of how to handle a nanomembrane that is only one atomic layer thick. The porous substrate is a thin film, much like a thinner version of Saran Wrap, with a regular array of holes in it. The porous substrate is a passive, structural component, its purpose is strictly to support the nanomembrane, allow for handling during manufacturing and contribute to the working lifespan of the membrane. The nanomembrane does the actual work of filtration; the porous substrate lets the water flow on through.

Use or disclosure of data contributed on this shoot is subject to the restriction on the 100 page of this proposal.

TECHNOLOGY-DERIVED BENEFITT

This basic technology enables the defivery the application-critical benefits, so exemplified in the following four key areas:

- 1. Ultra specificity in filtration
 2. Low-maintenance through non-fouling, non-scaling characteristics
 3. Ultra small device temprint coupled with ultra high performance
 4. Ultra low Energy requirements

4. Specificity, Previously, the shilly to create potable water by removing uses, even though the use is smaller than the earth sale, was described. This is an unprecedented technical achievement, and a strong demonstration of acquisite control over specificity of filtration. Secause pores can be built to absolute specification—different sizes, shapes, charges, siz.—this shilly can be tuned to apply specific filtration to any class of problem required.

Agus Vis products are articipated to provide such full exectum filtration to create good, poleble-weight; eliminating all bactaria, virusce, paraelites, cyste, amoebas, charactal and bloogic: warfare agents, postons, bootis, amenits, botton, spokes of pathopens, nitrogenous waste from commercial fertilizar or excrement, heavy metale, nanobactaria, etc. This includes the common problems of dyseniary, typhods, cholens, polit virus, or minerals such as areanic and fluoride. Good water becomes proliable at low cost for all needs; diretting, rentiation, hydrene and waste water retemption. Adding Agus Vis filtration to municipal systems would eliminate many contamination insues brought the pervasive exemic problem and the threat of contamination posed by temprists.

2. Low Maintenance. A membrane, no matter, how perfect its ability to filter, is useless if it is clogged. Scale buildup in water with notable mineral content is one such problem. Bacteris are snother prime problem. They ethach to surfaces and form rock hard blofilm which impairs or ends filter performance. Conventional membranes are backflushed and blackhed with hersh chemicals to bill backeris or to descale; this requires plant downtime. and creates maintenance expense.

The Smart Membrane's ability to address problem through specificity at the storals become unprecedented apportunities to control these problems. For example, the technology of the Smart Membrane provides multiple strategies to defeat biofilm formation. Some strategies are at the level of the pores and manamembrane, and others are employed by the protective top coefing, creating a total anti-bacterial environment.

One major strategy of bacteria is to use the thread-like pill (seen here surrounding the main body of an E. coll becterium) as grappling hooks to establish a footbold on a surface. But E. coll's pill, for example, measure 650 angstroms in diameter and are too big to anagonio any feature in a Smart Membrane. The pill are 100

Agus VIs, LLC 330 Beach Road, Berlingsons, California 94010 — 650-227-7777 Use or disclosure of this contained on this shareth related in the nearlither on the title page of this proposal

times bigger than an individual pore's exterior of 65 angstrome, and 260 times bigger than a purification pore's interior dimensions of 25 angstroms.

Both the nanomembrane and the protective layer above it appear to these bacteria as absolutely smooth, featureless surfaces. The structures of both the protective layer and the nanomembrane are too small to be used by bacteria.

Laminar flow is also known to inhibit becteria's ability to form biofilm. The environment bacteria encounter is optimized for laminar flow, they are swept along with no ability to attach to a surface.

Other becteris do not use plil, but colonize by taying down a stime layer. But both classes of bacteria are known to have characteristics which can be used to inhibit bloffirm formation. Both classes of bacteria prefer a hydrophobic surface on which to begin colonization. Besteria are also known to be substrable to a range of anti-microbial chemical and pharmaceutical agents. Therefore, among the design requirements for the prefective layer is to present a becteria-hostile, hydrophilic surface studded with anti-microbial destruct points, and optimized for laminar flow.

This ability to design with storale precision has never been available before. It means that many strategies for preventing fouling and scaling, or strategies for precision-filtration are made evailable for the first time. In addition, this is setup up for continued filtration over a long life spen. Unlike bucky tubes, activated charcoal or delonization media-which-utimately-saturate, a nanomembrane simply litera: undesirable classes of contaminants cannot pass through the membrane and are dumped to waste. Desirable pure filtrate water passes through the pote and is captured.

- 3. Small Footprint, High Performance. Attached to their Saran-Wrap-like porous substrate, the complete Smart Membranes are only 0.5 microns thick, in contrast with conventional membranes which 35 times thicker. Therefore, a huge amount of filtration capability fits into a very small footprint. Calculations indicate that one square foot of membrane could produce 205 gallors of purified water per day operating at <1pst. At this filtration rate, high volume water purification could be provided within a small footprint: a Smart Membrane cube measuring 165mm (6.6 inches) per side could produce 100,000 gallors per day at 1 pst. A city of 5 Million people with a 600 gigaliter annual water need could be met with 5,000 such cubes.
- 4. Low Energy Requirements. Because these membranes are so thin, very little energy is required for their operations. Because these membrane structures are so thin, it is useful to think about them in quantum mechanical terms rether then classical floid mechanical terms. Dr. William Dean of MIT has described these pores as "orifices" offering no impedance to flow, rather than as conventional "pores."

With low pressure drops across a nanomembrane 0.5 nanometers thick, high flux is produced at very low pressure differential. In fact, the impedance to flow is created by the porous substrate — although its job is to provide support, the religibility on how fast water can be processed is how long it takes to flow through the "thick" substrate.

In the most energy efficient mode, a filtration cartridge would sit at the bottom of a tube with a 27 head of water. At 1 pei, gravity does the work to purity the water.

Agus Vis, LLC 330 Beach Road, Burlingame, California 94010 650-227-7777

Use or disclosure of data contained on this sheet is subject to the restriction on the title page of this proposal.

SMART MEMBRANES AND DESALINATION

The most expensive form of creating potable water or water completely lacking salt is describation. Excluding any recent rise in the cost of energy, today describing of seawater can cost over \$1,000US per acre-foot. Water with less salt in it (brackish water) costs less to clear because the lower salt content drops the errount of pressure required. Although Tampa Bay, Florids had once hoped to describe a mix of brackish water and seawater at a cost of only \$650US per acre-foot, this potantial cost reduction was due to favorable financing terms, not technical breakthroughs. Even at Tampa Bay's larget cost, this still lesses described hopen only to energy and clash rich countries of the First World and the Middle East.

The claims of dramatically lower cost describation which used to be made by the Tampa Bay, Florida project are now being made by the Ashkelon project in larget. These numbers, which have even been quoted by the Congressional Budget Office as reflecting the current price of describation, are again based strictly on financing deals which have been described in the industry experts as "brittlant." According to describation experts within the U.S. Bureau of Reclamation, these systems contain no technological contribution to increased efficiency. The true cost of describation remains unchanged. In fact, Tampa Bay failed to meet its technical performance goals by 50% and is currently undergoing re-engineering.

Energy is the largest cost component of describation: annually, energy costs generally match capital costs. A \$400M plant can expect to generate a \$400M annual energy bill, assuming no price increases for energy. A dominant percentage of the capital costs are also derived from the energy requirement, e.g., high pressure pumps; energy recovery systems.

The final stage of purification—in which the water and salt are separated - accounts for 89% of the energy cost. Of that energy cost, roughly 2/3th is due to overcoming 1) the long and 2) tortuous path of the pores in conventional membranes. Only 1/3th is due to overcoming the osmotic gradient of the salt.

The Smart Membrane's extreme thinness and lack of tortuous paths immediately eliminates the 2/3rds energy pensity experienced by conventional membranes. Significant as this cost reduction is, the impact of moving to a low-energy/low pressure mode ripples through the overall design of any water system, accounting for an additional reduction of both the capital cost and labor costs. Concumitantly, eliminating high pressure pumps, energy recovery systems (little wasted energy to recover), certain pretreatment systems, reducing system complexity and maintenance costs may provide overall cost reductions on the order of 60 or 70% for a Smart Membrane seawater desalination system.

SMART MEMBRANE TECHNOLOGY MODIFICATION AND DESALINATION

The differences between using a Smart Membrane for desalination, as opposed to water purification are:

 For use in desalination, a smaller pore must be used than the basic water purification pore. A water purification pore can pase up to 4 water molecules at a time. For desalination, the pore must be capable of passing only 2 water molecules at a time.

Agus Vis, LLC 330 Beach Road, Burlingsine, California 94010 650-227-7777

Use or disclosure of data contained on this sheet is making to the restriction on the tipe page of this proposed.

- 2. Further "anap on" chemistry must be used to overcome the osmotic gradient.
- 3. In addition to the 1 psi energy requirement, 10 degrees of temperature change would be needed
- 4. The footprint would expand: the equivalent of two 6.5" cubes would now be needed to provide 100,000 gallons of desalinated water, instead of one cube.

-OVERCOMING OSMOTIC GRADIENT WITH A SMART MEMBRANE SYSTEM

Conventional desalination today uses reverse camosis with thick polymer membranes. To push the water through the membrane and leave the salt behind requires pressures ranging from 180 psi (for use with brackish water) up to 1400 psi (for use with seawater). In each case, 2/3rds of the pressure is used to overcome the fortunsity and the thickness of the membranes. The remaining 1/3rd is to overcome the camotic gradient with salt water on one side of a membrane and fresh water on the other side, the more concentrated salt solution "wants" to pull more fresh water onto its side until the salt content is evenly balanced between both sides. In reverse camosis, the additional pressure is placed on the salt side to push fresh water through the membrane and away from the salt.

Because of the Smart Membrane's extreme thinness, the penalty for overcoming the tortunality and thickness of conventional membranes is eliminated. Therefore, 2/3rds of the pressure requirement and 2/3rds of the energy cost disappear.

This leaves the remaining issue of dealing with osmotic gradient and reducing its attendant costs. Recently, a different technique has been used to aliminate the need for high pressure in dealing with an osmotic gradient; forward osmosis. The most widely known example has been the DoD's use of the technique for rehydrating food packages or sports drinks using a warfighter's urine or waste water. In this technique, a contaminated solution (urine or unsafe water) is placed on one side of the membrane. Sugar is placed on the other side of the membrane. The sugar draws the liquid in the contaminated solution across the membrane until there is an osmotic balance between the two sides. The membrane, to the best of its ability, separates water from contaminants. The user now has a sports drink or a hydrated food package.

Note that this technique produces purified water, not desalinated water (water free from a high solute content).

- The disadvantages of this technique which limit its usefulness are:

- unless the desired end product is a sports drink or a hydrated food package, the
 user now has water contaminated by sugar at some other substance which
 would require purification.
- once the sugar or food packet is used up, more sugar or another sorbent must be imported to process the next batch of water. This makes the technique expensive and impractical.
- As used today with conventional membranes, urea also peases along with the water and saits into the sports drink or hydrated food package. Urea is a known toxin; and too much exposure will include kidney (allure.

Ages Vis. LLC 330 Beach Road, Burlingame, California 94010 650-227-7777.

Use or disclosure of data contained on this sheet is subject to the restriction on the title page of this proposal.

However, moved to a level of stomic precision, this forward osmosis technique can be modified to overcome its disadvantages and made useful for desalination. For desalination with a Smart Membrane, a reusable, high density ("thirsty") molecular sponge can be engineered and anapped onto the base of the Smart Membrane. The sponge would scale up water from the bottom of the pores until saturation is reach. A few degrees of temperature change would be required to "wring" the sponge out and release the water into the catch chamber. The sponge is now ready to sook up another batch of water. As abundantly demonstrated in nature, many other systems commonly load and release over prolonged lifetimes. By designing and building at the atomic scale, these systems can be borrowed and modified for use elsewhere.

SUMMARY

Smart Membranes represent a new technology based on building materials which mimic the way nature performs filtration, selection, and protection against blofflin and scale formation. This technology is anticipated to out perform any known or planned competitors. The benefits include operating in an utilia-low energy mode, and producing highly pure and highly specific filtration.

Smart Membrane technology is anticipated to be applicable and superior for applications in:

- Decalination epitications, including both seswatar
 and brackish water.
- Purification applications, ranging from high purity semiconductor, other industrial and medical uses through home drinking water.
- Ramediation of both waste water and poliuted ground water.

Their specific technical capabilities include:

- Unique "full-spectrum" filtration of any mix of contaminents in the water feedstock
- . The highest purity possible
- . The lowest cost possible
- The lowest energy requirements possible
- Extreme flexibility of capacity, from municipal scale to hand held units in the field, in an extremely small footprint. A 6.5' cube is anticipated to provide 100,000 gallons of purised water per day.
- "Filter and forget" robustness under tough conditions.

Applying Smart Membranes to the problems of water purification and desalination holds the potential to positively impact the world water crisis and the many dimension which water shortage or impure water represents; health, agricultural productivity, industrial

Agus Via, LLC 330 Beach Road, Burlingame, California 94010 650-227-7777
Use or disciouse of data contained on this sheet is subject to the restriction on the title page of this proposel.

productivity, and conflict between nations. Because the technology combines high performance with low total costs (product costs, energy, infrastructure, metrizenance, training, etc.), it is anticipated to have major impact at opposite ends of the spectrum.

- such as the US DoD services, whose needs encompess and surpass those requirements are anticipated to derive value from Smart Membrane technology. The DoD operates in this most extreme environmental and logistical conditions, and is required to deal with the fullest array of water quality and water quantity problems. In eddition, their operation is usually subject to the strictest fortprint, weight, component resupply, volume issues, maintenance and sefety requirements. The range is exemplified by the need for detailination and purification occurring everywhere from submarines at depth to individual warrighters on the ground facing CBW contaminated water, or no liquids at all expect for their own sweat and uring. 1. High Performance Venues. In addition to water users with high purity demands such as semiconductor manufacturers or medical applications, organizations.
- provide cost-effective describetion to the American mid-west so wall as cost-effective water purification against the problems such as arranto, grandia, etc. Expressed interest in Smart Membranes has come from Australia, Singapora, China and India in addition to European parties, introduction in some vertical such as the water-short Middle East, may saisist in reducing tensions and Low Cost/high Volume. Municipal systems and point of use applications both in the U.S. and internationally are anticipated to be used by those seeking higher purity hesh water at low cost, or desalinated water at low cost to cope with water shortage. At a competitive price point, the Smart Membrane technology could shortage. increasing prosperty.

water provision are lifted, Various new paradigms of how water is delivered may well evolve, and with them new paradigms for living, conducting business or military operations. For example, municipal systems may become more widely distributed. Countries with substandard infrastructure may opt for home point of use systems to sugment central municipal facilities. Military operations may be more flexible once the logistical burdens of

By combining high performance with low cost, Smart Membranes hold a potential solution to seamingly intractable problems involving water quality and water quantity.

Response to Aqua Via Desalination Paper

Gayle Pergamit submitted similar white papers and a proposal to ONR BAA 05-005 Science and Technology in Water Desalination and Purification, January 2005. The BAA was part of a congressional program sponsored from Senator Domenici's office: Expeditionary Unit Water Purification Program, EUWP. Through this congressional, ONR is interested in research towards lowering the costs associated with water purification and desalination.

Working with Martin Edelstein and the company Covalent Industrial Technologies, LLC Gayle Pergamit submitted two white papers. The proposed work was primarily computer modeling (by Edelstein) to determine which sort of cyclic molecules could desalinate water. At the time, the company claimed to have developed a successful kidney dialysis membrane based on molecular computations. Two white papers were submitted to get around the cap of \$250k per year. ONR received about 300 white papers and asked for about 40 full proposals (with intent to fund about 15-20). We requested that Pergamit and Edelstein: (1) combine their two white papers into one proposal; (2) show some of the 'successful chemistry' from their kidney dialysis product; (3) and come up with a proposal that resulted in proof of concept within two years. The proposal had significantly more detail than the white papers and significantly more detail than the current white paper from Agua Via. The reviewer comments below show that at the time, it was still high risk/ high reward research and that none of the reviewers were comfortable even with the level of detail in the Covalent Industrial Technologies proposal. It was not recommended for funding.

Review comments from BAA **05-005**, Covalent Industrial Technologies, Pergamit, Edelstein

Reviewer 1:

We got this proposal two years ago. They had already developed the kidney and were looking for new markets. Now the proposal says the kidney dialysis membrane is still in development. This proposal is more cryptic. What is a "smart pore?" It sounds like the same technology proposed in #849. At any rate, this proposal will only search their molecule database and model it for the first year and in the second year make one pore. #849 was a better deal.

Reviewer 2:

The PI proposes to develop a monolayer macrocycle membrane for RO just like the artificial kidney success that they claim. The problem is that specific chemical detail is not given. The concept is great but though I believe the membranes would be frail. They

propose to use molecular modeling to develop macrocycles with 2 angstom pores that will let only water pass. The macrocycles will assemble side by side on a substrate and be reacted to the surface so that one has a 1 molecule thick separation layer on a substrate. They say that hurdles such as ordering of the macrocycles and bonding them to the substrate have been overcome, even patented, but give very little details and don't list the patent. Still, approach is tempting, but year 1 is only modeling to select which macrocycles to make and test in year 2.

Reviewer 3:

The offeror proposes to develop an aquaporin like macrocyclic molecule which will selfassemble into a monomolecular membrane. Biological membranes use aquaporin transmembrane protein channels to separate and transport water molecules with a high selectivity and low resistance resulting in a low consumption of energy. The offeror plans to conduct a structural evaluation of their existing macromolecular library, conduct structural evaluation for chemical modification, if in the likely event no exsisting molecules will form a water pore, conduct molecular pore modeling, conduct pore testing, and evaluation of membrane formation and testing. This pattern follows the successful pattern used for the development of an artificial kidney membrane. The use of molecular modeling will enable rapid evaluation of macromolecules. There appears to be a high risk with the offerors proposed approach of developing a nanomolecular membrane that is only one molecule thick. This means that they must be able to form a perfect layer only one molecule thick or will have defects in the membrane, reducing rejection efficiency. This one molecular thick membrane must also be able to cover the surface of a rough support layer that will have a roughness exceeding the thickness of the membrane or they will have to fabricate a **new** support membrane that is extremely smooth, which is an entire project in itself. In order to overcome osmotic pressure with a thin, delicate membrane the offeror proposes to use a novel forward osmosis based on a temperature sensitive reusable polymer. No details are given on the expected driving force generated by this process or energy requirements of the recovery of water from the polymer. Without this data it is impossible to evaluate the overall system energy requirements and potential for enhancement over current state of the art.

Current White Paper from Agua Via, LLC, Pergamit

The white paper from Agua Via has the following problems:

- 1. Absolutely no detail is given on the chemistry of the one atom thick membrane rejection layer. It **is** doubtful that such a thin membrane could exclude solutes by any mechanism other than sieving. Aquaporin water channels (the molecular proteins that transport water through cell walls) in the body have an hour glass shaped pore with 20 angstroms or so length and embedded charges using both sieving and columbic repulsion to purify water.
- 2. Absolutely no detail is given on the rest of the membrane structure, which must be rugged enough for handling and winding into a module, have fine enough pore structure to support the atomic layer, not foul, and have no pressure drop across it. If they had such a support they could already sell it to industry.

- 3. Absolutely **no** detail is given on how such an atomic layer membrane is assembled to be pinhole free and adequately supported.
- **4.** There are membrane techniques such as "direct contact membrane filtration" that can desalt water without application of pressure, just taking advantage of vapor pressure differences between cold and hot water. At a 10C temperature difference across the membrane, there is a very low flux of water from the feed to the treated water stream. **Also,** for such an approach to work, thicker membranes with larger hydrophobic pores are desired.

There is no reason to consider this white paper any further. Work on this began in 1997 yet the proposer does not give any indication as to the current state of progress in the development of these smart membranes. Thus there is no reason to believe any of the anticipated benefits of this nonexistent technology. The lack of details is consistent with a previous proposal received by the Office of Naval Research. Additionally, Martin Edelstein, the researcher on the previous proposal, is not mentioned in the white paper and the qualifications of Gayle Pergamit are not given.

Paul Annistead

INFORMATION PAPER

SUBJECT: Agua Via LLC Nano-Molecular Membranes

1. Purpose. To respond to the Agua Via Nano-Molecular Membrane Unsolicited Proposal.

2. Facts.

- a. All U.S. Army tactical water purification equipment is required to purify and/or desalinate any potential source water. In general, the Army is interested in research that could lead to the reduction in costs or increased availability of water purification equipment at the tactical and individual soldier level. Current purification systems are based on membrane technology using microfiltration or ultrafiltration followed by reverse osmosis.
- b. In November of **2004**, individuals from the Army Tank-Automotive Research Development and Engineering Center (TARDEC) reviewed a white paper from Agua Via LLC on Nano-Molecular Membranes in support of the Office of Naval Research (ONR) Expeditionary Unit Water Purification Program (EUWP). The ONR EUWP program is currently funding two projects investigating biomimetic membranes. The white paper purposed from Agua Via LLC was not selected by ONR for award.
- c. The white paper from Agua Via LLC does not provide enough information to assess the potential of the proposed technology. Potential technical issues not fully addressed are the ability to create defect free membranes on a large scale and the elimination of fouling (choked with a foreign substance).
- d. The proposed method of desalination, which requires heating water 10 degrees, will require approximately 11 watt-hours per liter. The Affordable Desalination Collaboration, a non-profit organization of commercial and government agencies, has recently demonstrated membrane based desalination with commercial technology at 2 watt-hours per liter. Therefore, from an energy efficiency standpoint, the proposed approach does not appear attractive.

Please respond by 5/7/04 _____

Dear Secretary Rumsfeld,

I am a sophomore at Stanford University with a strong interest in national security and foreign policy. My grandfathers were Edward H. Levi and George A. Ranney This summer 1would very much like to serve as an intern for you or for one of your assistants

Much of my academic study has concentrated on national security and defense. I have taken courses in international conflict and peacekeeping, technology in national security, and the politics and history of national defense. I am also co-director of the public policy forum of Stanford In Government, a non-partisan student organization that promotes discussion of national political issues.

Last summer I interned for the House Committee on the Judiciary's Subcommittee on Crime, Terrorism, and Homeland Secwity. This was a wonderful experience, and I learned a-lot about the legislative branch while also making myself useful in anyway that I could.

It would be a great honor to serve you and io be of whatever help I am able.

I have attached a copy of my resume. I know that you are extraordinarily busy. Thank you so much for your consideration. I am most grateful.

Sincerely,

(b)(6)

SUBJECT: David Merkel

Chris Cox asked you to consider David Merkel as Deputy Assistant Secretary of Defense for Eurasia. I interviewed Merkel today.

Key conclusion: In my view, he is not as strong a candidate as Jim MacDougall.

- Merkel has relevant experience and supports President.
- Merkel is currently Deputy Assistant Secretary International Affairs, Treasury Department working on congressional issues,
- He does not have much management experience (he supervises two people at Treasury).
- He does not have substantial foreign language skills.
- He, of course, is not as knowledgeable of current policy as MacDougall, who is acting DASD-Eurasia.

Assessment Team Recommendati

DoD Transition Support Team - Iraq

Update to the Secretary of Defense 22 April 2004

11-L-0559/OSD/25979

Progress Notes

- The Operations Plan, with accompanying Annexes, Appendices and Milestones, was circulated for comment on 6 Apr.
 - DoS, OSD, the Joint Staff, CENTCOM, CJTF-7 and all military departments returned very helpful comments. An updated Operations Plan will be published during the week of 26 Apr.
- The DoD Assessment Teams reviewed a consolidated list of 26 recommendations stemming from their reports.
 - 12 have been completed (see Back-up slide 10)
 - ☐ 7 have been resolved and actions are ongoing (see slides 3-8)
 - 6 are working toward resolution (see slides 3-8)
 - □ 1 has been forwarded to the Deputy Secretary of Defense for decision (see slide 7)
 - Complete
- Missed, or potential to miss, due date causes moderate risk for transition
- Missed, or potential to miss, due date causes high risk for transition

Iraqi Security Forces

Action Acquire urgently needed equipment for the Iraqi Security Forces.	Due Date 1 Aug 04	Status Army PMO reviewing and accelerating equipment procurement contracts in Baghdad. Iraqi Security Force equipment contracts will be awarded throughout April, with deliveries expected 30-90 days later.*
Strengthen Coalition efforts to stand up Iraqi Security Forces.	31 Jan 05	Over 203,000 Iraqi Security Force (ISF) members in uniform. Current plan ensures that 68% will be fully trained by Jan 05, while 95% will have at least received training through the Transition Integration Program.**
Establish a process to certify that Iraqi units are credible and capable of performing their mission.	To be Determined	Iraqi Security Force training and certification is being re-assessed due to lessons learned from operations during the last two weeks. A new certification plan is pending new training concept approval.

^{*} CENTCOM is reporting requirements, equipment inventories and projected delivery dates. J8 has forwarded an inventory spreadsheet to CENTCOM to capture this critical information. CENTCOM and J8 are reviewing and reconciling a rough draft of the returned inventory spreadsheet. This information will be included as a back-up slide in next week's brief.

^{**} During recent operations the Iraqi Police Service & Iraqi Civil Defense Corps in select locations failed to perform as expected. These forces are being reconstituted and new leadership training programs are being developed.

Iraqi Security Forces (cont.)

Action Due Date Status Embed advisors in the Iraqi Security Forces. 1 Jul 04 ☐ The four (4) Iraqi Armed Forces (IAF) battalions that have been trained and graduated are being mentored by Coalition forces.* (2 battalions are currently deployed) All 40 Iragi Civil Defense Corps (ICDC) battalions are being mentored by Coalition forces.* (23 battalions are currently deployed) 296 of 500 authorized Iraqi Police advisors are in theater. 50 are deployed in Kirkuk, however the remainder lack sufficient personal security and communications equipment to deploy with Iraqi Police units throughout Irag.**

^{*} CENTCOM currently developing a program to embed advisors down to the platoon level in both the IAF and ICDC.

^{**} All police advisors and trainers are in lock down as Coalition forces have been tasked elsewhere to meet the recent security challenges.

Acquisition

POC: COL Nick Justice (b)(6)

<u>Action</u>	Due Date	<u>Status</u>
Resolve post-transition Program Management Office (PMO) Alignment.	15 Apr 04	☐ Pending execution of a National Security Presidential Directive.* After the NSPD is signed, DoD and DoS will create a memorandum of agreement to address detailed operational and reporting requirements.
Develop a master plan for US Mission and other Green Zone facilities.	7 Jun 04	Annex F of the Interagency Transition Operations Plan provides the overarching plan for facilities. DoS will complete a plan for US Mission facilities by 24 May. DoD will complete a detailed plan delineating the use of all other facilities in the Green Zone by 7 Jun. US Corps of Engineers has the lead.

^{*}The National Security Presidential Directive will resolve the organizational placement of the PMO and Iraq Reconstruction Management Office after transition as well as the post-transition emergency hire authority. The National Security Council is coordinating DoD and DoS drafts and comments on the NSPD. The NSPD is expected to be approved during the week of 19 Apr 04.

authority.

Personnel

POC: Ellen Tunstall (b)(6)

Action Due Date Status Recruit to fill vacant CPA / post-CPA 30 Jun 04 There are 398 personnel filling advisor positions. staff positions on or before 30 Jun 04. CPA redommends that this number be reduced to 199 after the transition. - 111 people have agreed to remain past the transition - 14 of which are from the Coalition. These volunteers are being vetted by DoS, and recruiting continues for the remaining 88 (26 Coalition) positions. CPA has recommended 39 support staff for the Iraq Reconstruction Office Management Office (support and oversight entity for the advisors). The Interagency Transition Planning Team is Create a CPA personnel redeployment 16 Apr 04 working with CPA to develop the plan. CPA is plan. expected to have a by name, time-phased redeployment plan by 25 Apr. Establish mechanism for DoD and DoS 15 Apr 04 ☐ Will be authorized in a National Security Presidential Directive now being coordinated by the to maintain 5 U.S.C. Section 3161 hiring

National Security Council (as noted on slide 5.)

Finance POC: Mary Tompkey (b)(6)

<u>Action</u>	Due Date	<u>Status</u>
Establish a cost-sharing plan between CPA and tenant organizations for administrative and life support costs.	1 Ma y 04	☐ Decision memorandum setting forth the plan is in the Executive Secretary's office awaiting approval and signature.*
Balance the CPA budget.	30 May 04	A series of actions, developed by the DoD Comptroller's office and Finance Assessment Team, from reviewing contract requirements to charging back logistics costs (see note above) are being planned and executed. As a result of these actions, the CPA predicts a balanced budget by the end of the fiscal year.

^{*} In order to implement the cost-sharing plan by 1 May, the decision memorandum (OSD control number 75915) needs to be signed as soon as possible.

Information Technology

<u>Action</u>	Due Date	<u>Status</u>
Establish a Senior Information Technology Steering Group in Iraq.	15 Apr 04	☐ A decision memorandum was circulated for comment within DoD on 1 Apr. CENTCOM / CJTF-7 registered initial non-concurrence. DoS, DoD and Joint Staff (J6) representatives met on 9 Apr to discuss how to resolve the issue.*
Stand-up an Iraq.gov internet domain to allow the Iraqi government to maintain internet services after 1 Jul.	1 Jul 04	☐ The Senior Advisor to the Science and Technology Ministry is leading the effort in coordination with the CPA Communications Support Office. A strategy document was forwarded to CPA on 7 Apr for acquisition of the domain name. Required equipment will be acquired and operated by the Ministry of Science and Technology.
Establish and fund a structure in the Iraqi Ministry of Defense to promote information flow within the Iraqi Security Forces.	1 Jul 04	☐ Baghdad continues to work requirements with analysis and budget construction to follow; initial construction on a communications infrastructure may be linked to ongoing projects to speed delivery.

^{*} During the 9 Apr meeting, DoS and the intelligence community agreed to provide representatives to the Iraq Senior Steering Group. CPA (Baghdad) is identifying an existing forum to meet the Steering Group requirement. If identified, there will be no need for the decision memorandum. The memorandum is on hold.

Back-Up

11-L-0559/OSD/25987

Tasks Completed Prior to This Week

Action

Identify and support key Iraqi ministries

Establish a panel in Washington to ensure interagency cooperation with respect to communications issues

Achieve unity of effort in the security sector.

Specify that the Multi-National Force – Iraq priority task is the creation of capable Iraqi Security Forces.

Establish a US Deputy for Admiral Nash to oversee Iraqi Army contracting requirements.

Reorganize the CPA Baghdad personnel office.

Start daily/weekly census of CPA personnel.

Improve the operation of the Baghdad strategic communications office.

Establish a working group to identify and overcome bottlenecks in the Iraqi Reconstruction and Relief Fund process.

Resolve pre-transition Program Management Office (PMO) Alignment

Assign a Green Zone Coordinator

Name a single Chief Financial Officer in Baghdad.

FROM:

Donald Rumsfeld

SUBJECT:

Multi-national Force Headquarters

I am concerned about the Chiefs raising questions about the number of people they are getting asked for the Iraq multi-national force headquarters. It sounds like that headquarters must be hundreds, maybe 500 to 1,000 people. Does that make sense?

I have no visibility on the size, what its functions will be, how the Petraeus activity fits in, or what its interaction with Metz will be.

I raise the question, because if you think about it, all we talk to is Abizaid and Sanchez. We don't ever hear about Metz. I have no idea what his role is. He is obviously somewhere between Sanchez and Conway, but the question has to be asked, is the Sanchez headquarters, the multi-national force headquarters, going to be so large that it is going to subsume Metz's function?

Thanks.

27 April 12

Foreign Media Analysis

Arab World: Al-Jazirah's Anti-US Tone on Iraq Overshadows Moderate Programming

The Qatari Government-financedAl-Jazirah TV in recent weeks has maintained a sharply critical tone toward the US in its reporting on Iraq. The channel portrayed US military actions in Al-Fallujah as unprovoked violations of the truce, highlighted the impact of US military operations on Iraqi civilians, implied Coalitionforces used excessiveforce; and glorified the "resistance against Coalitionforces. The channel's reporting on Iraq is consistent with past coverage of US military operations resulting in civilian casualties in Afghanistan and Haiti. Despite the channel's consistently critical reporting on Iraq, it did provide time to the US viewpoint, covering US press conferences and speeches and inviting US officials to comment on events and participate in talk shows. The channel also offered entertainment programming that did not portray the US in an unfavorable light.

Al-Jazirah's reporting on the conflict in Al-Fallujah portrayed the situation as a popular Iraqi "resistance" against the "occupation force" without distinguishing between insurgents, foreign fighters, and unarmed civilians. The channel rarely reported insurgents as instigating attacks against Coalition forces, instead portraying US military actions as unprovoked violations of the truce.

- On 21 April, for example, Al-Jazirah's correspondent in Al-Fallujah. Abd-al-Azim Muhammad, reported renewed fighting between US forces and "resistance men". people of Al-Fallujah." Muhammad said: "As the residents of the neighborhood say, the firing began when the American force with armored personnel carriers and troop carriers penetrated into the center of the neighborhood. The force was met with heavy firing from the resistance men who were surprised at the American forces firing despite the truce agreed to by the occupation forces."
- On 20 April, Al-Jazirah reported "the American occupation forces announced that eight armed Iraqis were killed in Al-Fallujah this evening, while the soldiers of the Marines destroyed three cars in the area, despite the truce that the occupation forces agreed to with the people of the area."
- Al-Jazirah correspondent Hamid Hadid in Al-Fallujah on 14 April reported that the "sudden US storming of the Nazzal neighborhood constitutes a serious threat to the cease-fire, which witnessed many violations that were represented by taking the roofs and minarets of mosques as positions for the [US] snipers, who open fire on every target they see."

Al-Jazirah's reporting on Al-Fallujah also highlighted the impact of US military operations on local civilians, implied that Coalition forces exercised excessive use of force against Iraqi

civilians, and glorified the "resistance" by highlighting successes against Coalition forces and sometimes portraying the Iraqi dead as "martyrs."

- On 15 April, Hadid said that "an ambulance that had gone to evacuate some wounded from
 the Al-Shurtah [police] neighborhood was targeted by US planes which led to its destruction
 and the wounding of three of its members." Hadid said that US forces prevented a medical
 team from getting to-the public hospital and preparing it for the patients: "under the pretext
 that it had not received orders to do so."
- Al-Jazirah on 14 April reported that overnight bombing resulted in nine killed and 11 injured in addition to damage to homes and cars. Hamid Hadid filed a video report in which he said: "Dead and injured, damage and destruction, is the result of the bombing of the citizens' homes by the American fighter planes and forces in response to the violation of the truce on the part of the people of Al-Fallujah, as they say." The report showed a resident saying the planes bombed a "residential area that didn't have any mujahidin or fighters."
- On 8 April, Al-Jazirah's Ahmad Mansur reported that the people of Al-Fallujah asked him to convey a "message" to the world that "we either live with dignity or die as martyrs and we will not surrender to the US forces, even if we remain under siege €or more than a year." Mansur said: "So far, 60 martyrs have been buried in [the stadium]" and the "casualty toll of the past few days is 300 martyrs and more than 500 wounded."

Al-Fallujah Reporting Consistent With Reporting on Iraq, Other Conflicts

Al-Jazirah's reporting on events in Al-Fallujah was consistent with its reporting on events throughout Iraq, which during times of escalated violence consumed the majority of the channel's newscasts.

- On 25 April, Al-Jazirah reported: "Eyewitnesses have said that four school pupils were killed when US occupation troops opened fire indiscriminately in the vicinity of a road in the Iraqi capital, Baghdad, after a roadside bomb exploded. The explosion damaged a US military vehicle." The video showed a dead child and injured children in a hospital.
- On 24 April, Al-Jazirah correspondent Yusuf al-Shuli reported that the "destruction and blood" in Al-Sadr City "were caused by US bombardment, as the citizens say, of several neighborhoods in the city." Al-Shuli added: "Some people say that this bombardment is nothing but a provocative attempt by the occupation forces against Al-Sadr City." He commented that the "bleeding is continuing in Iraq and the biggest losers are the civilians."
- On 25 April, Al-Shuli reported that the "scene in the village of Al-Nu'aymiyah, south of Al-Fallujah, was not much different from that in the city of Al-Sadr, for the destruction and blood swept the village, to which many Al-Fallujah citizens fled in quest for security. The US bombardment, however, forced them to flee the houses they sought refuge in to destinations they do not know."

Al-Jazirah's reporting on Iraq also mirrored the treatment the channel has given other recent conflicts involving US military actions resulting in civilian casualties or collateral damage.

- For example, a 10 December 2003 Al-Jazirah report on Afghanistan charged that "nine children paid with their lives last Saturday for an attempt by US planes to hunt a ranking Taliban minister" and the bodies of six more children who also "paid with their lives" were discovered on the same day. The video report noted similarities between US practices in Afghanistan and the Israeli practice of "targeted killings," showing Secretary of Defense Rumsfeld answering questions on the issue.
- During the channel's coverage of Haiti on 14 March, Al-Jazirah cited "eyewitnesses" in Haiti as saying that two more people have been killed "at the hands" of *American* soldiers, "one of them 18 years old," raising the number killed since the Marines arrived in the country to six. The report showed two bodies lying on a cement slab with people wailing and asserting that the two who were killed did nothing to provoke the attack.

Offering Modest Bright Spots

1

Despite Al-Jazirah's unfavorable news coverage and overwhelmingly critical commentary on the US in Iraq, the channel did consistently provide live coverage of US press conferences and speeches. Al-Jazirah also hosted Western personalities including current and former US Government officials on talk shows and, to a lesser extent, interviewed them during newscasts.

- On 25 April, Al-Jazirah aired repeatedly an "exclusive" two-minute recorded interview with US civil administrator Paul Bremer, in Iraq. He said the situation in Al-Fallujah is "difficult" and that "several hundred Saddam followers from the Republican Guard and the Intelligence joined some criminals and foreign terrorists and took the city hostage." Bremer added that the Coalition did not cause the problem in Al-Fallujah.
- Al-Jazirah's 23 April episode of "More Than One Opinion," moderated by Sami Haddad, discussed Bin Ladin's 16 April statement and included former British Ambassador to Iraq Sir Terrence Clark who argued against the message offered by Bin Ladin. On 26 March, the program included among its guests Stephen Cohen from the Brookings Institution.
- Al-Jazirah's live political discussion program "From Washington," which often hosts current
 and former US Government officials, featured former US Middle East Peace Process
 Coordinator Dennis Ross on its 15 April episode. On 25 March, former spokesman of the
 National Security Council, P. J. Crowley, and former adviser to President Carter in the
 National Security Council, William Quandt, appeared.

. In addition, the channel sometimes presented reporting and commentary that, although not necessarily complementary of the US, did criticize terrorist activities.

• On 22 April, Al-Jazirah aired a live 12-minute report by its Baghdad correspondent Abd-al-Qadir Ayyad in which he reviewed the Iraqi press published on 22 April. During the report, Ayyad cited an article that said, "There were some **300** to 400 Arab terrorists in Al-Fallujah,"

but most of them left the city after the Al-Fallujah residents insisted that they leave. Some of them refused and insisted on continuing to fight against the Americans."

- Ayyad had with him the chief editor of Baghdad Al-Watan newspaper, Dr. Tahar Jaza, who commented on the Basra bombings, saying: "It is regrettable that we see such incidents taking place in Basra and other Iraqi cities because the result of these bombings negatively affects. the civilians' interests, security, stability, and life. Most of the Basra bombings' victims were students." Jaza said "there is confusion between the concept of terrorism and the concept of resistance. Nobody supports a resistance carrying out acts that harm Iraqi civilians."
- On 15 April, Al-Jazirah aired a special talk show program discussing the Bin Ladin statement aired by the channel earlier that day. During the program, Al-Jazirah showed a three-minute video showing reactions by ordinary European citizens, including citizens of Arab origin or Muslims living in Europe. They all rejected any submission to Bin Ladin's threats and affirmed that Muslims in European countries are being treated in a fair manner.

Al-Jazirah Offers Nonpolitical Programming

Not all of Al-Jazirah's programming consisted of political discussion criticizing US foreign policy. The channel offered some programs that presented a mild tone toward the West, including a sports talk show, an automobile program, documentaries, a fashion program, and a cinema review program that reviewed Western movies. Al-Jazirah's managing director also recently announced that the channel would be introducing a tourism program in an effort to "add a softer dimension" to the channel.

- Al-Jazirah's program "Appointment in the Country of Emigration" [Maw'ad fi al-Mahjar] is a weekly program that presents the experiences of Arab personalities who emigrated to Western countries during their childhood and remained abroad to achieve prom.: e. . West. The channel's 23 April episode featured a Lebanese-Arab living in Canada, Antwan Najim, who established the first "nuclear medicine laboratory" after obtaining his Doctorate in "nuclear pharmacology" in America.
- The Qatari English-language daily *The Peninsula* reported that Al-Jazirah "plans to add a softer dimension to its strident image with a slew of 'lighter' programs aimed at the family." According to the article, managing director Waddah Khanfar announced the channel would soon air a travel and tourism program. The article quoted Khanfar as saying, "We don't see our role as being restricted to bringing just the bad news and hard political developments to people. We also want to become a part of the every day lives of people. We want to create a friendly screen" (22 April).

NOR:

SECRETARY OF DEFENSE DEPUTY SECRETARY OF DEFENSE

FROM:

Powell A. Moore, Assistant Secretary of Defense

&William

J. Haynes II, General Counsel

SUBJECT: Status of Train & Equip Legislation

• This will provide an update regarding the Department's progress in achieving legislative authority to train and equip friendly foreign forces in furtherance of the global war on terrorism.

- Over the last two years, the Department has proposed and the Congress has enacted some new train and equip authority. A brief summary of existing, available train and equip authorities is provided at TAB A.
- In addition to the authorities noted in TAB A, the Department is seeking four new train and equip authorities two included in the Presidents Budget Request for FY05 (appropriations provisions) and two in the Department's FY 05 legislative package (authorization provisions). (TAB B). The proposed authorization provisions have not yet been approved by the Office of Management and Budget, however. They both would give us new authority -- that is not encompassed by the appropriations provisions included in the Budget Request (assistance for peacekeeping and peace enforcement operations, and assistance for irregular forces, groups, or individuals assisting SOF forces to combat terrorism).
- Commanders in the field continue to express dissatisfaction concerning their ability to train & equip foreign forces. While in some cases the dissatisfaction is the result of a lack of authority, in other cases it stems from the cumbersome and relatively untimely nature of our authorities (e.g., drawdown), the result of lengthy, unanticipated delays in the procurement process (e.g., acquisition of battalion sets for the Iraqi Armed Forces and the Iraqi Civil Defense Corps), or simply a lack of familiarity with authorities we do have (or the process for invoking them). As set forth in detail in TAB A, the Department already possesses some authority to address many train and equip requirements. However, outside of Iraq and Afghanistan DoD's authority is severely limited the Department of State usually is the lead agency with the requisite authority.

1-04/

TO:

Donald Rumsfeld

FROM:

Paul Wolfowitz

SUBJECT: Train and Equip Authorities

• You requested me to put my head into the "Train and Equip" legislation memo and tell you what I think we ought to do.

MAY 2004 LIC

- DoD requested four new "Train and Equip Authorities" in FY 2005 legislative proposals—all four have gone to Congress:
 - \$500 million "train and equip" authority for Iraq, Afghanistan, and "other friendly nearby regional nations."
 - Additional \$200 million of drawdown authority under Afghanistan Freedom Support Act for the Afghan National Army.
 - \$100 million to fund President's Global Peacekeeping Operations Initiative.
 - \$25 million to provide support to foreign forces and others facilitating military operations by US Special Operations Forces.
- What have we done:
 - In my hearings before the SASC on 20 April, HASC on 21 April, and the HAC-FO on 29 April, I urged Congress to support our train and equip legislative proposals fully.
 - At the SASC hearing, Sen. Lieberman responded positively: "we might ... take the lead in responding ... as rapidly as the urgent circumstances on the ground require."
 - SOCOM and SOLIC representatives have briefed the \$25 million SOF proposal to congressional staff.
 - OSD/LA is hosting briefings with HASC and SASC staffers on 30 April.
- Chairman Kolbe of HAC-FO indicated somewhat greater flexibility than in the past. I
 will follow up with him.
- I will also try to enlist support from Lewis-Murtha and Chairman Young (our problems in the past have mainly been with the HAC-FO).

11-L-0559/OSD/26018

's beyond DARPA's control contrib-As a research agency charged with -...oping, but not implementing, technological tools, DARPA was unprepared to answer critics' questions about the privacy implications of how TIA might be used. Historically DARPA had engaged in high-risk, high-pay-off research for the DOD, conducted out of the limelight. Much of its research has resulted in spectacular advances, with benefits far beyond the defense establishment—for example, DARPA created ARPANet, the precursor to the Internet, as a technological tool for linking defense researchers—but never before had the agency been required to account for the potential impact on privacy of future uses of a tool it was in the process of developing.

This led to sustained miscommunication between DARPA and its critics. DARPA answered questions about privacy by repeatedly assuring the public that it was not aggregating personally identifiable information on U.S. persons or using TIA to access any such information, and that any such activities in the future would be by other agencies which would bear responsibility for complying with the laws and regulations applicable to them. Some observers found these responses evasive especially in the light of DARPA's public rhetoric promoting TIA. Although the Assistant to the Secretary of Defense for Intelligence Oversight found no evidence that TIA was at any time using personally identifiable information on U.S. persons, DARPA's assurances failed to resolve critics' concerns.

The timing of revelations about TIA also contributed to the controversy surrounding the program. Many Americans were growing increasingly uneasy about government actions, in the aftermath of the September 11, 2001 terrorist attacks, that appeared to threaten civil liberties: the detention of non-U.S. persons without charge or access to counsel, monitoring of inmate telephone calls with their attorneys, passage of the USA PATRIOT

Act with the new powers it conferred on the government to conduct—in some cases secretand seizures, physical searches of airline passengers and their juggage, and the Attorney Operation TIPS program waterabandoned) under which delivery, repair, and other workers who entered people's hornes would report to the government on what they saw there. Moreover, news of TIA was breaking during the fall of 2002, just as Congress was debating the Homeland Security Act, with the goal of centralizing many of the government's surveillance programs within a new Cabinet-level department. All of this coalesced to heighten concerns among legislators and members of the public to the potential threat of government use of personal data.

Another significant contributor to the controversy was DARPA's failure to build protections for privacy into TIA technologies as they were being developed. We recognize that DARPA had underway separate initiatives to develop privacy-protecting technologies, but these were not part of the TIA tools that DARPA was demonstrating in 2002 and 2003. As the Inspector General noted, these research projects "were not as comprehensive as a privacy impact assessment would have been in scrutinizing TIA technology."

Informational privacy is respected and meaning-ful policy oversight guaranteed only when they are made a central part of the technology development process and when the tools necessary to ensure them are developed as an integral part of writing software and building systems. DARPA failed, in the words of the Inspector General's report, "to ensure that privacy is built into the developmental process." DARPA was by no means unique, but that failure ultimately contributed to the elimination of TIA. Ironically, it also contributed to Congress withdrawing funding for the privacy enhancing technologies that DARPA was developing.

LTG Sharp TO: Jim Haynes Ryan Henry Lt Gen Schwartz Peter Rodman MG Burgess Reuben Jeffery VADM Jacoby Bill Luti FROM: Donald Rumsfeld SUBJECT: Sistani Please see the attached report about a meeting with a Sistani associate. Thanks. Attach. 4/22/04 Meeting report DHR:dh 042804-10

Please respond by _

is a close contact and personal friend of GA has had access to GA Sistani for the past 15 years. Ali Sistani. moderate and a respected notable in the city of Najaf/Kufa. He is not a cleric, and he is not employed by Sistani, but is an independently wealthy and a religiously inclined man who has had direct involvement in the Hawza. The purpose of the meeting was to establish a direct relationship with CPA [He claimed that many Baghdad visitors led them to believe that there was a solid conduit to CPA-Baghdad but that they were beginning to lose faith in this and wanted to build their own relationship at this point. He indicated grave dissatisfaction in dealing with multiple interlocutors who all claim they were sent by Amb Bremer to "solve the problem" and the episodic nature of their involvement. Some, he claimed, had even gone as far as asking for a photograph with GA Sistani [IGC member Muwaffaq Al Ruba'i] for what they interpreted as an attempt at proving they met with him and gaining increased credibility when they quoted him. He stated that Sistani understands many are speaking in his name and that he has to do something about that and is looking at making a direct office to office connection with a "real live American officer" in the CPA so there is no misunderstanding. He knows of , and sought us out. Note: He did not indicate at any time that he had a message from Sistani. However, at the close of the meeting, stated that he would report his meeting results directly to Sistani and requested that I meet with a closer contact of Sistani [NFI] this coming week. He stated that this person will come to CPA to meet. He did not mention a name, nor did I ask, but he mentioned the person is a cleric and an associate of GA Sistani. I believe that final selection of this person will come out after

Here is a report of the key points he made:

GA Sistani.

- 1. Coalition Forces were seen in some neighborhoods [Hayy Zahra] and were refreshingly received. He stated that the people that want peace welcome this action. Indicating that US Forces are welcome in their midst.
- 2. Any city where there is no Law and no Authority there is a problem, and thus is the case in Najaf and Kufa. The sovereign should never abandon his [people] during a crisis; neither should he yield his authority to any person that is not properly appointed. Here he is indicating the obvious, asking the US to regain control from the forces that now [occupy government offices] in Najaf. He mentioned US success in Kut, and wished for a similar outcome where the US was able to regain control and push back the militia.
- 3. He further commented that Najaf has fallen into the hands of the so called Jaysh Al Mahdi, a group of thieves, murderers, he goes on...that have armed themselves beyond any comprehension, taken police stations, released all the prisoners, and looted the government offices...all while the coalition forces watched. He went

- on to say that anyone that worked with the CF has been targeted and many now are in jails and are being tried in so called Shari'a courts, some have been executed and still the Coalition stands by without interfering. He mentioned that [collaborators] are being systematically pursued, arrested, and detained daily and that the families have no where to go and complain—just like the old days under Saddam. Fear and Intimidation now rule the city again.
- 4. He stated that Sistani has done his duty [as a religious leader]; he sent a delegation asking MAS to leave the city if he intended to fight the coalition and spare the city and shrines from inherent destruction. He stated that the delegation warned MAS that the coalition will respond with might for every bullet Sadr Militia [SM] expended. He went on to explain that Sadr's inner circle was now in charge of key [military] decisions and that MAS remained removed from direct involvement, but that MAS was adamant about not backing down in the face of too much pressure—didn't look good—and that MAS was personally convinced that he could win and keep/control Najaf/Kufa.
- 5. He affirmed that most of the hardened MAS militants in the streets manning positions were strangers [from outside the city], and more likely from Thawra city [Sadr City] in Baghdad. He wondered how they could have traveled, unobstructed—to Najaf—and taken control so easily, and remain in control in the face of the mighty coalition that liberated Iraq. He said that people were beginning to draw dangerous conclusions from such a situation and that lest the coalition regain control that it would be hard to mobilize the citizens to help or cooperate later. They live in fear of retribution for any misconstruction made by the Sadr thugs...this is like living under Saddam only now it was 1991 all over again.
- 6. He stressed that Najaf is not Fallujah. He stated that Fallujah is full of former Baathists, foreign fighters from all over the Middle East to include Al Qaeda and Ansar Al Islam, former Iraqi military, former Iraqi Intelligence, and former Iraqi Special Services, many that benefited from the regime for years. Najaf is different. You do not have any military commanders, or any security apparatus, or any Sunni opposition. You have people that never benefited from the regime but were systematically oppressed and persecuted for the past 35 years. You don't have any former regime elements, or anyone fighting against an occupation—we are still thankful you liberated us, and Sistani has stated that since you announced you are leaving and given a date then you are not truly occupiers—so the dynamics are different and you can count on the people to support you to a limit if you were to go after him more aggressively. We hear the planes overhead daily and nightly, we know the troops are in the outskirts of the city, and we await a solution. It is my understanding here that he is indicating that they expect a US offensive to take back the town and remove MAS and his militia [using Kut as an example], but cautioning against prolonged fighting and collateral damage control [meaning the Shrines].
- 7. He described the Najaf Police as traitors that must be fired once the city is liberated. Stated that they were obedient dogs when Saddam was in power, and their paychecks were a fraction of what they are now. He displayed outright disdain for the great betrayal that they committed in giving over the city to Sadr's

- criminals. He then said they would have never thought of doing that under Saddam, but it was easier now since there was no perceptible punishment by the local government/coalition, but that the outcome of not cooperating with MAS was taken more seriously.
- 8. Stated that Sadr was a cancer that needed to be removed or else it would get worse fast and that you would either have to amputate [give up Najaf] or be chasing the disease that was spreading ever so much faster. He urged some solution that would rid them of this future [Shi'a] Saddam. He went on to develop the Saddam analogy by showing that Sadr has surrounded himself with a circle much like Saddam's that would protect the leader as long as they were benefiting from him—currently that consisted of feeding of his spoils—like police cars and weapons, monies they plundered and influence they now enjoy along with its inherent respect. He stated that GA Sistani has declared that all government property had to be returned.

The meeting lasted two hours and was rather pleasant in tone. It is a friendly fellow that likes to make analogies and funny remarks. One joke he made about Sadr that is worth mentioning goes like this: A mother mosquito tells her child not to go near any people, she feared for his life, but the little mosquito didn't listen, he came home that evening and told his mother, mom, why did you ask me to stay away from the people, they really like me, when I went near them today they all started clapping for me...[he motioned with his hands how we try to kill a mosquito] he said this was Sadr, he was that naïve & stupid. We then had a catered lunch [actually cooked by the wife of one of our Iraqi staff—it was delicious] in our office followed by the usual barrage of tea and Pepsi.

Again, before we said our final good-bye's	[which we did several times as usual] he
mentioned that he would brief Sistani person	nally and re-contact our office for a future
meeting with a closer associate. Direct cont	act with is seen is done through our
interlocutor who has been faith	fully with us for almost a year now. He has
	after several death threats received in his
home by phone and paper under the door.

Acting Assistant Secretary Mira Ricardel

Assistant Secretary Powell Moore

Deputy Assistant Secretary Steve Moffitt Deputy Assistant Secretary Jeanine Esperne

FROM:

Jon Kyl

DATE:

April 27, 2004

SUBJECT:

Missile Defense FY 2005 Budget

I believe the President's missile defense request for fiscal year 2005 is in scrious danger of not being fully funded. According to today's CongressDailyAM (excerpt attached), Rep. Ellen Tauscher will likely offer an amendment to use missile defense as an offset for boosting the Army's end-strength in Iraq. I am most concerned about similar efforts in the Senate because they would be more difficult to defeat.

I understand that Senator Carl Levin will likely attempt to cut funding for interceptor deployment during the Armed Services Committee mark-up for the Defense Authorization bill. Furthermore, I am hearing that Sen. Levin may use a similar tactic to Rep. Tauscher - attempting to substitute missile defense funds for either the War on Terror or Iraq - which would, undoubtedly place Meribers in a politically difficult position by creating a false choice between two important priorities. I suspect some Republican Members might consider supporting such an amendment.

I alerted Assistant Secretary for Legislative Affairs Powell Moore to my concerns in a phone call yesterday. It is absolutely critical that the Defense Department immediately begin an intense lobbying offort, focused first on Democrat and Republican Senate Armed Services Committee Members.

As I continue to gather information on efforts to cut missile defense funding. I will be sure to pass it along to you. In the meantime, if I can be of any assistance in this or any other matter, please do not hesitate to contact mo at (b)(6)

> http://www.senete.ggv/-kv// PRINTED ON RECYCLED PAPER

OSD 06/94-04

<u>.</u> ,

new entitlementspending.

That amendment passed on 451-48 vote, with four Republicans voting with the Democrats to reinstate pay/go, while Democratic Sen. Zell Miller of Georgia voted 'm.' Sen. Tim Johnson, D-S.D., who was absent for that first vote, is expected to support if which means Republicans need to cajole two senators into switching their votes so Vice President Cheney can then cast a deciding vote in favor of the budget resolution.

With Commerce Chairman McCain and Sen. Lincoln Chafee, R-R.I., unwilling to negotiate, GOP leaders have turned to Governmental Affairs Chairwoman Collins and Sen. Olympia Snowe, R-Maine, as well as moderate Democrats.

Those discussions, including a one-on-one Monday evening meeting between Collins and Nickles to gauge her willingness to compromise, have not yet produced an agreement.

"We'rediscussing and working on it," Nickles said, walking with Collins from the meeting to the Senate floor. Collins made a similar comment.

Earlier, Snowe said she had had discussions with Nickles and GOP leaders but had made no commitments."We'vetalked, that's about it," she said. By Peter Cohn

DEFENSE

Dems Target Missile Defense Funds To Boost Troop Strength

With pressure mounting on Capitol Hill lo fund more troops and equipment in Iraq, some Democratic lawmakers are eyoing the president's \$10.2billion missile defense request as a vehicle to offset such costs.

Rep. Ellen Tauscher, D-Calif., said it would play into her plans to boost the Army's strength by 10,000 troops, a proposal that would cost an estimated \$1.6 billion in FY05.

"I will more likely than not offer an amendment to do that in the defense bill using national missile defense as the offset," she said. "I don't think the Pentagon should be without sacrifice for this while we're at war."

Although observers say Republican backing for such a proposal is unlikely, Tauscher's comments coincide with a report GAO issued last week criticizing the president's plan to field a missile defense capability this summer.

GAO found that the system has not been thoroughly tested and the program's prime contractors were over budget in FY03 by roughly \$380 million, according to a summary of the report.

GAO recommended that the Pentagon carry out more rigorous testing and set cost, schedule and performance baselines, Although the Defense Department agreed to establish baselines, it said formal operational testing is not required before entering production. The Bush administration has argued that growing concerns over the spread of weapons of mass destruction and their means of delivery, especially by a handful of potentially hostile states and terrorists, justifies the need for a missile defense capability.

The FY05 funding proposal would help field a national missile defense system with ground-based interceptors in Alaska starting sometime this summer. A total of 20 missile interceptors would be deployed in Alaska

and California by the end of 2005.

Because the Bush administration has made missile defense a top priority, it is unlikely Republican lawmakers would support cuts proposed farit.

But bipartisan support to increase the number of troops and provide mare equipment for troops in Iraq before the November election is growing.

House Armed Services member Jim Cooper, D-Tenn., last week introduced a bill that would provide \$50 billion in FY04 supplemental funding for troops deployed in Iraq. And Armed Services Chairman Hunter said he would support an FY05 wartime supplemental of at least \$20 billion to pay for more troops and equipment in Iraq.

Tauscher introduced a bill last year to temporarily increase military end-strength by 83,700troops, raising the total strength of the Army, Marines and Air Force by 8 percent for five years. The bill had 25 Democratic co-sponsors, including Armed Services ranking member Ike Skelton, D-Mo. By Amy Klamper

HOUSE PACES

N.C. Dems Are Optimistic, But Need A Challenger To Hayes Republican Rep. Robin Hayes — whose tie-breaking 2001 trade vote and competitive district make him a perennial Democratic target — likely will have to wait until next week to find out who Democrats will run against him.

North Carolina's candidate filing period opened Monday, and the Democratic Congressional Campaign Committee is still working to recruit a credible challenger against the three-termincumbent before the May 7 filing deadline.

Concord businessman Wayne Troutman, one of two Democratic prospects, said in an interview Monday his chances of entering the race are "well more than 50-50." But he said he wants to gauge his political and financial backing. To run competitively, Troutman sdd he would need to nearly match the \$3 million he estimated Hayes would spend on reelection.

"This is going to be an expensive race if we do it," Troutman said.
"There are a few things that have to fall into place."

Troutman said attorney Chris Kouri, the 2002 Democratic nominee who held Hayes to 54 percent, was unable to get much political traction out of Hayes' tie-breaking House vote in December 2001 to give the president trade promotion authority.

However, North Carolina Democrats said the bankruptcy and liquidation last year of the Pillowtex Corp., which cost North Carolina approximately 4,800 textile jobs, could make trade a much bigger issue this year.

"It's difficult to overstate the ramifications of that vote and its effect on the district," a state Democratic Party spokesman said.

The Democrats' other prospective candidate is 27-year-old Hunter Pruette. He served as the top field staffer, or "body man," to Sen. John Edwards, D-N.C., during Edwards' presidential campaign.

UNITED STATES ARMY CHIEF OF STAFF

INFO MEMO

April 6, 2004, 2:50 PM

FOR: SECRETARY OF DEFENSE

THRU: R. L. Brownlee, Acting Secretary of the Army

FROM: GEN Peter J. Schoomaker, Chief of Staff, Army Musoull

SUBJECT: Civil Affairs (CA) Recommendation

• In 1987, CA was assigned to USSOCOM under U.S. Code Title 10 to designate a unified commander as the resource advocate and manager of shared characteristics of regional orientation and language skills. At the time, it seemed the best functional "fit."

- In 1993, CA was formally designated as SOF. Prior to 1993, CA was managed by both USSOCOM and Headquarters, Department of the Army (HQDA). The FY 2004-09 Program Decision Memorandum (PDM) SOF study found that, "While the focus of CA differs from that of SOF 'operators,' CA contributes best to the Global War on Terrorism (GWOT) by remaining within USSOCOM."
- There are proven advantages for maintaining CA within SOF. USSOCOM is uniquely suited to manage CA because of its unconventional nature and the unique skill sets CA soldiers must learn and sustain. USSOCOM is the doctrinal proponent for CA and provides the institutional training and education for all CA enlisted and officer personnel through the JFK Special Warfare Center and Schools at Ft. Bragg.
- CA units help commander's transition from combat to post-combat stabilization
 and ensure conventional commanders plan, resource, and conduct stability
 operations throughout the depth and width of the maneuver battlefield. Wellexecuted CA operations are not sequential to; they're simultaneous with combat
 operations.
- We have increased the role of CA in our new modularity construct. We are adding CA sections at the Unit of Action (UA) Level, and increasing CA staffing at the Unit of Employment (UE) Level. These CA forces will help our conventional commanders train, plan, and deploy with assigned CA experts.

SUBJECT: Civil Affairs (CA) Recommendation

- The Army is working with USSOCOM to grow the 96th CA battalion into a brigade. This will increase the number of active Army CA soldiers available on short notice. USSOCOM provides Army CA to all Combatant Commands and Services, not just Army formations.
- Recommend an independent study to conduct a thorough analysis of command relationships, organization, and staffing of CA assets to provide the requisite capability within Department of Defense before directing major changes.

Civil Affairs

My impression is that civil affairs was put in with Special Operations because it was different and Special Ops was different, which made sense. Probably also it was because the regular Army did not want it.

It continues to be different, but it is also different from Special Ops, as well as being different from the regular Army,

My impression is that we ought to give careful thought to moving it over to the regular Army, so that the regular Army interests itself in that subject and so the transitions from combat to post-combat stabilization can be relatively seamless. Furthermore, I don't think there is anything lost by moving it out **of** Special Ops, and possibly something gained.

Please	think	about	it	and	get	back	to	me.

Eritrea

Please get somebody to draft a memo from me to the NSC people on Eritrea, saying that we have to balance these two State Department local nationals who are in jail against the fact that we are suddenly getting cut out.

Abizaid needs to get in. He needs to work with them. It is important. The question is what is the cost-benefit ratio here? It sounds to me like we are on the wrong side of it.

Thanks.

H&R Blocked

The tax giant has a great brand name. Can it extend it to other financial services? BY EMILY LAMBERT

PRIL 15 LOOMS, but H&R Block Chief Executive Mark A. Ernst has more than taxes on his mind. He's eager to find out how many of this season's customers can gradually be convinced to buy H&R Block's newer offerings, including home mortgages, business consulting and brokerage services.

There's new urgency to this mission, although a strategy shift to build on the tax business has been in the works for several years. H&R Block offices lost 4% of their

taxpayer clients in 2003. Some filed taxes through H&R Block online-convenient for them but less lucrative for the tax preparer. Also, this season got off to a sluggish start, perhaps because of growing competition from rival Jackson Hewitt. Says Ernst: "This repositioning of the brand must happen." The effort is evident in increasingly pushy agents and TV spots that subtly pitch H&R Block advisers as experts in college planning, home buying—even, jokingly, nursery design. So far, results are encouraging. The average fee per office client as of Feb. 15 this year was \$135, up from \$131 last year and \$122 in 2002.

Last fiscal year the company's nontax businesses accounted for half of its \$3.8 billion in revenue, most of that from its mortgage lending, which it started offering in 1997. But other services are a tough sell. Its financial services business hemorrhaged \$128 million (pretax) last year, and the business services arm is also lagging. The unit, which operates as RSM McGladrey, lost \$14 million in 2003.

One problem has been turning number crunchers into smooth salesfolk. "Anything that's new is viewed suspiciously," sighs Ernst, 45. Now H&R Block gives its 80,000 tax advisers computer prompts with recommendations for clients, pointing them, for example, to IRAs (though it insists it wouldn't specifically push its own IRA product).

Some customers may be wary, too. The company is under fire for its "refund anticipation loans." The loans, which can carry interest rates of 129%, appeal to cash-strapped low-income customers. The fees accounted for \$109 million in revenue last year. H&R Block has settled a number of loan-related lawsuits, including one in Texas for \$50 million. The company defends the loans. But there could be more trouble: The Securities & Exchange Commission is investigating whether H&R Block properly disclosed the suits to shareholders.

FIGHT NOW, PAY LATER

Members of the U.S. military earn an average salary and benefits of \$99,000 a year. So why is recruiting and retaining military personnel such a challenge?

With U.S. soldiers dying almost daily in Iraq, that might seem an absurd question. But it's not. The military's manpower problems precede Iraq. And while the war may scare off some potential recruits, it attracts others, who feel a patriotic call.

In fact, the Pentagon's personnel problems have a more mundane root: the way soldiers are paid. Only 42% of that \$99,000 package comes in their paychecks. The rest takes the form of benefits, with two-thirds of those henefits—mostly for pensions and health care—nor received until years after soldiers leave the service, the Congressional Budget Office reports.

Not a good way to pay soldiers—or anyone else. It turns out that many prefer a bird in the hand to 200 in the bush. The evidence: In the 1990s, with the Cold War over, Congress and the Pentagon decided to encourage voluntary early departures by offering the choice of a lump-sum payment or a long-term annuity. The annuity had a present value about double that of the lump sum. Yet over half of the officers and 92% of the enlisted personnel who left took the lump sum.

Using those choices, economists John Warner of Clemson University and Saul Pleeter of the Defense Department calculate that officers discounted future benefits at an average rate of 10% to 19% a year, while enlistees discounted them at 35% to 54%, which is to say they valued such benefits hardly at all. The math is striking: A soldier with a 35% discount rate values a dollar to be received in

21 years at under a fifth of a cent. Yet to pay a soldier that \$1 in benefits in 21 years costs taxpayers 36 cents in today's dollars—200 times what the service member thinks it's worth.

So soldiers end up underpaid, and taxpayers
overburdened;
spending and
accruals for military
retirement now total
\$52 billion a year, with an

additional unfunded liability of \$576 billion.
The military compensation scheme isn't just inefficient, it's also unfair. Soldiers must serve 20 years before they're eligible for retirement pay. That means the more than half of officers and 85% of enlistees who serve less than 20 years get zilch.

Fixing this screwed-up system won't be easy. The Pentagon says it's planning a review, but even a limited reform—which was passed by Congress in 1986 and wouldn't have lowered any soldier's retirement pay for another two decades—was repealed in 1999, before it ever had time to take effect.

INFO MEMO

204 /57 -7 111 1: 50

April 6, 2004, 1:00 PM

FOR: SECRETARY OF DEFENSE

FROM: David S.C. Chu, USD (P&R)

SUBJECT: Personnel Systems for Guard and Reserve -- SNOWFLAKE

- Pay for active, reserve, and Guard personnel is one of the many problems caused by our ineffective legacy military personnel systems.
- The Defense Finance and Accounting Service (DFAS) is developing an interim pay system (Forward Compatible Pay) that will address some of the pay problems. The Services are also putting in place manual workarounds. However, many of the pay problems are caused by the personnel systems and the lack of integration between personnel and pay.
- My office, working with the Services and other DoD offices, designed the Defense Integrated Military Human Resources System (DIMHRS) that will address the problems with our current legacy military personnel and pay systems. It is a fully integrated, all-Service, all-Component personnel and pay system built on a commercial off-the-shelf base (PeopleSoft) and designed to streamline business processes and incorporate best practices. We recently developed an accelerated schedule for implementation that will bring the Army up beginning in September 2005 with full implementation in all Services by October of 2006.
- The accelerated program requires some additional near-term funding, which I will work with the Comptroller to secure.

INFO MEMO

March 31,2004, 8:00 a.m.

FOR: SECRETARY OF DEFENSE

FROM: R. L. Brownlee, Acting Secretary of the Approx

SUBJECT: Pay Systems for the Guard and Reserve

- In response to your query of March 15,2003, I fully agree that we need to ensure our Soldiers receive the best possible support, especially with respect to their pay. We have been working to resolve the systemic causes of the problems even before the start of Operation Iraqi Freedom. We have since intensified our efforts.
- In the near term, the Forward Compatible Pay System (FCPS) will provide a commercial, off the shelf, interim solution, beginning in March 2005. Current development cost estimates for FCPS total \$77.3 million. The ultimate solution is the Defense Integrated Military Human Resources System (DIMHRS), which is being developed by the Under Secretary of Defense for Personnel and Readiness. The deployment of the system will not begin until January 2006. The Army Budget Office is working with the Joint Requirements Integration Office to validate the full DIHMRS development costs.
- Until FCPS is fielded, the Army is providing training teams to finance battalions, mobilizatiodemobilization sites, and units in Kuwait, as well as establishing workarounds for current pay systems to correct specific, problematic input. Additionally, an information campaign to inform Soldiers and family members of the Guard and Reserve Pay Task Force (telephonic and e-mail hot line) is already proving beneficial in resolving pay issues.
- We continue to monitor progress in resolving this issue as outlined in the attached Pay Improvement Plan (Tab A).

March 25, 2004

Mr. Secretary,

I know you are incredibly busy and you haven't time to focus on the following, but I think it is important.

The Army's past request to industry to bid on equipping the Iraqi Army was cancelled. The Army through Army Material Command is re-initiating this proposal. In the initial proposal, bidders were allowed to bid foreign-made equipment. I recommend that DOD constrain industry to bidding only U.S. built equipment for the following reasons:

- It would logistically tie the Iraqi Army to the United States for the next several decades.
- It also means that we could logistically shut down the Iraqi Army at anytime of our choosing.
- We have excess equipment that can be used for equipping the new Iraqi Army.
- The upside to this is that we would need to refurbish new equipment through the Army Depot system (4-6 depots). This would be art economic advantage to the states concerned; which is a plus to the Administration in an election year.

Bottom line: I feel it is very important to have a logistical hold over the Iraqi Army.

thanx

INFO MEMO

2014 AFR -2 FI 4: 18 EF-9006 04/004020

FOR: SECRETARY OF DEFENSE

DepSecDef___

FROM: Douglas J. Feith, Under Secretary of Defense for Policy

SUBJECT: Draft National Security Presidential Directive (NSPD) Concerning United States Assistance to the Iraqi Special Tribunal (IST)

- The Department of Justice (DOJ) has the USG lead in providing support to the IST, which will try the top Iraqi regime officials. DOJ has drafted an NSPD to define the responsibilities of its Regime Crimes Advisor's Office (RCAO) and the supporting roles of the CPA, DoD, State, and the intelligence community.
- At the March 23,2004, Deputies' Committee meeting, several of us questioned whether an NSPD is necessary for this purpose, but Hadley made clear that he intends to go forward with the NSPD. I said DoD has change\$ to propose and, in any event, we cannot approve the NSPD until the Secretary of Defense has reviewed it.
- The DoD Office of General Counsel, USD(I), and I have made edits to the latest DOJ draft (Tab B). However, the following items remain concerns that should be addressed before the NSPD is approved (relevant language is highlighted in the NSPD draft at Tab A):
 - O The fourth full paragraph on page two delays releasing information to the Iraqi Ministry of Human Rights until "the conclusion" of the DOJ mission. This information is both critical to identifying missing Iraqis and to publicizing Saddam's atrocities. This should not be delayed but should be an ongoing effort.
 - o The last full paragraph on page three directs DoD to provide "secure access to and transportation of Iraqi prisoners for interviews." After June 30, DoD should not necessarily be required to provide access to and transport of prisoners in Iraqi custody. This would be an additional task for MG Miller's mission, which is still being defined (the Joint Staff has the pen).

SPL ASSISTANT TO FATE	1040
SR MA CRADDOCK	10.770 4
MA BUCCI	
EXECSEC MASSIOTIC 8:	9/1/14/-

FOR OFFICIAL USE ONLY

- O This same paragraph also requires DoD to provide "access" to Iraqi documents. The final paragraph (page 4) requires the ISG to "make available...appropriate documents." This may require the ISG to shift its priorities in response to DOJ requests for documents. The issue of the ISG's priorities is being reviewed now by the Deputy Secretary of Defense and should not get foreclosed by the NSPD.
- O The NSPD also places four Judge Advocates assigned to the CPA's Office of Human Rights and Transitional Justice under RCAO "operational control." While these Judge Advocates can and should participate in the RCAO effort, operational control must remain with DoD.
- The NSPD may also raise resource concerns. A copy has been provided to the Comptroller for comment.
- DoD General Counsel recommends non-concurrence until the document is acceptable.

AUTHORITY

SUBJECT:

United States Assistance to the Iraqi Special Tribunal

The investigation and prosecution of members of the former Iraqi regime and the Iraqi Ba'ath Party for genocide, crimes against humanity, war crimes, and violations of certain Iraqi laws represent key elements in the restoration of democratic self-government to the people of Iraq. The successful establishment and operation of the Iraqi Special Tribunal (IST) is vital to the success of our national security, foreign policy, homeland security, law enforcement and defense strategles, and is critical to protecting and advancing America's interests. The IST statute mandates that international advisors assist the Tribunal Investigative Judges, Prosecutors, Trial Chamber Judges, and Appeals Chamber Judges in the performance of their duties. The United States must take its place in the provision of that international assistance.

Therefore, I direct the **following**:

- All relevant Departments and Agencies of the United States Government (USG), as set forth below, shall provide necessary assistance to the Iraqi people to establish a fully <u>functioning</u>, independent IST that reflects internationally accepted ooncepts of due process and the rule of law.
- The Attorney General shall appoint a Regime Crimes Advisor (RCA) to the XST.
 The Regime Crimes Advisor will lead and supervise American advisors and

TAB 4

P. 25

DRAFT

certain international advisors, collectively known as the Regime Crimes Advisor's Office (RCAO), to continue the related work begun by the GPA Office of Hamen Rights and Transitional Justice (OHRTJ). Specifically, the RCAO will assist ISI investigators, prosecutors and investigative judges, direct American advisors to the IST, and serve as USG liaison regarding ISI investigations and prosecutions to the Iraqi Governing Council (and the successor Iraqi Government after June 30, 2004). The RCA will assist the Governing Council in establishing, staffing, and administering the XSI. The RCAO will serve as the lead Coalition office to assist the XSI in coordinating all assistance to the ISI by foreign governments, law enforcement agencies, international and non-governmental organizations, and other USG agencies in Iraq. The RCAO will also serve as the lead Coalition office supporting the ISI measures to ensure the security and safety of witnesses and victims of crimes under investigation by the ISI.

hate

- The Department of Justice will assist the RCA to select a team of advisors that will deploy to Iraq. DOJ and RCA will assemble and deploy squads of investigators, under FBI leadership, drawn from federal, State or local law enforcement agencies. The RCA may deploy these teams or elements of them within Jraq in accordance with the investigative plan. RCAO may make use of any IST-related facilities and projects established or begun by OHRTJ, and coordinate this continued use after 30 June 2004 with the appropriate Iraqi authorities. DOJ will provide administrative support such as paralegals and secretaries to the RCAO.
- The RCA will supervise all USG advisors and mentors to the **IST.** RCAO personnel will work closely with the Iraqis supporting the **IST, and** ensure, where appropriate, that training and technical assistance is provided.
- The RCA will supervise and coordinate forensic and exhumation efforts by USG or third-nation elements in support of IST investigations. The RCA will also support Iraqi forensic efforts in support of IST investigations. The RCA may deploy personnel to locations outside Iraq.
- At the conclusion of the RCAQ's mission to support the IST, the RCA will ensure
 that electronic or paper copies of all appropriate unclassified documents and
 information collected during its investigations are transferred to the Iraqi Ministry
 of Human Rights to assist the Ministry's continuing efforts to identify missing
 persons and to preserve a historical record of the suffering of the Iraqi people
 under Saddam Hussein's regime.
- The CPA, in coordination with the Public Affairs Directorate of the National Security Council, will prepare a strategic communications plan directed at both Iraqi and international audiences concerning the activities of the IST and the role of the RCAO in support of the IST. Thereafter, all RCAO public affairs and public diplomacy activities will be closely coordinated with CPA's Strategic Communications Office before any public releases. In addition, all RCA public

affairs activity will comply with any relevant rules and guidelines that the **IST** may enact governing pretrial and trial publicity.

- The RCAO shall function as a component within the CPA, and the RCA shall report to the CPA's Administrator.
 - o The Attorney General may augment the RCAO with a Budget Officer to manage all expenditures in support of the IST, from funds appropriated for that purpose. RCAO will have review and approval authority, within the expenditure process now employed by CPA, for all IST-related funds.
 - o The Attorney General, through the Deputy Attorney General, may, in consultation with CPA, provide input to the RCA regarding substantive legal and investigative matters.
- Following the transfer of full governmental authority to the transitional Iraqi
 administration and the recognition of the sovereignty of that administration, all
 responsibilities of the CPA with respect to the RCAO will devolve upon the
 Secretary of State, acting through the Chief of Mission, U.S. Embassy in
 Baghdad.
- The heads of all other United States law enforcement agencies and organizations will be prepared to support the RCA with personnel or resources as needed.
- Using funds appropriated to support the IST, the Department of Justice will support and sustain RCAO personnel in Iraq, to include: housing/billeting; transportation within Iraq; food/medical support; communications access and linkup; compound security and armed escort outside of Baghdad; security for investigative teams and forensic sites in the field; and weapons and related weapons training plus necessary personal protective gear. RCAO, in consultation with the CPA, will also coordinate with the Iraqi Ministry of Justice and Ministry of the Interior for personal and physical security of Iraqi IST installations and facilities, judges and personnel.
- The Secretary of Defense will assign to the RCAO from the military departments an agreed number of Judge Advocate General Corps (JAG) officers to serve as advisors to the IST, who will serve under RCAO operational control. The Department of Defense will also provide secure access to and transport of Iraqi prisoners for interviews; provide access to seized Iraqi documents and assistance with issues of classification and declassification; and provide departmental expertise in military history, law of war, and international law issues to include additional personnel, as appropriate.
- The CPA and the Secretary of State will support the RCAO by assisting the Iraq
 Governing Council in establishing IST infrastructure and court facilities, and in

Tack and the second

Seather Trians

the expedited identification and installation of Iraqi judges, tribunal investigators, and prosecutors to staff the IST.

- The Secretary of State will assist the RCA in recruiting and selecting, in consultation with CPA, international advisors and international investigative or forensic teams to assist the IST, and in advising the IST regarding its rules of evidence and procedure. The Secretary of State may also assist the RCAO by contacting other governments and requesting that they provide their full cooperation in collecting all evidence and contacting witnesses located within their territory that are relevant to IST investigations.
- The Director of Central Intelligence and the collected Intelligence Community: will provide historical and archival research support to the RCAO as appropriate; will serve as liaison between the RCAO and foreign government intelligence services to assist in investigations as needed; and will provide to RCAO support supplemental to the main efforts of DOD/CPA, for information security. Cleared RCAO personnel with a demonstrated need to know shall be given appropriate access to relevant captured documents and their analysis. The Iraq Survey Group (ISG) within the Intelligence Community will make available to RCAO appropriate documents in ISG possession, custody or control that are relevant to RCAO and IST investigations, and ISG will coordinate with RCAO liaison to facilitate the declassification and handling of such materials.

United States Assistance to the Iraqi Special Tribunal

The investigation and prosecution of members of the former Iraqi regime and the Iraqi Ba'ath Party for genocide, crimes against humanity, war crimes, and violations of certain Iraqi laws represent key elements in the <u>establishment restoration</u> of democratic self-government <u>in to the people of Iraq</u>. The successful establishment and operation of the Iraqi Special Tribunal (IST) is vital to the success of our national security, foreign policy, homeland security, law enforcement and defense strategies, and is critical to protecting and advancing <u>U.S. America's</u> interests. The IST statute <u>provides mandates for the appointment of %international advisors to assist the Tribunal Investigative Judges, Prosecutors, Trial Chamber Judges, and Appeals Chamber Judges in the performance of their duties. The United States must take its place in the provision of that international assistance.</u>

Therefore, I direct the following:

 All relevant Departments and Agencies of the United States Government (USG), as set forth below, shall provide necessary assistance to the Iraqi people to establish a fully functioning, independent IST that reflects internationally accepted concepts of due process and the rule of law.

TAB B

DRAFT

11-L-0559/OSD/26077

- The Attorney General shall appoint a Regime Crimes Advisor (RCA) to the IST. The RCA Regime Crimes Advisor will lead and supervise U.S. American advisors and certain international advisors, collectively known as the Regime Crimes Advisor's Office (RCAO), to continue the related work begun by the CPA Office of Human Rights and Transitional Justice (OHRTJ). Specifically, the RCAO will assist IST investigators, prosecutors and investigative judges, direct <u>U.S.</u> American advisors to the IST, and serve as USG liaison to the Iraqi Governing Council (and the successor Iraqi Government after June 30,2004) regarding IST investigations and prosecutions to the Iraqi Governing Council (and the successor Iraqi Government after June 30, 2004). The RCA will assist the Governing Council in establishing, staffing, and administering the IST. The RCAO will serve as the lead Coalition office to assist the IST in coordinating all assistance to the IST by foreign governments, law enforcement agencies, international and nongovernmental organizations, and other USG agencies in Iraq. The RCAO will also serve as the lead Coalition office supporting the IST measures to ensure the security and safety of witnesses and victims of crimes under investigation by the IST.
- The Department of Justice (<u>DOJ</u>) will assist the RCA to select a team of advisors that will deploy to Iraq. The DOJ and the RCA will assemble and deploy squads of investigators, under FBI leadership, drawn from Ffederal, State or local law enforcement agencies. The RCA may deploy these teams or elements of them within Iraq in accordance with the investigative plan. The RCAO may make use of any IST-related facilities and projects established or begun by OHRTJ, and coordinate this continued use after 30-June 30, 2004 with the appropriate Iraqi authorities. The DOJ will provide administrative support such as paralegals and secretaries to the RCAO.
- The RCA will superviseall USG advisors and mentors to the IQT. RCAO
 personnel will work closely with the Iraqis supporting the IST, and ensure, where
 appropriate, that training and technical assistance areis provided.
- The RCA will supervise and coordinate forensic and exhumation efforts by USG
 or third-nation elements in support of IST investigations. The RCA will also
 support Iraqi forensic efforts in support of IST investigations. The RCA may
 deploy personnel to locations outside Iraq.
- Concurrent with its mission to At the conclusion of the RCAO's mission to support the IST, the RCAO will ensure that electronic or paper copies of all appropriate unclassified documents and information collected during its investigations are made available transferred to the Iraqi Ministry of Human Rights to assist the Ministry's continuing efforts to identify missing persons and to preserve a historical record of the suffering of the Iraqi people under Saddam Hussein's regime. In the event transfer of certain documents would interfere with investigative and prosecutorial efforts, transfer will be made at the conclusion of the RCAO mission.

1

- The CPA, in coordination with the Public Affairs Directorate of the National Security Council staff, will prepare a strategic communications plan directed at both Iraqi and international audiences concerning the activities of the IST and the role of the RCAO in support of the IST. Thereafter, all RCAO public affairs and public diplomacy activities will be closely coordinated with CPA's Strategic Communications Office before any public releases. In addition, all RCA public affairs activity will comply with any relevant rules and guidelines that the IST may adopt enact-governing pretrial and trial publicity.
- The RCAO shall function as a component within the CPA, and the RCA shall report to the <u>Administrator of the CPA_2s Administrator</u>.
 - o The Attorney General may augment the RCAO with a Budget Officer to manage all expenditures in support of the IST, from **funds** appropriated for that purpose. The RCAO will have review and approval authority, within the expenditure process now employed by CPA, for all IST-related funds.
 - o The Attorney General, through the Deputy Attorney General, may, in consultation with CPA, provide input to the RCA regarding substantive legal and investigative matters.
- Following the transfer of full governmental authority to the transitional Iraqi administration, and the recognition of the sovereignty of that administration, all responsibilities of the CPA with respect to the RCAO will devolve upon the Secretary of State, acting through the Chief of Mission, U.S. Embassy in Baghdad.
- The heads of all other U.S. nited States law enforcement agencies and
 organizations will be prepared to support the RCA with personnel or resources as
 needed.
- Using funds appropriated to support the IST, the Department of Justice will support and sustain RCAO personnel in Iraq, to includinge: housing/billeting; transportation within Iraq; food/medical support; communications access and linkup; compound security and armed escort outside of Baghdad; security for investigative teams and forensic sites in the field; and weapons and related weapons training plus necessary personal protective gear. The RCAO, in consultation with the CPA, will also coordinate with the Iraqi Ministry of Justice and Ministry of the Interior for personal and physical security of Iraqi IST installations and facilities, judges and personnel.
- The Secretary of Defense will assign to the RCAO from the Mmilitary
 Ddepartments an agreed number of Judge Advocate General's Corps (JAG)
 officers to serve as advisors to the IST., who will serve under RCAO operational
 control. The Department of Defense will also provide secure access to and

transport of Iraqi prisoners for interviews; provide access to seized Iraqi documents and assistance with issues of classification and declassification; and provide departmental expertise in military history, law of war, and international law issues, to-including e-assignment of additional personnel, as appropriate.

- The <u>Administrator of the CPA</u> and the Secretary of State will support the RCAO by assisting the Iraq Governing Council in establishing IST infrastructure and court facilities, and in the expedited identification and installation of Iraqi judges, tribunal investigators, and prosecutors to staff the IST.
- The Secretary of State will assist the RCA in recruiting and selecting, in consultation with the Administrator of the CPA, international advisors and international investigative or forensic teams to assist the IST, and in advising the IST regarding its rules of evidence and procedure. The Secretary of State may also assist the RCAO by contacting other governments and requesting that they provide their full cooperation in collecting all evidence and contacting witnesses located within their territory that are relevant to IST investigations.
- Intelligence Community, as appropriate, will; provide historical and archival research support to the RCAO as appropriate; will; provide historical and archival research support to the RCAO as appropriate; will serve as liaison between the RCAO and foreign government intelligence services to assist in investigations as needed; and will provide to RCAO support supplemental to the main efforts of DOD/CPA, for information security. Cleared RCAO personnel with requisite security clearances and a demonstrated need to know shall be given appropriate access to relevant captured documents and their analysis. The Iraq Survey Group (ISG) will provide access to appropriately cleared RCAO staff or cleared RCAO approved individuals to documents in the possession of the ISG. Materials will be declassified make documents available to RCAO and declassify appropriate material in accordance with the policy guidance that has been developed between the CPA and the TSG regarding Iraq document exploitation in support of the Iraq Special Tribunal. DoJ will provide all resources required for such support.
- e The Iraq Survey Group (ISG) within the Intelligence Community will make available to the RCAO appropriate documents in ISG possession, custedy or control that are relevant to RCAO and IST investigations, and the ISG will ecordinate with an RCAO liaison to facilitate the declassification and handling of such materials.

OFFICE OF THE SECRETARY OF DEFENSE 1920 DEFENSE PENTAGON WASHINGTON, DC 20301-1920

LOOS REVAM

MAR 29 2002

MEMORANDUM FOR THE SECRETARY OF DEFENSE

FROM: ANDREW MARSHALL

SUBJECT: Creation of an Organization to Explore the Information Aspects of Warfare

BACKGROUND

DIRECTOR OF NET ASSESSMENT

Central to most of ideas about how warfare will change in the future is the notion that the information and communication technologies should lead to new operational methods and ultimately to major changes in warfare. We also already see that precision strike is now possible in ways that it was not in the more distant past, and that our ability to coordinate the actions of a wide variety of platforms or units, even if they are widely separated geographically, is now possible in a way that was never possible before. Information or superior information has always been important in warfare. Napoleon's success can be seen as due to his ability to use effectively available information and the staff that he created to support his operational command efforts. There is reason to think that information will be more central in the future than in the past. Therefore, a key competitive area in warfare is likely to be based on being better at getting and using information than one's opponent. One ought to start from a better position through superior investment, better organization for exploiting information, training, etc. As combat begins one would try to improve one's position by attacking and otherwise screwing up including deception the opponent's information acquisition and processing capabilities and defending against his efforts to similarly act upon our information gathering and processing systems. The problem is that we don't have an adequate basis for an analysis of the information aspect warfare, nor for measuring the level of superiority we have in any particular situation. We talk about information advantage, but there are few metrics. Also, our ability to model the information aspects of warfare is very poor, and hence difficult to include in any combat models that we have.

gararo

SUGGESTION

Create a RAND of the 1950's organization and provide it with a broad but clear mission statement. Such a statement might be something like the development of the science of the information aspects of warfare. The idea would be to bring together a very bright set of people and set them to work over an extended period thinking through the role of information in warfare and developing appropriate analytic tools, metrics and significantly improving our ability to model the contribution of information to the outcomes of combat. This is likely to be a decade long effort and not too expensive, although the bureaucratic obstacles to starting such a new Federal study organization would have to be negotiated with the Congress. I don't think this requires a lot of people; the numbers initially could be quite small, on the scale of 20-25 people in the organization. In any case, the key thing is picking the management and, as in the analogy with RAND, that means finding a Frank Colbohm and people like Charlie Hitch and John Williams to establish its character and provide initial intellectual leadership. Because there are no real experts in this area you would need to think about growing future Albert Wohlstetter and Herman Kahns. So young bright people with appropriate academic backgrounds that are willing to focus on concrete problems are what you need. Ideally, if I could, I would start two of these organizations and have them compete way to see which one could provide the best analytic framework for this area, the best case studies of the role of information in warfare, etc.

MEMORANDUM FOR THE SECRETARY OF DEFENSE

FROM:

STEVECAMBONE

SUBJECT: Protective Service Operations

- This responds to your question (Tab B), "I would like to know what security they actually had during the last 12 months, by month, and what they thought the threat level was" concerning protective service operations conducted by each Military Department (Service).
- Each Service reported data (Tab A), by month that reflects the total number of personnel used to provide personal protection to each protectee. Personal protection is provided by special agents (A) and when applicable are supported by drivers, administrative, and military police, which we call "support" (S).
- In the Services' report, each of the last 12 months is color-coded to show the threat level as determined by the responsible Services' field commanders.
 - Determining a threat to an individual while lacking a specific and credible threat information is subjective. The overall threat levels published by DIA, Department of Homeland Security, and COCOMs are taken into consideration, however the following are other factors field commanders consider when determining the overall threat:
 - Terrorism (kidnapping, assassination)
 - Criminal activities (kidnapping for ransom, assault or murder)
 - Civil disobedience (embarrassment of activities by demonstrators)
 - Wrong place, wrong time (natural disaster, victim of another's accident)
 - Association and/or proximity to another threatened person (collateral effects)

16 45

Prepared by: Col Kevin Jacobsen, ODUS (b)(6)

OSD 11740-04

- When the Services reported threat level for each month, they used the following general criteria:
 - LOW: No significant threat to protectee or the protectee is not exposed to the general population.
 - MEDIUM: General information, which shows the protectee may be targeted, based on his/her position or the protectee is exposed to the environment where the terrorist or criminal threat level is assessed as medium.
 - o HIGH: Credible and specific information that shows the protectee is targeted and/or the protectee is exposed to an environment where the terrorist or criminal threat level is assessed at high or critical.
- TAB (C) was previously provided to you and is attached for background.

4/6/04 Comments of Scott Carpenter

DHR:dh 041204-13

Please respond by 4/15/04

8SD 11741-04

Comments of Scott Carpenter, Director, Governance Team, Coalition Provisional Authority: April 6, 2004

- Carpenter said that without the efforts of Ahmed Chalabi, CPA would not have achieved:
 - The law on direct foreign investment.
 - The flat individual and corporate income tax.
 - The November 15 agreement.
 - The Transitional Administrative Law.
- Carpenter also said, "we go to Chalabi on a day-to-day basis to solve problems."

Vice President Richard B. Cheney

Honorable Colin Powell (by hand)

Honorable George Tenet Dr. Condoleezza Rice

Honorable Andrew H. Card, Jr.

FROM:

Donald Rumsfeld

SUBJECT:

CPA Comments

Attached are some comments by the Coalition Provisional Authority's Director of the Governance Team, which are worth considering as we prepare for the meeting ahead.

Attach.

Subject: Update

Bill, please be sure that Paul gets this.

Paul,

Here's an update on how I see the security situation and our response to the threat. I'd like to follow it up with a meeting with you either here or in DC.

- The security situation is not improving as it relates to the terrorist threat. There is improvement in law enforcement, but it remains spotty. These are my subjective assessments and may to some degree appear at odds with some of the metrics (i.e. number of traqi security forces, recruit and TIP graduates, equipment fill, etc.) that are being used to gauge our success. Effective Iraqi security forces, particularly the police, are the essential component in achieving our strategic objectives here. Demonstrated performance is the real measure of effectiveness.
- I consider the lack of effective leadership within the Ministry of Interior as the most significant impediment to improving the security situation. The problem begins at the top. The Interior Minister, Nouri Betran, is incompetent and dishonest. He consistently blames the US for the lack of security in that we have not provided assistance in the form of requested equipment. He and his INA party members (including Alawi) are soft on the Ba'athists and are making a concerted effort to reincorporate them into the government (including the police). I have addressed this repeatedly with Bremer, who by and large concurs with my assessment of the problem, but is unwilling to challenge the IGC by sacking one of its appointed ministers. This problem is further aggravated by the lack of an effective Senior Advisor to the MOI. The net result is the MOI, which is the key to our security objectives and withdrawal plans is marginal at best.
- General Ahmed K. Ibrahim is the latest victim of Betran's incompetence and our unwillingness to challenge him. In my opinion, Ahmed is the most competent and courageous Iraqi leader in MOI. He has been and continues to be our most loyal ally. Betran has orchestrated his removal from his post as Deputy Minister and assignment to the Foreign Ministry for subsequent transfer out of Iraq, perhaps to New York. Despite describing Ahmed in glowing terms and tell him that we need 10 more like him, Bremer has acquiesced to the reassignment as an accommodation to the IGC and Interior Minister as well as concern for Ahmed's safety. As you might expect, the enemy consider him the number one Iraqi target for assassination.

- The enhanced role of CENTCOM in training and equipping the Iraqi security forces, especially the police, is a needed change. This is not only true for the reasons listed above, but because the police have suffered from a lack of support across the board, including from both the JTF and CPA. The MSCs have been reluctant to expend their resources on the police because CPA-MOI supposedly has that responsibility. Furthermore the MSCs would much prefer to field and support ICDC for which they are responsible and have complete control. In fairness, the support from the MSCs has ranged from excellent to poor. The quality of the police in Mosul is quite good as a direct result of the efforts of the 101st Commander. The results in Baghdad are at the opposite end of the scale. I am hopeful that the change to military control will cause the MSCs to assume greater ownership of the police across the board, especially as it relates to advising and mentoring the police leadership.
- The training program for the police is targety ineffective. We transplanted the ICITAP effort in Kosovo and with little change have attempted to implement it here. The security situation alone makes it nearly unworkable, but the constraints of time and the prior conditions within the police make the plan totally inappropriate. ICITAP has had problems everywhere, including Panama where I observed them firsthand. They simply cannot deal with a program of this size. That is why they create "model precincts" that are impressive to visitors, but fail to address the need in a comprehensive way. At my insistence and Bremer's direction, the training program has been modified to address the leadership problem. Unfortunately, it remains an afterthought effort and will probably be of marginal value unless CENTCOM focuses on it. Using effective military leaders, preferably those with law enforcement experience, to act as mentors to Iraqi police leaders is probably the only to way to make real improvement in the near future.
- The 8-week recruit training course is a good starting effort, but requires a 24-week follow on mentorship program to produce a qualified basic policeman. Therein lies the problem. INL is not fielding the civilian police mentors in required numbers for a host of reasons, mostly security and equipment related. Those that are fielded are likely to go to the model precincts. Given the limited number of civilian police mentors, I believe they should be linked up with police chiefs and precinct and station commanders not as recruit mentors. The other problem with the 8-week program is that it is alien to the existing police system. The Iraqi police, like all of their neighboring police, are organized along military lines. I predict that our efforts to unwind that system will not survive beyond July. I suspect the graduates of the 8-week program will not qualify for leadership positions in the police without going back to some extended academy education program like existed prior to the war.
- The 3-week TIP program is useful, but at present does not address the key issue leadership. I proposed
 that the TIP be changed to a TIP II leadership course focused on mid-level officers. Those officers are
 attending the current TIP and are intermixed with policemen of all ranks. Why not frontload the officers and
 focus on making them more effective leaders? While Bremer agreed with the concept, nothing has
 changed on the ground.
- The fact that we are still unable to access the supplemental funds is impossible to explain.
- On a brighter note, our efforts to create an inter-ministerial working group to address counter-terrorism looks promising. It will have the benefit of some experts like Brian Jenkins and Bruce Hoffman from Rand.
 The first challenge will be the Shiite religious period of Arb'een in early April.

Paul, as you may gather from this litany, I am a very concerned about what is and is not happening in the security area here. While I have high respect for Bremer, he is consumed by governance issues and relying on others to address the security problem. Please don't consider my comments as denigrating the dedicated efforts of many both in and out of uniform. I need your advice and counsel regarding my continued role here. I'm not accustomed to failure and see this mission as too important to the Nation to let it falter. I look forward to hearing from you.

Subject: FW: Sistani rep meeting at CPA-SC -- SENSTIVE NET ORTO

CDA South Central (Mike Greaters office)

CPA-SC Senior PolAd [Fadi Petro] receives Sistani Office representative at CPA-SC HQ.

22 April, 2004.

Sayyed Maytham Faisal Mazthboub (protect) is a close contact and personal friend of GA Ali Sistani. Maytham has had access to GA Sistani for the past 15 years. Maytham is a moderate and a respected notable in the city of Najaf/Kufa. He is not a cleric, and he is not employed by Sistani, but is an independently wealthy and a religiously inclined man who has had direct involvement in the Hawza.

The purpose of the meeting was to establish a direct relationship with CPA [regional]. He claimed that many Baghdad visitors led them to believe that there was a solid conduit to CPA-Baghdad but that they were beginning to lose faith in this and wanted to build their own relationship at this point. He indicated grave dissatisfaction in dealing with multiple interlocutors who all claim they were sent by Amb Bremer to "solve the problem" and the episodic nature of their involvement. Some, he claimed, had even gone as far as asking for a photograph with GA Sistani [IGC member Muwaffaq Al Ruba'i] for what they interpreted as an attempt at proving they met with him and gaining increased credibility when they quoted him. He stated that Sistani understands many are speaking in his name and that he has to do something about that and is looking at making a direct office to office connection with a "real-tive American officer" in the CPA so there is no misunderstanding. He knows of Mike, Hume and I [from back when we first made our rounds with the Ayatollahs], and sought us out.

Note: He did not indicate at any time that he had a message from Sistani. However, at the close of the meeting, Maytham stated that he would report his meeting results directly to Sistani and requested that I meet with a closer contact of Sistani [NFI] this coming week. He stated that this person will come to CPA-SC to meet. He did not mention a name, nor did I ask, but he mentioned the person is a cleric and an associate of GA Sistani. I believe that final selection of this person will come out after Maytham briefs GA Sistani.

Here is a report of the key points he made:

- Coalition Forces were seen in some neighborhoods [Hayy Zahra] and were refreshingly received.
 He stated that the people that want peace welcome this action. Indicating that US Forces are
 welcome in their midst.
- 2. Any city where there is no Law and no Authority there is a problem, and thus is the case in Najaf and Kufa. The sovereign should never abandon his [people] during a crisis; neither should he yield his authority to any person that is not properly appointed. Here he is indicating the obvious, asking the US to regain control from the forces that now [occupy government offices] in Najaf. He mentioned US success in Kut, and wished for a similar outcome where the US was able to regain control and push back the militia.
- 3. He further commented that Najaf has fallen into the hands of the so called Jaysh Al Mahdi, a group of thieves, murderers, he goes on...that have armed themselves beyond any comprehension, taken police stations, released all the prisoners, and looted the government offices...all while the

coalition forces watched. He went on to say that anyone that worked with the CF has been targeted and many now are in jails and are being tried in so called Shari'a courts, some have been executed and still the Coalition stands by without interfering. He mentioned that [collaborators] are being systematically pursued, arrested, and detained daily and that the families have no where to go and complain—just like the old days under Saddam. Fear and Intimidation now rule the city again.

- 4. He stated that Sistani has done his duty [as a religious leader]; he sent a delegation asking MAS to leave the city if he intended to fight the coalition and spare the city and shrines from inherent destruction. He stated that the delegation warned MAS that the coalition will respond with might for every bullet Sadr Militia [SM] expended. He went on to explain that Sadr's inner circle was now in charge of key [military] decisions and that MAS remained removed from direct involvement, but that MAS was adamant about not backing down in the face of too much pressure—didn't look good—and that MAS was personally convinced that he could win and keep/control Najaf/Kufa.
- 5. He affirmed that most of the hardened MAS militants in the streets manning positions were strangers [from outside the city], and more likely from Thawra city [Sadr City] in Baghdad. He wondered how they could have traveled, unobstructed—to Najaf—and taken control so easily, and remain in control in the face of the mighty coalition that liberated Iraq. He said that people were beginning to draw dangerous conclusions from such a situation and that lest the coalition regain control that it would be hard to mobilize the citizens to help or cooperate later. They live in fear of retribution for any misconstruction made by the Sadr thugs...this is like living under Saddam only now it was 1991 all over again.
- 6. He stressed that Najaf is not Fallujah. He stated that Fallujah is full of former Baathists, foreign fighters from all over the Middle East to include Al Qaeda and Ansar Al Islam, former Iraqi military, former Iraqi Intelligence, and former Iraqi Special Services, many that benefited from the regime for years. Najaf is different. You do not have any military commanders, or any security apparatus, or any Sunni opposition. You have people that never benefited from the regime but were systematically oppressed and persecuted for the past 35 years. You don't have any former regime elements, or anyone fighting against an occupation—we are still thankful you liberated us, and Sistani has stated that since you announced you are leaving and given a date then you are not truly occupiers—so the dynamics are different and you can count on the people to support you to a limit if you were to go after him more aggressively. We hear the planes overhead daily and nightly, we know the troops are in the outskirts of the city, and we await a solution. It is my understanding here that he is indicating that they expect a US offensive to take back the town and remove MAS and his militia [using Kut as an example], but cautioning against prolonged fighting and collateral damage control [meaning the Shrines].
- 7. He described the Najaf Police as traitors that must be fired once the city is liberated. Stated that they were obedient dogs when Saddam was in power, and their paychecks were a fraction of what they are now. He displayed outright disdain for the great betrayal that they committed in giving over the city to Sadr's criminals. He then said they would have never thought of doing that under Saddam, but it was easier now since there was no perceptible punishment by the local government/coalition, but that the outcome of not cooperating with MAS was taken more seriously.
- 8. Stated that Sadr was a cancer that needed to be removed or else it would get worse fast and that you would either have to amputate [give up Najaf] or be chasing the disease that was spreading ever so much faster. He urged some solution that would rid them of this future [Shi'a] Saddam. He went on to develop the Saddam analogy by showing that Sadr has surrounded himself with a circle much like Saddam's that would protect the leader as long as they were benefiting from him—currently that consisted of feeding of his spoils—like police cars and weapons, monies they plundered and influence they now enjoy along with its inherent respect. He stated that GA Sistani has declared that all government property had to be returned.

The meeting lasted two hours and was rather pleasant in tone. Maytham is a friendly fellow that likes to make analogies and funny remarks. One joke he made about Sadr that is worth mentioning goes like this: A mother mosquito tells her child not to go near any people, she feared for his life, but the little mosquito didn't listen, he came home that evening and told his mother, mom, why did you ask me to stay away from the people, they really like me, when I went near them today they all started clapping for me...[he motioned with his hands how we try to kill a mosquito] he said this was Sadr, he was that naïve & stupid. We then had a catered lunch [actually cooked by the wife of one of our Iraqi staff—it was delicious] in our office followed by the usual barrage of tea and Pepsi.

Again, before we said our final good-bye's [which we did several times as usual] he mentioned that he would brief Sistani personally and re-contact our office for a future meeting with a closer associate. Direct contact with Maytham is done through our Hawza interlocutor Ala', who has been faithfully with us for almost a year now. He has relocated his family to Hilla [with relatives] after several death threats received in his home by phone and paper under the door.

Very Respectfully,

Re: Liability Insurance

MIFORMESI MIFORMESI enior mil august 3, 2004 this! &

- Attached is a copy of Ray Dubois snowflake response outlining the terms of the liability insurance available to DoD employees. Bottom line, most employees at the GS-15 level and above are eligible and can be reimbursed up to \$150 of the yearly premium. (The premium, however, is not expensive and is in the \$290 range).
- The coverage is available for either \$500k or \$1 million and covers liability and up to \$100k in attorneys' fees. (One caveat is coverage for "pre-existing conditions." I have looked at the application form and it asks whether the applicant is aware of any pending "claims or allegations" which presumably would not be covered by a policy obtained now).
- You asked whether coverage extends beyond separation from the government.
 General Counsel's office has informed me that if the employee resigned or retired (as opposed to being fired), they would be covered.
- As the last paragraph of Ray's memo states, the current plan is to publicize the
 availability of the insurance in the next quarterly edition of Personnel HiLites,
 published by WHS Human Resources Directorate.

OFFICE OF THE SECRETARY OF DEFENSE

1950 DEFENSE PENTAGON WASHINGTON, DC 20301-1950

INFO MEMO

FOR: SECRETARY OF DEFENSE

FROM: Raymond F, DuBois, Director, Administration and Management

SUBJECT: Professional Liability Insurance Reimbursement Program

- The attached snowflake requests information regarding a program for professional liability insurance reimbursement within DoD.
- DoD implemented this program beginning in FY 2000. Pursuant to the DoD program, qualified employees may be reimbursed up to one-half the cost incurred for professional liability insurance, not to exceed \$150.00 per year.
- The Treasury, Postal Service, and General Appropriations Act for Fiscal Year 1997 requires agencies to reimburse qualified employees for up to one-half the cost incurred for professional liability insurance. The Act permits agencies some discretion on the specific amount to be reimbursed, provided the total yearly payment does not exceed one-half the cost of the premium. WHS operates this program for employees assigned to OSD as well as the JCS and activities receiving operational support from WHS.
- Qualified employees under the statute include law enforcement officers, supervisors, and management officials covered under the general schedule (GS) and those above the GS-15. Military personnel and non-appropriated fund supervisors and managers are not covered. Since the Program was implemented, WHS Human Resources Directorate has processed 15 claims for reimbursement. It does not have a record of claims for reimbursement sent directly to DFAS by administrative officers of other DoD organizations.
- Liability insurance obtained by employees covers legal expenses and damages awarded in the event that employees are sued for actions taken in the course of their duties.
- The Professional Liability Insurance Reimbursement Program will be publicized in the next quarterly issue of the WHS Human Resources Directorate's <u>Personnel Hilites</u>, a widely distributed on-line publication disseminated throughout OSD and other WHS-supported organizations.

11-L-0559/OSD/26127

MEMO TO: Secretary Rumsfold

DATE: August 3,2004

FROM:

Paul Wolfowitz

SUBJECT: Director, Naval Nuclear Propulsion Program

Don,

You asked me what I would propose concerning the personnel and assignment policies in the Naval Nuclear Propulsion Program. In the short term, specifically the next four years, I endorse the CJCS recommended course of action, a course of action with which the SECNAV and CNO are in agreement: maintain the four star stature of the Naval Reactors Director, but reduce the tour length to four years, renewable to eight. I've attached the CJCS's original memo at Tab A.

I believe, however, that the question you raise, as well as several associated personnel and assignment issues, should be studied. E.g.:

- Despite rising nuclear carrier numbers and declining submarine numbers, the Naval Reactors directorship continues to reside with the submarine officers. Should this change?
- Another issue is the command of nuclear aircraft **carriers.** By law, dating from the 1920's, an aviator qualified officer must command a carrier. Given the sensitivity of nuclear safety issues and the complexity of these ships during the series of refueling overhauls now confronting the Navy, should consideration be given to sharing command of these capital ships with nuclear trained surface or submarine officers during these overhaul periods?
- The Naval Nuclear Propulsion program tends to get first call on that segment of the Naval officer corps with engineering and scientific aptitude. Is the platform-centric organizing principal of

Naval Reactors appropriate for such a large percentage of these key members of 21st century officer corps? Is there another pool of manpower with which to operate the older technology represented by nuclear reactors (perhaps raising the retirement age of existing nuclear officers) thereby freeing up a larger percentage of the younger, technically capable officers to other needs of our nation's defense?

Reducing the term of the Naval Reactors Director to four years will require a legislative change, presumably as part of the FY'06 Authorization. With your approval, I would ask the Navy to come back with recommendations on the three questions above, as well as on the question of reducing the Director's term to four years in time to have a total package ready for the FY'06 submission.

Go ahead and task the Navy	71.	AUG	9	2004

CHAIRMAN OF THE JOINT CHIEFS OF STAFF

WASHINGTON, D.C. 20318-9999

INFO MEMO

CM-1892-04 1 July 2004

FOR: SECRETARY OF DEFENSE

FROM: General Richard B. Myers, CJCS (Hum 6/25)

SUBJECT: Director, Naval Nuclear Propulsion Program

- Question. What do you recommend on this eight-year four-star for the Director, Naval Nuclear Propulsion Program? (TAB A)
- Answer. I recommend the Director of Naval Nuclear Propulsion Program remain a four-star position, however, the Department should propose to revise the tour length in FY06 NDAA. An eight-year appointment is too long. The director should be appointed to serve an initial term of four-years with the option to serve additional one- or two-year terms not to exceed a total of eight years.
- Analysis.
 - Retaining the Director of Naval Nuclear Propulsion Program as a four-star position is commensurate with the level of responsibility for the safe operation of over 100 nuclear reactors.
 - Reducing the initial term from eight to four-years while retaining the option for additional one- or two-year terms will provide greater flexibility to manage the Naval Nuclear Propulsion Program.
 - Revising the term of the Director, Naval Nuclear Propulsion Program requires the concurrence of the Secretary of Energy as well as a change to the current law.
 - The Secretary of the Navy and the Chief of Naval Operations concur with this proposal.

FOD	`	-	74	1

SECRETARY OF DEFENSE

DEPSEC

FROM:

William J. Haynes 11, General Counsel,

(b)(6) Waynes

SUBJECT: Position of Director, Naval Nuclear Propulsion Program

- At your earlier direction, Dan Dell'Orto met with the Secretary of the Navy and the Chief of Naval Operations to obtain their views about the grade (0-10) and term of appointment (8 years) of this position.
- The Secretary of the Navy believes that any proposed change in either the grade level or term of appointment is sensitive.
 - The grade level is significant because of the Navy's outstanding nuclear safety record.
 - Were the grade level reduced, any subsequent safety problems likely would be attributed to that reduction.
 - An 8-year term is unduly long and permits the incumbent to outlast at least one Administration, and possibly two.
- The Chief of Naval Operations agreed that any proposed change in either grade level or term of appointment would be controversial and possibly particularly difficult in an election year because the submarine community would mobilize to oppose any change.
 - Having a 4-star officer (although it does not have to be a submariner, it
 historically has been) in this position provides the submarine community with
 an edge over both the surface and aviation community neither of which has a
 Navy uniformed advocate above the two-star level.
 - Interestingly, ADM Clark does not believe that either the Department of Energy or the Senate would oppose a change in this position unless the submarine community sways them.

トロンクマ

(ABE) Gray 012

OSD 11872-04

- The position as currently structured is an anachronism during a period of transition from a threat- to a capabilities-based defense and a platform centric system to an information centric system.
- Consideration should be given to a Senior Executive Service person for this position, as the Executive Order contemplates, as this would remove the position from the operations role and the submarine advocacy role.
- ADM Clark was very complimentary toward ADM Skip Bowman, the incumbent, who has handled himself as well as anyone could in this position.

9/23/04 Levin List of Documents Not Yet Received from SecDef & USDP

8/05/04 Levin Letter to SecDefre: Pre-war Intel docs

6/30/04 Levin Letter to USDP re: Iraq docs 9/22/04 Levin Document Requests Update

DHR:ss 092704-17

Please respond by 9/29/04

Rom Cul Stri To Sec. Rumsfeld

September 23, 2004

List of documents not yet received from Secretary of Defense and Under Secretary Feith in response to Senator Levin's requests

- 1) Six items requested of Secretary Rumsfeld on August 5,2004, to which there has been no response.
- 2) "Reviews of or contributions to" docurnents produced by other agencies (promised on Feb. 26, then he said on June 14 that had not agreed to do so, and would have required permission of other agencies).*
- 3) Two binders of documents being reviewed for executive privilege (promised on
 ✓ May 12).
- 4) ORCON documents (unspecified number) being reviewed by the CIA for release approval (promised on May 12).
- 5) Communications from Secretary Feith's Policy office (OUSDP) personnel to other agencies and offices related to the relationship between Iraq and al Qaeda from September 2001 through April 2003*
- 6) Documents related to information from detainees, or from defectors provided by or assisted by the Iraqi National Congress (the latter promised on Feb, 26, then he said there were none on June 14).
- 7) SASC received documents contained in a Feith June 29 response to SSCI, which were responsive to a previous Levin request but which Feith said on June 14 could not be found. Therefore, it appears there are likely to be similar documents and communications from other staff that should be provided.

* Items 2-7 relate to requests to USD Feith, and are summarized in Senator Levin's June 30,2004 letter to USD Feith. That letter clarified his request to include documents from other personnel and organizations within the OUSDP, in addition to the documents from the Office of Special Plans (OSP) and the Policy Counter Terrorism Evaluation Group (PCTEG). On August 16, DOD provided to SASC the October 27 answers to the SSCI's QFRs from July 10 hearing, without any reference to the June 30 letter.

Honorable Donald H. Rumsfeld Secretary of Defense 1000 Defense Pentagon Washington, DC 20301-1000

Dear Mr. Secretary:

I am writing to request additional documents related to my inquiry into pre-war intelligence on Iraq. Four of the documents I am requesting apparently have already been provided to the National Commission on Terrorist Attacks Upon the United States (the 9/11 Commission). Where relevant, I am including the page number from the 9/11 Commission report, with the reference in brackets.

- September 14,2001, Memo from Office of the Under Secretary of Defense for Policy, 1) "War on Terrorism: Strategic Concept." [p.559]
- September 17,2001, Memo from Deputy Secretary Wolfowitz to Secretary of Defense, 2) "Preventing More Events." [p.559]
- September 18,2001, Memo from Deputy Secretary Wolfowitz to Secretary of Defense, 3) "Were We Asleep?" [p.559]
- September 20,2001, Memo from Under Secretary of Defense Douglas Feith to Secretary 4) of Defense, "Briefing Draft." [p.560]
- All documents related to the DOD document identified as "Suggested Additions for 5) CIA's 20 August Draft on Iraqi Support for Terrorism," which was provided to the Committee on January 15,2004. This includes, but is not limited to, any cover memo; emails and other written communications regarding the document or the draft CIA paper; the draft CIA paper; and CIA's response to the DOD document.
- All documents and communications, including e-mails, related to your request to the 6) Intelligence Community to declassify statements about the relationship between Iraq and al Qaeda, which you referred to in your press conference of September 26,2002, and in your comments to the Atlanta Chamber of Commerce on September 27,2002, including, but not limited to, the statements themselves.

11879-04

I would ask that you provide the documents in response to this request by August 20, 2004. *Thank* you for your assistance.

June 30,2004

The Honorable Douglas J. Feith Under Secretary of Defense for Policy 2000 Defense Pentagon Washington, DC 20301-2000

Dear Mr. Secretary:

I am writing in further pursuit of my request of November 25,2003 for documents from your office related to Iraq. With your most recent letter of June 14, it appears you believe you have provided all the documents that are relevant to my request, other than documents being reviewed to determine if they are protected by executive privilege, or awaiting **CIA** release approval. I am concerned that you may be defining my request in a manner that limits both its scope and your response. There are some documents that you should have provided long ago, and I request that you provide them without delay, as described below.

Based on the information we already have received, it seems unlikely that there are no documents related to the subject of my inquiry. For example, you have stated on a number of occasions that new information from detainees was important in helping your office to develop its perspective on the links between Iraq and al Qaeda. Given the importance you have attached to this new information, it seems unlikely that not even one single document or record was created related to the debriefings of such detainees, whether by personnel in the Office of Special Plans (OSP) or the Policy Counter Terrorism Evaluation Group (PCTEG) or by anyone else in the Policy office. If, upon further review, there are any such documents, please provide them.

Your letter of June 14 states that you "did not undertake" to provide "reviews of or contributions to" documents produced by other agencies. You had never previously denied your intent to provide the requested documents, and your explanation of the necessity to obtain release permission from other agencies is neither necessarily true, nor sufficient reason to withhold such documents. Clearly, you can provide your office's reviews of other agencies' documents, as you have already done in part with the briefings on the Iraq-al Qaeda relationship. You should also be able to provide any contributions or suggestions given by your office to other agencies, whether or not they contributed to subsequent documents of those agencies.

You have already provided one document that your office initiated to provide such input to the Intelligence Community relative to a draft CIA report concerning Iraq's support for terrorism, an example in which it appears you did not need, seek, or obtain any release permission. Please provide all such contribution documents, records and communications.

Furthermore, I would point out that the three different versions of the briefings produced by your office and provided to the Secretary of Defense, the Director of Central Intelligence (DCI), and the staffs of the National Security Council (NSC) and the Office of the Vice President (OVP), respectively, on the Iraq-al Qaeda relationship were, in essence, reviews of intelligence documents. As you have acknowledged, your staff met with Intelligence Community analysts after you briefed the DCI in August, 2002 in order to present your views on the intelligence. It should be a straightforward matter to provide all additional documents and records, as well as communications, related to this meeting and these briefings, including information related to why and on what basis the changes were made to the three different versions of the briefing.

Your unilateral withholding of your complete October 27,2003 responses to the SSCI's Questions for the Record is unacceptable. Your previous actions have demonstrated that there is no reason to withhold the information. For instance, you have already provided to SASC a portion of your October 27 responses, as well as your complete responses to Senator Rockefeller's Questions for the Record from the same hearing. Also, you have provided to the SSCI all the documents provided to SASC in response to my request, and did not deny them such material as being proprietary to SASC. Why the double standard? I would also note that the Intelligence Community is providing to SASC all the documents it is providing to SSCI in response to its inquiry. The fact that I am on the SSCI is not relevant. By withholding the information from SASC, it prevents the SASC staff from reviewing the material. Please provide all the remaining material from your October 27 responses.

As to the issue of the two binders of documents being reviewed for executive privilege, your letter of June 14 states that "I did not say in my May 12 letter that the President has claimed executive privilege with respect to any of the documents you have requested." I remind you that unless the President has claimed executive privilege, documents are not protected by such privilege. Please provide the status of this review (which appears to have been under way for two months), including how many documents are being reviewed, a brief description of each document being withheld for review, and when we can expect documents to be provided or privilege asserted.

With respect to the ORCON documents mentioned in your May 12 letter that are being reviewed by the CIA, how many documents have you sent for review, and will you provide them on a rolling basis if they are approved for release on a rolling basis, rather than waiting for all of them to be reviewed?

Finally, based on the documents you have provided, it is clear that there are relevant documents that were prepared by, and communications from, individuals within your Policy office but outside of the Office of Special Plans (OSP) and Policy Counter Terrorism Evaluation Group (PCTEG), including the Policy Support office. I am concerned that by asking for documents, records, and communications from the OSP and PCTEG groups, SASC would be missing a substantial amount of important and relevant information that has a bearing on our inquiry. Accordingly, I would ask that you provide all documents and communications from all persons within your Policy organization from September 2001 through April 2003, related to the relationship between Iraq and al Qaeda

Please provide the requested documents no later than July 15,2004.

SEN. LEVIN DOVEMENT REQUESTS ON INTEL INVESTIGATION

- There are **2 outstanding requests from Sen. Levin** seeking documents relating to pre-war intelligence on Iraq and Policy's Office of Special Plans:
 - 1. An August 5 letter to you with 6 separate requests for documents. We expect to answer this one shortly and to provide most of the documents requested, although there are probably fewer than Levin expects.
 - a. The first 4 requests seek memos from the Deputy and Doug Feith written to you in the immediate aftermath of 9/11. Although there are deliberative process privilege claims that could be made, these documents were given to the 9/11 Commission and the plan is to produce them.
 - **b.** The remaining 2 requests are looking for documents relating to the project on Iraq-al Qaida links and any requests you sent to CIA to declassify documents. We have some responsive documents but are still searching for others.
 - 2. A June 30 letter to Doug Feith seeking very broad categories of documents from the entire Policy organization on pre-war Iraq policy and intel. The request is still under Policy and General Counsel review. Policy has already responded to Levin as follows:
 - O Policy staff has spent over 1800 person-hours searching files, reviewing documents and answering Levin's questions and document demands
 - A team of three career DoD officials reviewed thousands of pages for any documents related to his inquiry
 - Feith's office sent five binders full of documents, plus several hundred more pages of documents at various times, showing what Special Plans and Policy Counter-Terrorism Evaluation Group did all of it proper.
- Levin's minority inquiry duplicates the SSCI's investigation of Special Plans and PCTEG.
 - o Mr. Feith testified before the full SSCI (of which Levin is a member) and answered 51 written questions for the record nearly all on the same subjects as Levin's minority induity. SSCI staff also interviewed 14 Folicy staff members for more than 30 hours.

UNCLASSIFIED UPON REMOVAL OF TOP SECRET DOCUMENT AT TAB E THE UNDER SECRETARY OF DEFENSE

2000 DEFENSE PENTAGON WASHINGTON, DC 20301-2000

POLICY

OCT 20 2004

The Honorable Carl Levin Ranking Member Committee on Armed Services United States Senate Washington, DC 20510-8050

Dear Senator Levin:

I have reviewed your two October 6,2004 letters to the Secretary of Defense. *The* shorter one, dealing with document requests, does not acknowledge the substantial efforts my office and I have made in response to your minority inquiry and the voluminous documents we have provided, as summarized in an attachment to Secretary Rumsfeld's October 1,2004 letter to you and re-attached here (Tab A).

You included in your shorter October 6 letter a list entitled "Outstanding Information Requested from DoD." The list contains some errors. It refers to "outstanding" requests for documents that, as explained in my June 14,2004 letter to you and Tab E of Secretary Rumsfeld's October 1,2004 letter to you, we have not found, despite diligent efforts. Tab E of the Secretary's October 1 letter is re-attached here (at Tab B). Your list refers also to documentation that you say we did not provide about an interview with an Iraqi defector. That interview was not classified and not an intelligence de-briefing; it was a meeting between an Iraq exile and a Policy staff member doing unclassified research. I explained that interview in my June 29,2004 letter to SSCI Chairman Roberts, a copy of which I sent to the SASC together with the relevant documents. In other words, these requests are not "outstanding."

I have **also** reviewed your longer October 6,2004 letter to Secretary Rumsfeld, which dealt with CIA comments on our "Summary of Body of Intelligence Reporting on Iraq-al-Qaida Contacts (1990-2003)." We prepared the Summary in response to a request from the SSCI for intelligence community documents to which I had alluded in testimony before the SSCI. We did not write it as a paper for use within the Administration. Nor did we write it as a comprehensive analysis of the subject of Iraq-al-Qaida connections.

In July 2003, I had briefed the SSCI that in 2002 some Policy staff members believed that certain intelligence reports were not reflected adequately or at all in finished intelligence analyses on the Iraq-al-Qaida relationship. The SSCI asked me, among other

UNCLASSIFIED UPON REMOVAL OF TOP SECRET DOCUMENT AT TAB E

UNCLASS FIED UPON REMOVAL OF TOT SECRET DOCUMENT AT TABLE

questions for the record, to provide those reports. As I explained in my answer to the SSCI, I attached to my answer a list of the requested documents along with the Summary, which highlighted the main points in those documents on contacts between Iraq and al-Qaida. To reiterate: The Summary responded to the SSCI's request! for the reports.

The Summary was not intended to press a particular conclusion on the SSCI, which in any case had access to all the views of the intelligence community and to underlying documents. By the time the Summary was created, the matter of the Iraq-al-Qaida relationship was an historical rather than a policy issue, given that the Saddam regime had fallen months earlier.

Your letter says that (I) I did not request CIA clearance on the Summary until after you asked that a copy of it be sent to the SASC, and (2) I did not reflect CIA's modifications in our January 2004 Addendum to the Summary. Neither of those points is correct, however.

I did request CIA approval in October 2003, before submitting the Summary to the SSCI. My staff provided the Summary to the CIA on October 24,2003 and highlighted the urgency of a response. The CIA said that it would try to provide clearance by October 27,2003. The Summary was part of the classified annex to our answers to questions for the record that the SSCI had issued on September 26 with a due date of October 3. We wished to be responsive and were already overdue. So, though I had not yet received formal word back from the CIA, I released the answers, with the Summary, to the SSCI on October 27. From that date until receiving the CIA's December 10,2003 letter that you mentioned, my office received no CIA comments on the Summary.

The Weekly Standard published an article in November 2003 that purported to quote from the Summary. DoD issued the attached November 15,2003 press statement (Tab C) that was coordinated with other agencies. I personally discussed the initial draft press statement with Deputy Director of Central Intelligence John McLaughlin, and after further discussion with others, the CIA cleared the press statement, which said that "the provision of the classified annex to the Intelligence Committee was cleared by other agencies and done with the permission of the Intelligence Community."

After the *Weekly Standard* article was published, the SASC, HASC and HPSCI all requested copies of what I had sent in October 2003 to the SSCI. Before honoring those requests, my office, for the second time, requested CIA permission because the initial permission related to providing the Summary to the SSCI only, rather than to the other committees. The CIA's December 10,2003 letter responded to this second request and

UNCLASSIFIED UPON REMOVAL OF TOT SECRET DOCUMENTAT TABE

referred to some required "additions, deletions and/or source document clarifications" that were detailed in the comments attached to the letter.

You say that DoD's January 15,2004 transmittal letter, sending the Summary and Addendum to the SASC, was wrong in stating that the Addendum contained the CIA's proposed modifications to the Summary. You mention, as examples, items #8, #9, #10 and #33, but you do not explain what you mean.

I have reviewed these and the other items in the Addendum, and the CIA's December 10,2003 comments. I do not see any misstatement in DoD's January 15,2004 transmittal letter (attached at Tab D without attachments), which says that the Addendum "contain[s] the substance of the CIA's proposed changes." The Addendum refers to every change the CIA requested. The CIA did not ask us to include its commentary about the requested changes; rather, it asked us to make specific modifications, and we made them. None of the CIA's requested changes altered the substance of the Summary.

For example, in item #8 the CIA asked us to delete the phrase "from a well placed source;" the Addendum does so, and replaces the deleted phrase with "from the source described in the italicized paragraph above." The CIA made no comment on this italicized paragraph, except to ask that we not refer to Senior Executive Memoranda. In item #9 the CIA asked us to replace "from the same source" with "from the same foreign government service as #8" and to replace "field comment" with "foreign government service comment;" the Addendum does that. In item #10 we replaced "according to sensitive CIA HUMINT reporting (same source as #8)" with "according to the same foreign government service report as item #8," just as the CIA asked, and we included a reference to an additional source document that the CIA asked us to add.

With respect to item #33, we cited three sources, i.e., one raw intelligence report and two products produced after that raw report. The CIA did not ask us to make any specific changes to our text, but pointed out that the earlier raw report contradicted one of our comments, which was, however, supported by the later products that we cited. As the raw report had been cited to support the main proposition of item #33 and not to support the comment in question, we replaced the reference to the raw report with a reference to a later finished product supporting the main proposition, while retaining the references to the other two sources. It bears repeating: Those other two sources, which post-dated the raw report at issue, supported the challenged comment in our Summary. So it was reasonable to conclude that the raw report was ultimately judged by the Intelligence Community to be either untrue or no longer true regarding that comment. The CIA did not express any objection to the way in which we responded regarding item #33 (nor to our responses regarding any of the other items). If the CIA's judgments on

UNCLASSIFIED UPON REMOVAL OF TOP SECRET DOCUMENT AT TAB E

these matters have changed since we prepared our Addendum, that would have no bearing on the adequacy of our response to its December 10,2003 comments.

By letter of January 15,2004, we sent the CIA the Summary and a memo entitled "Response to CIA Requested Modifications to 'Summary of Body of Intelligence Reporting on Iraq-al-Qaida contacts (1990-2003)." That letter and memo (both attached at Tab E, without ORCON attachments) explained how we dealt with the CIA's requests and responded to questions the CIA had raised in its December 10,2003 letter about source documents and citations. After sending that letter and memo we received from the CIA no further comments, questions, or requested changes. Had the CIA raised any further concerns, we would have worked with it to resolve them.

Your allegations have an accusatory tone. If you had called me or asked to meet and discuss these matters, we could have cleared **up** the misunderstandings that underlie your allegations. The matters at issue hinge on complex textual and historical analysis. A stream of confrontational correspondence is less productive than a civil dialogue would have been.

With best wishes, I remain

Yours truly

Douglas J. Feith

UNDER SECRETARY OF DEFENSE

701 AUG 12 AM 9:35

INFO MEMO

August 11, 2004, 5:00 PM

FOR: SECRETARY OF DEFENSE

FROM: Tina W. Jonas

SUBJECT: Iceland

• In response to your request regarding the annual costs to maintain U.S. forces in Iceland, the Department spends about \$239 million annually as shown below:

(Dollars in Millions)

Category	<u>Navy</u>	Air Force	<u>Total</u>
Operation & Maintenance (O&M)			
Base Operations	101	3	104
Radars	-	19	19
Total O&M	101	22	123
Military Personnel	66	39	105
Family Housing Operations	11	***	11
Total	178	61	239

- The Department maintains 2,464 military and civilian personnel (642 Air Force and 1,822 Navy personnel) at the Naval Air Station Keflavik in Iceland, along with HH-60G search and rescue helicopters, a detachment of 4 deployed P-3s (rotating every 6 months), and an Aircraft Intermediate Maintenance operation.
 - The Navy P-3s are a rotational detachment from a deployed squadron, split between U.S. Southern Command and U.S. European Command. The P-3 deployment cycle maintains a rotation base of three squadrons (one deployed, two in interdeployment training cycle).
 - Under the Aerospace Expeditionary Force construct, the Air Force rotates four F-15s, one KC-135, and one HC-130 and crews to Iceland every 3 months.

OSD 12088-04

o The mission of Naval Air Station Keflavik is to maintain and operate facilities, and

provide services and materials to support aviation activities and Navy's operating

forces. Iceland also provides the primary divert airfield for the North Atlantic.

The Air Force uses the Navy's facilities and reimburses the Navy for the support

provided. The Air Force operates the radars (\$19 million) for air control and defense.

The radars feed the Icelandic air traffic control system.

o For FY 2005 and later, the Air Force has not budgeted for Iceland because it wants to

remove its forces. The Air Force will continue to support Iceland until they get

approval to leave. The Air Force believes that it can provide for Icelandic defense

through force projection.

Ending the Air Force presence in Iceland would save \$22 million annually (base

support and radar costs) and would relieve pressure on the low density/high demand

search and rescue crews and aircraft.

COORDINATION: None.

CHAIRMAN OF THE JOINT CHIEFS OF STAFF WASHINGTON, D.C. 20318-9999

INFO MEMO

CH-1984-704 AUG | 2 PH |2 | 6

FOR: SECRETARY OF DEFENSE

FROM: General Richard B. Myers, CJCS VA RIANGE 04

SUBJECT: NATO Working Hours

- Question. "Please let me know whether or not NATO really does have a 35-hour work week that is imposed on civilian and military alike, and whether or not we ought to find a way to waive it for a military organization during wartime or permanently. Thanks." (TAB A)
- Answer. NATO has set 38 hours as the normal workweek for civilian and military alike. However, depending ou requirements of the unit or staff section, both categories of personnel can work extra hours (and normally do). Additional information is attached (TABB).
- There is no real advantage to waiving the official NATO working hours. Based on current NATO personnel rules (approved by the North Atlantic Council), military and civilian working hour rules apply in peacetime as well as wartime. Personnel work the hours necessary to complete their tasking.
- Analysis. US military personnel assigned to the US Delegation and US Mission to NATO, as well as Joint Staff officers who have served in NATO previously, indicate that NATO working hours is not an issue that impacts staff officer availability.
- Current NATO working hour policies provide the flexibility to support operations
 in both wartime and peacetime. However, civilian overtime pay costs rise during
 wartime or when circumstances demand extended working hours. Therefore, any
 change to the current policies will have negligible impact on the execution of
 NATO operations since provisions are in place for personnel to work as required
 to complete tasking.

INFORMATION PAPER

Subject: NATO Working Hours

1. <u>Purpose</u>. To provide information on NATO working hours.

2. Key Points

- NATO has set 38 hours as the normal workweek for civilian and military alike. However, depending on requirements of the unit or staff section, both categories of personnel can work extra hours (and normally do).
 - For military and category A and L (executive and officer level) civilians, there is no extra compensation for working over 38 hours per week. Category B and C civilian personnel (clerks, secretaries, etc) can be made to work overtime but are paid an additional 33 percent for nights and 50 percent for weekends.
 - In addition, regardless of national working hour laws, military and civilian personnel may not work less than the mandated 38 hours when assigned to a NATO position. For example, military or civilian staff from France, a nation with a mandated 35-hour workweek, must still work the full 38 hours. It is up to the member nation to provide any extra compensation for the three-hour delta. In contrast, US civil service employees working at NATO agencies must still work a statute minimum of 40 hours weekly.
 - The only NATO employees to whom the 38-hour workweek does not apply are Local Wage Grade contract employees such as mechanics, gardeners, and cleaners. In their case, the working hour statutes of the host nation apply. National delegations and liaison offices (which do not fall under NATO personnel rules) work the hours set out by their national authorities.
- There is no real advantage to waiving the official NATO working hours. Based on current NATO personnel rules (approved by the North Atlantic Council), military and civilian working hour rules apply in peacetime as well as wartime. Personnel will work the hours necessary to complete their tasking.
 - The only difference is the extra expense of paying overtime for B and C grade civilians. If this additional expense becomes excessive, a

suspension of overtime pay can be enacted, if necessary, by either suspending the benefits for the duration of a conflict or through a change to the normal working hours. This requires NAC approval.

Current NATO working hour policies provide the flexibility to support operations in both wartime and peacetime. However, civilian overtime pay costs **rise** during wartime or when circumstances demand extended working hours. Therefore, any change to the current policies will have negligible impact on the execution of NATO operations since provisions are in place for personnel to work as required to complete tasking.

Lt. Gen. Ron Kadish

FROM:

Donald Rumsfeld

SUBJECT:

Huntsville Trip and Missile Defense

I feel a little out of touch with missile defense. Since I am going to speak in Huntsville on Wednesday, I would appreciate it if someone would prepare some questions and appropriate responses for me, so I can refresh myself.

If it looks like it could be a problem and my head is elsewhere on intelligence reform and the like, I may have Ron Kadish (if he is going to be there) join me in responding to questions.

Thanks.

PROPOSED Q&A's FOR SECRETARY RUMSFELD 7th Annual Space and Missile Defense Conference Huntsville, AL August 18,2004

Q1. What is the current budget for missile defense? Will the trend continue? A1: The Fiscal Year 2005 missile defense'budget is \$10.2B, an increase from the Fiscal Year 2004 missile defense budget of \$9.0B. The President is committed to the defense of this nation and its allies, and the development, deployment, and sustainment of the Ballistic Missile Defense System is a big part of that commitment,

Q2. How are the rules of engagement being developed for the missile defense system? Has all of the necessary training been accomplished?

The U.S. Strategic **Command** has overall responsibility for operation of the Ballistic Missile Defense System. The Combatant Commands are responsible for planning, management, and day-to-day operation of the fielded elements of the Ballistic Missile Defense System. In the case of launching ground-based interceptors from Fort Greely, **Alaska**, that responsibility lies with Commander, Northern Command.

The Ballistic Missile Defense System will be manned by highly trained military personnel. A number of missile defense system operators completed the advanced training and certification in order to meet the strict standards required to operate and maintain the missile defense equipment. Additional operators are currently going through the training regime. This training is a cooperative effort among the Missile Defense Agency, Combatant Commanders, and the military services.

(b)(6)

Q3. There has been lots of criticism of deploying a missile defense system without adequate testing. What is the basis for your confidence is deploying a missile defense system?

The full range of missile defense testing—from our extensive modeling and simulation and hardware-in-the-loop tests to our ground and flight testing—makes us confident that what we deploy will work as intended. We do not rely on intercept flight tests alone to make final assessments concerning system reliability and performance. Our flight tests are important building blocks in this process, but the significant costs of these tests combined with the practical reality that we can only conduct a few tests over any given period of time mean we have to rely on other kinds of tests to prove the system. System capabilities assessed for deployment will be based on test events planned for Fiscal Year 2004 as well as data collected from flight- and ground tests and simulations over the past several years.

We conduct other **kinds** of tests that provide valuable information about the progress we are making and the reliability of the system. Integrated ground tests, for example, are not subject to flight test restrictions and can run numerous engagement scenarios over the course of a few weeks. Our modeling and simulation activity is **an** even more powerful system verification tool. It is important to understand that in the Missile Defense **Program** we use models and simulations, **and** not flight tests, as the **primary** verification tools. This approach **is** widely used within **the** Department, especially when complex weapon systems are involved.

We will continue hoth ground and flight tests after our initial capability is put on alert. We still have a test bed for continuing development even though we take advantage of the test bed to provide limited defensive capability (where we have had none before.)

(b)(6)

BMDO RMI

Q4. With deployment occurring shortly, haw are the fielding activities progressing? Will we be ready?

As I stated in my speech, on July 22,2004, we emplaced the first interceptor at Fort Greely, Alaska. **Up** to five more interceptors will be emplaced at Fort Greely by the end of 2004, with up to 18 interceptors emplaced by the end of 2005 including those at Vandenberg **Air** Force Base, California.

Preparations for communications support at Eareckson Air Station in Shemya, Alaska are on track. Over 112,000 miles of fiber optic cables connecting major communication nodes are in place, along with nine satellite communications links. We are in the process of upgrading the Early Warning Radar at Beale Air Force Base and are well underway building the sca-based X-band radar. Our brigade at Schriever Air Force Base and battalion fire control nodes at Fort Greely are connected to the Cheyenne Mountain Operations Center in Colorado. The command control between combatant commanders, so essential to providing situational awareness, is progressing well and is on schedule. Upgrades to the Cobra Dane Radar are on schedule. The Chief of Naval Operations has identified the first group of Aegis ships to be upgraded with a ballistic missile defense capability, and the work to install the equipment on the first ship is underway.

Q5. You said in your speech that you're deploying a limited operational capability, what does that mean?

Fielding activities are progressing well. **Construction** of the silos and buildings at Fort Greely, Alaska required for the initial operational capability are complete. The first Ground-based Interceptor was installed in its silo at Fort Greely, Alaska on 22 **July** 2004. Assembly, shipment, and emplacement of the remaining Ground-based Interceptors are progressing according to schedule and will be available in October 2004.

We will field a system that provides some capability that we do not have today with the knowledge that we will continue to improve that system over time. Our strategy is to build on this beginning to make the BMD system increasingly more effective and reliable against current threats and hedge against changing future threats.

JLL 2 3 2004

MEMORANDUM FOR DEPUTY UNDER SECRETARY OF DEFENSE FOR ACQUISTION, TECHNOLOGY AND LOGISTICS/
, INSTALLATIONS & ENVIRONMENT

THRU DIRECTOR, WASHINGTON HEADQUARTERS SERVICES

SUBJECT: Contingency Funded MILCON Projects for Raven Rock Mountain Complex, Site-R

References: (a) Memorandum (S/N), Joint Staff, DJSM-0240-04, 09 March 2004, Subject: Raven Rock Mountain Complex (RRMC) Site-R Master Plan (U).

(b) Memorandum (S/N), ASD-HD, 6 Apr 2004, Subject: Raven Rock Mountain Complex Site-R Master Plan (U).

Reference RRMC/Site-R Master Plan approved by you. As discussed during your recent visit to Site-R, this plan contained two Near Term projects for the construction of an External Fire Station and Repair and Upgrade of the Existing Helipad.

This memorandum provides the packages detailing justification for pursuing funds and authorization of these projects under 10 USC 2804, which provides the SecDef authority to carry out MilCon projects not authorized by law if deferral of the project to the next Authorization Act would be inconsistent with national security or national interests. I believe these projects meet that criteria.

Since these requirements are urgent in nature, request you identify whether contingency funding of \$5,357,000.00 is available under the authorization allowed in Section 2804 of Title 10, U.S.C. I believe that deferral of these projects into the next authorization cycle would be inconsistent with national security and national interests in ensuring that RRMC Site-R is COOP ready and capable.

I have attached the DD Forms 1390 and 1391 at Tab B, and request they be forwarded with your endorsement to the SecDef for approval. We will be ready to award

these projects by 30 August 2004.

Michael R. Sullivan

Director

10. DESCRIPTIONOF PROPOSED CONSTRUCTION

Provide improvements to the existing RRMC helipad that will allow it to continue supporting the Joint Chiefs emergency evacuation plans (JEEPs).

- The existing pad footprint will remain. The pad concrete will be replaced, repaired, cracks will be filled and the pad will be sealed. The pad will be required to meet the weight requirements for JEEPs.
- The existing asphalt apron will be replaced with concrete.
- The lighting for the heliport will be upgraded to meet the requirements of TM 5-811-5.
- A new AC power panel will be installed to provide power for the lighting and misc. equipment
- The existing RRMC helipad will be re-striped to meet the requirements of TM 5-823-4.
- The existing Air Traffic Control Observation building will be removed to allow for the construction of aircraft parking area to meet the JEEPs requirement.
- A new 33.5m² X 45.7 m² (110' X 150') concrete parking area will be installed to allow for aircraft parking.
- The existing security fencing around the existing helipad will be replaced to meet current frangibility guidelines of UFC 3-260-01
- A new asphalt entrance will be provided from the existing access road.
- A tie in to the new fire water line and fire hydrants will be installed at the site. This will allow firefighters to fight fires at the Helipad this capability currently does not exist.

10. DESCRIPTION OF PROPOSED CONSTRUCTION

New Fire Station of approximately 790m² (8,500sf.) which will include:

- A single story Truck Bay capable of accommodating 4 Fire trucks w/trailers, able to maintain a temperature no lower than 4.5 degrees C. (40 degrees F.) = 279m² (3000 SF)
- A two story office with billeting, both floors equal approximately 511m² (5,500 SF)
 - Office for Firefighter Administration and Watch Room.
 - Kitchen/Lounge that would support the (5) Billeted Firefighters.
 - Billeting for (2) helicopter pilots.
 - Small Lounge/Kitchenette for Pilots.
 - Men and Women Lavatories
 - Laundry Room
 - Storage Rooms
 - PhysicalTraining Room (PT)
 - Necessary Communications and Equipment Rooms to support, Fire Fighters, Air Control/Observation and Presidential Weather.
 - Air Traffic Control Observation requires a glassed area of approx. 21m² (225 SF) to replace the current HelicopterControl/Observation Bldg.
 - Presidential Weather requires office and map rooms of approx. 93m² (1000 SF).

Ancillary Fire Station Building which will include:

- Approximately 186m²(2,000 square feet)
 - Capability of housing the Hazmat Response Trailer
 - Capability of housing the Special Rescue Trailer
 - Humidity Control Minimal HVAC
 - Communications (Telephone)
 - Electrical Power

(OLO DEFENSE PENTAGON WASHINGTON, DC 20301-1010

The Honorable Duncan Hunter Chairman, Committee on Armed Services United States House of Representatives Washington, DC 20510-6028

Dear Mr. Chairman:

In accordance with Section 2804 of title ?0, U.S.C., I am notifying you of the Department's intent to use \$5,357,000.00 v. Military Construction, Defense-wide funds (contingency construction account) we support an argent requirement at Raven Rock Mountain Complex (RRMC)/Site-Refer to construction projects, a Fire Station with HazMat response/recovery capability with the repaidupgrade of the Helipad will be performed at the facility.

These projects are vital to the success of RRMC's mission and the Joint Chiefs Emergency Evacuation Plans. The project. Thus the completed by the fourth quarter FY 2005. Additional information regarding these projects is enclosed.

I have determined that deferring these projects for inclusion in the next Authorization Act would be inconsistent with national security.

Additional details can be provided upon request,

Similar letters were sent to the Chairmen of the House and Senate Appropriations Committee and the Chairmen of the Senate Armed Services Committees.

INFO MEMO

JUL 2 1 2004

FOR: SECRETARY OF DEFENSE DEPUTY SECRETARY OF DEFENSE

FROM: Raymond F. DuBois, Director, Administration and Managemen

SUBJECT: Office of the Secretary of Defense (OSD) Military Detailees

- At a senior staff meeting, you raised a concern regarding the number of military detailees to the OSD staff. You asked all of your Principal Staff Assistants to review detailees working for them and revalidate their assignments or return them to their parent units. Currently, there are 55 military detailees assigned as outlined on the
- parent units. Currently, there are **55** military detailees assigned as outlined on the attached.
- The assigned detailees are concentrated primarily in OUSD(AT&L) (15), OUSD(P) (16), OUSD(P&R) (11) and OUSD(I) (4). The OUSD(C) currently does not have any military detailees assigned. Additionally, the OGC has 7 military detailees and both ASD(NII) and WHS have 1 assigned. The assigned numbers are in rough proportion to the size of the components' permanently assigned staff.
- Military detailees are typically detailed to the OSD staff for one year or less and remain permanently assigned to their parent organization's roles. Temporary details are authorized to support unforeseen temporary requirements, workload surges, or as a short term measure where the knowledge and skills are not otherwise available from within the organization. Many are detailed to provide temporary, but specific, military expertise required for the Global War on Terrorism and some are detailed for an educational/training experience. Additionally, roughly 10 percent of existing detailees are performing a liaison function between OSD and their parent unit.

Chinese Quotations (Proverbs)

(Collected by Don Rumsfeld during a 1994 visit to the PRC)

"The dragonfly that barely touches the water."
"Sometimes it is necessary to kill a chicken to frighten the monkeys."
"The wind through the tower presages the coming of the storm."
"Watching the flowers on the galloping horse."
"Rain will fall, and widows will remarry."
(Mao Tse-tung's comment on receiving the report that his Defense Minister's, Lin Pio airplane had crashed.)
"When the water recedes, the stone emerges."
(An old proverb used most recently to suggest that Quiao Shi, Chairman, Standing Committee, National People's Congress, whose name means "stone," will ultimately succeed Deng Xiaoping, but only after one or two others serve briefly.)

Faxed to (b)(6) 5/13/04

Dear Mr. President:

I am writing to request a fresidential Proclamation for Family Day: A Day to Eat Dinner With Your Children, an initiative of The (b)(6)

T-432 P.003

F-130

Columbia University. Each year since its inception in 2001, you have issued a Presidential Proclamation proclaiming family Day.

A copy of each proclamation is attached.

Since 1996, (b)(6) research has consistently shown that the more often children eat dinner with their families, the less likely they are to smoke, drink or use illegal drugs. Family Day A Day to Eat Dinner With Your Children is a national effort to promote parental engagement as a simple, effective way to reduce substance abuse by children and teens and raise healthier children. Family Day emphasizes the importance of regular family activities in parent-child communications and encourages Americans to make family dinners a regular feature of their lives. In addition to your proclamation, the governors of 35 states and more rhan 200 cities and counties have issued Family Day proclamations each year. Last year your mother, former First Lady Barbara Bush, appeared in television spots to publicize Family Day and Jamie Lee Curtis did tho same on the radio.

Also attached are background information on Family Day, (b)(6) a conv of the letter from Joseph A. Califano, Jr. President of (b)(6) to Mr. Andy Card, and the response from Melissa Bennett. We would like the proclamation by June 15, 2004 because of our request in The Office of Scheduling for a June presidential ceremony to publicize Family Day.

If you need further information, please contact me at (b)(6) and kgeracd@casacolumbia.org. Thank you.

Sincerely

Director of Development

Enclosures

FAMILY DAY, 2003

By the President of the United States of America

A Proclamation

Children thrive in loving families where they are taught, nurtured, and comforted, by spending time with our children and stressing the importance of making the right chokes, parents and other family members help them develop into confident, successful individuals.

Families can help secure a healthy tomorrow for their children by providing guidance, shaying Involved, and serving as role models. I am committed to supporting strong families and strong markages to help ensure that every child grows up in a safe, loving family. Statistics show that children hom two-parent families are less likely to end up in poverty, drop out of school, become addicted to drugs, have a child aut of wedlock, suffer abuse, or become a violent criminal. Because stable families should be the central goal of American welfare policy. I have proposed spending up to 3300 million a year to lind the most effective programs to rivengthen marriage.

Parents play a critical role in discouraging harmful behavior such as experimenting with alcohol, drugs, and tobacco. Research shows that teens often listen to their parents when it comes to decisions about harmful substances and risky behaviors. Regular amily activities provide opportunities for parents to communicate important messals and substance their relationships with their children. Recent studies from the (b)(6)

(b)(6) found that teens from lamilies who cat dinner together were less likely to use the gal drugs, alcohol, and cigarents, while teenagers who rarely cat dinner with their parents wor more likely to engage in these unbesirby activities.

Families and all Americans can act together to educate our youth about the diagers of drug and alcohol and help them grow into healthy, responsible, compassionate clizens. In order to ensure a brighter future for our Nation, and as to, healthy, and happy lives for ow children, our children must learn that avoiding harmful substances is amongoing responsibility. As we work to educate our next generation about making healthy choices, we renew our commitment to the American (amily.

NOW, THEREFORE, I. GEORGE W. BUSH. President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim September 22,2003, as Family Day, I call upon the people of the United States to observe this dry by engaging in activities to attend the relationships between parents and children and help hight against substance abuse and risky behaviors.

IN WITNESS WHEREOF, I have become one my hand, this twenty-eighth dry of August, in the year of our Lord two thousand three, and of the lodependence of the United States of America the two hundred and twenty-eighth

DEPARTMENT OF THE NAVY HEADQUARTERS UNITED STATES MARINE-CORPS 2 NAVY ANNEX CONTROL OF THE WASHINGTON, DC 203862177557 OF DEFENSE

200 MS 20 FY 3: 20

INFO MEMO

FOR: SECRETARY OF DEFENSE

FROM: General W. L. Nyland, Assistant Commandant of the Marine Corps W/W

Subj: KEEPING IN TOUCH WITH THE INDIVIDUAL READY RESERVE (IRR)

- The Marine Corps response regarding the Secretary of Defense's inquiry on how the Services maintain contact with members of the IRR is at Tab A.
- Since 9/11, the IRR has proven to be a valuable manpower pool that the Marine Corps has utilized to meet both Joint and internal Individual Augmentation requirements. To date, we have activated a total of 3,974 IRR members in support the Global War on Terrorism. Their service has been instrumental to the successful accomplishment of the Marine Corps war fighting mission.
- The keys to this success have been twofold: first, the Marine Corps Total Force System (MCTFS), our automated personnel and pay system that administers both Active and Reserve component personnel in one integrated system, has enabled us to efficiently and seamlessly activate and manage IRR members; and second, our perspective that the IRR is an integral part of the Marine Corps Reserve and should be utilized to the fullest extent possible during both peacetime and wartime.

COORDINATION: None.

Prepared by:	Maj Chris Mace.	(b)(6)
Prepared by:	Maj Chris Mace.	

Copy to: SecNav

Remind them of their service obligation:

- Following the Transitional Recruiting briefs every Marine receives when departing Active Duty, "Welcome to the IRR" information is mailed to each Marine as they are joined to the IRR. Both the Transition brief and the IRR information stress the Marine's remaining service obligation and explain the requirements and/or options for reserve participation.
- The Mobilization Screening card also reminds IRR Marines of their remaining service obligation,

Etc (other efforts):

- Upcoming SNCO and Officer Promotion Board announcements with application instructions are mailed out annually to all eligible IRR Marines.
- Upcoming Professional Military Education opportunities with application instructions are mailed out annually to all IRR Marine Officers.
- Promotion warrants and congratulatory letters are mailed to all selected IRR Marines
- The Mobilization Screening card also encourages them to visit specified Marine Corps informational websites.
- "Notification of Change in Reserve Status" letters are sent to all IRR members identified as non-participants, which explains their status, identifies remaining service obligations, and offers options for increased participation.
- All Officer promotion selects and non-selects in the IRR are called personally.
- MOBCOM maintains a Solicitation Cell that calls IRR members to find volunteers for board membership and short fuse ADSW opportunities.
- The Solicitation Cell also calls IRR members to identify their availability for activation billets which correspond with their rank, MOS, and related military or civilian experience.
- RDOL offers members the ability to search for duty opportunities while offering commands the ability to search for qualified individuals.
- The Customer Service Center (CSC) operating at MOBCOM offers assistance and guidance to all Marines, including IRR members. The CSC is available through a toll-free phone number or a web-based interactive database that provides a direct link to RDOL.
- The Reserve Counterpart Training (RCT) budget is dedicated specifically for funding IRR Marines interested in conducting periods of training with active or reserve units in their occupational field.
- The Mobilization Training Unit (MTU) program offers a viable alternative for participation to IRR Marines who cannot perform regularly scheduled drills but still desire to perform duty. MTU members participate in a non-pay status but still receive inactive points credited towards a reserve retirement. MTUs are assigned project-oriented missions, and develop flexible schedules around the needs of its members.

Marine Corps Efforts to Keep in Touch with the IRR

The Marine Corps takes a multi-faceted approach in maintaining contact with its 58,000+ IRR population and views its IRR members as a vital asset in supporting both peacetime and wartime requirements. In fact, the Marine Corps recognizes that 30% of its Selected Reserve is comprised of Prior Service Marines recruited from the IRR. The Marine Corps Mobilization Command (MOBCOM) in Kansas City is responsible for the day-to-day administration and maintenance of the IRR. We believe the effort we put into maintaining contact with IRR Marines directly increases the availability and interest of our IRR Marines. Since 11 Sep 01, 3,974 IRR Marines have been activated as Individual Augments in support of the Global War On Terrorism while countless others have volunteered for duty and transferred to the Selected Reserve.

In response to SecDef's questions - know where they are, know what their health is, know what they can do, remind them of their service obligation, etc. - the following is submitted:

Where they are:

- An annual Mobilization Screening card is mailed to every IRR Marine during the month of their membership anniversary, which requests updates to contact and personal information.
- All direct phone calls to IRR Marines are used as opportunities to obtain updates of contact and personal information.
- The Reserve Duty On-Line (RDOL) website provides IRR members a means of volunteering for activation and other duty opportunities. The registration process in RDOL captures contact information that is automatically fed into the Marine Corps Total Force System.

Know what their health is:

- The Mobilization Screening card also requests info about IRR Marines' health status.
- All direct phone calls to IRR Marines are also used as opportunities to obtain updates on their health status.
- Medical/dental records are sent to MOBCOM when a Marine transfers to the IRR.
- MOBCOM maintains these records and conducts health verification record reviews whenever an orders request is initiated on an IRR member.
- Medical status is verified during all contacts via correspondence, phone or electronically.

Know what they can do:

The registration process in RDOL also captures Civilian Employment Information (CEI) data, self-professed language capabilities and foreign countries visited.

July 26, 2004

FOR SECRETARY OF DEFENSE

FROM: Andy Hoehn, Deputy Assistant Secretary of Defense for Strategy

SUBJECT: Global, Posture; Reaction tu POTUS Speech (U)

Here is an update on recent reactions to the President's posture announcement on August 16. Public Affairs reports that coverage overall has been 90% positive.,

- Foreign reaction, especially official statements, has been almost universally positive, while domestic reaction has been somewhat more mixed.
 - Domestic media tends to emphasize US politics, while foreign media gives more prominence to the strategic value of the review.
- In general, those who have done sufficient fact-finding (e.g. Wall Street Journal and BBC) have responded vary positively.

DOMESTIC

- Op-eds offer expected election-season political commentary, such as Ron Asmus's critical Aug 1.8piece in the Washington Post.
 - But op-eds Charles Krauthammer in the Post and Marcus Corbin in Baltimore Sun were highly
- Most editorials like the Washington Post, Boston Globe, and Detroit Free Press offer a generally understanding, if mixed, viewpoint. Some common themes are:
 - Credit for the Administration's strategic rationale;
 - Support for long-overdue moves in Europe;
 - o Concern about impact in Korea; and
 - o criticism for announcing the changes at a campaign event.
- Only a few editorials have been decisively positive or negative:
 - The Wall Street Journal's good piece was the result of time we invested with their editorial Writers.
 - The New York Times' negative editorial was expected they wrote a negative piece on US-German relations last
 - a The Philadelphia Inquirer produced an oddly negative and speculative editorial, which we have responded to via a letter to the editor.

2

(b)(6)

FOREIGN

- Foreign official reaction has been positive testimony to our consultation efforts over the past 9 months.
 - o Ranges from very positive (Australia, Italy) to surprisingly benign
- In foreign media, the review's strategic aspects have received significant attention, along with stories on local impact and speculation about US political motives.
- See the attached paper for samples of both official and press statements from allies and interested parties.

WAY AHEAD

- · Your up-ed is being finalized.
- We will continue to respond to negative editorials via letters and to push out op-eds
 like Doug Feith's piece in the August 19 Washington Post.
- · We will encourage combatant commanders to speak aut,
- We will approach selected Defense Policy Board members such as Harold Brown, James Schlesinger, and Barry Blechman to write op-eds and take interviews.
- SASC plans a bearing on 20 September.

ATTACHMENT: As stated.

Prepared by: Mike Brown and ScanSmeland, Strategy, 614-0421

Serlet - WE'VE ASKED DITH IF THEY CAN FROM ANY INSIGHT INTO REACTIONS FROM N. KERED, CHUM, OR FROME. ZANDWAY

(b)(6)

SAMPLE OF FOREIGN REACTION

Official

- Karsten Voight, German PM Schroeder's coordinator for US relations: "This is positive...a success story."
- UK MoD: "The UK government and NATO have been consulted ... but it is too early to say what impact there will be on US deployments in the UK"
- Italy MFA: "Absolutely not [a symbol of a weaker commitment]. The Cold War is a thing of the past."
- Japan MFA: "Japan welcomes the review of the US military framework that will better suit the global security environment and further contribute to peace and stability."
- South Korea MFA: "The South Korean government has been well aware of this plan."
- Australia MoD: "It will, improve the US capability to contribute to international efforts to defeat global threats."
- Russia's MoD: "I don't see anything alarming in these plans."

Note: No official commentary reported yetfrom China, France, Singapore, or India.

Press

- Germany: Deutsche Welle and Frankfurter Allgemeine likely negative impacts on the German economy and local affinities for US troops, but also the need for NATO to improve its own capabilities.
- UK: BBC and Financial Times = largely favorable discussion of the strategic rationale and implications, but speculation on the fate of UK-based F-15s.
- Japan: Japan Times and Asahi praise for the strategic rationale, and detailed reporting on specific proposals for posture in Japan.
- South Korea: Korea Herald focuses exclusively on impact in Korea and ongoing Future of the Alliance talks.
- Australia: Sydney Morning Herald new posture may weaken deterrence in Korea.
- Singapore: The Straits News quotes from President, very little discussion of strategy or implications in Asia.
- India: The Hindu cursory discussion of the rationals, with quotes from the President and critics,
- France: Minimal exposure in French press, mostly quotes from the Resident and critics.

Note: Little press commentary to date from China'or Russia.

GENERAL COUNSEL OF THE DEPARTMENT OF DEFENSE 1600 DEFENSE PENTAGON

WASHINGTON, D. C. 20301-1600

ACTION MEMO

2015 JUN 10 21 3 39

December 23, 2004, 12: 15 PM

MEMORANDUM FOR SECRETARY OF DEFENSE

FROM William J. Haynes 11, GENERAL COUNSEL

SUBJECT Diplomatic Passports

- You asked (Tab A) whether providing courtesy diplomatic passports for life to former Secretaries of State should be extended to former Secretaries of Defense, in light of the nature of the world today.
- The State Department Foreign Affairs Manual (FAM) provides at section 1311.3-3c., "Diplomatic Passports," that:

Courtesy diplomatic passports are diplomatic passport books that are issued, for tourist purposes only, to certain former high-ranking **U.S.** Government officials, such as former Presidents, Vice Presidents, Cabinet Secretaries and Foreign Service Chiefs of Mission who were career government employees. These passports are issued at the Department to a very limited number of retired USG employees and their spouses. The prescribed fees are charged. (Emphasis added.)

- We are informed that the Department of State changed this policy in late 2003. Under current policy, former U.S. Presidents, Vice Presidents, Secretaries of State, Career Ambassadors, and their spouses or widows/widowers are provided courtesy diplomatic passports for life. Such passports:
 - o do not, in and of themselves, afford the bearer any privileges and immunities:
 - o are subject to prescribed fees, just as for a "regular" or "tourist" passport;
 - o may be used only for personal travel; and,

- o still require the bearer to obtain/present a visa when presenting the "courtesy" diplomatic passport for entry to a foreign country, as do travelers on "regular" or "tourist" passports.
- Prior to November 2003, courtesy diplomatic passports also were provided to present and former U.S. Supreme Court Justices, and to all Foreign Service Officers who had served as Ambassadors and their spouses or widows/widowers.
- Due to a series of incidents involving attempted extry by such passport bearers into foreign countries without visas, and their requests for special privileges, State Department revised the policy and now provides diplomatic passports only to the individuals listed above (not including former Cabinet Secretaries).

Conclusions

- o Courtesy diplomatic passports issued to former **U.S.**Government officials do not afford to them any special protections, privileges or immunities. As a matter of current policy, State Department does not issue them to former Cabinet Secretaries (except for former Secretaries of State).
- o Nevertheless, in light of frivolous judicial initiatives in several **countries** in recent years, it would seem reasonable to ask the State Department to revisit their current policy. We have **drafted** a memo (Tab B) **from** Under Secretary Feith to Under **Secretary** Grossman for this purpose. (Mr. Feith recommended extending the request to include former high-ranking agency officials and retired senior military officers, as well **as** former Cabinet Secretaries.)

RECOMMENDATION	Approve USDP sending the	memo at Tab B.

Please respond by	 	 	

MEMORANDUM FOR UNDER SECRETARY OF STATE FOR POLITICAL AFFAIRS (MARC GROSSMAN)

FROM Douglas J. Feith, Under Secretary of Defense for Policy

SUBJECT: Diplomatic Passports

Currently, only former **U.S.**Presidents, Vice Presidents, Secretaries of State, Career Ambassadors and their spouses or widows/widowers are provided courtesy diplomatic passports for life. The Foreign Affairs Manual, however, provides that such passports may **also** be issued to former high-ranking officials, such as Cabinet Secretaries.

Although courtesy diplomatic passports do not afford special protections, in light of recent judicial actions in some countries, such a passport might facilitate travel through foreign countries. I think you may want to consider issuing these passports to former Cabinet Secretaries and other former high-ranking agency officials, and retired senior military officers, such as Chairmen of the Joint Chiefs of Staff and Combatant Commanders.

FOR: SECRETARY OF DEFENSE

FROM: General Richard B. Myers, CJCS VA 150-64

SUBJECT: Georgia Train and Equip Program (GTEP) Sustainment

- Question. "What kind of a proposal do we have to maintain Georgia 'train and equip' efforts with some training of their folks and periodic visits?" (TAB A)
- Answer. USEUCOM has developed the Georgia Capabilities Enhancement Program (GCEP) to follow up GTEP, which prepared Georgian forces for counterinsurgency operations on Georgian territory.
- Analysis. GCEP will be conducted using Mobile Training Teams (MTTs) focused on improving GTEP-trained units to battalion-level operations capability to include:
 - Organizing, training and equipping one NATO-Compatible Infantry Brigade (1 lth BDE) with an emphasis on creating new support units.
 - Providing uniforms and C41 equipment to GTEP battalions and staffs.
 - International Military Education and Training courses focused on US/NATO interoperability, including improvements to the English Language Training System.
 - Creating an effective UH-1H helicopter unit to NATO standards.
- I fully endorse GCEP as the right way ahead for the Georgian Armed Forces and our security cooperation focus.

General John W. Handy, USAF Commander Air Mobility Command 402 Scott Drive, Unit 3EC Scott Air Force Base, IL 62225-53 10

Dear General Handy:

I write regarding your statements recently reported in U.S. News and World Report that "I am not a muscle **man,** but I have stuck my finger through significant pieces *of* metal," and "I could poke a hole into the corroded areas of the airplane." The quotes were characterized as supporting the acquisition of new air refueling tankers for the Air Force.

As you are aware, the Secretary of Defense has ordered a thorough analysis of alternatives regarding the tanker replacement program. As you also know, this was precipitated by findings of a Defense Science Board task force that, among other things, there is no evidence that corrosion poses an imminent catastrophic threat to the KC-135 fleet mission readiness and that the Air Force's maintenance regime is well poised to deal with corrosion and other aging problems. In fact, the findings indicate that the Air Force's claims of unmanageable corrosion problems and cost growth were overstated. It also found #at the KC-135E can fly to 2040. These findings disproved assertions to the contrary repeatedly made by civilian Air Force leadership regarding the purportedly urgent need to lease 100 Bocing 767s. In other words, the 'dominating rationale' cited by the Air Force to Congress for having taxpayers pay billions of dollars more €or leasing Boeing's KC-767A tankers than they, would for buying them outright, has been conclusively shown to be without merit. The Air Force's representations on this issue remain a natter of continuing investigative concern. I discussed my concerns about such misconduct in a letter to the Secretary, dated July 28,2004.

Aspects of that deal, ranging from the how the original Air Force proposal passed through Congress outside the normal budget process to the improper conduct of senior executives at the Boeing Company, have been exhaustively reviewed and fundamentally criticized by the Senate Committee on Armed Services; the Senate Committee on Commerce, Science and Transportation; the Department of Justice; the Defense Department's Office of the Inspector General; the Defense Science Board; the Congressional Budget Office; the General Accounting Office; the Congressional Research Service; the Office of Management and Budget; the Defense Department's Office of Programs, Analysis and Evaluation; the Institute for Defense Analyses; the Industrial College of the Armed Forces, National Defense University and others. Notably, White House Chief of StaffAndy Card and former Defense Department Comptroller General

SUBJECT: Transforming the USG

Attached is a short draft presentation on transforming the U.S. Government for the 21st century. This brief is obviously in an early stage.

Andy, it seems to me that these are the kinds of national security, homeland security and other issues that you folks in the White House are considering. Clearly, they don't fit neatly into the responsibilities of any single department or even into any one of the White House councils. But then, the problems we face in the world don't fit neatly into any one department or into any one of the various White House councils.

In any event, we have folks in DoD who have been thinking about some of these things. If anything here is of interest to you, the Vice President or Condi, let me know. We would be happy to try to be helpful. If you would like to talk about any of these ideas, let me know.

Thanks.

Transforming the U.S. Government for the 21st Century

23 August 2004

This briefing is classified

Draft Working Papers Not Subject to FOIA

8/20/2004

Purpose

- Public attention generated by 9/11 Commission report and Congressional hearings have focused Nation on need to improve national security
- Opportunity for Administration to:
 - Go beyond 9/11 Commission recommendations
 - Go beyond the issue of terrorism
 - Prepare for broader challenges of 21st century
- Consider whether the USG might:
 - Restructure institutions
 - Create or realign authorities
 - Take further action

-Feue-

812012004

FOUC

Restructure Institutions - Illus frafive Ideas

- Domestic intelligence Go beyond law enforcement approach and integrate with foreign intelligence while duly preserving civil liberties?
- Strategic Communications Create entity in the USG that draws on US private sector prowess in media, IT, advertising, and entertainment?
- NSC and HSC Restructure organizations?
- US Country Teams Transform US Embassy Country Teams for 21st century operations?
- UN and other international institutions Reorganize to prevent crises and assist member states that lack capacity for effective governance?
- National Guard Organize, train and equip the National Guard for homeland defense?

-FOUQ-

8/20/2004

FOUC

Create or Realign Authorities - Illustrative Ideas

- Interagency "Jointness" Increase through "Goldwater-Nichols" for whole USG?
- Build Local Capacity Help international partners build their capacity to counter enemies and replace US forces
 - Seek additional authorities for: "Train and Equip," Commander's Emergency Response Program (CERP), Global Peace Operations Initiative
- Homeland Security Is it time for review of how USG responsibilities and authorities are allocated to ensure right capabilities and assets address key problems?
- Congress Streamline Congressional oversight (e.g., Joint Committees; smaller committees; merged authorization and appropriation committees) and speed nomination/confirmation process?

FOUC-

8/20/2004

Take Action - Illustrative Ideas

- Bio-Defense Launch Strategic Bio-Defense Initiative?
- Common Threat Assessments Implement initiative to develop common threat assessments with key allies and partners?
- Non-Governmental Action Mobilize private philanthropies and utilize public-private partnerships to promote educational reform and economic development in Muslim world?
- Civilian/Military Recruiting and Retention Review incentives/disincentives for public/military service?

4000

812012004

INFO MEMO

August 24,2004 1902

FOR: SECRETARY OF DEFENSE

FROM: William J. Haynes II, General Counsell Hou

SUBJECT: Start of Military Commission Trials

- On June 29,2004, the Appointing Authority (AA) referred charges to a Military Commission for trial in the cases of al Bahlul of Yemen, al Qosi of Sudan, and Hicks of Australia. On July 14,2004 the Appointing Authority referred charges to a Military Commission for trial in the case of Hamdan of Yemen.
- The Presiding Officer of the Military Commission set separate initial hearing dates in each of the four cases which began this week at the U.S. Naval Base, Guantanamo Bay, Cuba (GTMO), as follows:
 - o U.S. v. Hamdan Tuesday, August 24,2004;
 - o <u>U.S. v. Hicks</u> Wednesday, August 25,2004;
 - o <u>U.S. v. al Bahlul</u> Thursday, August 26, 2004;
 - o <u>U.S. v. al Qosi</u> Friday, August 27,2004.
- The initial appearance for each case will likely include:
 - o An advisement of the Accuseds' rights;
 - o A reading of the charges against each accused;
 - o An entry of the Accuseds' pleas (guilty/not guilty);
 - Setting a schedule for future trial dates;
 - o Setting a schedule for dates that Prosecutors and Defense Counsel will be required to give notice of witness requests, discovery issues, and evidentiary issues;
 - o Setting a schedule for dates that Prosecutors and Defense Counsel will be required to file motions.
- The initial appearance for each case may also include argument of motions by Prosecutors and Defense Counsel, including:
 - o Motions Challenging the Jurisdiction of the Military Commission;
 - o Motions Challenging the Presiding Officer and Appointing Authority for Conflict of Interest;

- o Motions for Protective Orders for Classified or Protected Information.
- The initial appearances in each of the first four cases are expected to attract wide media attention.
 - o 78 media representatives will be in GTMO to watch the hearings.
 - 8 media representatives will view the hearings from inside the trial room.
 - 70 media representatives will view the hearings through closed-circuit television at another location at GTMO.
 - o 5 representatives from non-governmental organizations (NGOs) will also view the hearings from inside the trial room.

INFO MEMO

201 119 20 PM 4 51

August 20, 2004, 1200

FOR: SECRETARY OF DEFENSE

FROM: David S. C. Chu, USD(P&R)

SUBJECT: SNOWFLAKE - Keeping in Touch w/IRR

- You asked what we are going to do to get the Services to stay in touch with their IRR
 members and ensure that they know the members' location, health, military skills,
 civilian skills, and to make sure that members were aware of their obligations,
 requirements and opportunities.
- Currently, all Services are using, to various degrees: Exit briefings as members
 separate from active duty; "Welcome to the IRR" letters; annual screening mail-outs;
 electronic media (web-sites), telephonic contact, and letters related to promotions,
 physical status, military and civilian skills status, and security clearance status, as well
 as obligations, requirements and opportunities. Additionally, all Services update data
 when IRR members perform any type of duty.
 - Each Service also has some version of a "participating IRR" a more active IRR population with whom there is regular contact.
- To locate members who fail to respond to any of the above, Services contract with
 various commercial sources to include credit companies and the postal service. To
 help in this area, we have submitted a legislative proposal that will allow the Internal
 Revenue Service to provide the Services with address information on those members
 we have not been able to locate through other means.
- To enhance contact efforts, at a recent conference on the IRR, the following initiatives
 were proposed and being reviewed by the Services for implementation:
 Institutionalized programs to inform all military members of their total service
 obligations; annual "virtual musters;" increased resourcing for physical musters;
 annual military service obligation and expectation reviews for both active and reserve
 members; and, a DoD-wide portal for input of required personal information.
- The most crucial effort being undertaken is the development of a DoD-wide program
 to educate service members, the public, and the Congress on the IRR, and the
 obligations, responsibilities and opportunities of IRR members. This is being
 developed specifically to create proper expectations.

INFO MEMO

FOR: SECRETARY OF DEFENSE

FROM: David S.C. Chu, USD/P&R

SUBJECT: Snowflake — Mobilization Legislation

- You asked about proposed legislation relating to mobilization of the Guard and Reserve (TAB B).
- We support six proposals for the FY-2005 Defense Authorization Act (a more detailed description of each proposal is at TAB A):
 - Mobilize to Train Allows reservists to be mobilized to train for their pending mobilization, be released from active duty, and then be mobilized later to deploy (House and Senate provisions).
 - Reserve Accounting and Management—Eliminates the 180-dayend strength restriction and allows reservists to voluntarily serve on active duty for up to three years without counting against active duty end strength or grade ceilings (House provision).
 - Consolidated Bonuses Allows reservists to qualify for a bonus under the same authorities and the same conditions as active duty members (House provision).
 - Foreign Language Proficiency Pay Increases monthly pay for proficiency in a critically needed foreign language (House provision).
 - Accession and Training Requirements—Provides flexibility to reduce the minimum 8-year service obligation and 12-week basic training requirement for selected individuals accessed with unique specialty civilian skills (Senate provision).
 - Auxiliaries Provides a structure for services to use retirees, veterans and private citizens who volunteer to support non-combat defense missions (Neither House nor Senate provision).
- Our goal is to ensure these proposals are included in the conference report.

RECOMMENDATION: None

Prepared By: Mr. Tom Bush, OASD/RA(M&P),

(b)(6)

OSD 12904-04

TAB

A

Legislation Related to Mobilization

House	Senate	Proposal	Description
\$522	\$521	Mobilize to Train	Allows guard and reserve members to be mobilized to train for future mobilization missions, be released from active duty, then mobilized later for a scheduled deployment.
\$404		Reserve Strength Accounting and Personnel Management	 Creates a new strength accounting category for guard and reserve members serving voluntarily on active duty or full-time National Guard duty to provide operational support. Eliminates the 180-day active duty end strength accounting threshold that has been a barrier to using reserve volunteers. Allows reservists to remain in this category for 3 years without counting against active duty end strength and field grade or senior enlisted grade ceilings.
\$615 §617 \$618 §619		Consolidation of Bonus Authorities	 Allows guard and reserve members to qualify for the active duty accession, enlistment, reenlistment, retention and conversion bonuses under the same conditions as active duty members. Use contingent upon demonstrated need and availability of funds. Provides greater flexibility in responding quickly and appropriately to officer and enlisted personnel shortfalls, regardless of component.
\$616	_	Foreign Language Proficiency Pay	 Increases monthly pay for members who maintain proficiency in a critically needed foreign language. Converts the pay from an incentive pay, which is paid only when a reservist is in a duty status (the so-called 1/30th rule) to a bonus, which will allow reservists to be paid at the full monthly rate since it does not require reservists to be in a duty status to receive the pay.
	§576	Service Obligation/ Basic Training Requirement	Provides flexibility to reduce the minimum military service obligation and basic training requirement for select individuals accessed because of their unique specialty civilian skills (such as linguists): • Allows SecDef to specify a lesser minimum military service obligation—law currently specifies 6 to 8 years. • Allows SecMilDepts to specify a lesser required period of basic military training during war or national emergency—law currently specifies a minimum of 12 weeks.
		Auxiliaries	 Provides structure for the services to use volunteers to perform non-combat missions. Provide an opportunity for military retirees, veterans and private citizens to support the military by offering their services. Air Force could expand missions assigned to the Civil Air Patrol and improve its oversight of that organization. Army, Navy, Marine Corps could establish auxiliaries.

MEMORANDUM FOR SECRETARY OF STATE

SUBJECT: Risk of the ICC and US Participation in UN Peace Operations

State has been doing some good work in lining up additional ICC Article 98 agreements and reminding the UN that the US willingness to participate in peacekeeping operations will be affected by whether we get proper ICC-related protections. It is important that we keep pressing on this matter which grows more important as we continue to fight the global conflict we ar in.

By the way, shouldn't we stop referring to the ICC as the Rome Statute"? As I see it, one of the main problems with the treaty is that the parties arrogate to themselves the right to legislate for other countries -- that is, for ountries that aren't parties to the treaty. We should stress that the ICC agrees ent is a treaty, not a statute.

Isn't that correct?

CSIS MEMORANDUM

To:

CSIS Board of Trustees, Supporters, and Friends

From: John J. Hamre /

Date: May 17, 2004 (Number 137, Three Pages)

Re:

Should America just walk away from Iraq?

All over Washington I am now hearing this question asked: Is Iraq a lost cause? Should we just find a way to pull out as soon as possible? I honestly believe the answer to both is no. It is clear, however, that we are less in control of the situation every day - which may indeed be our exit strategy.

Washington is still reeling from the terrible pictures from the prisons. They have become a metaphor for all that has plagued us this past year. It seems that Washington (and our Baghdad headquarters, I fear) has been cut off from what is really happening on the ground in Iraq. We have managed Iraq policy through our hopes and aspirations, not through a realistic assessment of the conditions on the ground.

It appears, though, that the Administration is now embracing a new strategic direction that is more realistically grounded on conditions in the field. After the uprising in April, senior leaders in the Administration finally realized the path they were on was not working. They correspondingly made three critical decisions:

First, they abandoned the sweeping "de-Baathification" policy that excluded past managers from participating in the building of a new lraq.

Second, they decided to reinforce our troop levels in the region, committing to a major deployment for at least the next 18 months. There is no question that the political folks in the White House would have preferred to pull the troops out rather than to move more in, that would have been a far more popular move domestically. Instead, the President decided that his entire presidency now rests on success in Iraq.

Third, they chose to stay with the concept of "indigenization" of Iraqi security, but with a surprising twist. They agreed to let a former Saddam general take charge of the security of Fallujah. It seemed completely incongruous when it first came up. I believe it was more than just a pragmatic solution to avoid a bloody battle, which would have only served to strengthen the uprising elsewhere in Iraq. In fact, it represents a new powersharing strategy in Iraq. We can see this even more starkly in Najaf, were the radical Shi'ite cleric, Moqtada al-Sadr, has holed up with his small army. Instead of launching an all out assault on them, we have sealed off the region in order to allow the most pragmatic Shia religious and political leadership the time to finally decide that they want to remove al-Sadr and his forces.

Both of these instances—turning Fallujah over to a former Saddam general and letting Shi'ite leaders disarm al-Sadr—are indeed defacto power-sharing decisions. We have

17 May 04 12:57

decided to let local political leaders have direct authority on the street, so long as it stays within the boundaries we find acceptable - which is why we are keeping 135,000 troops in the country indefinitely. In effect we are saying "you run things at the local level, and so long as it doesn't threaten national unity, we will leave you alone."

This still begs the question of how we create a viable national government. Here is where the tragedy of the prisoner abuse scandal will haunt us. Some 80% of Iraqi citizens now want America to leave as soon as possible. That, in combination with the fact that Ambassador Paul Bremer has publicly stated that U.S. and coalition forces would withdraw if asked to do so by a future Iraqi government, now presents a significant dilemma. No new Iraqi government will have legitimacy with its citizens unless it confronts America. If America selects the new government, it won't be legitimate. If the Iraqi people pick the government, it is likely to be anti-American. The challenge now is to create a new process to produce a legitimate government, without it being seen as America's product.

Last weekend CSIS sponsored a very high level private conference in a quiet setting outside of London. It was a productive few days that invited very frank and open discussions. The participants agreed that the primary problem we face in Iraq is to prevent it from sliding into factional strife - effectively breaking it up into three constituent parts. Based off of that premise, they outlined a path which I think makes good sense.

- 1. Immediately seek a new United Nations resolution.
- Recruit a "national unity" council to replace the Iraqi Governing Council.
 This national unity council should explicitly include opponents of America's involvement, not just the segment of Iraqi leadership that embraces America's role.
- 3. Accelerate the use of former Baathists to assume administrative functions within the government. These Baathists should be required, however, to first pledge their support to the Iraqi national unity council.
- 4. Appoint a U.S. Presidential envoy of unquestioned influence and integrity (Jim Baker was considered a representative candidate) who could undertake a new outreach to Middle East capitals. The purpose of the outreach would be to listen to each of their perspectives, and enlist their support for the remainder of this agenda.
- 5. Under the umbrella of a UN resolution, establish a Reconstruction Implementation Council patterned after the mechanism developed for Kosovo. This takes the international legitimization effort out of the day-to-day politics of the UN and into the hands of a group that is committed to solving the problems in Iraq. Notionally the Council would include each of Iraq's regional neighbors (including Iran), along with 8-10 other countries willing to

(b)(6)

commit a legitimate effort to helping the new government of Iraq get on its feet. This formula allows us to incorporate the regional countries, but in a forum where they can't dominate the deliberations.

- Seek to involve the Arab League in concrete steps. Let supportive Arab
 capitals take the lead in developing an agenda that the Arab League could
 embrace for the reconstruction of Iraq.
- Re-engage on the Israeli-Palestinian problem. Dr. Condoleezza Rice has been given the lead in this area, and she should visibly make it a priority during the next 3 months.

This seems to me a very pragmatic path to answer the opening question of this memo: Is the situation in Iraq lost? No, it is not lost - but the path to success now largely rests in the hands of others.

Sorry, this memo is a bit longer than usual, but I felt the topic merited a more in depth discussion. I am always grateful to hear your thoughts and comments. Please feel free to contact me with your reactions at <u>JHanne@csis.org</u>.

SUBJECT: Police Training in Afghanistan and Iraq

I would like a report on what police work has been done in Afghanistan by whom, at what numbers, over what period of time, what the State Department has done what the Germans have done, etc.

I would like the same thing for Iraq. I would like to know precisely what the Department of State has done, how many instructors they have, how many people they have trained, were they are on schedule, are they behind **schedule**, etc.

Please get it pulled together for me.

Thanks.

JUN - 9 2704

FOR SECRETARY OF DEFENSE

FROM: Thomas W. O'Connell, Assistant Secretary of Defense

SUBJECT: Police Training in Afghanistan and Iraq (U)

- You asked a number of detailed questions about police training n Afghanistan and Iraq. Here is a summary, followed by a detailed explanation fo Afghanistan (Tabs A-B) and Iraq (Tabs C-D).
- The State Department has been slow to start police training in both countries. DoD is working with State, providing equipment and infrastructure in Afghanistan and training in Iraq.

Afghanistan

- The State Department has now picked up momentum and will meet the initial objective of training 20,000 police by July, one month behind schedule.
- The supervision of deployed police, providing adequate equip ment and infrastructure, and building the managerial capacity of the Ministry of Interior are the most significant challenges.

Iraq

- Sustaining police training and mentoring programs as multi-faceted as those we have in Iraq is a complex task that will require substantially more planning and resource allocation.
- Rapidly boosting the total numbers of Iraqi security forces on duty has been relatively easy, but now the emphasis must shift to a sustained effort to boost the quality of the police force.

COORDINATION: Tab E

650 Policy

Afghanistan Police

- Together with Germany, the US will likely meet the Government of Afghanistan's goal of 50,000 trained national and highway police and 12,000 border police by December 2005, provided Germany accelerates its border police training.
- In the past year, the State Department Bureau of International Narcotics and Law Enforcement Affairs (INL) has trained 12,558 patrolmen. See slide at Tab B.
- INL has constructed a Central Police Training Center in Kabul and five (of seven)
 Regional Police Training Centers (RTCs). There are 35 US trainers in Kabul and 450
 US-trained Afghan trainers in RTCs and Kabul.
- Approximately 25 German trainers train commissioned and nod-commissioned officers in one-and three-year programs at the national police academy in Kabul. Since 2002, they have trained 3,700 national police, with 1,500 more in training. They have also trained 750 border police.
- INL is just beginning to address the following key challenges:
 - o <u>Ministry of Interior capacity</u>: INL is in the process of contiacting a Ministry of Interior reform package. Starting July 1, INL will embed 30 senior level police advisors within the Ministry to oversee reform and development of plans and standards.
 - o Equipment and Infrastructure: INL has provided communications linking provincial police chiefs (32) to the Ministry of Interior. INL also provides equipment and supplies, and contributes to an international fund for salaries.
 - DoD is providing \$60M of Counternarcotics funds this year to CENTCOM to increase police capacity, including providing equipment and infrastructure
 - Outstanding critical needs include: police station infrastructure, weapons and weapons training, communications, specialized equipment and vehicles.
 - Germany, with US support, solicited donations for these requirements at the May 18-19 Afghan Police Reconstruction conference in Doha.
 - o <u>Mentoring/monitoring</u>: CFC-A is deploying military Mobile Assistance Teams to help assess local police units' procedures, administrative capacity, training and deployment plans, infrastructure and equipment.
 - CFC-A will provide findings to INL with the goal of energizing INL programs.

TAB

B

Security - Police

Summary as of 24 May 04:

Lead Nations:

Germany and U.S.

Jun '04 Goal:

20,000*

Current Trained:

3,600

12,558

750 border

Increase since 22 March 600

3600

Assessment: Currently on track to reach goal of 20,000 police by June 2004.

* national police, border police & highway patrol combined

US Training Goals and Status:

- US Program will build 7 Regional Training Centers (RTCs) for Police, Border Police, and Hwy Patrol in same cities as first 7 PRTs.
- Program has already completed rebuilding Kabul training facility. -Gardez, Mazar, Kandahar, Jalalabad & Konduz RTCs operational with capacity of 1,000 students each.
- ·Herat and Bamiyan RTCs planned Spring
- Attrition rate for trainees after graduation is than

German Training Goals and Status:

- Rebuild Kabul police academy and commence 3 year (officers) and 1 year (NCO) <u>programs - construction</u> completed, Academy training underway.
- Provide trainers for two US regional training centers – underway.
- Assist Ministry of Interior with organizational reform-planning underway, but transferred to U.S.

Afghan Initiatives and Status:

- MOI developed a comprehensive reform program which includes revenue generating initiative such as traffic regulations and a fine system as well as development of a new payroll and financial management system. INL is reviewing proposals and will make selections shortly.
- MOI completed deals to purchase weapons from the Czechs, which have been delivered and is negotiating a deal to purchase vehicles from Russia. USG continues to assist with negotiations for a weapons donation from Ukraine.

Iraq Police

 DoD's lead role in training Iraqi police is an unusual arrangement driven by unusual circumstances. When the environment in Iraq permits, State will assume its normal lead role in training local police forces.

- The 2004 Supplemental allocated \$1.147B to train and equip Iraqi Police. The administration of that money is divided between DoD and INL.
- As of 8 June 2004, Iraq had approximately 89,000 police officers on the payroll. See chart at Tab D.
 - Select coalition Military Police have conducted Transition and Integration Program (TIP) training at fifteen sites country-wide since June 2003.
 - 21,055 police officers have graduated from one of the 3-week (TIP) programs.
 - With State Department INL funding, Department of Justice International Criminal Investigative Training Assistance Program (ICITAP) developed the eight-week basic skills training program used at facilities in Jordan and Baghdad. To date, 5,707 recruits have received this training.
 - Jordan Academy will reach its full capacity of 3,000 students by this summer.
 - Academies in Baghdad and Mosul currently have a cumulative capacity of over 1500 and plan to expand the cumulative number to 2500 students.
 - o INL is preparing to establish a training center in Baghdad to provide specialty training such as fighting organized crime, anti-terrorism, and drug enforcement.
 - INL will establish agreements with ICITAP and various U.S. law enforcement agencies to provide trainers.
 - INL will provide the field support.
 - o Mentoring/monitoring: INL is planning to fund 500 U.S. Iraqi Police Advisors (IPA) in Iraq. Nearly 300 are currently in country. IPAs are responsible for supervising the field training and mentoring of Iraqi police after they receive classroom training.

THE ASSISTANT SECRETARY OF DEFENSE WASHINGTON, DC 20301-1300

May 20,2004 5:45 PM

FOR: SECRETARY OF DEFENSE

From: Powell A. Moore, Assistant Secretary of Defense for Legislative Affairs (b)(6)

Subject: Response to Senator Bennett, SECDEF Snowflake # 052004-8

- As soon as you informed me on the afternoon of May 19 that Senator Bennett had spoken with you about a floor statement he planned to make, I called him to make sure that we had a clear definition of the information he needed and to reaffirm your offer of support. He advised me that he had already mad his statement right after his conversation with you.
- Moreover, he said that a primary purpose of his call to you wa to be able to say in his floor statement that he had passed along his suggestions about fundamental approaches commanders should take to avoid similar situation in the future. These included surprise inspections and ensuring there is a duty officer at the prison at all times, day or night. He cited General Eisenhower's principle that "areas that are not inspected deteriorate." I have underlined these suggestions in the attached statement and have given them to the Vice Chairr an of the Joint Chiefs of Staff.
- After reviewing his speech, we advised him that he misinterpr :ed the meaning of a General Officer Memorandum of Reprimand (GOMOR). GOMORs are originated by general officers, not necessarily directed at them No general officer has received a GOMOR regarding this incident, as his floor speech stated.
 Brigadier General Karpinski received a letter of admonishmen rather than a GOMOR.
- Senator Bennett and his staff have expressed appreciation for Jur support.

cc: General Peter Pace

The Vice Chairman Joint Chiefs of Staff

PENTAGON RESPONSE TO IRAQI PRISONER ABUSE -- (Senate - May 19, 2004)

[Page: S5741] <u>GPO's PDF</u>

Mr. BENNETT. Mr. President, last week, along with a number of my colleagues, I went up into the room on the fourth floor in the Capitol where the Defense Department, the State Department, and the CIA come to brief us on classified information. I sat in a darkened room where we saw a slide show of the photographs that had been taken of Americans inflicting abuse on Iraqi prisoners. The pictures were revolting, they were disgusting, and they left us all with a sense of outrage that this had gone on, outrage that Americans had been involved in anything such as this.

I did not look forward to the experience. Indeed, I made the initial decision not to go. Then I decided: No, if I am going to be involved in examining what is here, I have to see the evidence, as revolting as it may be.

The sense of outrage that I and my colleagues felt about this was shared by all Americans, but in one sector of American society it seems to be even greater than anyplace else. There are some in this society who might not be able to guess what that sector is. But I would say the outrage that has been the strongest has come from those who serve in the American military.

Duty, honor, country—these are the watch words of the American military, and the were violated by those who took those actions in the prison in Baghdad. They did not do their duty. They dishon red the uniforms they were as they abused those prisoners, and they brought disgrace on the country whose Constitution they had taken an oath to uphold and defend.

The sense of outrage is nationwide, but it is particularly focused among those who have sworn to uphold duty, honor, and country and saw their fellows in uniform violate those principles.

I rise to discuss this today because today is the first court-martial coming as a result of the investigations that have been conducted into this activity. This morning in Baghdad, Army SPC Jeremy Sivits pled guilty, was convicted, and sentenced to a 1-year imprisonment, reduction in rank, and a bad conduct discharge.

Now, there are those in our society who have less faith in the military, who say: These courts-martial are a part of a coverup; this is an attempt to gloss over what has happened; one cannot trust the military to investigate themselves; and we need a whole series of investigations by outside groups.

I believe the facts are that we will find out more what happened from the courts-martial than we would find out from any degree of investigation conducted elsewhere. I offer as a demonstration of the fact that the military can be trusted to act in matters of this kind the following chronology of what has happened with respect to this incident.

http://thomas.loc.gov/cgi-bin/query

512112004

We now know that the abuse of the prisoners took place in the last quarter of 2003. We do not know the exact dates, but sometime toward the end of that year the alleged detained abuse occurred. On January 13, 2004, SPC Joseph Darby opened an e-mail thinking he was going to see pictures that he describ d as a travelogue; a history of the performance of a particular unit. Instead, what had been downloaded on his com uter were the photographs that my colleagues and I saw in room 407 of this building.

Specialist Darby was absolutely stunned. What did he do? Here were his fellow soldiers engaged in activity that was clearly in violation of everything he had been taught, people he wanted to feel close with and identified with, people who, perhaps, were his friends. What would he do? He did his duty, and he provided a CD of the abuse photos to the Army Criminal Investigation Command, or the CID, on January 13, 2004. On January 14, the CID began its investigation--no attempt to cover up. No attempt to hide or turn away from the fact that there was a potential difficulty. They began the next day, and they notified people up the chain of command of what they were doing.

On January 16, just 2 days later, Brigadier General Kimmitt announced that there would be an investigation by

[Page: \$5742] GPO's PDF

Central Command. It had gone up all that way, that quickly. In just 3 days they wer at the top levels of Central Command.

Two days after that, BG Janis Karpinski, who was the commander at Abu Ghraib prison, was admonished and suspended from her command. She was relieved just 2 days after this reached the attention of Central Command.

Additionally, the Abu Ghraib chain of command was suspended, from the battalion commander, a lieutenant colonel, all the way down. Just 2 days after this was brought to the attention of Central Command, the entire group was relieved.

Now, on January 19, a combined joint task force requested that Central Command appoint an investigating officer, and on January 31, Major General Taguba was appointed to conduct the investigation.

On February 10, the Secretary of the Army tasks the inspector general to conduct an analysis of the internment detention policies, practices, and procedures. It goes beyond just the prison: Look at the whole Army and our procedures to see what can be done to prevent this from happening again.

On March 12, General Taguba completed his investigation and briefed the commander of joint task force 7, Lieutenant General Sanchez, Also on March 12, Lieutenant General Helmly, who was the commander of the U.S. Army Reserve Command, directed that Command's inspector general to conduct an assessment of training for Reserve personnel on the issues of detained treatment, ethics, and leadership to see if the training had broken down in a way that would cause this to happen. All of this was going on-the military acting on its own.

On March 20, the first charges were preferred

against six accused and announced by Brigadier General Kimmitt at a press conference. This is not something that got discovered by some investigative reporter digging in behind the scenes. This was something that was announced by the military after they had done a careful examination and moved in alway to protect the rights of every individual.

At that announcement, no names or units were identified so that they would not compromise the due process of those who were being accused.

http://thomas.loc.gov/cgi-bin/query

5/21/2004

1

On April 15, Major General Fay, the Army Deputy Chief of Staff for Intelligence, appointed an investigative different to examine the circumstances with respect to the 205th Military Intelligence Brigade. That is the group where the commander was relieved within 2 days of discovering that there was an allegation of a problem.

On May 1, Lieutenant General Sanchez issued a memorandum of reprimand to six general officers and one letter of admonition to a member of the 800th Military Police Brigade as recommended by Major General Taguba. This is not something that they passed off to the GIs, the sergeants, the corporals, and the privates. This is something they took care of at the general officer level. Six general officers received a memorandum of reprimand. That is a career-ending experience for a general officer.

Then on May 7, Secretary Rumsfeld announced the independent review panel headed by former Defense Secretary Jim Schlessinger, including retired Air Force General Chuck Homer, former Representative Tillie Fowler, and former Defense Secretary Harold Brown. And then, today, on May 19, the first court-martial has taken place and Specialist Sivits was found guilty and sentenced.

The lesson that comes from this list of actions is a lesson that the world should heet. The lesson for Iraqis and other nations is that this is how democracies handle their problems. This is how Americans face the difficulties that arise when there is a breakdown that occurs within our military. We do not hide it. We do not pretend it did not happen. We do not strive to find excuses. We act in the way consistent with the rule of law.

I hope everyone in the world would recognize the difference between the way we have responded to this and the way al-Qaida has responded to this. We have responded to it by exercising the rule of law and seeking those responsible. They have responded by taking an innocent American civilian, who had hothing whatever to do with any of this, and cutting off his head, live and in color on international television. That is the difference between Americans and al-Qaida when faced with a problem.

So that is the first lesson I hope the world will take from the way we are handling this. The lesson that the military should take from this is that the rules are there to be obeyed. The lesson that should go forward from Specialist Sivits' court-martial, from the six general officers who got the memorandum of reprimand and from the investigations that are still going forward is that if the rules are broken, you end up in Fort Leavenworth.

That is the lesson that should come out of this for the American military, and I believe it is being received there.

The lesson for the commanders, those who are now responsible and who have tak over to replace those who were relieved, is this. It comes from a statement by General Eisenhower, who knew pomething about military discipline. He said: "Areas that are not inspected deteriorate."

Let's go back to Specialist Sivits for a moment and find out from his statements religiting to his court-martial what really happened. I am quoting now from the Washington Post:

Sivits told investigators that the abuse would not have happened had higher-ranking members been present. "Our command would have slammed us," he said. "They believe in doing the right thing. If they saw what was going on, there would be hell to pay."

That statement echoes testimony given by one of the initial investigators on the case. During a session similar to a grand jury proceeding, Tyler Pieron, an Army criminal investigator, said the abuses occurred, "after the chain of command had changed shifts and gone home."

Sivits said he did not report the abuse to his commanders because [he was told not to by a friend] "and I try to be

friends with everyone. I see now where trying to be friends with everyone can cost you."

I spoke with Secretary Rumsfeld this morning about this lesson, the lesson of command. It is fine to change the command, but we must examine what caused the problem and change the procedures. Even though the rules were there, the procedures broke down. There was not a duty officer on duty. We have been told that this abuse took place between 2 and 4 in the morning when no one was around. I raised with Secretary Rumsfeld the importance of seeing to it from now on that the new commanders of the prison make sure there is a duty officer there all night long.

Back to Eisenhower's dictum, there should be snap, surprise inspections. People in the prisons should never know when someone might drop in, unexpected and unannounced, to see what is get in g on. Secretary Rumsfeld concurred. I believe that is the lesson that command should receive from this experience, and I believe it is the lesson they will learn and they will follow.

As sorry as this chapter is in our proud military history and as deep as this stain has become upon America's honor, it is not the first time we have seen such chapters. It is not the first time we have endured such stains. I wish I could say it is the last time this will happen, but even in this morning's news we are the aring that there are more pictures, that it may have been more widespread than we thought. With human being as imperfect as they are, it is inevitable that at some point in the future someone else will break the rules, violate as oath, and take actions that will cause all Americans to mourn, as we do over these actions.

Given that history, that it has happened before and perhaps will happen again, we should remember what we did as a nation when it happened before and what we are doing now. We dealt with it. We went after those who were responsible, discovered who they were, gave them their full due process, but when they were convicted, they were punished. They were dealt with. Then we made the changes that were necessary to see to it that it wouldn't happen again. Then we got past it.

We have not allowed those past chapters in our history to deter us from our destiny as a nation. We should do the same thing now. We are in the process of discovering who the guilty are. We are in the process of conducting courts- martial. Specialist Sivits is just the first. Charges have been

proffered against others and additional courts-

[Page: 557431 GPO's PDF

martial will be forthcoming. We are in the process of making the changes--not just the change of command but the change in procedures to see to it that this will not happen again.

As we have done in the past, we must get through this and not let it deter us from our overall goal of why we are in Iraq. We must not fixate on this stain on our honor to the point that we become so muscle-bound that we cannot proceed forward in our mission.

What is our mission? Speakers who have addressed this before me have made that clear. Our mission is to provide freedom and security for the people of Iraq. I believe that means freedom and security for the Middle East generally. I believe that means transforming the world in which Americans live and an increase of freedom and security for our Nation as well. These are worthy, indeed noble goals, and we must not be deterred from seeking them by preoccupation with this particular outrage.

I close with a conversation I had over the weekend. Like many of us over the weekend, I went home to Utah and I participated in Armed Forces Day. It was a poignant Armed Forces Day for a variety of reasons, because many of

the people who were there were families of those in the military who were there without their family member-that is, children, husbands, wives, mothers and fathers of Utahns who are serving in this war and who are not home with their families to enjoy the delightful spring day at Murray City Park where everyone was having a pienic and a good time. Set up in that area was a series of flags, one flag for each individual who had fallen in either Iraq or Afghanistan. Of course, the majority of flags were American flags, but I was struck by the number of British flags, Italian flags, Polish flags, Spanish flags--one I did not recognize, an Ukrainian flag, an Estonian flag. We are providing the leadership, but many countries in the world are responding to us as we launch on this mission.

On Armed Forces Day I sat next to a colonel. He was not a Utahn; he had come to Barticipate in the activities. We visited over lunch. With the **Army**, he has been in Kosovo, he has been in Bosni^a, he has been in Afghanistan, he has been in Iraq, and he was on his way back to Iraq.

I said to him: Colonel, tell me what it is like. You have been there, you have been on the ground. Tell me what it is like. He gave me an answer we hear a lot. Indeed, it was the first sentence out of his mouth that comes out the same as many others. He said: Well, things are not nearly as bad as the U.S. press would have you believe. Things are really going fairly well in many parts of the country. But we have problems.

We talked about some of the problems. He made this observation that I think should keep us thoughtful as we address our mission in Iraq. He said: You know, whether it is Bosnia, Kosovo, Afghanistan, or Iraq, the same thing is true: Those people are just like us in that all they want is to have their children be able to walk out of the door and be safe on the street, to be able to go to school without intimidation and learn what they need to learn to get a decent job and live a decent life. That is all they want in Kosovo, Bosnia, Afghanistan, or Iraq--just like us. That is what we want in America. To bring that to Iraq and give the people of Iraq that opportunity, with their wives and their children and their grandchildren, unfortunately requires force of arms.

Americans, British, Italians, Poles, Spaniards, Ukrainians, Estonians, are willing to risk their lives to bring about that goal. We must never lose sight of the importance of that mission or of the sacrifice that has gone into achieving it. We must never turn back simply because there are those who have put a stain on American honor by the way they have behaved.

I pay tribute to the Armed Forces. I pay tribute to the chain of command that is dealing with these challenges. I pay tribute to those who are willing to face the problems and not back away from them or cover them up. We must support them in their efforts. We must not smear the entire establishment because of the actions of a few.

Information Paper on DoD Advisory Boards

• The Department currently utilizes 60 advisory boards, 34 of w lich were established at the discretion of the Secretary of Defense. Twe ty-five were created in statute by the legislative branch, and one was establ hed by Executive Order. A listing of these boards and their missions is at Tab 1 also found at the DoD Federal Advisory Committees website: http://faca.disa.mil under the Advisory Committees tab.

This listing is

- DoD advisory boards which have private citizens as members |re subject to the Federal Advisory Committee Act, 5 U.S.C. App. I. This statu | not only recognizes the merits of seeking advice and assistance from e: berts outside the government, but it allows the executive branch to receive advide that is relevant, objective, and open to the public.
- Department advisory boards can be established on a long-tern basis to address continuing issues, or they can be established on a short-term t sis to address a specific issue. Long-term boards can be established for two-year periods and can be renewed for additional two-year periods thereafter.
- Under the law, advisory board meetings must be announced it advance and must be open to the public. All or part of an advisory board meeting may be closed. however, based on one or more of the provisions of the Government in the Sunshine Act, 5 U.S.C. § 552b(c).
 - o As an example, advisory board meetings may be closed to the public when the board will discuss classified information.
- The law also requires advisory boards to keep and make available to the public minutes of open and closed meetings, including an accurate description of and the resolution of each matter discussed by the board.
- Department advisory boards are independent entities. While they report their findings to the Department leadership, their recommendation | are not subject to direction and control by the Department.
- It has been the Department of Defense's policy for the past 15 years to appoint all private sector board members as Consultants, also known as Special Government Employees. After agreeing to serve, potential n imbers are vetted through the Office of the Special Assistant to the Secretary o Defense (White House Liaison) and various Principal Staff Assistants who ut lize the board

and/or receive their advice. Nominees are also required to fill dat financial disclosure reports if the board they serve on makes recommendations that could affect the expenditure of government funds in the future. Boar Imembers may accept travel and per diem, but are rarely compensated directly for their work.

- The General Counsel of the Department of Defense notifies ad risory committee members by letter to contact the Standards of Conduct Office (SOCO) for advice concerning ethics issues relating to their appointment. SOCO: sources that the members' confidential financial disclosure reports are completed before their first meeting. Committee members also complete a Foreign At tivities Questionnaire and execute a disqualification from participation in any particular matters involving financial interests listed on the confidential financial disclosure report. SOCO attorneys provide an ethics briefing to the Committee members. A guide for current committee members is distributed at a corn mittee meeting and can be found at http://www.defenselink.mil/dodnc/defenseethics under "ethics resource library" and under "DoD guidance."
- Advice provided to the Department has been critical to current transformation efforts, keeping the Department informed on cutting edge issues from the latest best business practices to state-of-the-art science and technology developments. This advice cannot be drawn exclusively from internal government sources. We simply do not have the expertise or those with professional net works with access to the kind of information needed. This advice often has a direct impact on future military operations and the welfare of the war fighter.
- If the Department were to use survey instruments and contract tal arrangements to gather the advice provided by advisory boards, the costs wo lid be significantly higher. Most support provided to these committees is done by federal employees who manage these committees as a collateral duty to their principal duties.

As of 04/29/2004

Type of Committee: Statutory (Total - 25)
Presidential (Total - 1)
Discretionary/Established by Secretary of Defense (Total - 34)

Committee Name	Туре	Description
Advisory Council on Dependents' Education (ACDE)	Statutory	Advises the Secretary of Defense and the Director, Department of Defense Dependents Schools (DoDDS), on improvements to achieve and maintain a high quality public educational program through secondary school for minor dependents in overseas areas as defined in section 1411, Public Law 95-561, as amended.
Advisory Panel to Assess Domestic Response Capabilities for Terrorism Involving Weapons of Mass Destruction	Statutory	Assesses the capabilities for responding to terrorist incidents in the U.S. homeland involving weapons of mass destruction. Examines response capabilities at the Federal, State, and local levels.
Air University Board of Visitors	Discretionary	Assists the Air University in sustaining effective programs pertaining to the educational, doctrinal, and research policies and activities of the Air University, and advises the Secretary of the Air Force, through the Commander, AU.
Armament Retooling and Manufacturing Support (ARMS) Executive Advisory Committee	lDiscretionary	Studies the ARMS Initiative and reviews the Army's plan for its implementation; makes specific findings and recommendations concerning the concept, executability, and overall soundness of the plan; assesses government and industry expectations for the ARMS Initiative; evaluates the incentives being proposed under the ARMS Initiative Implementation Plan (AIIP); reviews and makes specific recommendations on the applicability and adequacy of the loan guaranty program and planning grants; reviews and determines which existing public laws, regulations, and policies are currently available to fulfill the ARMS Initiative; and, reviews and comments on the Army's plans for Plant Reutilization, Emergency Planning, and the Disposal of Excess Plant Equipment.

Serves as a continuing scientific adv sory body to the Surgeons General of the military departments and the Assistant Secretary Defense (Health Affairs) providing them with timely scientific and professional advice and guidance in matters pertaining to operational programs, policy development and research needs for the prevention of disease and injury and promotion of health.	
Army Education Advisory Committee Discretionary (Auth by Law) Discretionary (Auth by Law) Provides the Secretary of the Army, Army's senior leadership with expert Army educational programs. Advice educational policies, school curriculus and objectives, program effectiveness instructional methods, and other asper management.	
Discretionary	Advises the Secretary of the Army, the Chief of Staff, the Assistant Secretary of the Army (Research, Development and Acquisition), the Deputy Chiefs of Staff, and major Army Commanders on scientific, technological, and acquisition matters of interest to the Department of the Army.
Discretionary	Advises and assists the President, Naval War College in educational and support areas. Reports or opinions, suggestions and recommendations of the Board will be made to the President, Naval War College. The President, Naval War College shall advise the Secretary of the Navy and the Chief of Naval Operations of opinions and recommendations made by the members of the Board which should receive consideration by a higher authority.
Discretionary	Advises the Superintendent and the Secretary of the Navy on naval graduate education programs, assessing the effectiveness of the school in accomplishing its mission and inquires into the curricula, instruction, physical equipment, administration, state of the student body, fiscal affairs, and other matters relating to the operation of school programs.
Statutory	Provides advice and guidance to the Secretary of Defense through the Assistant Secretary of Defense for Health Affairs for the operation of the Uniformed Services University of the Health Sciences; to assure that said operation is in the best tradition of academia and in compliance with the appropriate accreditation authorities,
	Discretionary (Auth by Law) Discretionary Discretionary

Board of Visitors, Joint Military Intelligence College	Discretionary	
Board of Visitors, Marine Corps University	statutory	e policie examines all aspects of the University's Professional Military 3ducation operations; and provides such oversight and advice as s necessary to facilitate high educational standards and cost
Board of Visitors, National Defense University	Discretionary	students, curricula, educational methods, research, facilities, and idministration of the National Deferse University (NDU). Principal components of NDU are: Armed Forces Staff College, re die of D
Board of Visitors, Western Hemisphere Institute for Security (WHINSEC)	Statutory	Provides to DoD expert advice on the operations and management of the Institute. Inquires into the curriculum, instruction, physical Equipment, fiscal affairs and acaderric methods of the Institution and any other matters that it or the Secretary of Defense deems appropriate. Reviews WHINSEC at riculum and determines whether it complies with applicable U.S. laws and regulations consistent with U.S. policy goals toward the Western Hemispheres and adheres to U.S. doctrine appropriately of th

Chief of Engineers Environmental Advisory Board	Discretionary	Serves as advisor to the Chief for developing policy and procedures for Corps Programs; asce ains and advises upon natural, social and cultural resource management issues associated with Corps plans, projects and programs; provides advice aimed at both identifying and resolving existing environmental issues with new or expanded Corps missions; advises on the development of workable methods for quantifying natural, social and cultural resource management costs and benefits of Corps programs and in expressing these in terms of both their tangible and intangible consequences; and, explores and advises on new directions where the Corps, acting as the national engineering agency, can continue to solve not only the engineering and economic aspects of new challenges, problems, and opportunities, but also those environmental features for which it has responsibility.	
Chief of Naval Operations Executive Panel Advisory Committee	Discretionary	Provides an avenue of communications by which a distinguished group representing scientific, academic, engineering, and political communities may advise the Chief of Naval Operations (CNO) on questions related to national seapower. In pursuing its objectives, the CEP may operate in committees composed of selected Panel members to conduct detailed examinations of matters related to national seapower.	
Defense Acquisition University Board of Visitors	Statutory	Advise the Under Secretary of Defense (Acquisition and Technology) and the President of the Defense Acquisition University (DAU) on "organization management, curricula, methods of instruction, facilities and other matters of interest" to the DAU, as directed by 10U.S.C. 1746.	
Defense Advisory Board for Employer Support of the Guard and Reserve	Discretionary	Provides advice to the Secretary of Defense about issues concerning Reservists and their civilian employers, to include recommending policies and prioritie—for employer support action and programs.	
Defense Advisory Committee on Military Personnel Testing	Discretionary	Provides the Secretary of Defense, through the Assistant Secretary of Defense (Force Management and ersonnel), with assistance and advice on matters pertaining to military personnel testing; reviews the calibration of personnel election and classification tests to ensure the accuracy of resulting scores; reviews relevant validation studies to ensure that the tests have utility in predicting success in technical training and on the job; reviews ongoing testing research and development in apport of the enlistment program; and, makes recommendations for improvements to make the testing process more responsive to the needs of the Department of Defense and the Military Services.	

Defense Advisory Committee on Women in the Services	Discretionary	Provides the Secretary of Defense, through the Assistant Secretary	
Defense Business Board	Discretionary	Makes recommendations to the Senior Executive Council (SEC) on effective strategies for implementation of best business practices of interest to the Department of Defense. Studies and provides an annual report to Congress on the findings and recommendations concerning environmental restoration at military installations closed or realigned.

Answer to Your 14 May 2004 Snowflake Question:

Records of Prior Service

You said, "One of the investigators probably ought to look at the records of the people who were charged with problems at Abu Ghraib, and see what their records looked like in Bosnia and possibly Afghanistan, since apparently some of them were there also."

- Bottom line: Background checks of U.S. Army personnel so far identified in the abuse of detainees at Abu Ghraib did not reveal indicators of aberrant behavior.
- OUSD(I) tasked the Director of the Army Staff, Headquarters U.S. Army, to have the Army's Central Adjudication Facility (handles background investigations relevant to the granting of security clearances) review the records of all individuals that were in some way connected to the Abu Ghraib detainee abuse investigation.
- A review of U.S. Army records revealed information on three of these individuals "that might have been indicative of potential abuse behaviors." Those indicators included: violation of a restraining order, disorderly conduct, and counseling for an adjustment disorder. None of these three soldiers, however, have so far been implicated in the Abu Ghraib abuses and there is no record of misconduct by the three while on active duty in the Army in any other theater of operations.

FOR OFFICIAL USE ONLY

DEFENSE INTELLIGENCE AGENCY

WASHINGTON, D.C. 20340-

May 24,2004

U-0429/DR

FOR: UNDER SECRETARY OF DEFENSE FOR INTELLIGENC

FROM: L.E. Jacoby, Vice Admiral, USN, Director, Defense Intelligence Agency

SUBJECT: (U) Mr. Nicholas Berg

(U) The JITF-CT queried CIA-CTC, NSA, TTIC, and FBI regarding terrorism information related to Mr. Berg.

(U) What we know. Most of what we know regarding Mr. Berg's activities results from FBI interviews and Press reporting. It appears Mr. Berg was an independent business owner looking for contract opportunities in Iraq. He does not appear to have had a direct link to terrorism, though in 2002 he may have inadvertently provided passwords for computer access to individuals with al-Qaida links.

(U) On 25 March, the U.S. military contacted the Mosul Operations dase (MOB) regarding a U.S. citizen detained at an Iraqi police station in Mosul. The U.S. person was identified as Nicholas Berg. Mr. Berg was detained by Iraqi Police on 24 March after being observed by the police in a taxicab in Mosul. The Iraqi Police deemed Mr. Berg to be suspicious (NFI), although they had no information indicating he was involved in any illegal or terrorism-related activities. Iraqi Police subsequently notified the U.S. military.

(U) Mr. Berg was interviewed by FBI agents in Mosul between 25 and 26 March, and again on 3 April. Mr. Berg told agents he entered Iraq through Jordan to establish working relationships in the "antenna tower" business and to acquire contracts for his business, Prometheus Towers. Mr. Berg stated he had previously traveled to Mosul in late 2003. During the March interview, Berg told agents he was a "politically active Jew," and believed he could inconspicuously move in Iraq because he thought he could "blend in." FBI Agents and Coalition Provisional Authority (CPA) officials emphasized the dangerous Iraqi environment to Mr. Berg. Prior to Mr. Berg's CPA-assisted release on 6 April, he was offered financial assistance to safely depart Iraq. According to CPA representatives, Mr. Berg declined the assistance.

(U) In 2002, Mr. Berg was interviewed by FBI officials in Philadelphia after determining his computer account at the University of Oklahoma had been used by suspected al-Qaida member Zacarias Moussaoui. While attending the University, Mr. Berg compromised his

11-L-0559/OSD/26312

OSD 13135-04

FOR OFFICIAL USE ONLY

computer account by providing his UserID and password to an unknown individual from a nearby flight school. The flight school used some University of **Ok** ahoma facilities and dorms but did not have computer access. Following compromise of the computer account, Mr. Berg's logon information was passed to students at the flight school on a regular basis and became widely used by numerous individuals, inch ling Moussaoui. During the 2002 FBI interview, Mr. Berg did not recognize a photo c 'Moussaoui or his name. The FBI assesses Mr. Berg was not otherwise connected to Moussaoui or terrorism-related activities.

- (U) What we don't know. Beyond those indicated in press, we don't know who Mr. Berg's contacts were in Iraq.
- (U) The exact nature of his activities in Iraq.

, , , ,

- (U) The circumstances of his capture where, when and specifically by whom.
- (U) What we assess. Both Press reporting and information learned from interview with FBI officials suggest he remained in Iraq for husiness purposes. Apparently, Mr. Berg traveled extensively in this endeavor and appeared to shun normal precautions, such as using security personnel beyond a driver.

OFFICE OF THE SECRETARY OF DEFENSE 1920 DEFENSE PENTAGON WASHINGTON, DC 20301-1920

12 May 2004

TO: SECRETARY OF DEFENSE

FROM: Andy Marshall

SUBJECT: Abusing Prisoners

You may be deluged with advice on this matter, but you may find the attached two items sent to me by old friends of interest. The essence of the results of experiments and experience is that normal human beings when put in the position of guarding prisoners often will mistreat them. Close supervision is required to see that it does not happen.

I will send copies to Tillie Fowler and Jim Schlesinger.

In any case, you have my best wishes and support.

Ferguson, Eric, CIV, Net Assessment

Paul Berenson (b)(6) From:

To: Marshall, Andrew

Cheney, Richard; Warner, Senator John; Christie, Tom Cc:

Subject: Abusing Prisoners is a Natural Human Tendency of Prison Guards

)ear Andy;

The reference to the prisoner tests I requested in my e-mail below has been provided to me. It is as follows:

Eaney, C., Banks, C., & Zimbardo, P. (1973). Interpersonal dynamics in a simulated prison. *International Journal of* Priminology and Penology, 1, 69-97).

This is a famous psychological test that is known as the 'Stanford Prison Experiment' that was conducted by Prof. hilip Zimbardo and associates in 1971. Prof. Zimbardo is currently a Professor of Psychology Emeritus at Stanford, nd is a former President of the American Psychological Association.

As stated below, and in the subject title, the tests demonstrate that abusing prisoners is a natural human tendency of rison guards who are normal human beings. Psychotics and sadists would behave much worse including murder, vhich apparently also happened in Iraq.

This can be overcome by good training, and an appropriate command environment, neither of which apparently xisted in Iraq. The MPs who were assigned to prison guard duty claimed they had no special training as prison tuards, and the Commanding General from MI apparently passed the word that he would like the MPs guarding the risoners to 'soften them up' for questioning. Given these conditions, it was inevitable the prisoners would be nistreated.

I suggest you pass this information to the Secretary of Defense and the military leadership so they are aware of the ause of the problem, and can take action to ensure it doesn't happen again. None of this excuses the hehavior of the inlisted personnel who abused the prisoners, but it is unfortunate they will be punished for behaving in a way that could be expected in the environment in which they were put.

I will probably be getting additional information from my e-mail network that I will pass to you if I believe it may be ielpful.

I hope this is useful

Very respectfully

Paul Berenson (b)(6)

Paul Berenson (b)(6)

wrote:

Dear Colleagues:

You may find the subject statement shocking, but it is true, and apparently not widely recognized. None of the commentary or testimony on Iragi prisoner abuse gave any indication that anyone was aware of this fact. Most important, it applies to normal, average people, not just psychotics or sadists who will behave worse than the average person. The guards behavior in Iraq is probably more common than anyone is willing to comprehend.

I first became aware of this about 40 years ago when I read a description of a famous experiment conducted by a psychology or sociology professor at a university. I would like to get a reference to this paper so that I can send it to the Secretary of Defense, et al;

blease help me in any way you can in finding a description of this experiment. Professors of psychology or sociology are likely to know of tobumentation of this experiment.

The experiment was conducted by the professor randomly splitting a group of randomly selected normal male students into two groups; one group became the prisoners, and the other group became the prison guards. He then put the prisoners in makeshift cells in a prison environment, and observed what happened. Very quickly, the guards, who were otherwise

quite normal, began to abuse the prisoners in various ways. The abuse started with mild abuse, but quickly got worse. The abuse got so bad that the professor had to terminate the experiment early. I also recall that the professor was forbidden to run any more experiments like this. What this tends to show is that people given absolute power and control over other people tend to abuse them. This same phenomenon tends to happen in non-prison environments such as fraternity hazing. You can probably think of other examples.

An extreme example of this tendency is genocide. Prof. Rudy Rummel, who devoted his life to documenting and understanding government mass murder summarized his conclusion in Rummel's Power Principle: "Power kills; absolute Power kills absolutely". His work is documented in his monumental book, "Death by Government" for which he was nominated for the Nobel Peace Prize.

It is important that this natural tendency for human beings to abuse people under their absolute control be recognized in order to counter it. If we can find the paper describing the experiment, it should be read by all who will be prison guards so they recognize the tendency they have to abuse prisoners, and can fight the tendency. Please help me find the paper or a description of this experiment.

Nothing I say above should be misconstrued to justify or excuse the maceptable behavior of U.S. prison guards in Iraq.

Thanks for your help

Paul

While a 1st Lt, Military Police Corps, 32^M Infantry Division, Wisconsin National Guard Division, when it was mobilized 1961-62: During Survival Escape and Evasion training, following the procedure of our host unit at Fort Lewis, the 4th Infantry Division, our MPs were used to guard and harrass troops in a fake PoW cage. In their attempt to make things "realistic," our lads became a bit too zealous, and officers from other units and out MPs complained, I met with division chief of staff, and it was stopped. When the Stanford experiment results were published a decade or so later, I was not surprised.

At Fort Irwin, while I was Acting Provost Marshal in the "Exercise Bristle Cone" maneuvers - 1962 - I received
a command letter from a four-star general asking for details on reports that Military Intelligence interrogators (Reservists called up from the Washington, D.C. ar (a) had roughed up Aggressor PWs and taken away their outer clothing and sleeping bags when they put them out cold desert night. Our MPs had given the "PWs" their sleeping bags - fortunately.

These and other experiences, including the day-to-day ¹eadership challenge of keeping police discretion on a tight leash, heighteⁿed my sensitivity to these issues. Many years later, when I had gained some reputation **as** a military historian, in full expectation that difficultⁱ es along these lines would arise in the future, I wrote two pieces on the subject:

"Preventing Atrocity in Low Intensity Conflict," MILITARY REVIEW 63:11 (November

1983).

"Thinking the Unspeakable: On Cruelty in Small Wars," SMALL WARS AND INSURGENCIES 1:1 (April 1990).

Reportedly they showed "The Battle of Algiers" in defe se circles before the Iraq War to sensitize them to these very pitfalls. Did they use it as a training film?

Donald H. Rumsfeld Secretary of Defense 1000 Defense Pentagon Washington, DC 20301-1000

Dear Don,

Last week I was invited by a group of your finest (Marine officers) to a seminar at Camp Pendleton, which is only a few miles north of where I live. These guys are great and have been assigned to a variety of tasks involved in the transition of traq from an occupied, economically dependent territory to a self-governing economically independent country. They have their work cut out for them under the best of circumstances. Why I'm writing to you, however, is because I was led to believe both from written material and during the course of our conversations that these tasks are facing additional potentially insurmountable obstacles placed in their way by the Coalition Provisional Authority and other directives coming from the U.S.

Because of my experience with the domestic economy of Vietnam in the 1970-1974 period under George Schultz and my work on a post-Castro transition plan for Cuba with the Cuban American National Foundation, when it was ably led by Jorge Mas Canosa (who passed away five years ago), I thought you might be interested in my two-cents worth (which has been discounted even below two cents). Rather than criticizing what I may not have fully understood of the Bremer and CPA plans, I've limited myself to what I consider essential do's and don'ts for creating an economically viable society out of a war-rayaged former totaliterian state.

A. Perhaps the most significant obstacle to reestablishing markets is the absence of a viable stable-valued means of payment and store of value (currency). To foster economic interchange, merchants, workers, savers and investors need a currency they can count on both over time and across space. This currency has to be stable in value over time to satisfy the needs of small savers, and to provide a basis for contracts and it has to be readily acceptable everywhere both inside and outside the region to facilitate trade and investment flows.

I can't begin to tell you how depressing it was to the local economy of Mexico in 1976 when the peso started to collapse after having been stable for years and years. Likewise, Argentina's recent abandonment of the currency peg (under de la Rua) and the subsequent financial collapse is a tragedy of immense proportions. Our own return to dollar credutity in the late 1970s and early 1980s under Paul Volcker and Ronald Reagan was the sine qua non of America's renaissance. Time and again dountries are forced to relearn the powerful dictum of a sound money.

Iraq does not have the ability nor does it have powerful enough political institutions to pursue, maintain and monitor its own currency de novo. Iraq, if it is to have its own currency at all, must have that currency immutably linked to the dollar or euro. My personal suggestion would be to use either euros or dollars as the domestic currency of

Iraq and don't even pretend to introduce a new Iraqi currency. Pariama is dollarized literally, and lots of other countries are dollarized de facto, and the system works extremely well.

Attempting to set up a new currency puts at risk the entire traqi rehabilitation effort and could, if bad enough, force the lower echelons of the traqi economy into barter. Barter is inefficient, inconvenient and costly, and will meterially impede the type of economic progress we all hope for. The upper levels will always be able to take advantage of foreign currencies.

B. Also of exceptional importance for a new traqi government is the structure of fiscal policy (taxation, spending and the issuance of debt) at the national and providical levels.

In countries like Iraq where financial markets are years and years away from sophistication, there is a virtual certainty that budget deficits will lead to overuse of the printing press and hyperinflation. Budget deficits also can lead to excessively high tax rates and widespread disregard and flouting of the laws. Therefore, clear and concise tax policy explicitly segregated between federal and provincial prerogatives is of the essence.

trag is extraordinarily fortunate to be blassed with oil. As such severance taxes on oil should be a mainstay for government revenues — severance taxes are about as efficient as taxes get. If set up correctly, a good system of oil severance taxes is effectively a tax on foreigners and should do the least damage to the domestic economy of any tax system I know. We have two states that use them extensively, Alaska and Wyorning. It also makes lots of sense to collect revenues on a comprehensive flat rate basis on imports. Any type of sin tax is also a good option because the economic damage the tax does is on the disfavored products. Also property taxes should be used at the provincial level — property and real estate are about the only items that can't ascape local taxes by teaving. Any additional revenue supplements should be on a flat rate, broad-based, value added like tax.

Taxes that should be avoided are income taxes (especially progressive) and small taxes where the costs of collection approach or exceed the revenue actually collected. The keys to good tax policy are:

- i.) Tax those items most that can escape the least, and conversely tax those least that can easily escape. It makes no sense to tax something that then flees the jurisdiction, goes underground or stops working. You not only don't get the revenue, but you also lose the benefits of the productive services.
- Tax those things most that you least like (sin taxes). An additional benefit of sin taxes is that they do reduce the activity being taxed.
- iii.) Tax those things least where the collection costs are highest
- incentives to evade, avoid and otherwise not report taxable income and the least number of places where they can escape taxation.
- v.) Tax people fairly. People in like circumstances should have similar tax burdens. The perception of fairness is key to voluntary compliance.
- vi.) Make sure that taxation is not arbitrary or easily subject to discretionary changes. The power to tax in the wrong hands is an ugly weapon for exploitation.

vii.) Lastly, collect only as much as you really need. Wasteful spending will always rise to the level of revenues.

(b)(6)

These rules should help your efforts, if meticulously adhered to. Next to a bad money I know of nothing that will bring an economy to its knees faster than an unjust, inefficient, anti-growth, excessive system of taxation. This principal is universal.

On the spending side, priorities need to be set really quickly. In my view infrastructure is the first among equals such as: security (police), judiciary, water, electricity, telecommunications, roads, airports, hospitals and government itself. In the near term at least, school programs, women's issues, social redistribution and humanitarian projects are further down on the list. Once the economy is back on its feet there will be plenty of time to redress these wrongs. At the outset, government spending should be focused almost exclusively on getting the economy back on it's feet as quickly as possible. Without production there's nothing to redistribute. Feigning a big heart is often the quickest path to disaster. Ireq needs endemic production and government can be instrumental in achieving its goal.

- C. Forgiveness of debt owed by Iraq to foreign creditors can be enormously beneficial to Iraq if and only if Iraq has the infrastructure to take advantage of the additional resources financed by additional debt. If Iraq's incentive structure and system of self governance isn't well ranged, new debt to replace old debt is money down a rat hole. You really don't want to replace old bad loans with new bad loans. No one wins. Allowing iraq to incur additional foreign debt obligations should only occur after Iraq's economy and government have been established. You're going to make lots of mistakes and will loarn a lot from those mistakes. The smaller the scale of the initial operations, the less Iraq will have to pay for lessons learned. The less costly the mistakes from which you learn, the better off Iraq will be.
- D. Regulatory policy should be simple, small and fair. Laws should be basic and enforceable with quick and decisive action for violation. Having laws on the books that are not observed or actively disobeyed undermines the moral authority of all government. Keep regulations to a minimum, keep them simple and enforce them.
- E. Trade policy should be as open and as free as possible, restricting only those products which really cause harm (drugs, weapons, etc.). For revenue purposes you may want a low rate, broad-based tax on imports. It's interesting to note that for most of our country's history, tariffs provided the lion's share of our tax revenues. Tariffs plus an oil severance tax could well be the lion's share of future Iraqi tax revenues.

Trade is often an area where privilege and corruption take root. Here more than anywhere is where traq needs transparency, simplicity and fairness.

- F. A lot of attention is being placed on the need to provide an adequate number of jobs for Iraq. And while jobs per se clearly are important, increasing employment and creating jobs is often a catch phrase standing in for increasing output. In truth Iraq needs additional output far more than it needs more jobs. Now in some cases these two phrases are synonymous, but they may not be interchangeable in Iraq. Make work projects and avoiding reform for fear of losing jobs are sure fire losers. At no time and nowhere is it more important to recognize the primacy of efficiency, output and productivity than it is now in Iraq.
- G. Special industries like banking, glass factories, construction companies, etc. should be left to the marketplace. I know they are important, but so does every business person in Iraq. Those businesses will grow on their own if they are profitable.

(b)(6)

(b)(6)

- H. Dismantling the former government and former military can be carried too far. Under Saddam Hussein there were no alternatives and therefore there are no substitutes waiting in the wings to take over the general functions of government and security. You do need an Iraqi presence to deal with, to support, and to nurture, in order for us to get out.
- Be very careful of U.S. quasi-governmental lobbying groups who see visions of sugarplums with each new contract with Iraq. These people rarely focus on what's good for the Iraqi people (or Americans for that matter) and yet they can wrap their desires in the full clothe of altruistic public interest.
- J. Don't expect traq or traqis to love us right away. Even though we have done an enormous amount for them, they still feel the intense pain of Saddam's victous dictatorship and the ensuing war and will lash out at anyone near them. In due course, if we continue to behave honorably, they will come to appreciate all that we have done for them and they will respect us for all that we have sacrificed on their behalf.
- K. Our purpose for being in Iraq has absolutely nothing to do with our desire to develop a free-enterprise, pro-growth, democratic, capitalist nation. Under Saddam Hussein, Iraq was a threat to our way of life and as such we terminated that threat. Anything additional we do for the Iraqi people is truly out of the goodness of our hearts, not out of guilt. No matter what anyone may say, you were 100% correct in the actions you took. You make me very proud to be an American.

Hope these points arc of some value. You have done and are doing the best job ever. I dream and hope for you continued success.

Your Buddy,

Arthur B. Laffer

INFO MEMO

June 14, 2004 - 5:00 PM

SECRETARY OF DEFENSE

FROM:

MR. POWELL MOORE, ASSISTANT SECRE

(LEGISLATIVE AFFAIRS)

SUBJECT: Congressman Buyer - SNOWFLAKE

The attached information paper responds to your note of May 19, 2004, which states: "Congressman Buyer said yesterday that he is a JAG officer and we dumped him on his fanny. I don't know what that is all about."

• The information paper provides a brief background on Congressman Buyer's discussion with Army Reserve in early 2003 concerning volunteering for active duty and reiterates longstanding DoD policy concerning the limitations on active duty by serving U.S. Congressmen.

RECOMMENDATION: Information Only

Attachment: As stated

INFORMATION PAPER

SUBJECT: Background for Response to SecDef Concerning Congressman Buyer

- ☐ This information paper responds to the SecDef note of May 19, 2004, which states: "Congressman Buyer said yesterday that he is a JAG officer and we dumped him on his fanny. I don't know what that is all about."
- In early 2003, Congressman Steve Buyer from Indiana's 4th District, a colonel, Judge Advocate General's Corps officer in the Army Reserve who served the first Gulf War before his election to Congress in 1992, discussed with the Reserve volunteering for active duty. He was granted leave of absence from Congress March 20,2003, after telling House leaders had been called to serve in
- □ To be mobilized under current statutory authority, a Reservist must be in the Ready Reserve.
 - 1) Members of Congress occupy a "key position" and must serve in the Standby Reserve rather than the Ready Reserve. (The Standby Reserve is a pool of trained individuals who are not required to perform training. This is the Department's solution to the ticklish question of whether Members of Congress can constitutionally also serve in the military.)
 - 2) Members of the Standby Reserve may be transferred back to the Ready Reserve when the reason for the member's transfer to the Standby Reserve no longer exists. They may be ordered to active duty voluntarily only if the Secretary of the Military Department concerned, with the approval of the Secretary of Defense, determines that not enough qualified Ready Reservists are available in the categories required. (With over 4,000 judge advocates in the Ready Reserve, transferring Congressman Buyer from the Standby Reserve to the Ready Reserve would have been inappropriate.) Congressman Buyer's case did not meet this test, and no such determination was made.
- □ Congressman Buyer was subsequently informed by that while the Army appreciated his willingness to serve, or those who might serve with him to have a important ancillary consideration in this of the Army in a letter, would not be safe for him in a war zone—an
- □ The Department has used identical reasoning for the other case that has arisen, a similar request from Congressman Kirk.

COALITION PROVISIONAL AUTHORITY BAGHDAD

May 18, 2004

MEMO FOR:

Secretary Rumsfeld

FROM:

Paul Brenter 516

SUBJECT:

Abu Ghraib Draw-Down and Demolition

This memo provides a plan for the draw-down and demolition of Abu Ghraib prison that allows the President to announce immediately that evacuation will commence by June 1 and demolition will begin no later than August 31. The plant consists of rapidly constructing 2,000 "quick-build" temporary beds in eastern Baghdad for criminal detainees, and another 2,000 "quick-build" beds for security internees at Camp Bucca near Um Qasr. Immediately thereafter, we will construct an additional 2,000 "quick-build" at both locations for total of 8,000. Finally: work will commence on a 4,000-bed permanent facility in Baghdad which will open within two years. The project will cost about \$200M. The Iraqi Governing Council has requested closure of Abu Ghraib, so we will execute this plan using money from the Iraqi Development Fund.

It is possible to begin destruction of Abu Ghraib sooner, perhap\$ by June 30. This would require execution of the plan described above, and temporarily ielocation of about 3,000 security detainees in tent facilities at Camp Bucca and relocation of 1,400 criminal detainees at detention centers in Baghdad and Mosul. But this course of action has several important disadvantages. First, it requires two mass movements instead of one, and to more distant locations, with all the considerable risks of transportation. Second, large numbers of detainees will await permanent internment in temporary camps that are substandard. Without adequate protection from the summer heat, we would expect the same thing we observed last summer -- riots, mass escape attempts, grater difficulty with accountability and control, and greater threats to our soldiers. This d, prisoners will lack access to families and to legal counsel; and trials will not be feasing from a logistical standpoint.

For all these reasons, we would expect further criticism from human rights organizations, and think we may undercut the very objectives we are trying to symbolize with our commitment to close Abu Ghraib. These risks outweigh a gain of two months, so unless instructed to the contrary. I will proceed with the first option.

• DETENTION FACILITIES:

- O Improved force protection measures to protect coali on forces and detainees
- o Prominently displayed Geneva Conventions and facility rules in English and detainee language in all camps
- O Implemented plans to upgrade facilities for solders and detainees
- O Improved overall facility conditions for detainees at Abu Ghraib

DETAINEE PROCESSING:

- o Increased rate at which detainee case files were reviewed and recommended for release or continued internment to ensure only those detainees posing a threat to security were detained
- o All detainee transfers are conducted using biometric automated system
- o Segregated males, females and juveniles within detention facilities so that no contact exists

GENERAL, DETAINEE OPERATIONS:

- o Issued orders and command policies reinforcing the liw of war, including the Geneva Conventions.
- Reissued memorandum regarding: "Proper Treatmen of Iraqi People During Combat Operations"
- o Issued policy memorandum number 18, entitled "Proper Conduct During Combat Operations," which emphasized need to treat all Iraqis with dgmty and respect. This policy memorane um also contained a summary for dstribution down to individual soldier level providing clear guidance and mandating training on:
 - ✓ Law of war and rules of engagement
 - ✓ Treating all persons with humanity, dgmty and respect
 - ✓ Using judgment and descretion in detaining civilians
 - ✓ Respecting private property
 - ✓ Treating journalists with dignity and respect
- o Improved standard operating procedures for detainee operations:
 - Published comprehensive procedures for hand ing and treatment of detainees in all theater detention fucilities

- ✓ Detention rules of engagement/rules for use of force and principles of Geneva Convention are briefed at every shift change and guard mount
- ✓ Reviewed procedures on detention, interrogation and detention facility administration and published to lowest level

• TRAINING:

- Conduct routine training at each guard mount on daily detention tasks and standards
- o Use lesson learned in serious incidents and review for future efforts
- o Mobile training teams deployed to assist in training Military Police and Medical Treatment Teams; used Guantanamo Detention Facility Teams to improve individual and unit knowledge
- o CPA provided training on Arab cultural awareness

• INTELLIGENCE:

- O Established system for intelligence fusion that decreases information cycle time (collection, analyze, disseminate)
- Refined transfer criteria to support continued rapid exploitation of high value detainees and release of low value detainces
- o Assigned Joint Intelligence Task Force Counterterforism personnel at primary theater interrogation facilities to expedite exchange of counterterrorism information between agencies
- o Established weekly Interservice Agency Targeting Board to focus HUMINT collection and targeting efforts within the theater to provide information sharing, internee access & tasking protocols
- o Re-prioritized HUMINT requirements.
- Multinational Force Iraq (MNI) assumed responsibilities for all HUMINT collection and analysis and received additional manning
- International Committee of the Red Cross (ICRC) Report Handling:
 - Working with Congress and the ICRC to establish protocols for sharing appropriate ICRC documents
 - o Take Red Cross findings seriously and address them
 - o Mandated all Red Cross reports and working papers would be addressed to Commander Multinational Force Iraq, and designated Judge Advocate General Multinational Force Iraq as single entry point for those reports and papers
 - Changed handling process of Red Cross reports so they go via
 Deputy Commanding General Detainee Operations to Commander
 Multinational Force Iraq and higher authority as rapidly as possible

Subject: F-15 BASING PROPOSALS, BASED ON 27 APRIL DISCUSSIONS.

MR SECRETARY,

AS IWAS NOT PRESENT AT THE 27 APRIL MEETINGWITH GENERALS PACE, JUMPER, AND HANDY, IWOULD APPRECIATE AN OPPORTUNITY TO OFFER **SOME THOUGHTS** WITH REGARD TO THE F-15S AND THE BASING PROPOSALS WHICH WERE DISCUSSED.

BY WAY OF PREPARATION FOR DISCUSSION, THE FOLLOWING REPRESENTS SOME OF MY THOUGHTS CONCERNING THIS ISSUE:

1.GENERAL OBSERVATIONS:

A. REDUCED CAPABILITY IN THEATER CLOSEST TO WESTERN EDGETOF "GREATER MIDDLE EAST".....MEANS GREATER REPONSETIMES AND SIGNIFICAN ILY LARGER SUPPORT PACKAGES FOR CONUS BASED DEPLOYMENTS.

- B. IMPACT OF DIMINISHED ABILITY TO LEADNATO'S AIR FORCES.
- C. UNINTENDED CONSEQUENCES WITH REGARD TO u.K., ESPECIALLY IF ANNOUNCED NOW.
- D. DISPROPORTIONAL RELIANCE ON CONUS BASED FORCES TO SUPPORT U.S. MISSIONS IN 91 COUNTRY THEATER

2. NATO/EUCOM TRANSFORMATION:

- A. IMPACT ON NATO AIR POLICING/AIR DEFENSE THROUGH REDUCED USAF ASSETS IN THEATER.
- B. REDUCED CAPABILITY TO SOURCE U.S. AIR FORCE ROTATIONS/CONTRIBUTIONS TO THE NATO RESPONSE FORCE.
- C. ALLIES WILL CONCLUDE THAT SUCH A REDUCTION **IS** NOT TRANSFORMATION, BUT IS A FORCE CUT.
 - D. POSSIBLY UNBALANCES EUCOMJOINT BASING PROPOSAL PREVIOUSLY BRIEFED.

3. THEATER RESPONSE FORCES:

- A. GUARANTEED ACCESS FROM U.K. BASES, THE MOST IMPORTANT FACTOR IN WHERE WE BASE OUR FORCES.
- B. F-15 PAYLOAD IS TWICE THAT OF THE F-16, SOLE DELIVERY PLATFORM OF SOME OF OUR BEST STANDOFF WEAPONS.
- C. EXCESSIVE RELIANCE ON CONUS BASED AIR FORCES, WHICH MAY OR MAY NOT BE AVAILABLE/PROVIDED.

4. FORWARD PRESENCE:

- A. MAINTAINING MIX OF FIGHTERS FORWARD SUPPORTS SECDEF STRATEGIC GUIDANCE AND RECENT 10-30-30 TO EACH SERVICE.
- B. REDUCES BY A FACTOR OF TWO STRATEGIC LIFT REQUIREMENTS (TON-MILE/TANKER/ TIME REQUIREMENT), AND DEPLOYMENT TIME LINES.
 - C. REMOVES DELIVERY SYSTEM FOR NUCLEAR WEAPONS LEFT IN EUROPE
- D. COMBAT UTILIZATION DATA FOR EUCOM BASED SQUADRONS SUPPORTS CURRENT EUCOM FOOTPRINT PROPOSALS
 - E. NEXT 12 MONTHS, F-15S ALONE TO TAKE PART IN 17 MISSIONS IN THEATER.

5.US/UK SPECIAL RELATIONSHIP:

A. HISTORICAL IN NATURE. UK WILL BE HIT BY NAVEUR DEPARTURE AS WELL, POLITICALLY, A BAD TIME FOR MR. BLAIR.

B. OFFSET PROPOSED (MOVINGOUR 24/7 HQ FROM GERMANY) DISA DVANTAGES US BY MISALIGNING AND SEPARATINGOUR OWN HQ. LIKELY WILL NOT BE CONVINCING TO UK THAT IT REPLACES 3 SQUADRONS. WILL BE EXPENSIVE.

6. SUMMARY:

- A. CONCERNED WITH EMERGING PATTERN SIGNALING U.S. CHANGE IN VALUE OF FORWARD BASING AND FORWARD PRESENCE.
- B. NEED TO THINK ABOUT HOW WE WILL LEAD, AND WHAT IT IS WE WILL LEAD WITH IN THE FUTURE. VACUUMS WILL BE FILLED, MOST LIKELY BY E-U. POSSIBLE FUTURE QUESTIONING OF U.S. LEADERSHIP IN BILLETS TRADITIONALLY "RESE RVED" FOR US.
- C. F-16 BASING INTURKEY NOT YET RESOLVED. HOPE TO DO SO A PAPPROPRIATE TIME. MANY US/TU ISSUES ON TABLE AT PRESENT.
- D. FROM BOTH THEATER AND NATIONAL PERSPECTIVE, RECOMMEND NO REMOVAL (OR ANNOUNCEMENT OF INTENT TO REMOVE) OF F-15'S AT THIS TIME
- E. APPRECIATE OPPORTUNITY TO PRESENT VIEWS IN PERSON AT YOUR CONVENIENCE.

Security Arrangements

Between June 1 and June 30 we have to get a new negotiating team in to negotiate how the security arrangements are going to work. It should probably be led by DoD.

We need to decide how we are going to work with Iraq on Iraqi detainees, what we are going to do with the Iraqi Police, and the like.

Maybe we could have Gen. Casey head up the group and start working with Negroponte. Maybe one of the outcomes would be to set up a Consultative Group fashioned to work out issues going forward between CENTCOM, the new US Mission and the new Iraqi government.

Thanks.

Global Defense Posture: Update and Next Steps

DHR:dh 052004-39

Please respond by 6/4/04

320.2 Shatipi

0\$0 13153-04 E

Global Defense Posture: Update and Next Steps

- □ **DoD and interagency** analysis and recommendations are nearly complete...it is time to move into the **next phase...implementation**, including ongoing consultations and negotiations
- ☐ Broad outreach effort with Allies and Congress to date...all accept our rationale...we'll continue at more detailed level as we go public
- □ Two key thoughts...
 - o First is a **keynote speech**, linked to our Hill and Allied outreach plans...we could use military academy graduations as a setting
 - SecDef speaks at West Point, 29 May
 - President speaks at Air Force Academy, 2 June
 - o Second, it may be time for a Presidentially-appointed special envoy for posture negotiations
 - Show our seriousness of purpose
 - <u>Critical</u> for getting flexible legal arrangements for access and usability by our forward forces

Potential Candidates - Special Envoy for Global Posture

Jim Ellis, Commander, United States Strategic Command

John Keane, former Vice Chief of Staff, US Army

William Schneider, resident fellow of American Enterprise Institute; Chairman, Defense Science Board; former Under Secretary of State for Security Assistance

Chris Williams, Partner, Johnson and Associates; Defense Policy Board member

Dov Zakheim, (soon to be) Partner, Booz Allen Hamilton

Attributes:

- Good negotiator, detail-oriented
- Solid understanding of strategic rationale behind posture proposals
- Positive international stature/reputation
- Acceptable to State and White House
- Responsive to SecDef
- Protective of DoD equities
- Integrity, no perception of conflict of interest
- Willing to travel

SPECIAL ENVOY FOR GLOBAL POSTURE NEGOTIATIONS

Talking Points:

- I recommend a Presidentially-Appointed Special Envoy to conduct negotiations for the global defense posture review.
- Our allies have been receptive to our consultations on this subject
- As we transition into the next phase, we would benefit from having a Special Envoy to convey the significance of the negotiations both for the USG and the host country.
- The envoy will need not just diplomatic stature, but a **firm** grounding in the strategic rational for the review and an ability to protect DoD equities.

For background only:

The presumptive negotiator from State, Ambass dor Barbara Bodine, has not represented well DoD's concerns in several recent negotiations.

Global Posture: potential special envoys and attributes

Jim Ellis, Commander, United States Strategic Command

Tillie Fowler, Partner, Holland & Knight; Chair, Defense Policy Board; former member of Congress

John Keane, former Vice Chief of Staff, US Army

<u>William Schneider</u>, resident fellow of American Enterprise Institute; Chairman, Defense Science Board; former Under Secretary of State for Security Assistance

Chris Williams, Partner, Johnson and Associates; Defense Policy Board member

-Dov Zakheim, (soon to be) Partner, Booz Allen Hamilton

Attributes:

- Good negotiator, detail-oriented
- Solid understanding of strategic rationale behind posture proposals
- Positive international stature/reputation
- Acceptable to State and White House
- Responsive to SecDef
- Protective of DoD equities
- Integrity, no perception of conflict of interest
- Willing to travel

HSC DEPUTIES COMMITTEE MEETING SUMMARY OF CONCLUSIONS

DATE:

May 6, 2004

LOCATION:

White House Situation Room

TIME:

2:30 PM = 4:00 PM

The Homeland S curity Council (HSC) Deputies Committee (DC) met to discuss four topics: enhancing rail security of toxic-by-inhalation hazards; fingerprint sharing; the interagency success of continuity of operations (COP) and Continuity of Government (COP) programs; and Presidential Emergency Action Directives (PEAD).

The following was agreed to by the attendees:

1. The Department of Homeland Security (DHS) and Department of The sportation (DOT) should begin to implement the seven-step plan for enhancing be security of TIH shipments by rail presented to the deputies. Specifically, DHS and T, as appropriate, will:

a. Begin implementing short term recommendations (within Actions 1, 2, 3, and 4)

immediately, existing authorities permitting; and

b. Establish a regulatory working group that will, in close coordination with the Office of Management and Budget (ONB) and other appropriate agencies, recommend options for any rulemaking necessary to implement the actions contained in Actions 3, 5, 6, and 7.

- The Department of Defense (DOD) will provide all fingerprints of known or suspected terrorists in its possession to the Federal Bureau of Investigation (FBI) as soon as possible after the Secretary of Defense and the DOD General Counsel approve the transfer. Estimated completion of the transfer is within 90 days. **DQD** will continue to provide such fingerprints to the FBI as they are collected from known or suspected terrorists in the future. In addition, DOD will seek to implement policies such that: (a) fingerprints compatible with FBI standards are collected from all detainees before they are released from detention; and (b) DOD deploys electronic systems to the field that can collect fingerprints combatable with FBI standards. The Department of Justice (DOJ) will provide technical and other assistance to DOD to implement these policies.
- 3. The major findings and recommendations of the end-to-end review of COOP/COG will form the basis for a final report and phased implementation plan that will be presented to the Enduring Constitutional Government Coordinating Committee (ECGCC) by June 15, 2004.
- 4. Deputies will advise their own Department and Agency general counsels to work with HSC's Office of General Counsel and the White House Countel's Office to:

UNCLASSIFIED / POUC

UNCLASSIFIED / FOUO

- a. Update those Presidential Emergency Action Documents (PE the Federal Emergency Management Agency (FEMA) and DO so Office of Legal Counsel (OLC) to their respective Department or Agency; and
- b: Compile or update individual Department and Agency compile one of Secretarial emergency authorities.

VV/CDR Nosenzo

5/20/04

OSD 13160-04

SECRETARY OF THE AIR FORCE WASHINGTON

MAY 19 2004

MEMORANDUM FOR SECRETARY OF DEFENSE

SUBJECT: Increase in Air Force

Since we discussed this subject in January, we've taken several actions to return to endstrength by the end of FY05, the original goal. Providing numerous opportunities for leaving the active force and limiting accessions this year and next to our most needed skills should get us there.

With the implementation of two periods of Stop Loss for OEF and OIF, we disrupted the normal departure patterns of our people. The aggregate impact of a strong commitment to the GWOT, success in obtaining long sought improvements in the compensation package, including pay raises, pay table reform, BAH improvements, and a variety of special pays and bonuses for hard-to-fill skills, combined with an uncertain economy, caused our people to stay at unprecedented rates that initially were masked by the Stop Loss which was in place until July 2003. In short, we are experiencing great demand to enter the **Air** Force; at the same time, retention is very high. This "good news" is causing us an endstrength problem. At present, we are 20,000 over endstrength.

Recognizing this by November 2003, we began reduction measures with opportunities for service in the Air Reserve Component (ARC), rollbacks in dates of separation and active duty service commitments, inter-service transfers, ROTC-to-ARC commissions, and bonus commitment waivers. These efforts only yielded about 2,500 additional departures, so we significantly increased the population eligible for each of the measures and added an aggressive retraining program of individuals in overage skills. This is already moving some people to critical skills and to the ARC, the Army or civilian life. This alone could yield about 9,800 in FY04 and FY05.

Simultaneously, we have restricted recruiting for the rest of FY04 and through FY05 only to maintain or correct skill balances across our force. This translates to reductions of approximately 2,000 recruits in FY04 and 11,000 in FY05. The combination of all of these actions should bring us down to authorized endstrength by the end of FY05.

From a force stability standpoint, reducing accessions by a third in one year is very significant, but also creates some opportunities. We can correct skill imbalances, transform training programs, eliminate ARC training backlogs, and return to authorized endstrength without breaking faith with our current force. While some will believe this warrants reducing our recruiting and training budgets, that would be counterproductive for this brief training pause. We appreciate your support in that regard.

1 08g

40 may 04

Johny o

0SD 13160-04

We will track the effects of these actions along a ballistic trajectory, with increases likely for a few months. Nevertheless, we intend to be at authorized levels by the end of FY05. I'll keep you apprised as we go forward. John Jumper and I will be monitoring this on a monthly basis.

your son but I was moved to write to you after reading several articles in the Commercial Appeal tollowing his death.

First, I must confess to you that I have experienced many conflicting feelings about the U.S. presence in IRAQ, so upon reading about your son my first thought was how sad and how senseless. But throughout the days since News of hism passing was first reported, I have other thought of him - and I can't emplain why. Except that, over these days I have come to see that what your sor was doing and why he died surpasses any single war or conflict. He died, defending of if you will - promoting and protecting the Fundamental proceiple of this breat Nation FREEDOM. That concept is so much bigger than any political party, agenda or election. * That alone makes him a true, american patriot and hero - at least to me! And I am profoundly moved.

From Everything I have read and heard about Brent he was a good, Noble and five man-While I can't begin to comprehend your loss; I appreiate his land your) sacrifize. I am humbled by his courage and commitment. Over the weeks and months to come, may bob continue to bless you with love and the comfit of his brace and the love and 11-L-0559/OSD/26365 support of family and friends. Please know that through too your son has truly impacted my life and I think, changed me to the better! My despest sympathy - you are in my thoughts and prayers!

Please respond by $\frac{5/21/04}{}$

OSD 13173-0

United States Senate

WASHINGTON, DC 20510

October 22, 2003

The Honorable Donald Rumsfeld Secretary of Defense Department of Defense 1300 Defense Pentagon Washington, D.C. 20301

Dear Don,

Thank you very much for your letter of the 16th and the copy of the one pager you are working on to explain the administration's plan to win the peace.

The one-pager is moving in the right direction. Fully developed, it should persuade Americans of our goal, our plans and our progress toward the goal.

Since you asked, here are my suggestions:

- 1. Set a clear overall goal: Operation Iraqi Democracy.
- 2. Set a timetable for accomplishing the goal and withdrawing most American forces: for example, January 1, 2005 or 2006.
- Establish a set of measurable objectives which, taken together, add up to a plan to meet the goal. These should specify pre-war levels, post-war levels, today's levels, today's goal, and the goal for January 1, 2005 (or 2006). I've appended a list of suggested measurable objectives that are easy to understand.
- 4. Report publicly on the objectives once a week.
- 5. In every speech you, the President, Vice-President, Secretary Powell, Dr. Rice and other key officials make, refer briefly to that week's progress report: "As our weekly progress report on our plan to build democracy in Iraq showed, electricity before the war was at 3300 megawatts, our goal for January 1, 2005(or 2006) is 6000 megawatts, we are at 4217 megawatts today which is 1217 more than before the war, and right on schedule for our goal; on crude oil production, etc.

Sincerely,

U17594 /03

Suggested objectives (should be measurable and simply presented):

- ← ✓ Electricity (megawatts produced, % of Iraqis w/ power)
 - ✓ Schools (# of schools open, % of boys & girls attending)
 - ✓ Health care (# of hospitals operating, % receiving services)
 - ✓ Governance (timetable to a constitutional democracy)
 - ✓ Crude oil production (barrels produced, shipped)
 - ✓ Police (# in training, # serving)
 - ✓ Militia (# in training, # serving)
 - ✓ Water (gallons of water available, # of Iraqis w/ fresh water access)
 - ✓ Prisons (# of prisons, # of beds for prisoners, # of prisoners)
 - ' ✓ Iraq Troops (# in training, # serving)
 - ✓ Troops from other countries (# of troops, # of countries)
 - ✓ US Troops (overall #, reserve, and active duty)
 - ✓ Food (# of malnourished Iraqis, amount of food available)
 - ✓ Unemployment (# and/or %)
 - ✓ TV/Radio (# of stations, # of Iraqis receiving)
 - ✓ Etc.

August 27,2004

SUBJECT: U.S. Department of Defense responsibilities for homeland security, prior to September 1 1,2001, on 9-11, and today

Homeland Security Assignments and Responsibilities:

DOD never has had, and does not have today, primary U.S. Government responsibility:

- To stop terrorists from coming across our borders.
- To stop terrorists from coming through U.S. ports.
- To stop terrorists from hijacking aircraft inside or outside the Jnited States.
- To seek out or arrest terrorists inside the United States.

Responsibility for those functions rests with the Department of Homeland Security, Department of Justice and the FBI, the Department of State, C A and various other U.S. agencies.

Not only does DOD <u>not</u> have primary responsibility for <u>any</u> of those functions, DoD is expressly limited by federal law, including the Posse Comitatus .ct, from participating in most U.S. law enforcement activities.

DOD's role has been, and is today, restricted to the following:

- Defend the U.S. homeland against foreign threats and attacks comoutside the U.S. (NORTHCOM/NORAD/PACOM)
- Protect U.S. DoD military forces and facilities located within the United States.
- Support designated lead federal agencies, as specifically directed by the President, to include:
 - "Render safe" a nuclear weapon located inside the United States.
 - Provide support for designated "National Special Security Events," such as the G-8 Summit, Democratic and Republican Convention, the Super Bowl, etc., and
 - Serve as a sector-specific agency for the U.S. defense indiastrial base in accordance with Homeland Security Presidential Directive 7

Comment:

I am deeply concerned that the September I Ith Commission, the press, Members of the U.S. Congress, and many Americans are not aware of the very limited role of the U.S. Armed Forces in dealing with terrorist attacks inside the USA, by law and Executive Order.

However, notwithstanding DoD's limited role and the general misunderstanding about our role, it is clear that, in the event of a chemical, biological or nuclear attack on the U.S. from within the U.S., the following would occur, as it did on September 11, 2001:

- 1) The first calls for help will be to DoD to immediately take charge, but tech cally not in the lead role, only in a supporting role; specifically, DoD will be asked to undertake the very responsibilities DoD has not been assigned or funded to do, and therefore has not organized, trained or equipped to do, and
- 2) When the dust settles, blame will be placed on DoD for:
 - Not preventing the attack, even though that is the legal resignsibility of others and is not DoD's assignment;
 - Not instantaneously responding to mitigate the attack after it occurs, even though DoD is not authorized, funded or permitted by law to organize, train, equip or deploy to do so.

This unusual situation raises some questions:

Does the current USG arrangement and allocation of responsibilities still make sense?

If not, what might be done to better organize, allocate and rearrange responsibilities among **USG** agencies?

In either case, what might be done to better inform the Members of Congress, the press, and the American people of the decided upon allocation of sponsibilities, so the current confusion as to roles and responsibilities can be reduced?

DRAFT WORKING PAPERS

SUBJECT: <u>USG Responsibilities for Homeland Security</u>

Situation Today:

Since September 11,2001, the Administration has made substantial progress to protect America from terrorist attacks. Among other measures, we have established:

- The Department of Homeland Security.
- A National Bio-Defense Strategy and stockpiles of biological vaccines.
- United States Northern Command.
- The Terrorist Threat Integration Center.

As a result of these and other initiatives, America is safer today than it was prior to the 9/11 attacks, although we must continue to improve America's homeland security.

Homeland Security Roles and Responsibilities:

However, in the event of another major terrorist attack, we will certainly ask ourselves what else we might have done to prevent it or mitigate its consequences. One issue that concerns me is that roles and responsibilities for homeland security are still not as clearly defined as they might be. Now that we have almost two years of experience with the Department of Homeland Security and the new USG organization for homeland

DRAFT WORKING PAPERS

11-L-0559/OSD/26374

security, it may be an appropriate time to evaluate the assignment of roles and responsibilities for homeland security. We also need to consider how we can better educate the American people about those roles and responsibilities. It is important for the American people to have realistic expectations about the role the U.S. Armed Forces might play in dealing with terrorist attacks inside the United States, as defined both by law and executive policy. I am reminded of the polls taken in the 1990s which showed that Americans believed erroneously that we have a capability to shoot down a ballistic missile targeting the U.S. There is a great deal the U.S. military can do in the event of a terrorist attack, but there are limits on that capability and—as a matter of law and policy—there may be things we should not do.

Across the **USG**, there bave been several major homeland security exercises over the past several years. We could use their results to evaluate where gaps may exist **in** the USG homeland security concept and determine if changes are warranted with respect to statutes, authorities, policies, missions, resources and training, etc. Evaluations, moreover, could help to identify any legal considerations that might limit the military from providing support to any Lead Federal Agency and that could impede effective command and control.

Homeland security roles and responsibilities **are** spread among the Departments of Homeland Security, Justice, State, the FBI, the CIA and various other **U.S** agencies:

- To stop terrorists from coming across our borders.
- To stop terrorists from coming through U.S. ports.
- To stop terrorists from hijacking aircraft inside or outside the United States.

DRAFT WORKING PAPERS

11-L-0559/OSD/26375

To seek out or arrest terrorists inside the United States.

DOD does not have primary responsibility for <u>any</u> of those functions. Its traditional role has been largely restricted to the following:

- Defend the U.S. homeland against foreign threats and attacks from outside the
 U.S. (NORTHCOM/NORAD/PACOM).
- Protect U.S. DoD military forces and facilities located within the United States.
- Support designated lead federal agencies, as specifically directed by the President, to include:
 - ➤ "Render safe" a nuclear weapon located inside the United States.
 - ➤ Provide support for designated "National Special Security Events," such as the G-8 Summit, Democratic and Republican Conventions, the Super Bowl, etc., and
 - ➤ Serve as a sector-specific agency for the U.S. defense industrial base in accordance with Homeland Security Presidential Directive-7.

Comment:

In the event of a catastrophic nuclear or biological attack on the territory of the United States, the **following** would likely occur, **as** it did on September 11,2001:

1) The first calls for help will be to DoD to immediately take action, but

DRAFT WORKING PAPERS

TOHO

technically not in the lead role, only in a supporting role. Specifically, DoD may be asked to undertake the very responsibilities DoD has not been assigned or funded to do, and therefore may not have organized, trained or equipped to do, and

- 2) When the dust settles, the American people may well ask why DoD did not:
 - Prevent the attack, even though that is the legal responsibility of others and it is not DoD's assignment;
 - ➤ Instantaneously respond to mitigate the attack after it occurs.

Recommendation:

Given this situation, the Administration may wish to undertake a quick review to provide recommendations for the following types of questions:

- What might be done to better organize, allocate and rearrange responsibilities among USG agencies to ensure that the right capabilities and assets will address key problems?
- Should we further organize, train and equip the National Guard and the reserves for homeland defense?
- Has DoD allocated sufficient force structure to homeland defense, particularly to prevent or mitigate the consequences of a catastrophic attack?
- What might be done to better inform the Members of Congress, the press, and

DRAFT WORKING PAPERS

11-L-0559/OSD/26377

the American people of the decided upon allocation of responsibilities, so the current confusion as to roles and responsibilities can be reduced?

DRAFT WORKING PAPERS

CHAIRMAN OF THE JOINT CHIEFS OF STAFF WASHINGTON, D.C. 20318-9999

CH-2026H4 - 2 11 3 57 2 September 2004

INFO MEMO

FOR: SECRETARY OF DEFENSE

FROM: General Richard B. Myers, CJCS 198119/1

SUBJECT: DOD Responsibilities Paper

- Issue. "Please take a look at the attached paper. It is a problem that concerns me, and I don'tknow the answers. If you have thoughts or suggestions on it, let me know. My thought is to send to the Vice President, Andy Card, Condi Rice and Fran Townsend to get them thinking about these issues. Let me know what you think." (TAB)
- Conclusion. I agree with your concerns that there are misconceptions regarding the military's roles and responsibilities in the event of another catastrophic domestic event.

Discussion.

- We should first ensure that all of DOD has the same understanding regarding
 military roles, missions, and responsibilities in Homeland Security. A
 discussion involving your staff and mine would be useful to consolidate views.
- We have conducted several HLS exercises over the past few years. We can
 use their results to evaluate where gaps exist in the USG concept for protecting
 its horders and citizens. Some gaps exist in WMD response, maritime defense
 and security, and counter-tenorism.
- An assessment of these gaps in USG capability would tell us if any DOD
 changes are warranted with respect to statute, authorities, policy, mission,
 resources and training, etc. Evaluations will identify any legal considerations
 that limit the military in providing support to any Lead Federal Agency (LFA)
 and which may impact Command and Control requirements.
- I agree a note to key members of the interagency, mentioning this review process, may get them thinking about their respective roles and responsibilities.

SUBJECT: Comparison to Vietnam

FYI.

Undated: "Vietnam? No Comparison"

DHR:dh 050304-28

<u>.</u>* .

Please respond by __

OSD 13219-04

Vietnam? No Comparison.

- It's difficult to recall of an instance in which guerillas alone have ever won a war. They can:
 - Harass.
 - Ambush.
 - Mine roads.
 - Occasionally shoot down a helicopter.
 - Occasionally mass for an attack (like in Ramadi last week).
- But these things don't win wars, unless they break the will of the stronger power. Guerillas stand a better chance of winning when they:
 - Have a coherent political strategy;
 - Can serve as an auxiliary to a conventional force;
 - Enjoy the benefit of an external sanctuary;
 - Have the support of a sympathetic population;
 - Supplied by a major client state.
- Has Iraq become, as some have claimed, "George Bush's Vietnam?" Hardly. Iraq is not like Vietnam:
 - There is no conventional North Vietnamese Army to distract us from organizing to fight a guerilla war.
 - There is no coherent anti-coalition strategy like Hanoi's "armed struggle" and "political struggle."
 - There is no external sanctuary of the scope enjoyed by Hanoi.

- There is no overwhelming sympathy from the population.
- There is no major client state supplying the guerillas.
- With time and perseverance, an army can always defeat guerillas acting alone especially if that army:
 - Organizes for counter-guerilla operations;
 - Develops good intelligence and acts on it quickly;
 - Isolates the guerilla strongholds (prevent them from entering or leaving);
 - Systematically identifies, captures, or kills trapped guerillas;
 - Gains and keeps the support of the local population;
 - Secures the borders.

We are doing these things in Iraq today and we will win. Iraq is not like Vietnam.

Sir:

Attached is an update on the stop loss issue, which I understand arose again this weekend. I urge that we focus our argument for the policy on the benefit to unit readiness and pohesion.

David S. C. Chu

Attachment

TALKING POINTS (April 12,2004)

SUBJECT: Stop Loss Update

- To maintain cohesion among deploying units during periods of train-up, in-theater service, and redeployment, a program called "Stop Loss" is employed. It presently affects about 21,000 from the Active Components and 24,000 from the Reserves. Only Army presently is using Stop Loss.
- Stop-loss restrictions bar voluntary separations or retirements for Soldiers in designated units throughout their deployment, and up to 90 days after their unit returns to its home station. In addition, a stop-movement policy suspends the normal rotation of soldiers into and out of affected units.
 - o Most deployed soldiers are not affected because they have service obligations that extend beyond their deployments.
- The use of Stop Loss is driven by concerns over unit performance, and the recognized requirement to maintain unit cohesion down to the squad and crew level, which contributes to the safety and the effectiveness of units.
- Stop Loss plans are reviewed quarterly. Presently, the Army must employ Stop Loss, in light of its substantial numbers participating in Operations Iraqi Freedom and Enduring Freedom. The other Services have for now suspended employment of Stop Loss.
 - o Navy and the Marine Corps terminated use of the program in May 2003. About 2,600 Sailors were affected by the program during FY 2003, as were 3,400 Active and 5,600 Reserve Marines.
 - o Air Force discontinued use of the program in June 2003. About 8,500 Airmen in the Active and Reserve Component were affected by Stop Loss during FY 2003.

Remarks by First Lady Laura Bush at the Congressional Club First Lady's Luncheon Washington Hilton

AS DELIVERED

MRS. BUSH: Thank you, Mary for your warm welcome. I always look forward to this lunch and to spending time with each of you. Special thanks to Lea Ann and to Cecile for organizing this beautiful lunch. Congressman Tauzin and Cecile are in our thoughts and prayers. Lynne Cheney and other cabinet member wives thank you for being here today. President Bush and I appreciate your and your husband's dedication to our country. And we appreciate the dedication of every member of the United States military, the National Guard and Reserve, and America's veterans like Joe Bartlett who is here today. I'm happy to hear that Janet Flower's son, P.F.C. Andrew Flowers is doing well. His eagerness to return to his unit in Iraq is evidence of his commitment and courage.

The President and I are inspired by the dedication of our men and women in uniform. We visit with soldiers at bases all over the world -- and perhaps one of our most moving visits was at Walter Reed Army Medical Center. One of the remarkable men we met at Walter Reed was Staff Sergeant Michael McNaughton. He stepped on a land mine near

Kabul while serving with the Louisiana National Guard. His right leg had to be removed above the knee and he was fitted with a prosthetic leg. Michael had been a great runner and he and the President exchanged stories about their favorite past time.

President Bush encouraged Michael to get well so that someday they could take a run together. Sergeant McNaughton held the President to his promise, and last week they ran together around the South Lawn at the White House. Sergeant McNaughton is still

working for the National Guard where he enlisted after September 11th because he said he "needed to do something."

The men and women of the United States military answer this call every day as they defend freedom around the world. Over the last year, the world has witnessed the skill and resolve of our military from Korea to Kosovo to the Middle East. We've seen their courage and their decency to the people of Afghanistan and Iraq. Our military men and women have helped to free fifty million people from the oppression of two brutal regimes. They are supplying villages with their first taste of clean water, delivering medicine and supplies to hospitals and schools. Our troops and their coalition partners have refurbished over a thousand schools so millions of children can study and learn again.

Our soldiers' compassion is not simply part of their mission -- it's part of their character. We will never forget their commitment to our country, nor will we forget the men and women who have fallen in service to America. All of those who serve in our military deserve our utmost respect -- and so do those who serve behind the front lines -- their families and children. As I've traveled to military bases, I've become aware of the special challenges that face military families. Like many families and like some of you, President Bush and I have moved a lot -- five times -- and we've lived in six different homes. Moving, packing and hoping our children will be happy in a new home is something many of us can relate to. And so is change. For us and for military families, change means moving and starting over; but it also means new friends, and new challenges. A military families' determination to make a home wherever they are matches their loved ones devotion to duty. Separation and transition are part of a military child's life, and they accept their duty with brave hearts.

There are more than one million military children around the world, and 800 thousand children go to public and Department of Defense schools in your neighborhoods. A military child may move as many as six to nine times from kindergarten to high school. By her senior year, a child will have attended six elementary and middle schools and

two or more high schools -- often in different states. This constant change has a huge impact -- both academically and socially -- on children. Many school districts are not prepared to help military children transition from one school to another.

There is no systematic process that ensures that records, grades, and accomplishments transfer with a military child. And this is a problem for many children, not just military children, in our highly-mobile society. Many students lose their class rank after transferring, and many fall behind in class requirements because their new school will not grant credits for their previous coursework. Many children who were athletes at their old school miss the opportunity to play sports because they miss tryouts.

Some students, like Renee, deal with the challenge of not graduating. Renee lives with her sister and her sister's husband, a soldier. As a senior, she recently moved to her fourth new high school. Renee's new school has more graduation requirements. She must pass a test and have a year of computer science. Her new school requested that Renee's previous school grant her a reciprocal diploma. But the school refused. Renee is receiving special help and support from her new school, but she may not graduate on time. This is a common problem for many military children and their families. But it doesn't have to be this way.

When an Air Force officer was asked what he needed in Iraq, he said, "Please don't send cookies, care packages, or socks. Just help take care of our children." Our country has always supported its military — in times of war there were community efforts to roll bandages and knit socks. We have a great capacity to care for the home front. Now is the time for a new Victory garden. In this garden, we can tend to the needs of military children. You can host a PTA group and talk about how your school can help ease transition for military children and families. You can volunteer at military bases and installations in your home states and read to children or host local events at libraries. Establish a parenting support program for military spouses in your neighborhood and help with home repairs and baby sitting.

The USA Freedom Corps started a program called "On the Homefront" to provide Americans with opportunities to support our troops and their families. More than a thousand volunteers from Rebuilding Together have repaired homes for military families while their spouses are deployed. With her two sons in Iraq, Marlyss Murray couldn't do all of the home improvements she needed. An army of volunteers in Tulsa helped Marlyss put a new roof and a fresh coat of paint on her home.

Volunteers from the Salvation Army in Cleveland, Ohio are collecting diapers and blankets to throw a group baby shower for military wives. And members of the VFW started a community-wide Adopt-A-Unit program to support military units in Iraq and Afghanistan.

We can show our appreciation for our troops and their families by getting involved in our communities. The members of the United States military pledge their lives to protect ours, and we can support them by supporting their loved ones. The Military Child Education Coalition is working to do just that. The coalition's founder, Dr. Mary Keller, works with schools and families to help military children with transition. While working as an Assistant Superintendent in Texas, Dr. Keller had more than 16 thousand students from neighboring Fort Hood in her school. She noticed that many of the military children who had transferred could not keep up. She gathered educators, military experts, and parents at her kitchen table and formed a coalition to help these students. She began as a volunteer and soon moved to working full time as Executive Director of the Coalition. Some of the funds from today's luncheon will benefit the Coalition. Dr. Keller can provide you with more information on how you can help military children -- children like Kiara who deserve not only a great education, but our support.

A sixth grade student in Louisiana, Kiara wrote a poem titled "I Serve Too." It reads, "I'm a military child, I stay strong when my dad goes away. If there is a war and my dad is detached, I will help him fight back. With my braveness and courage I can stay strong, my family's support helps me carry on. Whenever we move, I start over again, I have to go to a new school, and make new friends. Even though people think I'm a military brat,

I just don't quite see it like that. My daddy helps defend our country, so we can live in peace and harmony. So all the military children help their mothers and fathers because we serve too, we're their sons and daughters."

With your help, we can fulfill our duty on the home front -- and the hopes of every military parent who prays "?help take care of our children." Thank you for this lovely lunch and for your generous contribution to the Military Child Education Coalition.

SUBJECT:

Statistics

Ask some research office fast to get me separate information for both the Mexican and Canadian borders:

- 1. The number of border patrols the US has.
- 2. How many kilometers the border is.
- 3. How many border patrol per 100 kilometers of border.

Then get the separate numbers for both the United States and New fork City:

- 1. Number of police officers.
- 2. Total population.
- 3. How many pouce officers per 100,000 population.

I would like it fast.

Thanks.

FOR:

SecDef

FROM:

Mr. Paul Butler

SUBJECT: Answer to Your July 2,2004 Snowflake Requesting Border Patrol & Police

Statistics

Border Patrol Information

(Note: the size of an actual border patrol varies based on the situation; data compiled below reflects individual border patrol officers)

• Number of border patrol officers the US has:

- Along the US-Mexican border: 9,838 (total border length is 3,141 km)

- Along the US-Canadian border: 983 (total border length is 6,416 km)

• Number of border patrol officers per 100 km of border:

- Along the US-Mexican border: 313 officers/100 km of border (or 3/1 km)

- Along the US-Canadian border: 15 officers/100 km of border (or .15/1 km)

Police Information

• Number of police officers serving in:

- The United States overall (federal, state, local): App. 870,000 (total US population is app. 285 million)
- New York City: App. 38,000 (total New York City population is app. 8 million)
- Number of police officers per 100,000 population:
 - The United States overall: 305
 - New York City: 475

(b)(6)

CIV, OSD

This message is sent to Secretary Rumsfeld from James Schlesinger:

Don:

I'm not there. Can't vouch for this information.

But I thought it essential to pass it along.

CLOSE HOLD: THIS REPORT CONTAINS SENSITIVE INFORMATION. PLS HANDLE ACCORDINGLY.

The following is some information and analysis based on discussions with Tribal Sheikhs, local leaders and members of the Hawza in Najaf and Karabala regions;

1- Sadrites [militiamen] are openly engaged in anti-Sistani rhetoric in the streets, tearing his picture and cursing his name.

Sadr sees himself as the Iraqi Marja'iyah [i.e., the source of emulation/religious authority] first and foremost, and above any foreigners claiming this right [note: Sistani, Fayyad, Ghurayffi are all foreign—non-Iraqi]. All Sadr [ref the father] students claim Marja'iyah status and feel they are by default the true sources of religious authority, while the rest [Sistani, Fayyad, etc.] follow a sort of hierarchy. [Note: the Moslems do not have a church, anyone can issue a fatwa and there is no hierarchy, however the clerics do yield to one leader from among their peers in their immediate location, i.e. Sistani in Najaf or Iraq...but that status does not extend to Bahrain or Lebanon for example].

Already Sadr has killed the only other Iraqi Grand Ayatollah [Quoi] who posed a threat to his advancement, and after that he then surrounded Sistani's home and threatened him with death. That may happen again as Sadr feels his leadership position is vulnerable as he was isolated from the traditional Marja'iyah by the Coalition Forces (CF) presence on the outskirts of Kufa. The CF pullback has not done much to quell that situation; in fact it has exacerbated the tension.

Indeed, the Hawza did not side much with the CF, but they did not side with Sadr either and announced they do not support any such activity by his forces which resounds through his mind right now. The CF withdrawal has put those who didn't support Sadr in a precarious situation. In the words of the delegation, they are scared, they realize they are dealing with a dangerous kid and do not trust him to be wise when he is feeling vindictive.

2- Indeed, anti-Sadrites [but not necessarily pro-coalition anymore] were hoping for a strong CF stand against Sadr.

While not expecting a CF military attack necessarily, they did NOT want to see CF pull back, which really troubles them. Sadr to them is the new Shi'a Saddam, and they fear him outright, and are afraid they will have to obey him if we do not fix this situation—and they are looking for US leadership. One suggestion was an attempt to isolate Najaf from Kufa and deal with two different but smaller

11-L-0559/OSD/26401

OF OOF HOTO

problems, (nfi -- just relaying their view at this point.

- 3- Next step—they may start looking for a local solution, and if they start that, intricate warfare patterns will become evident moving towards a civil war pitting tribal and religious groups against one another which could become the norm rather than an all-out intifadah against the occupation. If Sadr is not diffused before we hand over sovereignty, then we will definitely see this after 30 June.
- 4- Moqtada Al Sadr is already searching for a governor for Najaf and for a Police Chief, He occupies all the key government sites, has checkpoints at all the main roads [using police Motorola's to call in spot reports], has control over the Shi'a Shrines and their funds, his government is slowly but surely manifesting itself.
- 5- The Hawza has declared, behind closed doors, that Sadr is not a Moslem, and urged that we get this message.

Their explanation:

There are 5 tenets in the Shi'a religion that are inviolable. These are

- 1. Belief in God,
- 2. Belief in the Prophet Mohammad,
- 3. Belief in Justice,
- 4. Belief in the resurrection, and
- 5. Belief in the Imams [mainly Ali, but all 11 and the coming of the 12th and last Imam].

If you betray any of these 5 principles then you are not a Moslem.

Here is what MAS has done to deserve such condemnation...his troops are chanting [note: all chants are pre-approved] very controversial slogans that portray him above Imam Ali and the Prophet Mohammad. Here is a translation of the slogans: 1. Please excuse us Ali, Sadr is the Imam [min rukhsitaq ya Ali, Muqtada huwa al Wali] and 2. Please excuse us Batool [aka the Prophet's daughter and wife of Ali-Fatima AL Zahra] Muqtada is the Prophet [min rukhsitek ya Batool, Muqtada huwa al Rasool], in Arabic they rhyme.

For this, Sadr is now considered a MURTAD, which means a REJECT— meaning from the religion of Islam. Sadr taking the place of the two holiest men in Shi'a Islam [the Prophet and 1st Imam], making himself larger than the 12th Imam who hasn't appeared yet, and larger than the Prophet of Islam altogether, is blasphemy and he is being condemned for it, secretly so far out of fear of him, but it will get out and spread.

They affirmed the people of Najaf and Kufa are on our side and against MAS/SM. Sadr must be taken down, brought to Justice, and or killed in the process, but he cannot remain in Kufa/Najaf to control/terrorize the Shrine cities unopposed. This goes for his entire team. (Sadr has ordered 400 cleric turbans, 200 white, 200 black, distributing them out to key associates for cover and protection.)

FINAL COMMENT:

Our strategy of negotiating with Sadr after he has committed still more outrages, murdered Coalition soldiers, seized two cities, desecrated two sacred Shi'ite shrines, and defied hoth Iraqi law and the Coalition's authority is unwise, ineffective, against our own interests, and morally unjustifiable. Is this why we fought the war?

11-L-0559/OSD/26402

With every passing day our credibility is falling as our local friends and other incountry sources are advising. We need to give the people of Karbala', Kufa, and Najaf the justice and protection they deserve by using military force to put

an end to Sadr's rebellion as soon as possible. If Sadr and his forces escape from this situation to fight another day, we will have sown the seeds of disaster and guaranteed that Iraq's future will be anything but democratic.

These points re Najaf apply equally to Karbala. Sadr will not go away peacefully; moreover, we have to be seen to be driving him from the field, or else we will have lost all credibility -- especially when the real struggle comes, with the Badr taking the lead, in the months following the dissolution of CPA.

The people of Karbala want to see Sadr humiliated, but they cannot do so by themselves as they have no weapons or leadership.

Moreover, it was painfully obvious at a recent meeting that the Abd al-Mahdi al-Karbalawi (al-Sistani) representative clearly did not want this stalemate to end. He wanted no armed confrontations to occur within the "holy city of Karbala" and opposed a citizen's demonstration against Sadr, meaning that it suits the Iranian agenda perfectly to have our indeciveness prolonged as long as possible. SCIRI/Badr/Abd al-Mahdi/Iranians all know Sadr and his Militia cannot threaten their control of Karbala, but Sadr's Militia is very useful in telegraphing to everyone here just who it is that can be relied upon to provide long-term security for the city -- SCIRI/Badr.

While we are losing time with negotiations that can only lead to a smoke and mirrors solution to the Sadr problem, the Governor, at the initiative of a local

Sheikh (Muslim al-Taa'i of the Husayn al-Sadr marj'a in al-Kazimiyya), has obtained permission from the Ministry of Awqaf (religious endowments) in Baghdad to turn the al-Mukhayyam Mosque (MAS headquarters in downtown Karbala) into a health clinic. While this is not a carte blanche to launch a missile into the al-Mukhayyam, it clearly shows that local civic leaders are doing all they can to pave the way for the removal of MAS influence from their city. After

order is restored and the Ministry of Awqaf order can be implemented, this will be a tremendous humiliation for MAS as it will leave him with no base in this city. It remains to be seen, though, whether sufficient calm will be restored to allow the local government to seize the al-Mukhayyam and convert it into a center that serves the people of Karbala rather that one which threatens them.

In the meantime, Sadr's Militia continues to disturb our sleep almost nightly with scattered mortar attacks near or on our base camp. Just enough harrassment to let us and everyone else know they are still there and defying us. How much more of this are we going to put up with? When are we going to start playing

"No-more-Mr.-Nice-Guy"? How about a few U.S. forces to take the initiative and start attacking the SM checkpoints in the northeastern suburbs of Karbala?

When SM militiamen start taking casualties, they will start to melt away. There aren't more than 300 of them, if even that many, in the whole city, according to informed U.S. military sources on the ground here. It is a mistake to have our forces simply surround Najaf while negotiations are going on and leave tidying up Karhala for another day. Every day of delay is subtracting from our ability to influence what is going on in this province. Soon we will have no credibility at all.

CLOSE HOLD: THIS REPORT CONTAINS SENSITIVE INFORMATION. PLS HANDLE ACCORDINGLY.

This report comes from US personnel in Kerbala who have been shelled virtually every night by mortar file in Karbala. This has gone on now for more than three weeks. They are recommending Coalition Forces become proactive in striking back at those who are trying to kill them every night, and if nothing else, at least allow US Special Forces to take out the positions which they know that Sadr's Militiamen are holding. Reportedly the US military are willing to take the fight to the enemy, but their requests for permission to do so are being turned down in Baghdad.

They also are seeking guidance on the overall plan to bring the crisis with Sadr to a close. Although negotiations are going on in Najaf and Falluja, Sadr's Militia (SM) in Karabala is operating as an independent force and is slowly occupying more and more real estate. The Tribal Democracy Center, taken over by the SM two days ago, is only two blocks away from the entrance to the US compound in which the governorate buildings and our Women's Rights Center (WRC) are located. If SM takes the WRC or one of the other high-rises near the city center, they will be able to direct their fire directly, and at close range, at the all-too-symbolic center of governance for this province. If they take the downtown area, they will release the dangerous criminals being held in the local jail and turn them against us in attacks on our base camp. At present, the SM's attention is drawn primarily to taking the city center, but our base camp will become their next principal target after the governance center falls. The mortars which have so far been missing us will then start to fall in our camp, and there will inevitably be casualties.

Moreover, we will not be able to hold meetings downtown with the Governor and Provincial Council, and as civil servants will not be able to come to work, the local government will come to a standstill. Indeed, if the center of governance falls, the Governor and PC will have begome entirely superfluous and all of our work in reforming the local government will have been in vain. You will then have to face the prospect of negotiating directly with some MAS-appointed government, which will only deal with us in bad faith, I assure you. These people will not go away until we drive them out. They see our current posture as cowardice and their nightly mortar attacks are demonstrations of their contempt for us. We must use our legitimate force to control this situation, and use it quickly.

The province's civic leaders also need us to provide a word of hope and guidance, but we have none to offer. Without our leadership and some reason to hold out hope, their morale will finally collapse, and we will face the same problem in Karbala -- JAM occupying the rabbit-warren of old city streets and lanes near the shrines -- that we already have in Najaf.

Karbala can be saved if we act in time.

I know that this is a difficult time to be asking for your personal attention to the problems of Karbala, which seems relatively quiet compared to all else that is being reported from around the country. The situation is actually quite serious, however, especially given the special symbolic significance of this city.

This matter undoubtedly is receiving your utmost attention, but we and other governance teams in Iraq would appreciate some guidance on what to expect in the near future. What is our game plan?

11-L-0559/OSD/26405

OF USE HOTE

We are now on Day 19 of the Mahdi Army siege in Karbala, with no end in sight and a complete absence of direction as to how this will all play out. I have not been in the State Department that long, but I spent twenty years of battles trying tough litigation cases and I learned a few things along the way that I believe in good faith apply here. (1) negotiating with people whose word cannot be trusted is a useless exercise and an affirmative demonstration of lack of resolve; (2) the failure to decide on a plan is to decide; (3) the failure to act is an affirmative act of omission.

- (1) From all reporting we receive from Najaf and from what we know of the criminal, brutal acts of the Mahdi Army here in Karbala, negotiating with Sadr and/or his Mahdi Army lieutenants is nothing but a useless exercise. We will get no where with the word of thugs and only demonstrate to all in Karbala our lack of resolve to actually support our mission here by attempting to engage in civilized discussion with terrorists and murderers.
- (2) Throughout this crisis, we have had no direction or guidance from Baghdad as to the way out. The failure of Baghdad to provide us with decisive guidance that we can pass on has eroded the confidence of the Karbala civic leaders and citizenry in us (CPA) and our CF. By failing to decide and/or advise us on what the plan is, we have not only failed the province of Karbala, we are failing ourselves as we are held virtual hostages in our Camp Juliet. We have been subject to water and food rationing as well as nightly mortar and RPG attacks that cause us to run at break-neck speed to our bunkers for safety. We dare not to venture out of Camp Juliet for fear of facing what has now become an almost virtual certainty that we will be ambushed if we don't hit a IED first. As the days pass, the odds are stacking up against us that one of those nightly mortars is going to find its way to a CPA human target. We need and deserve to know what decisions have been made for Karbala. If they haven't been made, then who do we need to impress that some course of action needs to be planned for Karbala? The failure to decide is costing us dearly with credibility and I just don't want it to cost us a life as well.
- (3) What is most incredulous to me is that our CF are either unwilling or unable to engage the Mahdi Army directly. Our special forces are repeatedly attacked, yet they are denied the green light to attack known Mahdi Army strongbolds in Karbala. Our IBCT advises it will only engage the Mahdi Army in Karbala if our nascent provincial council will give it permission. The failure of CF to affirmatively address the Mahdi Army siege has resulted in the Mahdi Army taking control of a significant portion of the city (including our almost-ready-to-be-opened Tribal Democracy Center) and poised to take over other strategic locations which will allow the domino-effect of taking control of the governorate building and police station. I am not a military strategist, but it is apparent to me that the failure to timely and directly engage the Mahdi Army in Karbala has allowed them to fortify their positions, pinpoint weak but strategically important positions to seize and has bolstered their confidence that they will not be touched in their efforts to take over this province. CPA and CF are being attacked daily and nightly, yet we see no firm resolve to respond. Maybe it is lack of a good night's sleep for too many days, or maybe it is the very real and present danger we are in here in Karbala, but I am beginning to feel unprotected and unsupported in our mission's efforts.

John, I am but one voice, but I'm looking for answers. Pass this up your chain of command or not, but please know I always appreciate that you encourage my most candid assessment.

CLOSE HOLD: THIS REPORT CONTAINS SENSITIVE INFORMATION. PLEASE HANDLE ACCORDINGLY.

Meeting with Sistani Office representative

22 April, 2004.

Sayyed Maytham Faisal Mazthboub (protect) is a close contact and personal friend bf GA Ali Sistani. Maytham has had access to GA Sistani for the past 15 years. Maytham is a moderate and a respected notable in the city of Najaf/Kufa. He is not a cleric, and he is not employed by Sistani, but is an independently wealthy and a religiously inclined man who has had direct involvement in the Hawza.

The purpose of the meeting was to establish a direct relationship with US personnel in the southern region. He claimed many Baghdad visitors led them to believe they were a solid conduit to CPA-Baghdad but Sistani and his interlocutors were beginning to lose faith in this and wanted to build their own relationship at this point. He indicated grave dissatisfaction in dealing with multiple envoys who all claimed they were sent by Amb Bremer to "solve the problem" and the episodic nature of their involvement. Some had even gone as far as asking for a photo with GA Sistani [IGC member Muwaffaq Al Ruba'i for one] for what they interpreted as an attempt to prove they met with him and gain increased credibility when they quoted him.

He stated Sistani understands many are speaking in his name and knows he has to do something about that ; thus he is looking to make a direct office-to-office connection with a military office in CPA south so there is no misunderstanding. He knows of us from back when we first made our rounds with the Ayatollahs, and sought us

Note: He did not indicate at any time that he had a message from Sistani. However, at the close of the meeting. Maytham stated that he would report his meeting results directly to Sistani and requested a meeting for a closer contact of Sistani [NFI] with us this coming week at our locale. He did mention the person will be a cleric and an associate of GA Sistani, once one to be determined after Maytham brilefs GA Sistani.

Here are key points Maythem made:

1) Coalition Forces were seen in some neighborhoods [Hayy Zahra] and were refreshingly received. People who want peace welcome this action, indicating US Forces are welcome in their midst.

In any city where there is no law and no authority there is a problem, as is the case in Najaf and Kufa. The sovereign should never abandon his [people] during a crisis, nor should be yield his authority to any person not properly appointed. [Here he is indicating the obvious, that the US regain control from the forces now occupying government offices in Najaf.] He mentioned US success in Kut, and wished for a similar outcome where the US was able to regain control and push back the militia.

- 2) Najaf has fallen into the hands of the so called Jaysh Al Mahdi (Sadr's Militia), a group of thieves, murderers who have armed themselves beyond any comprehension, taken police stations, released all the prisoners, and looted the government offices...all while the coalition forces watched. Anyone who worked with the CF has been targeted and many now are in jails and are being tried in so called Shari'a courts, some have been executed and still the Coalition stands by without interfering. "Collaborators" are being systematically pursued, arrested, and detained daily and their the families have no where to go and complain—just like the old days under Saddam. Fear and Intimidation now rule the city again.
- Sistani has done his duty [as a religious leader]; he sent a delegation asking Saldr to leave the city if he intended to fight the coalition and spare the city and shrines from inherent destruction. He stated that the delegation warned Sadr the coalition would respond with might for every bullet the Sadr Militia [SM] expended. Sadr's inner circle is now in charge of key [military] decisions and Sadr remains removed from direct involvement, but reamins adamant about not backing down in the face of too much pressure—which in his view

11-L-0559/OSD/26408

<u>oi not uni n</u> ULUUL MULU

000.7150

CLOCK HOLD

doesn't look good—in that Sadr is personally convinced he could win and keep/control Najaf/Kufa.

- 4) Most of the hardened MAS militants in the streets manning positions are in fact strangers [from outside the city], and more likely from Thawra city [Sadr City] in Baghdad. It is unclear how they could have traveled unobstructed to Najaf, and taken control so easily, and remain in control in the face of the mighty coalition that liberated Iraq. He said that people were beginning to draw dangerous conclusions from such a situation, and unless the coalition regain control, it would be hard to mobilize the citizens to help or cooperate later. They live in fear of retribution for any misconstruction made by the Sadr thugs...this is like living under Saddam only now it was 1991 all over again.
- 5) Najaf is not Fallujah. Fallujah is full of former Baathists, foreign fighters from all over the Middle East to include Al Qaeda and Ansar Al Islam, former Iraqi military, former Iraqi Intelligence, and former Iraqi Special Services, many that benefited from the regime for years. Najaf is different in that it does not have any military commanders, security apparatus, or Sunni opposition, but instead people who never benefited from the regime but were systematically oppressed and persecuted for the past 35 years. There are no former regime elements or anyone fighting against an occupation—but people still thankful US liberated us. Sistani has stated that since US announced its depature on a given date then US not truly occupiers—so the dynamics are different.
- 6) The people in Najaf can be counted on to support you to a limit if US were to go after Sadr more aggressively. Hearing planes overhead day and night, knowing US troops are in the outskirts of the city, Najaf awaits a solution (ie, they expect a US offensive to take back the town and remove Sadr and his militia [ala Kut]. He cautioned against prolonged fighting and collateral damage [meaning the Shrines].
- 7) The Najaf Police are traitors who must be fired once the city is liberated. They were obedient dogs when Saddam was in power, and their paychecks were a fraction of what they are now. He displayed outright disdain for the great betrayal they committed in giving over the city to Sadr's criminals. They would have never thought of doing that under Saddam, but it was easier now since there was no perceptible punishment by the local government/coalition, but that the outcome of not cooperating with Sadr was taken more seriously.
- 8) Sadr is a cancer that needs to be removed or else it will get worse fast and then require either amputation [give up Najaf] or chasing after a disease that is spreading fast. Some solution that would rid them of this future [Shi'a] Saddam is needed ASAP. Re the Saddam analogy, Sadr has surrounded himself with a circle much like Saddam's to protect him as the leader so long as they are benefiting from him—currently that consists of sharing his spoils—like police cars and weapons, monies they plundered and influence they now enjoy along with its inherent respect. GA Sistani has declared all government property must returned.

The meeting lasted two hours and was rather pleasant in tone. Maytham is a friendly fellow that likes to make analogies and funny remarks. One joke he told about Sadr worth mentioning goes like this:

A mother mosquito tells her child not to go near any people as she feared for his life, but the little mosquito didn't listen. He came home that evening and told his mother, mom, why did you ask me to stay away from the people, they really like me, when I went near them today they all started clapping for me...[he motioned with his hands how we try to kill a mosquito] he said this was Sadr, he was that naive &stupid.

In departing he again mentioned he would brief Sistani personally and re-contact our office for a future meeting with a closer associate.

DEPUTY SECRETARY OF DEFENSE

FROM:

Daniel J. Dell'Orto, Principal Deputy General Counsel

SUBJECT: Reconsideration of Waiver Denial (SNOWFLAKE)

- You asked whether someone should clarify to Major General Kathryn Frost the
 distinctions between the political activity rules that apply to military personnel and
 those that apply to civilian employees.
- On July 16,2004, the Acting Secretary of the Army denied MG Frost's request for waiver from certain political activity restrictions. She then forwarded the request to the Secretary of Defense, on whose behalf the Under Secretary of Defense (Personnel and Readiness) denied it on August 17,2004.
- Because MG Frost has not had further communications with the Office of the Secretary, taking additional steps on this matter would be unnecessary. As a courtesy, however, it would not be inappropriate for me to send her the letter at TAB A. It discusses the legal basis on which her request was denied. It also reiterates the limited activities related to her husband's campaign in which she may participate.

DEPARTMENTOFDEFENSE OFFICE OF GENERAL COUNSEL 1600 DEFENSE PENTAGON WASHINGTON, DC 20301-1600

Major General Kathryn G. Frost Headquarters, Army & Air Force Exchange Service Dallas, Texas 75266-0202

Dear General Frost:

On July 16,2004, the Acting Secretary of the Army denied your request for waiver from certain political activity restrictions. You then forwarded the request to the Secretary of Defense, on whose behalf the Under Secretary of Defense (Personnel and Readiness) denied it on August 17,2004.

As support for your argument that the Department of Defense (DoD) had relaxed the restrictions, you made reference in the request to section 734.307 of the Office of Personnel Management (OPM) regulations. I discuss below the reasons for which this section is inapplicable. I also reiterate the limited activities related to your husband's campaign in which you may participate.

Section 734.307 provides that a civilian employee covered by subpart C of the regulations may appear with the employee's spouse in a political advertisement or a broadcast and urge others to vote for the employee's spouse. Members of the armed services, however, are subject to DoD Directive 1344.10, not to the OPM regulations. Still, some of the civilian rules are persuasive in determining whether a service member may participate in political activities—specifically the rules in subpart D of the regulations, which apply to members of the Senior Executive Service (SES), employees of the National Security Agency (NSA), and other similarly situated employees.

This is the case because the rules in subpart D of the regulations are analogous to the rules in DoD Directive 1344.10, just as the duties of service members are analogous to those of NSA employees and the duties of senior commanders to those of SES officials. Subpart D employees, for example, may not participate in political campaigning and neither may military personnel. In contrast, employees covered by subparts B and C of the regulations are subject to less restrictive rules. For example, not only may they participate in a political campaign, but they may even manage one. Section 734.307 applies to employees covered by subpart C and thus fails to be persuasive.

Conversely, section 734.405 is persuasive because it applies to subpart D employees. This section provides that an employee may attend a political function with the employee's spouse, stand in the receiving line, and sit at the head of the table during a political dinner honoring the spouse. It also states that the employee may appear in photographs of the candidate's family that might be used in a political advertisement, broadcast, or campaign literature. In the same manner, an active-duty major general and senior commander may participate in these limited activities when out of uniform. The officer and the subpart D employee alike, however, are prohibited from taking an active role in the political campaign of the officer's spouse, speaking on behalf of or representing the spouse at political events, hosting an event bonoring the spouse, or participating in media interviews.

The OPM regulations therefore fail to support your request for waiver. They instead confirm the Under Secretary's denial.

Please contact me if you have any questions.

Sincerely,

Daniel J. Dell'Orto Principal Deputy General Counsel

SUBJECT: Reconsideration of Waiver Denial. Department of Defense Directive

1344.10/Army Regulation 600-20

MEMORANDUM THRU: Anny Chief of Staff

THRU: Secretary of the Army

FOR: Secretary of Defense

- 1. I respectfully request reconsideration of the Deputy Chief of **Staff**, Department of **Army**. 12 Apr 04, **denial** of my request for waiver **born** certain prohibitions against political activities contained in paragraph 4.1.2.3 and Enclosure 3 of Department of Defense Directive 1341.10, and paragraph 5-3a(2)(c). Army Regulation 600-20. I requested this waiver by letter dated 26 Feb 04, so I may participate in the campaign for my husband, Congressman Marlin **Frest**.
- 2. Specifically, I would like to be able to accompany my husband in door-todoor campaigning; represent him at events when he cannot be present; speak on his behalf to organizations; and participate in media interviews.
- 3. I believe the prohibitions concerning political activity were developed primarily to avoid command influence in the political process or to preclude the perception of an organizational or military endorsement of any candidate or party. It is doubtful those who crafted the language even contemplated the situation where a military member would be married to a politician. My request for a waiver in 2000 was denied. However, a recent decision by the Department of Defense (DoD) indicates a relaxation of restrictions. Likewise, in accordance with 5 C.F.R.731.307, civilian federal employes are permitted to participate in a spouse's political campaign. Examples of authorized participation include attending a fundraiser, standing in the receiving line, sitting at the head of the table, and urging others to vote for his or her spouse.
- 4. In order to comply with regulatory requirements and departmental policy, I have been forced into **the** role of silent spouse when I accompany my husband to various events **that** are critical **to** the success of **his** campaign. The **spouses** of today's political candidates, whether male or female, are **expected** to **take** a much more active role **than** in the past. As **a** result of my enforced silence even when appearing in public, my husband's supporters **may** question my loyalty, and **his** opponents may take advantage of the fact **that I must** remain silent in the face of criticism against him.
- 5. I will not wear my uniform or use government property or facilities while campaigning; allow my participation to interfere with my duties as the Commander, Army and Air Force Exchange Service (AAFES); engage in conduct which would imply Army or Department of Defense endorsement; solicit or receive campaign contributions; use my official authority or position to influence my subordinates; or campaign on behalf of anyone but my husband.

6. The reason given for denying my original waiver request was **that** "HQDA policy follows the DoD policy." However, DoDD 1344.10 has vested authority in the Secretary of the Army to consider waiver requests based on individual situations. If my request continues to be denied, I ask **that** the specific reasons for such **denial** be provided to me.

KATHRÝN G. FROST Major General, U.S. Army

DEPARTMENT OF DEFENSE OFFICE OF GENERAL COUNSEL 1600 DEFENSE PENTAGON

WASHINGTON, DC 20301-1600

INFO MEMO

September 2,2004, 10:00 A.M.

FOR: DEPUTY SECRETARY OF DEFENSE

Daniel J. Dell'Orto, Principal Deputy General Counsel Dell'Orto FROM:

SUBJECT: Reconsideration of Waiver Denial (SNOWFLAKE)

- You asked for information about the regulation concerning the participation of civilian employees in a spouse's political campaign. You also asked whether some limited waiver allowing Major General Kathryn G. Frost to stand in a receiving line, for example, was appropriate.
- Under the Hatch Act, the Office of Personnel Management (OPM) has issued 0 regulations in 5 C.F.R. §§ 734.307 and 734.405 that address the issue specifically. One section appears in the subpart with the least restrictions. The other appears in the subpart that applies to members of the Senior Executive Service (SES), employees of the National Security Agency (NSA), etc., who are subject to more restrictive rules.
 - o Under the subpart with <u>less restrictions</u>, section 734.307 provides that employees who are a candidate's spouse are subject to the same rules as other employees covered by this subpart. For example, they may attend a spouse's fundraiser, "stand in the receiving line," and "sit at the head table." They also may appear with the spouse in a political advertisement or broadcast and urge others to vote for the spouse.
 - o Under the subpart with <u>more restrictions</u>, section 734.405 provides that employees may attend a political function with the spouse. For example, they "may stand in the receiving line and sit at the head of the table during a political dinner honoring the spouse." The section also states that they may appear in photographs of the candidate's family that might appear in a political advertisement, broadcast, or campaign literature.

o Members of the armed services are not subject to the Hatch Act, but the applicable rules (published in DoD Directive 1344.10) are analogous to the more restrictive rules in it. (Under one rule, service members—like NSA employees—may not participate in political campaigns.) The directive does not address the specific

JA SD allem 1/8 SA DSD SRMA DSD EXEC SEC

issue at hand, but it requires the use of rules of reason and common sense when determining whether an activity should be prohibited. For this reason, service members have not been prohibited from attending political functions, standing in the receiving line, or sitting at the head table with the spouse (as long as they are out of uniform). Nor have they been prohibited from appearing in photographs of the candidate's family that might appear in a political advertisement, broadcast, or campaign literature.

In her request, however, MG Frost does not seek a waiver to engage in such activities. Rather, she wishes to take an active role in her husband's campaign, representing him at events that he cannot attend and speaking on his behalf. Because such activities are not allowed by the directive (or by the analogous Hatch Act provision) and waivers have not been granted previously, the Acting Secretary of the Army and the Under Secretary of Defense (Personnel and Readiness) denied the request. If MG Frost wishes instead to stand with her husband in a receiving line, for example, she does not require a waiver.

TOUC

DEPARTMENTS OF THE ARMY & AIR FORCE Headquarters Army & Air Force Exchange Service Dallas, Texas 75266-0202

254 105 -9 AUG 05 2004

SUBJECT: Reconsideration of Waiver Denial, Department of Defense Directive 1344.10/Army Regulation 600-20

MEMORANDUM THRU:

Deputy Secretary of Defense

FOR:

Secretary of Defense

1. Request for a waiver from certain prohibitions against political activities contained in paragraph 4.1.2.3 and Enclosure 3 of Department of Defense Directive 1344.10, and paragraph 5-3a(2)(c), Army Regulation 600-20. I am requesting this waiver so that I may participate in the campaign of my husband, Congressman Martin Frost. This request follows two earlier requests to department of the Army that have been denied.

//

- 2. I requested a waiver by letter dated 26 Feb 04. It was denied by the Deputy Chief of Staff, Department of the Army, by letter dated 12 Apr 04. I requested reconsideration by letter dated 29 Apr 04 and asked that, if my request was denied, I be given the specific reasons. The 16Jul 04 denial states that granting this waiver "would undermine a sound policy that helps preserve the integrity of the Army by keeping it politically neutral."
- 3. I respectfully submit to you that the political neutrality of the Department of the A my will not be adversely impacted should you grant my request for waiver. When the restrictive language of DODD 1344.10 and AR 600-20 was drafted, it was unlikely that anyone anticipated that a service member would be married to a Member of Congress. The current Administration has emphasized that strong marriages are central to a strong America. Therefore, I would plead that the ability of anyone to fully participate in the life of his/her spouse is central to a strong marriage recreation, avocation, or career. To restrict me, as a result of my military service, is to communicate that marriage within the military is less relevant than that of the private sector. My husband's constituents and potential voters do not now, nor would they in the future, presume my advocacy for my husband or my participation on his behalf to be anything other than my support for or belief in the man I love. No one would view action on my part either as violating Army neutrality in an election or as a service endorsement of any candidate—rather the expected support of the wife.

11

4. Specifically, I will not wear my uniform or use government property or facilities while campaigning; allow my participation to interfere with my duties as Commander, A my and Air Force Exchange Service (AAFES); engage in conduct which would imply Army or Department of Defense endorsement; solicit or receive campaign contributions; use my official authority or position to influence my subordinates, or campaign on behalf **of** anyone but my husband.

1

5. 1 do not believe that allowing me to participate in my husband's campaign under these conditions would cause a reasonable person to perceive that the integrity of the Army or the Department of Defense has been compromised. For this reason, and the reasons outlined in my previous letters, I respectfully ask that you expeditiously approve my request.

MEMORANDUM FOR Major General Kathryn G. Frost, Commander, Headquarters, AAFES, P. O. Box 660202, Dallas, Texas 75266-0202

SUBJECT: Reconsideration of waiver denial, DOD Directive 1344.10/AR 600-20

Your request for reconsideration of the Deputy Chief of Staff, G-1's denial of your request to be allowed to campaign for your husband, Congressman Martin Frost, is denied.

This denial is based on a careful review of DODD 1344.10, paragraph 4.1.2.3 (Enclosure 1) and AR 600-20, paragraph 5-3A(2)(c) (Enclosure 2), which prohibit members of the Army on active duty from participating in political campaigns. Granting the requested exception would undermine a sound policy that helps preserve the integrity of the Army by keeping it politically neutral.

As an additional matter, I recommend that you request your spouse's political campaign to delete all references to your duty position on its internet website to remove even the appearance that as an Army officer you are participating in a political campaign.

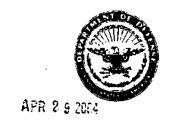

My point of contact for this action is Chaplain (LTC) Rick D. Mathis, Chief, Army Command Policy Branch, (b)(6)

FOR:

DEPUTY SECRETARY OF DEFENSE

FROM:

Daniel J. Dell'Orto, Principal Deputy General Counsel

SUBJECT: Reconsideration of Waiver Denial (SNOWFLAKE)

- On February 26,2004, Major General Kathryn Frost requested a waiver from certain political activity prohibitions. (Department of Defense Directive 1344.10 provides that service members on active duty may not engage in campaigning.) In the request, at TAB 1, she expressed her wish to take an active role in her husband's campaign for reelection to the U.S. House of Representatives.
- The Deputy Chief of Staff of the Army denied the request on April 12,2004 and the Acting Secretary of the Army affirmed such determination on July 16,2004. See TABS 2 and 3.
- On August 5,2004, MG Frost forwarded to the Secretary of Defense a request for reconsideration, at TAB 4. The Under Secretary of Defense (Personnel and Readiness) (USD(P&R)) coordinated this action with my office and denied the request on August 17,2004. See TAB 5.
- The determination by USD(P&R) constitutes final resolution of the matter. Any further action is therefore unnecessary.

AUG I 7 2004

Major General Kathryn G. Frost Headquarters, Army & Air Force Exchange Service Dallas, Texas 75266-0202

Dear General Frost:

I regret that I must deny your request for a waiver from certain prohibitions contained in Department of Defense Directive 1344.10 and Army Regulation 600-20,

As the Supreme Court has ruled, "keeping official military activities ... wholly free of entanglement with partisan political campaigns of any kind ... is wholly consistent with the American constitutional tradition of a politically neutral military establishment under civilian control." *Greer v. Spock*, 424 U.S. 828, 839 (1976); see also 42 U.S.C. § 1972. To maintain this neutrality, Department of Defense officials and active-duty members of the Armed Forces must avoid even the appearance of political partiality.

The participation of an active-duty Major General and senior commander in political campaigning would violate this standard.

Sincerely,

Parid S. C. Chr.

INFO MEMO

September 2,2004, 10:00 A.M.

FOR:

DEPUTY SECRETARY OF DEFENSE

FROM:

Daniel J. Dell'Orto, Principal Deputy General Counsel Dell'Ort

SUBJECT: Reconsideration of Waiver Denial (SNOWFLAKE)

- You asked for information about the regulation concerning the participation of civilian employees in a spouse's political campaign. You also asked whether some limited waiver allowing Major General Kathryn G. Frost to stand in a receiving line, for example, was appropriate.
- Under the Hatch Act, the Office of Personnel Management (OPM) has issued regulations in 5 C.F.R. §§ 734.307 and 734.405 that address the issue specifically. One section appears in the subpart with the least restrictions. The other appears in the subpart that applies to members of the Senior Executive Service (SES), employees of the National Security Agency (NSA), etc., who are subject to more restrictive rules.
 - o Under the subpart with <u>less restrictions</u>, section 734.307 provides that employees who are a candidate's spouse are subject to the same rules as other employees covered by this subpart. For example, they may attend a spouse's fundraiser, "stand in the receiving line," and "sit at the head table." They also may appear with the spouse in a political advertisement or broadcast and urge others to vote for the spouse.
 - o Under the subpart with <u>more restrictions</u>, section 734.405 provides that employees may attend a political function with the spouse. For example, they "may stand in the receiving line and sit at the head of the table during a political dinner honoring the spouse." The section also states that they may appear in photographs of the candidate's family that might appear in a political advertisement, broadcast, or campaign literature.
- Members of the armed services are not subject to the Hatch Act, but the applicable rules (published in DoD Directive 1344.10) are analogous to the more restrictive rules in it. (Under one rule, service members—like NSA employees—may not participate in political campaigns.) The directive does not address the specific

issue at hand, but it requires the use of rules of reason and common sense when determining whether an activity should be prohibited. For this reason, service members have not been prohibited from attending political functions, standing in the receiving line, or sitting at the head table with the spouse (as long as they are out of uniform). Nor have they been prohibited from appearing in photographs of the candidate's family that might appear in a political advertisement, broadcast, or campaign literature.

• In her request, however, MG Frost does not seek a waiver to engage in such activities. Rather, she wishes to take an active role in her husband's campaign, representing him at events that he cannot attend and speaking on his behalf. Because such activities are not allowed by the directive (or by the analogous Hatch Act provision) and waivers have not been granted previously, the Acting Secretary of the Army and the Under Secretary of Defense (Personnel and Readiness) denied the request. If MG Frost wishes instead to stand with her husband in a receiving line, for example, she does not require a waiver.

Re: Reconsideration of Waiver Denial 2 (SNOWFLAKE)

Sir,

Attached is a waiver request by MajGen Frost from certain prohibitions against political activities. While reviewing the package, the DEPSECDEF had some additional questions he would like answered. Please respond to DEPSECDEF's concerns and prepare a memo for Mr. Dell'Orto to send to the Deputy.

Response is due by COB on 2 September 2004. Please note that Mr. Dell'Orto's response is due to DEPSECDEF on 3 September 2004.

Please respond by 827/04

SUBJECT: Reconsideration of Waiver Denial, Department of Defense Directive 1344.10/Army Regulation 600-20

MEMORANDUM THRU:

Deputy Secretary of Defense

FOR:

Secretary of Defense

1. Request for a waiver from certain prohibitions against political activities contained in paragraph 4.1.2.3 and Enclosure 3 of Department of Defense Directive 1344.10, and paragraph 5-3a(2)(e), Army Regulation 600-20. I am requesting this waiver so that I may participate in the campaign of my husband, Congressman Martin Frost. This request follows two earlier requests to department of the Army that have been denied.

- 2. I requested a waiver by letter dated 26 Feb 04. It was denied by the Deputy Chief of Staff, Department of the Army, by letter dated 12 Apr 04. I requested reconsideration by letter dated 29 Apr 04 and asked that, if my request was denied, I be given the specific reasons. The 16Jul 04 denial states that granting this waiver "would undermine a sound policy that helps preserve the integrity of the Army by keeping it politically neutral."
- 3. I respectfully submit to you that the political neutrality of the Department of the Army will not be adversely impacted should you grant my request for waiver. When the restrictive language of DODD 1344.10 and AR 600-20 was drafted, it was unlikely that anyone anticipated that a service member would be married to a Member of Congress. The current Administration has emphasized that strong marriages are central to a strong America. Therefore, I would plead that the ability of anyone to fully participate in the life of his/her spouse is central to a strongmarriage recreation, avocation, or career. To restrict me, as a result of my military service, is to communicate that marriage within the military is less relevant than that of the private sector. My husband's constituents and potential voters do not now, nor would they in the future, presume my advocacy for my husband or my participation on his behalf to be anything other than my support for or belief in the man I love. No one would view action on my part either as violating Army neutrality in an election or as a service endorsement of any candidate--rather the expected support of the wife.
- 4. Specifically, I will not wear my uniform or use government property or facilities while campaigning; allow my participation to interfere with my duties **as** Commander, Army and Air Force Exchange Service (AAFES); engage in conduct which would imply Army or Department of Defense endorsement; solicit or receive campaign contributions; use my official authority or position to influence my subordinates, or campaign on behalf of anyone but my husband.

5. I do not believe that allowing me to participate in my husband's campaign under these conditions would cause a reasonable person to perceive that the integrity of the Army or the Department of Defense has been compromised. For this reason, and the reasons outlined in my previous letters, I respectfully ask that you expeditiously approve my request.

MEMORANDUM FOR Major General Kathryn G. Frost, Commander, Headquarters, AAFES, P. O. Box 660202, Dallas, Texas 75266-0202

SUBJECT: Reconsideration of waiver denial, DOD Directive 1344.10/AR 600-20

Your request for reconsideration of the Deputy Chief of Staff, G-1's denial of your request to be allowed to campaign for your husband, Congressman Martin Frost. is denied.

This denial is based on a careful review of DODD 1344.10, paragraph 4.1.2.3 (Enclosure 1) and AR 600-20, paragraph 5-3A(2)(c) (Enclosure 2), which prohibit members of the Army on active duty from participating in political campaigns. Granting the requested exception would undermine a sound policy that helps preserve the integrity of the Army by keeping it politically neutral.

As an additional matter, I recommend that you request your spouse's political campaign to delete all references to your duty position on its internet website to remove even the appearance that as an Army officer you are participating in a political campaign.

My point of contact for this action is Chaplain (LTC) Rick D. Mathis, Chief, Army Command Policy Branch, $^{(b)(6)}$

SUBJECT: Reconsideration of Waiver Denial. Department of Defense Directive

1344.10/Army Regulation 600-20

MEMORANDUM THRU: Army Chief of Staff

THRU: Sceretary of the Army

FOR: Secretary of Defense

- 1. I respectfully request reconsideration of the Deputy Chief of Staff, Department of Army. 12 Apr 04, denial of my request for waiver **born** certain prohibitions against political activities contained in paragraph 4.1.2.3 and Enclosure 3 of Department of Defense Directive 1344.10, and paragraph 5-3a(2)(c), Army Regulation 600-20. I requested this waiver by letter **dated** 26 Feb 04, so I may participate in the campaign for my husband, Congressman Martin Frost.
- 2. Specifically, I would like to be able to accompany my husband in door-todoor campaigning; represent him at events when he cannot be present; speak on his behalf10 organizations; and participate in media interviews.
- 3. I believe the prohibitions concerning political activity were developed primarily to avoid command influence in the political process or to preclude the perception of an organizational or military endorsement of any candidate or party. It is doubtful **those** who crafted the language even contemplated the situation where a military member would be **married to** a politician. My request for a waiver in 2000 was denied. However, a recent decision by **the** Department of Defense (**DoD**) indicates a relaxation of restrictions. Likewise, in accordance with **5 C.F.R.**731.307, civilian federal employees are permitted to participate in a **spouse's** political campaign. Examples of authorized participation include attending a fundraiser, standing in the receiving line, sitting at the head of the table, and urging others to vote for **his** or her spouse.
- 4. In order to comply with regulatory requirements and departmental policy, I have been forced into the role of silent spouse when I accompany my husband to various events that are critical to the success of his campaign. The spouses of today's political candidates, whether male or female, are expected to take a much more active role than in the past. As a result of my enforced silence even when appearing in public, my husband's supporters may question my loyalty, and his opponents may take advantage of the fact that I must remain silent in the face of criticism against him.
- 5. I will not wear my uniform or use government property or facilities while campaigning; allow my participation to interfere with my duties as the Commander, Army and Air Force Exchange Service (AAFES); engage in conduct which would imply Army or Department of Defense endorsement; solicit or receive campaign contributions; use my official authority or position to influence my subordinates; or campaign on behalf of anyone but my husband.

6. The reason given for denying my original waiver request was **that** "HQDA policy follows the DoD policy." However, DoDD 1341.10 has vested authority in the Secretary of the Army to consider waiver requests based on individual situations. If my request continues to be denied, I ask **that** the specific reasons for such denial be provided **to** me.

FOR:

DEPUTY SECRETARY OF DEFENSE

FROM:

Daniel J. Dell'Orto, Principal Deputy General Counsel

SUBJECT: Reconsideration of Waiver Denial (SNOWFLAKE)

- On February 26,2004, Major General Kathryn Frost requested a waiver from certain political activity prohibitions. (Department of Defense Directive 1344.10 provides that service members on active duty may not engage in campaigning.) In the request, at TAB 1, she expressed her wish to take an active role in her husband's campaign for reelection to the U.S. House of Representatives.
- The Deputy Chief of Staff of the Army denied the request on April 12,2004 and the Acting Secretary of the Army affirmed such determination on July 16,2004. See TABS 2 and 3.
- On August 5,2004, MG Frost forwarded to the Secretary of Defense a request for reconsideration, at TAB 4. The Under Secretary of Defense (Personnel and Readiness) (USD(P&R))coordinated this action with my office and denied the request on August 17,2004. See TAB 5.
- The determination by USD(P&R) constitutes final resolution of the matter. Any further action is therefore unnecessary.

AUG 1 7 2004

Major General Kathryn G. Frost Headquarters, Army & Air Force Exchange Service Dallas, Texas 75266-0202

Dear General Frost:

I regret that I must deny your request for a waiver from certain prohibitions contained in Department of Defense Directive 1344.10 and Army Regulation 600-20.

As the Supreme Court has ruled, "keeping official military activities...wholly free of entanglement with partisan political campaigns of any kind...is wholly consistent with the American constitutional tradition of a politically neutral military establishment under civilian control." *Greer v. Spock*, 424 U.S. 828, 839 (1976); see also 42 U.S.C. § 1972. To maintain this neutrality, Department of Defense officials and active-duty members of the Armed Forces must avoid even the appearance of political partiality.

The participation of an active-duty Major General and senior commander in political campaigning would violate this standard.

Sincerely,

David S. C. Chu

ARCHDIOCESE OF CHICAGO

Office of the Archbishop

Post Office Box 1979 Chicago, Illinois/60690-1979

August 19,2004

The Honorable Donald Rumsfeld Secretary of Defense 1400 Defense Pentagon Washington, DC 20301

Dear Mr. Rumsfeld,

It was good to hear from you at the Commercial Club luncheon on August 6, and I thank you for your clarity and courtesy in responding so graciously to my question about the future of the Christian communities in Iraq. As I mentioned, the Archbishop of Baghdad, here three weeks ago, and others in Iraq have said exactly what you said about the improvement in the lives of ordinary Iraqis because of the overthrow of Saddam Hussein by the United States and its coalition partners.

The question of the Christian minority in Iraq is complicated, as you know, by the history of the treatment of Christian and Jewish minorities in officially Muslim lands. The state of dhimmitude imposed by Sharia is not really compatible with contemporary standards of freedom, both personal and religious, yet it seems Iraq cannot become simply a Western style constitutional democracy. Is there conceptual room for a culturally and even in some sense officially Muslim state which would not impose Sharia? My contacts with Muslim political scientists here leave me puzzled, which is why I put the question to you. I hope that someone, in the midst of the immediate turmoil, is working toward such an order. The alternative is the flight of most of the Christians in Baghdad, a phenomenon already occurring.

Thank you for your dedicated service to our country. You and your family, as well as your work, are daily in my prayers.

Fincerely yours,

Francis Cardinal George, OMI Archbishop of Chicago

ARCHDIOCESE_OF CHICAGO

Office of the Archbishop

Post Office Box 1979
Chicago, Illinois/60690-1979

August 19,2004

The Honorable Donald Rumsfeld Secretary of Defense 1400 Defense Pentagon Washington, DC 20301

Dear Mr. Rumsfeld,

It was good to hear from you at the Commercial Club luncheon on August 6, and I thank you for your clarity and courtesy in responding so graciously to my question about the future of the Christian communities in Iraq. As I mentioned, the Archbishop of Baghdad, here three weeks ago, and others in Iraq have said exactly what you said about the improvement in the lives of ordinary Iraqis because of the overthrow of Saddam Hussein by the United States and its coalition partners.

The question of the Christian minority in Iraq is complicated, as you know, by the history of the treatment of Christian and Jewish minorities in officially Muslim lands. The state of dhimmitude imposed by Sharia is not really compatible with contemporary standards of freedom, both personal and religious, yet it seems Iraq cannot become simply a Western style constitutional democracy. Is there conceptual room for a culturally and even in some sense officially Muslim state which would not impose Sharia? My contacts with Muslim political scientists here leave me puzzled, which is why I put the question to you. I hope that someone, in the midst of the immediate turmoil, is working toward such an order. The alternative is the flight of most of the Christians in Baghdad, a phenomenon already occurring.

Thank you for your dedicated service to our country. You and your family, as well as your work, are daily in my prayers.

Sincerely yours,

Francis Cardinal George, OMI Archbishop of Chicago

INFO MEMO

MEMORANDUM FOR SECRETARY OF DEFENSE

FROM: Raymond S. DuBois, Director, Administration and Management

SUBJECT: DoD Directives Review Status 9/9/04

In response to your attached September 7 snowflake requesting the status of the DoD Directives review, the chart at Tab A shows our status as of September 3.

- At the outset of the Directives review effort, 654 directives were reviewed for currency, and a total of 396 were identified for revision or cancellation (327 for revision and 69 for cancellation).
 - To date, 193 have been submitted for formal coordination, and 70 (revisions and cancellations) have been signed by the DepSec.
 - Many of the remaining 133 Directives are under internal review within their own components.
 - e As the attached status chart indicates, two components (Policy and Intelligence) are lagging behind the others in completing their submissions for formal coordination. My staff is working with these components to help expedite the work they have in progress.
- On July 12, I forwarded you the report at Tab B reflecting our progress. During a meeting on September 7, you noted this report and a question about its accuracy was raised. We reviewed the data and determined that the July 12 report was indeed accurate.

DEPUTYSECRETARYOFDEFENSE

1 01 0 DEFENSE PENTAGON WASHINGTON, DC 20301-1010

ACTION MEMO

September 7,2004, 10:00 AM

SECRETARY OF DEFENSE

FROM:

Paul Wolfowitz, Deputy Secretary of Defense

SUBJECT: Processing of Claims by Iraqi Detainees Based on Allegations of

Personal Injury/Abuse and Mistreatment

- In response to your previous comment about reviewing any claims arising from Abu Ghraib allegations, Jim Haynes and Pete Geren sent you a draft memo (Tab B) that would have directed the Army (responsible for claims in Iraq) to submit any such claims packages to you.
- Your note of August 25 (Tab C) instead suggests delegating such review responsibility. Thus, I recommend proceeding with a process similar to the one set out in Jim Haynes' memo, with such claims being forwarded to the Secretary of the Army, who would review and act on the cases or, in his discretion, forward to me cases that raise particularly sensitive issues.
 - o An example might be a claim not payable under any claims statute, in which case the Secretary of the Army could consider alternative authorities (e.g., emergency and extraordinary expense (EEE) authority) and either use such an authority to provide compensation himself or forward the claim to me with a recommendation.
- The attached memorandum for your signature (Tab A) directs the Secretary of the Army to take action to ensure completed reports of the foreign claims commission, or investigations under other applicable claims statutes, are forwarded to him for appropriate action.
- Army reports that nine detainee-related claims have been submitted, and five allege abuse/mistreatment at Abu Gharib prison. Six claims allege that death occurred as a result of abuse/mistreatment during detention. (Tab D)

RECOMMENDATION: Sign memorandum at Tab A.

UBJECT: Compensation for Abuse of Iraqi Detainees

Attached is an Action Memo from Jim Haynes proposing a way ahead for processing diaims of abuse by Iraqi Detainees.

The proposal has been approved by CJCS, ASA and OGC. The only dissent came from Mr. Di Rita. He questioned whether you should, "really be the one to review all dlaims. Doesn't feel right to me."

Mr. Haynes explained to Mr. Di Rita that he believed the memo reflected your guidance and moved it forward for your consideration without change.

The memo and the coordinating documents are attached for your consideration.

MEMORANDUM FOR SECRETARY OF THE ARMY

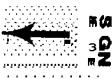

SUBJECT Processing of Claims by Iraqi Detainees Based on Allegations of Personal Injury/Abuse and Mistreatment

The **U.S.** Army has claims responsibility in Iraq. Because of the sensitivity of allegations of personal injury/abuse and mistreatment of Iraqi detainees, particularly at Abu Gluaib prison, I will review all claims based on such allegations.

Prior to my review, such claims will be investigated by a foreign claims commission under the Foreign Claims Act, 10 U.S.C. 2734, or investigated under other applicable claims statutes. The report of investigation will include a thorough analysis of whether the claim is edgnizable under the Foreign Claims Act or other claims statutes, whether the claimant is a proper claimant under the Foreign Claims Act or other claims statutes, and recommendation regarding an appropriate amount of compensation, if any.

The report of the foreign claims Commission, or investigation under other applicable claims statutes, will be forwarded to me, via the Secretary of the Army and the General Counsel of the Department of Defense. If it is concluded that the claim is not payable under the Foreign Claims Act or other claims statutes, the Secretary of the Army will identify all ernative authorities under which the claim could be paid and a recommendation whether such payment is appropriate.

MEMORANDUM FOR SECRETARY OF THE JOINT CHIEFS OF STAFF
UNDER SECRETARY OF DEFENSE FOR POLICY

FROM: Dmiel J. Dell'Orto, Phinolpul Deputy General Counse

SUBJECT: Processing of Claims by Iriqi Detainess Based on Allegations of Personal Injury/Abuse and Mistreatment

Because of the unique sensitivity of allegations of personal injury/abuse and mistreatment of Iraqi detainees, particularly at Abu Gharib prison, the Secretary of Defense has indicated his intent to review all claims based on such allegations.

The Department of the Army has claims responsibility in Irsh. We have prepared a memorandum for signature by the Secretary of Defense that directs the Secretary of the Army to forward to the Secretary of Defense, via the General Counsel of the Department of Defense, the completed reports of foreign claims commissions or investigations under other applicable claims statutel. These reports will contain a thorough snalysis of: (1) whether the claim it cognizable under the Foreign Claims Act or other claims statutes; (2) whether the claim is cognizable under the Foreign Claims Act or other claims statutes; and (3) a recommendation regarding an appropriate another of compensation if any. If it is concluded that the claim is not payable under the Foreign Claims Act or any other claims statute, the reports forwarded by the Secretary of the Army will identify alternative authority under which the claim could be paid, should the Secretary of Defense determine that payment is otherwise appropriate.

Please provide your comments and coordination by the close of business func 5, 2004 on the proposed action memo and memorandum to be signed by the Secretary of Defense. TAB A. My point of comment for this matter is Ron Neubauer (b)(6)

INFORMATION PAPER

JACS-TCF 2 Sep 2004

SUBJECT: Detainee Claims and Investigations

1. **Purpose.** To provide a summary of specific claims for personal injury stemming from allegations of mistreatment at US military detention facilities in Iraq.

2. Claims.

- a. The US Army Claims Service has three open claims pending investigation alleging personal injury as a result of detention at US military detention facilities. These investigations are almost complete.
- (1) Hassan, Alaa Ahmed. Colonel (Iraqi Navy or Marines) Hassan alleges US forces captured him on 21 March 2003 while aboard his tugboat in the northern Persian Gulf and took him to a US Navy ship. While on US Navy ship, COL Hassan alleges that he was flexicuffed, shoved by two US sailors, and slipped on the deck of the ship, where he injured his foot. He alleges he received no medical treatment other than having his foot wrapped in a bandage, and that his foot has never properly healed. However, in another interview, COL Hassan alleged that he broke his leg while in Camp Bucca, a US detention facility in Am Qser. He alleges elbow injury from his hands flexicuffed behind his back overnight. COL Hassan alleges damages of \$20,000 and medical and travel costs to a foreign country for surgery on his elbow. Prior coordination with the US Navy resulted in no information of his detention. Investigation is completed and is pending recommendation for denial as he is not a proper claimant. Processed under the Foreign Claims Act.
- (2) Shaltout, Hassam. Mr. Shaltout is a Canadian citizen who is a resident alien in Los Angeles, California, who was in Iraq with a peace organization. Mr. Shaltout also claims to be an employee of Gamin Europe, and to have sold products for that company prior to entering Iraq. US Marines detained him in Baghdad on 9 April 2003, and sent him to Camp Bucca. Mr. Hassan claims that he was beaten and tortured at the camp, and that his property, including \$119,000 in cash in his hotel room, which he was not allowed to secure while detained, was stolen from him. Mr. Shaltout alleges \$350,000 in personal injury (depression, PTSD, hearing loss in left ear, and aggravation of previously existing glaucoma and of a preexisting hernia) and property loss. Claimant and military police interviewed. Interviewed apprehending Marines and treating physician. Processed under the Military Claims Act. Investigation completed, pending drafting of recommendation.
- (3) Saleh, Haidar Muhsin. Mr. Saleh is a Swedish citizen, who alleges that US military personnel detained and imprisoned him in el-Najaf, el-Dewaniya, and

Abu Ghraib, Iraq; tortured; and stole \$79,000 cash and a Mercedes Benz automobile worth \$3,000. He alleges \$100,000 in personal injury (insomnia; depression; PTSD; injury to left leg, right hand, and head) and property damage. Mr. Saleh submitted an amended claim on 8 Jun 2004, and now alleges \$3.5 million in personal injury. Investigation completed and pending drafting of recommendation. Processed under the Foreign Claims Act.

- b. The US Army Claims Service received three claims on 7 Jul 04 alleging wrongful death as a result of detention at US military detention facilities. The Service will process under the Foreign Claims Act. On 16 July 2004, this Service requested CID reports, if any, of these named individuals.
- (1) Aziz, Abdul Hasan Khashan (claimant). The claimant alleges that his son, Mawafiq Abdul Hasan Khashan, was arrested by US forces in May 2003 and detained at Abu Ghraib prison. In August 2003, the claimant was notified to pick up his son's body at the Al Shua'a police station. Identification of the body is in question. The claimant alleges \$7,000.00 in damages.
- (2) Shamy, Abus Farhan (claimant). The claimant alleges that his son, Mosa Abas, died as a result of a bullet wound sustained while detained at Abu Ghraib prison. The claimant alleges \$5,000.00 in damages.
- (3) Abdul-Kalil, I'lham (Mrs.) (claimant). The claimant alleges that her husband, Asa'ad Abdulkarim Abduljali, was detained on 4 Jan 04 at the Asad Air Base (or aboard the Al Asad) and was tortured and killed on 9 Jan 04. The deceased had seven (7) minor children. The claimant alleges \$50,000.00 in damages.
- c. The US Army Claims Service received three claims in Aug 04 alleging wrongful death as a result of detention at a US military detention facility. This Service will process the claim under the Foreign Claims Act.
- (1) Shalan, Najia (Mrs.) (claimant). The claimant alleges that her husband, Loay Ibrahim, died on 19 Apr 04 as a result of his detention at Abu Ghraib. The claimant alleges \$3500.00 in damages.
- (2) Menem, Ashraf Muhamed Abdul (claimant). The claimant alleges that his father, Dr. Mohammed Abdul Menem Mehmud, died on 31 Jan 04 as a result of his torture at Abu Ghraib prison. The claimant alleges \$10,000.00 in damages.
- (3) Khamees, Shamsa Salman (claimant). The claimant alleges that her husband, Jassim Anoon Ayaash, died on 16 Aug 03 while in the custody of coalition forces. The claimant alleges \$50,000.00 in damages.
- d. The US Army Claims Service has received notice of one potentially compensable event (PCE) in Iraq, yet there has not been a claim filed.

(1) Oday, Kareem (deceased). Name of family member is unknown at this time. US forces detained on 10 Sep 03, 4 months later, it was reported to the family that he died. No further information is available at this time and this Service is attempting to confirm actual receipt of a claim.

MEMORANDUM FOR THE SECRETARY OF THE ARMY

SUBJECT: Processing of Claims by Iraqi Detainees Based on Allegations of Personal Injury/Abuse and Mistreatment

The U.S. Army has claims responsibility in Iraq. Because of the sensitivity of allegations of personal injury/abuse and mistreatment by Iraqi detainees, particularly at Abu Ghraib prison, I ask that the Secretary of the Army review all claims based on such allegations and act on them in his discretion.

Prior to this review, such claims will be investigated by a foreign claims commission under the Foreign Claims Act, 10 U.S.C. 2734, or investigated under other applicable claims statutes. The report of investigation will include a thorough analysis of whether the claim is cognizable under the Foreign Claims Act or other claims statutes, whether the claimant is a proper claimant under the Foreign Claims Act or other claims statutes, and a recommendation regarding an appropriate amount of compensation, if any.

The report of the foreign claims commission, or investigation under other applicable claims statutes, should be forwarded to the Secretary of the Army. If it is concluded that the claim is not payable under the Foreign Claims Act or other claims statutes, the Secretary of the Army will identify alternative authorities under which compensation could be provided and either take such action in appropriate cases or forward the claim to the Deputy Secretary of Defense via the General Counsel of the Department of Defense with a recommendation whether such payment is appropriate.

Using Kuwait to Relieve Pressure in Iraq

As we discussed at the SVTC this morning, I'd be interested in your assessment of how we could use Kuwait as a basing site to reduce the number of forces actually operating in Iraq and use the U.S. to reach back as well. This may be useful as we look ahead to allied roles.

Thanks.

INFO MEMO

· · · · · · ·

SEP 0 2 2004

FOR: SECRETARY OF DEFENSE

DEPUTY SECRETARY OF DEFENSE

FROM: William Winkenwerder, Jr., MD, ASD (Health Affairs)

SUBJECT: Bird Flu

- You inquired as to potential implications for DoD regarding Bird Flu. (TAB A)
- Health and Human Services (HHS) Secretary Thompson delivered a memo to the President discussing the threat of Avian Influenza (Bird Flu) on August 26,2004.
 This memo outlined steps the United States Government is taking to prepare for the potential that this strain of influenza (H5N1) could cause an influenza pandemic. The Department of Defense has been an active participant in the interagency planning process over the past six months.
- Important recent developments include:
 - Bird Flu is now considered endemic in Southeast Asia. Poultry flocks continue to turn up with the virus at unprecedented levels such that no expert in the field expects that it will go away on its own. A recent report from China indicates the H5N1 virus has now been found in pigs as well.
 - Scientists at the Centers for Disease Control and Prevention (CDC) and at the World Health Organization (WHO) are very concerned this virus will develop the ability to be transmitted human to human, raising the potential for a worldwide influenza pandemic.
- Secretary Thompson's memo summarized the work done to date and the way forward.
 - HHS has released their Pandemic Influenza Response Plan. DoD has participated with HHS in the development of this plan, and contributed on aspects of the plan that affect us.

11-L-0559/OSD/26507

- Expanded surveillance efforts are already underway to ensure the earliest possible
 detection of the emergence of an H5N1 strain that can cause a pandemic. DoD
 participates in this effort through its overseas labs and the DoD Global Emerging
 Infections System (GEIS).
- The National Institutes of Health has launched an initiative to develop and test
 potential vaccine candidates against the H5N1 strain and has taken actions to
 ensure the most rapid and effective production of vaccine should a pandemic
 occur. DoD has been working with them to ensure we will have access to an
 effective vaccine as quickly as possible to protect our forces worldwide.
- HHS has purchased 1.3 million treatment courses of the antiviral drug oseltamivir (Tamiflu), which is the only suitable antiviral drug against this particular form of influenza. The strategic national stockpile should have 2.3 million doses by December 2004. DoD is procuring a stockpile of Tamiflu and will position it forward in the pacific theater and CENTCOM to be used for our forward deployed forces, if ueeded. DoD will also be participate in a September 13, 2004 conference with HHS and the Department of Veterans Affairs to establish a common operational strategy for the deployment and use of antivirals during a pandemic outbreak.
- HHS and the White House have prepared documents to add a pandemic strain of influenza to the President's executive order for quarantine authority.
- HHS has contracted with an independent body to perform an interim assessment of the nation's pandemic preparedness. My staff is also finalizing DoD guidelines for pandemic influenza preparedness to ensure synchronization with the national plan.
- We will continue to participate in the interagency planning process to ensure that DoD will be maximally prepared in the event of an influenza pandemic. I will keep you informed.

24 February 2004

TO: SECRETARY OF DEFENSE

CC: Paul Wolfowitz Doug Feith

FROM: Andy Marshall Bern

SUBJECT: Assumptions for Next Two or Three Years

Here are my thoughts:

- 1. Major geo-political structure of the world will be as it is now. A possible Economic/banking crisis in China could affect its relative position some. Therefore, the main uncertainties that should be taken account of in DoD planning concern:
 - How the situations in Iraq, Afghanistan, N. Korea play out over the next few years.
 - The fate of Iran, Saudi Arabia, Pakistan, Indonesia, Philippines; where governments could change or internal unrest increase. Some changes could be very favorable and others create major problems.
 - Large casualty terror events in the U.S., Western Europe.
 - Constant high rate of scientific and technological advance leading to some surprises.
- 2. An effort to flesh out three to four alternative futures could be mounted. A team of people is needed to cover the wide range of knowledge necessary for intelligent speculation.

August 4, 2004

(b)(6)

Dear Secretary Rumsfeld,

Pete and Carolyn Repenning send-their regards. Walt McNerney does too except his stroke has taken away his speech. However, his cognitive powers are almost at 100%.

I am consutting on my corning book with two outstanding geniuses. Phil Hogan and associate. Both are working 24-7 for America. I have finished the book and it is headed to the publisher. Paul Wolfowitz has a very rough draft. Condoleezza Rice will get one.

Phil's brother, Paul Hogan, a Michigan State Police trooper at the time, wrote you a speeding ticket sometime in 1979. You were north bound on I-196 just north of South Haven Michigan. You were headed for a vacation at Saugatuck with your family. Paul still remembers how courteous your were. I guess it is a small world.

Phil Hogan has a strong past in information technology. While with the Michigan State Police he developed their Uniform Crime Reporting system that integrated reports from over 500 local police agencies. This application not only met the FBI requirements for the national Uniform Crime Reporting, but it also created a data repository that could be used for crime analysis and pattern detection across multiple police agencies.

He also developed a Major Case Investigation system that was recognized by the Department of Justice. He then went into the private sector working for EMC in the development and implementation of Business Continuity and Disaster Recovery Security applications for industry.

Recently he served as an instructor for the roll-out of Homeland Securities' Airport Security Screener effort in 2002. He is currently working on the Department of Defense roll-out of the CHCS II Military Medical Treatment Facility medical system.

Phil's past experience came to light as he worked editing my manuscript. I asked him if his system would be used to provide a large scale national intelligence service and if so why he had not offered it. He told me if could. However, in the past the necessary national integration of law enforcement, etc, information had not been possible for the same reason pointed out in the 9/17 Commission report. I asked him to take a look at the new Department of Homeland Security to see if it offers anything.

He got back to me a couple of days later saying that the new DHS Information Analysis and Infrastructure Protection unit would be appropriate. He also identified a Dr. Ruth A David, who is on the Homeland Security Advisory Council, as bring a possible point of

contact through which the applicability of Phil's system could be explored. As past Technical Advisor to the Director of the CCIA and current CEO of Analytic Services, Inc. (ANSER) it would appear that she would have the background and interest in this area.

I feel such a meeting with him is a must.

My guys, veterans, are still 100% behind you and so is Phil. The current emphasis on developing a single point national intelligence system is obvious and valid. Whatever structure the new Intelligence Czar appears in—the fact remains that he will need valid "intelligence" to work with. Something beyond a large scale collection of "reports".

Offering a functional Anti-Terrorist Intelligence System along with the Missile Defense System would give President Bush some powerful campaign ammunition and delight the voters by providing solutions instead of the hollow "promises" the other fellow is hawking.

Sincerely yours,

George Pergeot Lee youT

SUBJECT: Revision 5 to STRATCOM Plan

While I have approved ongoing work on Revision 5 to the STRATCOM Plan, I noted several provisos:

- Policy, working with STRATCOM and appropriate outside expertise, needs to ensure we have the political-military context for the scenarios in which we would use the options provided for in the revisions.
- We also need to consider how to bundle or package the options in sensible ways so that decision-makers can use them under pressure and quickly.
- Throughout the process, we must consider the reliability (or unreliability) of our intelligence and capture the effect of that factor.

Thanks.

INFORMATION PAPER

Subject: Army "Tiger Team" Briefing to Vice Chief of Staff

- 1. <u>Purpose</u>. To summarize latest Army briefing on Civil Affairs (CA) issues.
- 2. <u>Key Points</u>. On 26 August, the CA/PSYOP Tiger Team (CAPOTT) briefed the Vice Chief of Staff, Army (VCSA) on options for the assignment of CA units.
- The CAPOTT presented the following findings:
 - CA (and PSYOP) forces can best support operations by remaining under US Army Special Operations Command (USASOC).

 Reassigning CA to **Army** Forces Command would not increase Army interest in these activities, improve the transition to post-combat stabilization operations, nor support the Army Campaign Plan.
 - Addressing CA and PSYOP challenges requires partnership between US Army Forces Command and USASOC.
 - Operations would benefit **from** creation of a full-time strategic-level Civil Military Operations (CMO) planning/coordination capability.
 - The Army should consider elevating CMO to a doctrinal "battlefield operating system."
 - USASOC must redesign the current CA and PSYOP force structure for modularity and use Total Army Analysis to review AC/RC mix.
 - Extending the Reserve Component CA branch to the Active Component and creating a PSYOP branch would promote the management, professionalism and availability of those officers.
- VCSA approved the findings and gave the following guidance:
 - Continue to work the force structure for CA and PSYOP.
 - Determine how to integrate CA, PSYOP and supported units per the Army Campaign Plan. This should include Combat Training Centers.
 - Return in 90 days to brief the implementation plan.

DEPARTMENT OF THE ARMY

OFFICE OF THE VICE CHIEF OF STAFF 201 ARMY PENTAGON WASHINGTON DC 20310-0201

86 AUG 2004

MEMORANDUM FOR COMMANDING GENERAL, UNITED STATES ARMY SPECIAL OPERATIONS COMMAND (AIRBORNE), FORT BRAGG, NC 28310

SUBJECT: Results of **G-3** Directed *Civil* Affairs (CA) and Psychological Operations Tiger Team (CAPOTT)

- 1. As per our meeting and your request for assistance on 29 April 2004, I convened a Civil Affairs and Psychological Operations Tiger Team (CAPOTT) to analyze your Civil Affairs and PSYOP "Way Ahead" concept. The Team also analyzed two additional concepts for points of comparison. The team consisted of members of the Army Staff, selected Army major commands, and selected outside agencies. It ensured all doctrinal, organizational, training, materiel, leadership, personnel, and facilities issues were reviewed and considered.
- 2. The Tiger Team determined civil affairs and psychological operations forces could best support the Army by remaining under the Army Special Operations Command (USASOC). The Army's Force Generation Model's emphasis on modularity will assure that this capability is realized as CA and PSYOP staff planners will be assigned down to the BCT UA level. The Tiger Team recommends that USASOC should redesign the current CA and PSYOP force structures for modularity and relook the AC/RC mix.
- 3. During the conduct of the Tiger Team review and assessment the following three concepts were developed:
- a. Concept 1 USACAPOC, with all currently assigned forces, remains assigned to USASOC and transforms to support modularity.
- b. Concept 2 HQ USACAPOC with all CA and PSYOP Forces reassigned to JFCOM.
- c. Concept 3 SOF supporting forces assigned to USASOC and conventional forces assigned to FORSCOM.
- 4. <u>Recommendation</u>: The CAPOTT endorses **Concept** 1 by utilizing the comparison criteria of Training/Readiness. Modularity. Flexibility, and Predictability. Recommend USASOC begin coordination with FORSCOM to **support** transformation and support modularity IAW Concept 1.

SUBJECT: Results of G-3 Directed Civil Affairs and Psychological Operations Tiger Team (CAPOTT)

5. Although this constitutes the closure of this Tiger Team, the **members** are available to assist in **any** capacity. We need to continue to **build** on the **momentum** gained **thus far.** Furthermore, **USASOC's** pursuit of branches for **CA** and **PSYOP** will **help** to increase professionalism, management, and availability **of** the **officers** in those branches.

Subject Army 'TigerTeam" Briefing to Vice Chief of Staff

- 1. <u>Purpose</u>. To summarize latest Army briefing on Civil Affairs (CA) issues.
- 2. <u>Key Points</u>. On 26 August, the CA/PSYOP Tiger Team (CAPOTT) briefed the Vice Chief of Staff, Army (VCSA) on options for the assignment of CA units.
- The CAPOTT presented the following findings:
 - CA (and PSYOP) forces can best support operations by remaining under US Army **Special** Operations Command (USASOC). Reassigning CA to Army Forces Command would not increase **Army** interest in these activities, improve the transition to post-combat stabilization operations, nor support the Army Campaign Plan.
 - Addressing CA and PSYOP challenges requires partnership between US Army Forces Command and USASOC.
 - Operations would benefit from creation of a full-time strategic-level Civil Military Operations (CMO) planning/coordination capability.
 - The Army should consider elevating CMO to a doctrinal "battlefield operating system."
 - USASOC must redesign the current CA and PSYOP force structure for modularity and use Total Army Analysis to review AC/RC mix.
 - Extending the Reserve Component CA branch to the Active Component and creating a PSYOP branch would promote the management, professionalism and availability of those officers.
- VCSA approved the findings and gave the following guidance:
 - Continue to work the force structure for CA and PSYOP.
 - Determine how to integrate CA, PSYOP and supported units per the Army Campaign Plan. This should include Combat Training Centers.
 - Return in 90 days to brief the implementation plan.

DEPARTMENT OF THE ARMY

OFFICE OF THE VICE CHIEF OF STAFF 201 ARMY PENTAGON WASHINGTON DC 20310-0201

2 6 AUG 2004

MEMORANDUM FOR COMMANDING GENERAL, UNITED STATES ARMY SPECIAL OPERATIONS COMMAND (**AIRBORNE**), FORT BRAGG, NC 28310

SUBJECT: Results of **G-3** Directed Civii Affairs (CA) and Psychological Operations Tiger Team (CAPOTT)

- 1. As per our meeting and your request for assistance on **29** April **2004**, I convened a Civil Affairs and Psychological Operations Tiger Team (CAPOTT) to analyze your Civil Affairs and PSYOP "Way Ahead" concept. The **Team also analyzed** two additional concepts for points of comparison. The team consisted of members of the **Army Staff**, selected Army major commands, and **selected** outside agencies. *It* ensured all doctrinal, organizational, training, materiel, leadership, personnel, and facilities issues were reviewed and considered.
- 2. The Tiger Team determined civil affairs and psychological operations forces could best support the Army by remaining under the Army Special Operations Command (USASOC). The Army's Force Generation Model's emphasis on modularity will assure that this capability is realized as CA and PSYOP staff planners will be assigned down to the BCT UA level. The Tiger Team recommends that USASOC should redesign the current CA and PSYOP force structures for modularity and relook the AC/RC mix.
- 3. During the conduct of the Tiger Team review and assessment the following three concepts were **developed:**
- a. **Concept 1** USACAPOC, with all currently assigned forces, remains assigned to USASOC and transforms to support modularity.
- b. **Concept 2 –** HQ USACAPOC with all CA and PSYOP Forces reassigned to **JFCOM**.
- c. Concept 3 SOF supporting forces assigned to USASOC and conventional forces assigned to FORSCOM.
- 4. <u>Recommendation</u>: The CAPOTT endorses **Concept** 1 by utilizing the comparison criteria of Training/Readiness. Modularity. Flexibility, and Predictability. Recommend USASOC begin coordination with FORSCOM to **support** transformation and support modularity IAW Concept 1.

SUBJECT: Results of G-3 Directed Civil Affairs and Psychological Operations Tiger Team (CAPOTT)

5. Although this constitutes the closure of this Tiger Team, the members are available to assist in any capacity. We need to continue to build on the momentum gained thus far. Furthermore, USASOC's pursuit of branches for CA and PSYOP will help to increase professionalism, management, and availability of the officers in those branches.

MEMORANDUM FOR THE

From:

John J. Hamre

Date:

March 12,2004

Subject:

Developing a strategy concerning the rising demand for entitlement

benefits for reservists

First, let me thank you for the time you gave us yesterday to **go** through the "Beyond Goldwater Nichols" study. It is just the half-way mark in our work, but we felt this was the crucial foundation for what follows. You have brought the department to a remarkable position where change is possible. It is now feasible to take the next step that until now was not possible—genuine integration of key staff functions.

Phase 2 of the study will examine new combat missions, UCP changes, and the acquisition process, as well as continuing our work on the interagency process. In a separate but closely related effort, we'll be looking at the role of the Guard/Reserve components. It is this last item that I want to raise with you in this memo.

We have already started work on the Guard/Reserve issues. I have been startled, however, to see the momentum in Congress for a sweeping enlargement of pay and benefits for reservists due to the strains of current deployments. There is legitimate worry here, but a blind expansion of benefits will undermine the reserves as it will practically price them into the same cost structure of active-duty personnel. If that is the case, the general purpose of the reserves is significantly diminished.

I have met with staff directors on the Senate side, but they frankly don't have a plan to deal with the steamroller that is heading their way.

My sense is that everyone needs a firebreak to separate the passions of the current problems from a rational assessment of the role, structure and management of Guard/Reserve forces for the future. The traditional method of building a firebreak is to create a commission in order to buy time. This won't be enough this year. You need some commission-like process to get a dispassionate look at the role/structure/management issues, but you also have to create an escape valve for the political pressures of this year.

As I mentioned yesterday, I would propose that you request a 2-year authority to establish an "exceptional relief" process for active duty and reserve personnel who have suffered extraordinary hardship as a result of recent deployments. The authority would allow you to empanel a 5 (pick a number) person review board that would hear hardship cases. This board would have the authority to grant no-interest loans to military personnel. The board's decisions would be final, though Congress would retain the authority to pass private relief legislation (a very rare event).

This gives members of Congress something to act on without locking the Department into a long-term entitlement, or giving benefits to 100% of the population to solve a problem that plagues only 1% of the community.

- — Ideally this initiative would come from the Joint Chiefs as a relief measure for the total force, allowing you to work with members of congress to guide it towards being the dominant policy path to head off the steamroller of benefits enlargement. I know that we spoke yesterday about the idea possibly originating on the Hill. I am happy to help here, as well, but I honestly feel that it has gotten so far down the road that it will take the collective authority of the Chiefs to get attention to it.

The purpose of creating a firebreak is to create a new mindset about a problem. That is why you do need to accompany this with some kind of a commission.

I am prepared to build a commission to look at the Guard/Reserve issues. You can use **us** if you want, or create something yourself. If you want **CSIS** to **do** something here, I am happy to talk. One way or the other we will press ahead to examine the Guard/Reserve issues at the staff expert level.

We have examined the plans that the reserve components have launched under your direction already, and there are some exciting new ideas in the works.

Please let me know how I can help. And, thank you again for the chance to brief you yesterday.

END

UNDER SECRETARY OF DEFENSE

4000 DEFENSE PENTAGON WASHINGTON, D.C.20301-4000

INFO MEMO

September 13, 2004 - 9:00 AM ...

FOR:

SECRETARY OF DEFENSE

FROM:

DR. DAVID S. C. CHU, USD(P&R)

SUBJECT: John Hamre Proposal - SNOWFLAKE

• You asked where we stand on John Hamre's proposal (attached).

- We have met with John and his staff to discuss the roles and missions of the Reserve components and how we might shape future compensation and benefits.
- The Small Business Administration already has a program that provides some
 of the relief John proposes. The first loan under this new program was granted
 just months after the September 11th attacks, and to date the SBA has granted
 186 loans totaling \$16,144,400.
- While we were not successful in getting John's proposal considered this year (it requires legislation), the Senate authorization bill includes a provision that would establish a 13-member commission to assess the roles and missions of the National Guard and Reserve, and compensation and benefits provided to reservists. It would take up this idea.
- In the meantime, the President has proposed expanding educational benefits for mobilized Reservists, and you have approved added compensation and incentives for those who serve more than one year in Iraq and Afghanistan. Additional bonus authority for the Reserves, sponsored by the Administration is in the House Authorization Bill, and the conference must also adjudicate the vast difference between the Senate position on Reserve health benefits and that of the House (which follows the Administration's recommendations).
- The DoD Advisory Committee on Military Compensation is scheduled to begin work in October to review the long-term appropriateness of our pay and benefits structure. It is a good place to assess the net effect of all these changes, and will be able to consider the results of research we're now conducting on actual income loss by Reservists.

Detainee Treatment: Forward Momentum of DoD Implement

8 September 2004

11-L-0559/OSD/26557

Moving Forward on Abu Ghraib and Detainee Operations

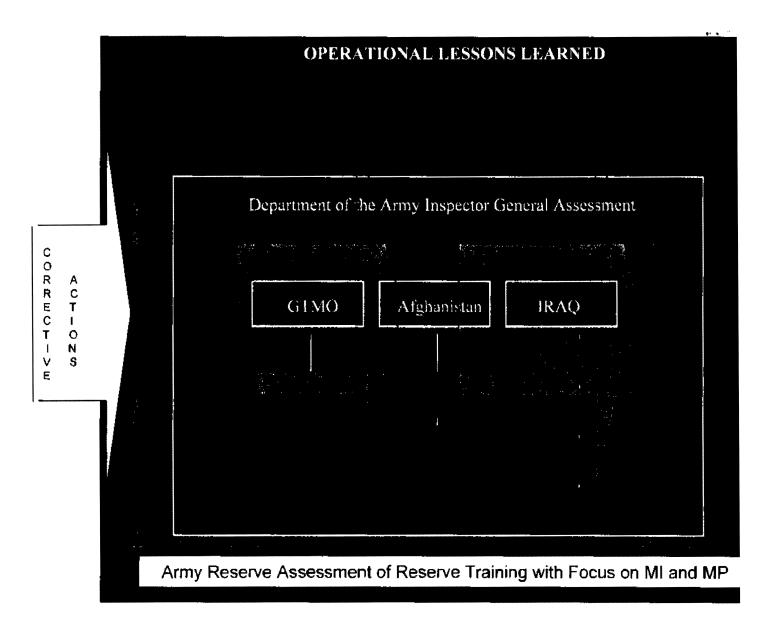

- The Department of Defense has aggressively investigated issues associated with detainee abuse and is committed to addressing shortcomings and improving detainee operations.
- We began the process of assessing detainee operations and implementing change before the abuses at Abu Ghraib were reported. Changes and improvements have been implemented when appropriate, without waiting for the results of investigations.
- As we continue to improve operations, the Department now has, or will soon have, insight and recommendations gained from 11 major investigations and assessments
 - Many of the proposed fixes are already completed or underway
 - We continue to consolidate and address the conclusions from the various assessments

The Department is taking a top-to-bottom approach

 Improvements are occurring simultaneously in OSD, the Joint Staff, the Military Departments, and the Combatant Commands

Improvements are already underway across the spectrum of Policy, Doctrine, Organization, Training, Materiel, Leadership, Personnel and Facilities

Detainee Operations: Forward Momentum of DoD Implem

11-L-0559/OSD/26559

OSD Actions

- Established Deputy Assistant Secretary of Defense for Detainee Affairs (DASD-DA) office
- Established a Joint Detainee Coordinating Committee on Detainee Affairs chaired by DASD-DA
- Issued policy "Handling of Reports from the International Committee of the Red Cross"
- Issued policy "Procedures for Investigations into the Death of Detainees in the Custody of the Armed Forces of the U.S."
- Initiated a department-wide review of detainee-related policy directives

OSD is organized to integrate fixes with USG and DoD policy, and to streamline the flow of information throughout the Department

Joint Staff Actions

- Created Joint Staff Detainee Affairs Division to address worldwide detainee operations
- Drafted Multi-Service Tactics, Techniques & Procedures on Detainee Operations by the Λir, Land, & Sea Applications Center
- Expediting publication of Joint Doctrine for Detainee Operations (JointPublication 3-63)
- Including Joint Interrogation Operations in "Joint and National, Intelligence Support to Military Operations" (Joint Publication 2-01)
- Added Detainee Operations to "Joint Training Policy and Guidance for the Armed Forces of the United States." (Chairman, Joint Chiefs of Staff Instruction 3500.01C)

Joint Doctrine for detainee operations and interrogations is already being developed

U.S. Army Actions

- Initiated Army assessments of detainee operations in summer of 2003 at the request of the Combatant Commanders
- Reviewed findings & recommendations from 3 Army assessments, two investigations, and 2 DoD reviews
 - Completed more than 950 interviews, compiling more than 10,000 pages
 - Gained combat experience of more than 300,000 soldiers
- Revising Army regulations on detainee operations
- Developing clearer lines of responsibility between Military Police and Military Intelligence

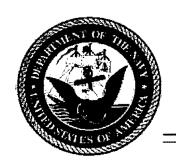

The Army is improving its practices based on lessons learned

U.S. Army Actions

- Established Provost Marshal General in September 2003
 - Army executive agent for detainee operations
- Developed detainee operations integration plan -- prioritized plan addressing policy, doctrine, organization, training, materiel, leadership, personnel, and fachties
- Synchronized Army with joint policy and doctrine
- Established Detainee Operations Oversight Council
- Providing training and augmentation for detainee operations
 - Sending corrections specialists, lawyers, interrogators, médical personnel
- Making technical assistance visits
- Improving detention fachties

Army is adapting to support the warfighter

Navy/Marine Corps Actions

Navy:

- DepSecDef established the Administrative Review Process
 - Gordon England (SECNAV) appointed Designated Civilian Official
 - Established Office for the Administrative Review of the Detention of Enemy Combatants
- DepSecDef established the Combatant Status Review Tribunal

Marine Corps:

- Coordinating with Army on enemy detention and interment operations , regarding doctrine development, training, and other pertinent issues.
- Deployed corrections specialists to Iraq and GTMO to provide oversight, training, inspection, and operational support for all detainee
- Continues to provide pre-deployment training (in conjunction with the Army) on detainee operations and the Geneva Conventions.

Navy and Marine Corps are contributing to improved processes.

Central Command Actions

- Assigned general officer to be responsible for all detention and interrogation operations, Deputy Commanding General – Detainee Operations, to Multinational Force – Iraq
- Require all lapses of accountability, escapes and disturbances to be reported to the Deputy Commanding General – Detainee Operations and Commander Multinational Force – Iraq
- Protecting coalition forces and detainees through improved force protection
- Upgrading facilities for soldiers and detainees
- Issued interrogation policies reiterating application of Geneva Conventions and requiring all interrogations be conducted in lawfully and humanely

CENTCOM has reorganized for improved management; its facilities are safer for U.S. personnel and detainees

Central Command Actions

- Accelerated review process for detainee case files for release or continued internment decisions
- Using biometric automated tool set for all detainee transfers to improve accountability
- Mandated and conducted training down to the individual level on CENTCOM policy "Proper Conduct During Combat Operations". This policy memorandum provides guidance and requires training on:
 - following the law of war and rules of engagement
 - treating all persons with humanity, dignity and respect
 - using judgment and discretion in detaining civilians
 - respecting private property

CENTCOM has improved detainee accountability and processing; its policy is distributed widely and is enforced.

Southern Command Actions

- Reviewing compliance with Standard Operating Procedures on a periodic basis
 - o Secretary of the Navy Inspector General team inspection (May 04) no deficiencies noted
 - o Established Joint Task Force Internal Standarduation Team
 - o Dedicated a Field Grade officer to ensure all Standard Operating Procedures are followed
 - o Inspecting 4 specific areas weekly, 15 other areas inspected monthly
- Hosting American Corrections Association visit with Detention Operations Group to compare procedures in use at U.S. detention facilities
- Video Recording all Forced Cell Extractions
 - o Reviewing every tape for compliance with proper procedure
 - o Keeping historical archives of all videos.
- Reviewing Standard Operating Procedures and processes to ensure adequate leader supervision
 - o Require Commander Joint Detainee Operations Group (Colonel) approval for detainee movement and body searches
 - o Require Commander Joint Task Force (General Officer) approval for segregation over 30 days

SOUTHCOM is verifying compliance with Standard Operating Procedures.

11

Improvements across all components and across the breadth of recommendations

Examples:

Policy

- ICRC Reporting
- Autopsies

Doctrine

- -Joint Detainee Ops
- Army MI/MP relationship
- Army Detainee Ops

Organization

- DASD-DA
- -Joint Detainee Coord Cmte
- JS Detainee Ops Div

Training

- Army MP/MI
- Marine Corps CorrectionSpecialists

Leadership

- Deputy Cdr for Detention Ops -Iraq

Personnel

- MI/MP Force Structure Reviews

Facilities

- Improvements in detention facilities

Holding Personnel Accountable

- General Officer suspended from command
- Investigated over 250 allegations of abuse
 - Army referrals to date: 45 Courts-Martial, numerous Article 15s and General Officer Letters of Reprimand (GOMOR)
 - Administratively separated 13 Soldiers from Army
 - Closed 120 of 225 cases.
 - 12 Marines have been Court-Martialed
 - A number of other Courts-Martial are pending
 - Article 32 investigation of 4 U.S. Navy members of Special Warfare Command
 - Information provided to Department of Justice for investigation of contractors
 - Numerous unit-level Article 15 Non-Judicial Punishment actions underway for Army and Marine Corps (not normally reported outside command channels.

Summary

Improvements are already underway across the spectrum of Policy, Doctrine, Organization, Training, Materiel, Leadership, Personnel and Facilities

OSD is organized to integrate fixes with USG and DoD policy, and to streamline the flow of information throughout the Department

Joint Doctrine for detainee operations and interrogations is already being developed

The Army is improving its practices based on lessons learned

The Army is adapting to support the warfighter

Navy and Marine Corps are contributing to improved processes

CENTCOM has reorganized for improved management; its facilities are safer for Soldiers and detainees

CENTCOM has improved detainee accountability and processing; its policy is distributed widely and enforced

SUBJECT: QDR

As we move forward toward the QDR, we should ensure that we look at several key issues. In particular, we should examine how we can create longer tour lengths so people learn their jobs. Equally important, we must focus on creating Standing Joint Task Forces and headquarters. Additionally, this QDR should look at DoD roles in homeland security, intelligence, counter-terrorism and tracking individuals, force sizing constructs, space investment, medical benefits, and global force posture. This is not an all-inclusive list, but should be helpful as we start this process.

Also, think through how we can take advantage of the good thinking available at the Defense Science Board, Defense Policy Board, and Defense Business Board.

The SLRG process should be valuable as we move forward on this QDR. Please come back to me soon with a lay-down of the dates and sessions for the process.

November 3, 2004, 9:11 AM

FOR: SECRETARY OF DEFENSE

FROM: David S.C. Chu, USD (P&R)

SUBJECT: History of the Combat Zone Tax Exclusion—SNOWFLAKE (attached)

- Prior to the Korean conflict, income tax benefits for members of the Armed Forces were part of individual revenue acts passed to finance war efforts, and the exclusion was not dependent on combat zone designation.
- Beginning with the Korean conflict, the law excluded military compensation earned in a combat zone.
 - o The Internal Revenue Code exclusion is generally triggered by the President establishing a combat zone by Executive Order, not by Congressional action.
 - Presidents have designated five combat zones: Korea, Vietnam, Arabian Peninsula, Kosovo, and Afghanistan. Korea and Vietnam have been terminated.
 - o Treasury regulations allow the Secretary, or his delegate, to extend combat zone tax benefits to members serving outside of but in "direct support" of the combat zone.
- Congress acted only twice to extend combat zone tax benefits to members by establishing in law Qualified Hazardous Duty Areas: the Former Yugoslavia (1995) and Kosovo (1999).
 - o Both of these bills originated in the House Ways and Means Committee.

SUBJECT:

Tour Lengths

Please send me the data we discussed on the tour lengths for our senior people as soon as you can.

Also, I want to see some specific suggestions for how we can lengthen tours at all levels in our military quickly. What are the mechanisms by which we will actually put this idea in place?

At a minimum, it seems to me that this idea should be embedded in the QDR and all upcoming guidance to the Services.

I am sure there are policy documents, instructions, and other mechanisms – such as operational "fleet up" concepts for Commanders – that can quickly move us in the direction of having people stay in a job long enough to really learn what they are doing and maximize their contributions.

MEMORANDUM FOR SECRETARY OF DEFENSE

From: Ryan Henry, Principal Deputy Under Secretary of Defense for Policy

Subject: DoD Directives

- You directed that Policy update 100% of its assigned DoD Directives by the end of this year and, if that is not possible, to respond to you.
- I met with Director Administration and Management's (DA&M) staff on 15 July to
 devise a work plan to manage Policy's directives workload that was compatible with
 ensuring policy-setting support to you.
 - o Of Policy's 66 assigned directives, 11 were current, 53 needed to be revised and 2 to cancel. Of the 53 directives to revise, 5 were in DoD coordination at the time.
 - o To accelerate our revision effort while sustaining policy-setting support to you, we committed with DA&M to produce one directive per month for each of my 5 components.
 - o The process began in August and we propose to complete it in June 2005.
- Status now is 7 revisions in DoD coordination and 1 signed into effect.

Recommendation: That we continue with our work plan to produce 5 revisions a month to complete effort in June 2005.

MEMORANDUM FOR SECRETARY OF DEFENSE

FROM: Raymond J DuRois Director Administration and Management

SUBJECT: DoD Directives Review status Report

In response to your attached September 7 snowflake requesting the status of the DoD Directives review, the chart at Tab A shows our status as of September 3.

- At the outset of the Directives review effort, 654 directives were reviewed for currency, and a total of 396 were identified for revision or cancellation (327 for revision and 69 for cancellation).
 - To date, 193 have been submitted far formal coordination, and 70 (revisions and cancellations) have been signed by the DepSec.
 - Many of the remaining 133 Directives are under internal review within their own components.
 - As the attached status chart indicates, two components (Policy and Intelligence) are lagging behind the others in completing their submissions for formal coordination. My staff is working with these components to help expedite the work they have in progress.
- On July 12, I forwarded you the report at Tab B reflecting our progress.
 During a meeting on September 7, you noted this report and a question about its accuracy was raised. We reviewed the data and determined that the July 12 report was indeed accurate.

RESPONSE TO SNOWFLAKE FOR THE SECRETARY OF DEFENSE

As of October 7,2004, 11:45

DEPSEC

FROM: Michael W. Wynne, Acting Under Secretary of Defend (AT&L)

- In the attached snowflake, you asked me to let you know if we were not going to complete our review of ow DoD Directives (DoDD).
- Barring any coordination delay from other components, I expect to complete the review of all but one of the 111 directives originally belonging to my office.
- DoDD 4100.15, "Commercial Activities Program" will not be completed because both the Senate and House versions of the FY05 Transportation/ Treasury Appropriations bill prohibit the implementation of a revised OMB Circular A-76, which this directive implements for the Department. Updating it is on hold until this prohibition is resolved.

INFO MEMO

SEP 1 6 2004

FOR SECRETARY OF DEFENSE FROM: William Winkenwerder, Jr., MD, ASD (Health Affairs)

SUBJECT: Electronic Health Records

- You requested information regarding electronic health records. (TAB B)
- To answer your question, our heads are very much into the issues raised by Gingrich. I meet periodically with him and his staff to exchange ideas on electronic health records and health information technology. We have provided him demonstrations on the military electronic health record, as well as a number of other advanced technologies in use today within the Department of Defense.
- I admit to some bias, but based on my experience in the private sector, the Military Health System is pursuing information technology and its application to all phases of our business far more aggressively than the vast majority of private sector health organizations and companies. (See TAB A)

INFORMATION PAPER

DoD Health Transformation through Information Technology

The DoD is a leader in the use of health information technologies to improve health care access, quality, population health management and force health protection.

I have met with Mr. Gingrich on a periodic basis to exchange ideas on the electronic health record and health information technologies in general. My staff has shown Mr. Gingrich and his staff the military electronic health record and a number of advanced technologies in use today within DoD. Health information technologies are being used to facilitate DoD's health and business transformation include:

- Composite Health Care System Provides an electronic health record at all military treatment facilities that includes laboratory, pharmacy and radiology computerized physician order entry and results retrieval, registration, appointing and scheduling, and documentation of the patient encounter capabilities.
- TRICARE Online Provides health care benefits information, health and wellness
 information, a secure personal health journal and online appointing capabilities at
 over 300 military treatment facilities.
- Telehealth Provides interactive consultations in radiology, mental health, dermatology, pathology and dental care between remote locations and medical referral centers.
- Military Health System Data Repository A centralized data warehouse containing
 patient encounter information from military treatment facilities and private sector
 providers, financial data, demographics and other data. It is used in our strategic
 planning, performance monitoring, population health management and business
 management.
- Pharmacy Data Transaction System A centralized data repository of all prescriptions processed for DoD beneficiaries, whether obtained in military treatment facilities, 50,000 retail pharmacies across the U.S., or through our mail order system. The system processes over 411,000 prescription transactions per day. It gives DoD amazing capability to know what is happening with all pharmaceutical services (over \$5B per year), and helps prevent tens of thousands of adverse drug reactions every year for our beneficiaries.
- Joint Medical Asset Repository A web-based system that provides comprehensive information on the location, movement, status and quantity of medical equipment, supplies, pharmaceuticals and units of blood in the Military Health System.

- Defense Medical Logistics Standard Support This system combines business process re-engineering with leading edge technologies to provide state-of-the-art capabilities supporting DoD medical logistics, electronic commerce and commercial best practices.
- Computer/Electronic Accommodations Program Provides assistive technology and accommodations for DoD and other Federal employees with disabilities. It is available to employees, patients and family members, Pentagon survivors and wounded soldiers with visual, hearing, dexterity and cognitive disabilities.

Key to transforming health care is an enterprise architecture; data, security, communication and interoperable standards; and implementation of a robust computing and communication infrastructure. The Military Health System enterprise architecture is aligned with the DoD Business Enterprise Architecture and Federal Health Architecture. DoD is a leader in the Consolidated Health Informatics initiative to develop and adopt common health standards for all Federal agencies.

I fully support the President's Management Agenda on health care reform. DoD assisted the Department of Health and Human Services (Office of the National Coordinator for Health Information Technology) in developing national strategies for transforming health care through the use of technologies such as the electronic health record. DoD, in response to a Presidential Executive Order, recommended approaches for providing affordable health information technologies to rural and medically underserved communities. DoD will continue to collaborate and share technology products, outcomes, benefits and lessons learned with HHS, other Federal agencies, and the private sector.

Subject: electronic health records and tricare-the aarp example-newt

for secdef, depsecdef from newt 3/20/04

transforming tricare for greater member satisfaction and better health and lower cost (the trifecta of health transformation)

everything being described for an electronic health record below could apply even more to the military and military retirees and we could have an electronic health record up and running for the members to use aas well as their doctors and hospitals by September one of this year

aarp is very excited about rolling out an electornic health record by January for the 2.2 million 65 year olds who will be getting the new Medicare benchmark physical exams in 2005.

building further on friday's lunch conversation

so we can explain why an electronic health record would be truly empowering for the new medicare benchmark physical:

it would be really helpful if aarp might have or develop the following data:

the new 65 year olds are different from their parents (remember your magazine cover with the model-60 is 30,a little much. I think it is 45 and I am 60)

- 1. how many more years will the average 65 in 2005 probably live and how long will the longest probably live
- 2. how many of the 2.2 million will probably reach 80 and how many will probably reach 90 and the same for 100 (this lets us know that in 2020, 2030, and 2040 we will have this many people still using their electronic health records compared to the

3/20 2004

frequency of paper records being lost, copied, fedexed etc.)

3. how often will this generation of 65 year olds travel each year, how many will go out of state, how many will go out of country

this explains why accessing your records from anywhere on the net is so important

how many will actually move out of state to live somewhere else than where they are now

how many have children or grandchildren who live out of state

this kind of data would enable us to build an overwhelming case for starting in January wiuth an elecytronic health record as a matter of convenience and safety for the health of "the new 65 year olds"

if you put all this together it might make a great article for the magazine along with a story about what England is actually doing (I met last night with the people from IDX who are partnering in two of the five English electronic health record regions and they were very very encouraging), you could also tie it into explaining your website development at aarp

thanks for helping with this newt

The Center for Health Transformation Vision Statement

The Centerfor Health Transformation i.r dedicated to creating a 21st Century Intelligent Health System in which knowledge saws lives and saves moneyfor every American.

Years 2004-2030

Years 1903-2003

This explosion of knowledge is moved from laboratory to market by a venture capital-licensing-royalty system of unprecedented power and ability. The potential for production is being radically expanded by the rise of China and India as the lowest cost producers on the planet.

Zones of Transformation

This scale of change will require America to undergo profound transformations if we want our children and grandchildren to live in the most productive economy in the world creating the highest value-addedjobs and the greatest wealth, especially for retirees.

We will have to transform:

- I. National security
- 2. Math and science education
- 3. Health and healthcare
- 4. From bureaucratic public administration to entrepreneurial public management
- 5. Tax code
- 6. Litigation system

For more on this go to www.healthtransformation.net/.

It will be the natural pattern for the system to revert to the traditional behavior unless leadership consistently reorients it to the new transformational model and sets metrics of achievement which only a transformation could achieve.

When faced with change on this scale, leadership has to learn not to say "No, because." but practice saying "Yes, if."

In health we not only have to transform Forthe future but we have to transform to catch up with the last thirty years. Look for example at ATM's, self-service gas stations with credit cards. Travelocity, e-tickets and cell phones.

Four Key Drivers of Health Transformation will be:

- Patient safety and patient outcomes
- Information and communication technology
- A system and culture of quality
- Individual knowledge, responsibility and power to choose

The Center for Health Transformation's 2004 Key Strategies for Transforming Health

- I. Create information-rich health savings accounts to both incentivize and empower the individual.
- 2. Create secure electronic health records with expert systems to maximize minimize errors, reduce inefficiencies and improve
- 3. Develop a new system of health
- 4. Create a **buyers**' market for pharmaceuticals by building a transparent system for individuals, doctors, and pharmacists of price and efficacy information about prescription drugs and medically appropriate over-the-counter drugs. The system would have an open formulary with **an** "after-pay" rather than a co-pay (a "Travelocity" for drug purchasing).
- 5. Create a system and culture of rapid adoption of solutions that result in better outcomes at lower cost for both the public and private sector.
- 6. Establish an intellectually credible, accurate system for capturing the cost and benefits of better solutions, better technologies and better outcomes in order to create a technically correct model of return on investment for solutions resulting in better outcomes at lower cost.
- Develop a real-time continuous research database and discover-develop-deliver ability (turning cancer into a chronic disease by 2015 and eliminating preventable complications from diabetes by 2015).
- 8. Knit together these electronic systems into a virtual public health network for health protection against natural outbreaks and a bioshjeld against deliberate biological attack.
- 9. By implementing the first eight strategies, turn health and healthcare from a problem into an opportunity, making it the leading creator of high-value jobs and foreign exchange eaming in American society (including as a first step the creation of ar, undersecretary of commerce for health).

For more information on transforming health and healthcare in America vist our web site at www.healthtransformation.net
