7. LENGTH OF OBSERVATION 5-8 sec.	8. NUMBER OF OBJECTS 1	9. COURSE WNW    ESE
10. BRIEF SUMMARY OF SIGHTING Silver objt similar to Car 8 or very fast a/c appeared in 8 o'clock position to a/c heading 133° T. Flight was toward a/c. 2 Looked like small delta wing fighter. When objt reached 3 o'clock position looked like sidewinder missile except that 1/3 of objt was a dark colored snout. At 3 o'clock position to 5 o'clock the pilot got impression that objt changed appearance to a dart target. No visible sight of propulsion. Speed estimated Mach 2. Initial observation caused by sun flashing on objt. Flight straight and level. No change in altitude.		11. COMMENTS Missile ruled out, if sidewinder or other type of radar controlled or heat seeking missile it was near enough to a/c to alter its course for hit. Pilots familiarity with a/c rules this out, and he should have knowledge of drone configurations in use. Quite possible that objt was a dart type target. However this should have been checked out at base submitting report. No conclusion reached and case is listed as Unidentified.
