As the National Library of Medicine (NLM) implements its Strategic Plan, 2017-2027, it is making organizational changes that include the closure of the Specialized Information Services (SIS) division, effective June 30, 2019, and the transition of many SIS programs into other parts of NLM. This integration serves to not only improve discoverability of and access to SIS resources by NLM's broad set of users, but also enables NLM to leverage its talents and resources to improve overall efficiency and effectiveness.

Over the next few months, many SIS resources and programs will transition to other parts of NLM, while some underutilized resources will be integrated into other NLM resources, made accessible on partner sites, or discontinued. We will provide notice of these changes as they are made.

Questions about this transition and individual resources can be directed to custserv@nlm.nih.gov or 1-888-346-3656.
