Admiral,

Just a quick follow-up: The existence/ mission of UAP TF appears to be in the New York Times this morning.

(b) (6),

Right now I don't have anything locked in for those weeks. I am usually in the office between 0500 – 1400 or so and flexible but definitely prefer earlier engagements if we can pull it off. I will do whatever is needed for the opportunity to discuss this with him. (b) (6) has full access to my calendar.

Classification Redacted

Interagency Task Force (ITF)

This overall classification
of this briefing is:

Classification Redacted

(b) (6)

Director, ITF

Naval Intelligence Activity

Office of the Deputy Director of Naval Intelligence

Office of the Deputy Chief of Naval Operations for Information Warfare

Interagency Task Force

- 2020 NDAA directed that Naval Intelligence lead an Interagency Task Force (ITF) to “collect, exploit, and analyze operational and scientific and technical data of unidentified aerial phenomenon (UAP)”
- UAP: Any aerial phenomenon that cannot immediately be identified.
- UAPs reported within the United States and around the world.
 - Safety of Flight
 - National Security (b) (1)
- Effort: Standardize and “De-Stigmatize” Reporting (b) (1)

- We use reporting from operator interactions to cue various other advanced means of tracking and analysis.
- The ITF uses a combination of subject matter expertise and specialized tools to identify, collect, investigate, and report on these contacts.
- The results of the data are used to (b) (1) inform other U.S. Government partners and develop concepts for addressing the problem.

Stigmas Associated with reporting UAP

- Don't want to be the “UFO” or “Tin Foil Hat” Guy
- (b) (1)
- Don't want to lose training

Reported Sightings of UAP (b) (1)

(b) (1)

“Tic Tac” Case 14 Nov 2004

- Nimitz CSG (CSG-11)
 - USS Princeton (CG-59)
 - VAW-117 (E-2C Hawkeye)
 - VMFA-232
 - VFA-41
 - USS Louisville (SSN-724)
- 30 Nautical Miles off the Coast of Mexico (south west of San Diego)
- It was “solid white, smooth, with no edges. It was “uniformly colored with no nacelles, pylons, or wings.” It was approximately 46 feet in length.
- Pilots reported the incident through Intelligence Personnel, there was a large amount of harassment and ridicule throughout the Nimitz.
- Reporting terminated at 3rd Fleet, there was no process to share the reporting.
- Although the debriefs of aircrew and other personnel within the Strike Group validated the event, there was very limited data to support technical analysis.

Pilot Reporting (b) (1)

Aircrew see the UAP, in this case they photographed the UAP...

(b) (1)

(b) (1)

Classification Redacted

UAS Observation

(b) (1)

(b) (1) observed a possible UAS, spherical in shape moving towards the surface of the water and then disappearing. (b) (1) assessed the object had sunk. Attempts to search the water for wreckage were ineffective.

Current Assessment

The ITF has collected (b)(1) reports dated from the last (b)(1) years that describe encounters with UAP. More than half have been detected via multiple sensors.

Potential Explanations:

1. (b)(1)
2. Unknown Weather or other Natural Phenomena
3. (b)(5)
